Review of WIC Food Packages National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Food and Nutrition Board, Committee to Review WIC Food Packages, 2017-06-25 The Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) began 40 years ago as a pilot program and has since grown to serve over 8 million pregnant women, and mothers of and their infants and young children. Today the program serves more than a quarter of the pregnant women and half of the infants in the United States, at an annual cost of about \$6.2 billion. Through its contribution to the nutritional needs of pregnant, breastfeeding, and post-partum women; infants; and children under 5 years of age; this federally supported nutrition assistance program is integral to meeting national nutrition policy goals for a significant portion of the U.S. population. To assure the continued success of the WIC, Congress mandated that the Food and Nutrition Service of the U.S. Department of Agriculture (USDA) reevaluate the program's food packages every 10 years. In 2014, the USDA asked the Institute of Medicine to undertake this reevaluation to ensure continued alignment with the goals of the Dietary Guidelines for Americans. In this third report, the committee provides its final analyses, recommendations, and the supporting rationale.

Review of WIC Food Packages National Academies of Sciences, Engineering, and Medicine, Institute of Medicine, Food and Nutrition Board, Committee to Review WIC Food Packages, 2016-08-06 The Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) began 40 years ago as a pilot program and has since grown to serve over 8 million pregnant women, and mothers of and their infants and young children. Today the program serves more than a quarter of the pregnant women and half of the infants in the United States, at an annual cost of

about \$6.2 billion. Through its contribution to the nutritional needs of pregnant, breastfeeding, and post-partum women; infants; and children under 5 years of age; this federally supported nutrition assistance program is integral to meeting national nutrition policy goals for a significant portion of the U.S. population. To assure the continued success of the WIC, Congress mandated that the Food and Nutrition Service of the U.S. Department of Agriculture (USDA) reevaluate the program's food packages every 10 years. In 2014, the USDA asked the Institute of Medicine to undertake this reevaluation to ensure continued alignment with the goals of the Dietary Guidelines for Americans. This, the second report of this series, provides a summary of the work of phase I of the study, and serves as the analytical underpinning for phase II in which the committee will report its final conclusions and recommendations.

Review of WIC Food Packages Institute of Medicine, Food and Nutrition Board, Committee to Review WIC Food Packages, 2015-05-20 Review of WIC Food Packages: An Evaluation of White Potatoes in the Cash Value Voucher assesses the impact of 2009 regulation to allow the purchase of vegetables and fruits, excluding white potatoes, with a cash value voucher on food and nutrient intakes of the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) population and to consider whether white potatoes should be permitted for purchase with the voucher. This report considers the effects on diet quality, the health and cultural needs of the WIC population, and allows for effective and efficient administration nationwide in a cost-effective manner. Review of WIC Food Packages: An Evaluation of White Potatoes in the Cash Value Voucher recommends that the U.S. Department of Agriculture should allow white potatoes as a WIC-eligible vegetable, in forms currently permitted for other vegetables, in the cash value voucher pending changes to starchy vegetable intake recommendations in the 2015 Dietary Guidelines for Americans.

Aircraft Carriers Paul E. Fontenoy, 2006-09-21 This vivid volume describes the fascinating history of aircraft carriers, first deployed successfully in World War I by the Imperial Russian Navy, and indispensable to the Allied victory in World War II, now the strategic centerpiece of the world's most powerful navies. From their World War I deployment in the Black Sea by the Imperial Russian Navy, to their coming of age in World War II, to their role in recent conflicts in Vietnam, the Falklands, and the Persian Gulf, *Aircraft Carriers: An Illustrated History of Their Impact* charts the evolution of carrier systems both militarily and within broader political and diplomatic contexts. Covering both the ships and the planes they support, this convenient, authoritative handbook offers complete descriptions of carrier systems from all of the world's major navies—from their operational histories, strategic integration, and technological advancements, to the training of aircrew, the development of carrier command leadership, and the role of carriers as deterrents and diplomatic enforcers.

Pig Health John Carr, Shih-Ping Chen, Joseph F. Connor, Roy Kirkwood, Joaquim Segalés, 2018-04-17 Maintaining the health of pigs is vital in pig farming and production. This new book written by experts from around the world focuses on the health of pigs, first with coverage of the disorders of pigs organised by clinical sign and body system. The book explores environmental medicine and then health maintenance. Treatment options are discussed, emphasizing a reduction in antimicrobial use and an increased awareness of a holistic approach to treatment. The book includes over 1,500 high-quality illustrations to enhance the clinical description, as well as a wealth of high-quality videos to test the reader in making differential diagnoses with treatment options. Quizzes at the end of each section also encourage reflective learning. International experts from the UK, USA, Australia, Spain and Taiwan cover clinical examination of the individual pig and groups along with

environmental medicine, making this the ideal reference for veterinary practitioners and students. Those interested in population medicine (poultry, aquaculture, cattle and small ruminant and apiaries) will particularly enjoy the holistic approach to veterinary medicine. All those who appreciate the many talents of pigs will enjoy the practical approach to managing the health of their animals. This book moves veterinary science forward, promoting health rather than treating disease. It will be your number one reference for keeping your pigs healthy.

A Buck Danny Adventure Francis Bergèse, De Douhet, 2010-02 The end of the Cold War - supposedly the era of glasnost and perestroika - has torn the Soviet Union apart at the seams. Buck Danny is sent as an observer and adviser to help the Russian army deal with its arsenal of nuclear weapons. But old communist habits die hard, and some of the Red Army hardliners have other plans.

Aircraft Carriers Norman Polmar, 2008-01-31 In the post-1945 era, the aircraft carrier has remained a valued weapon despite the development of nuclear weapons, cruise and ballistic missiles, and highly capable submarines. At times, as in the early days of the Korean and Vietnam Wars and in the Falklands conflict, carriers alone could deploy high-performance aircraft to the battlefield. In other operations, such as enforcing the no-fly zones and the U.S. invasions of Afghanistan and Iraq, only carriers could provide the bases needed for sustained combat and support operations. This second volume of Norman Polmar's landmark study details the role of carriers in the unification of the U.S. armed forces and strategic deterrence, fiscally constrained Great Britain, the development of British Commonwealth and ex-colonial navies, and the efforts of France and the Netherlands to rebuild their fleets. The role of the modern carrier-nine nations currently possess them-is discussed, as are the issues confronting nations that might acquire them. Chapters on the Soviet Union's effort to produce carriers are included for the first time. The

development of both carrier planes and the many oddball aircraft that have flown from carriers-such as the U-2 spy plane-are also examined. Appendixes include comprehensive data on all carriers built and converted through 2006. This volume is a valuable companion to the critically acclaimed Volume I, which covers aircraft carrier development and operations from 1909 to 1945.

Infant and Child Feeding Jenny T. Bond,1981 Abstract: Infant and child feeding represents an important application of nutrition science. Nutrition knowledge basic to meeting the nutrient needs of infancy and childhood is presented with emphasis on the many environmental factors which affect nutrition. Following an historical perspective of infant feeding, information is given on lactation, breastfeeding, and human milk. The relationship between nutritional quality of infant foods and child development is examined. The question of whether infants and children in developed countries are well nourished is addressed. Infant and child feeding practices, and nutrient requirements of pregnant women, lactating mothers, infants, and young children are described. Current issues are explored, including sodium intake, dental caries, obesity, iron nutriture, fluoride, taste preference, and the diet-heart hypothesis. Future trends, research, and development in infant nutrition are also discussed. (nzm).
