Tourism and Heritage Attractions Richard C. Prentice,1993 Cultural and historical attractions are principal factors generating tourism trips and this has spurred the growth of a large heritage industry. However, the character and behaviour of heritage tourists and their social and economic impact on their destinations is as yet little understood. Richard Prentice presents a detailed analysis of heritage tourism by examining the way the benefits gained from visits to attractions are consumed. This exploration into the nature of the heritage 'product' calls into question the terminology used to define this aspect of the tourism industry, and Richard Prentice argues that it is all too easily regarded as a homogenous industry when in fact it covers diverse attractions which serve diverse tourism and leisure markets. A more sensitive approach to such questions as the promotion of these attractions, their retailing role, their sustainability and their educational impact is needed within the industry. The author shows that the demands of tourists, their socio-economic background and the decision-making processes involved all have implications for the management and marketing of tourism. He analyses the benefits that tourists seek when visiting heritage attractions and measures their reactions to the presentation of such sites, asking how informed tourists are and what sort of promotion they respond to. By setting up a model of the heritage user, he attempts to identify key features which should influence tourist operators seeking to understand the behaviour of their tourist visitor and respond effectively.

The Cambridge Handbook of Group Interaction Analysis Elisabeth Brauner,Margarete Boos,Michaela Kolbe,2018-08-02 This Handbook provides a compendium of research methods that are essential for studying interaction and communication across the behavioral sciences. Focusing on coding of verbal and nonverbal behavior and interaction, the Handbook is organized into five parts. Part I provides an introduction and historic overview of the field. Part II presents areas in which interaction analysis is used, such as relationship research, group research, and nonverbal research. Part III focuses on development, validation, and concrete application of interaction coding schemes. Part IV presents relevant data analysis methods and statistics. Part V contains systematic descriptions of established and novel coding schemes, which allows quick comparison across instruments. Researchers can apply this methodology to their own interaction data and learn how to evaluate and select coding schemes and conduct interaction analysis. This is an essential reference for all who study communication in teams and groups.

Cultural Resource Laws and Practice Thomas F. King,2013 In this fourth edition of the CRM classic, Thomas F. King shares his expertise in dealing with laws regulating the use of cultural resources. With wry insight, he explains the various federal, state, and local laws governing the protection of resources, how they have been interpreted, how they operate in practice, and even how they are sometimes in contradiction with each other. He provides helpful advice on how to ensure regulatory compliance in dealing with archaeological sites, historic buildings, urban districts, sacred sites and objects, shipwrecks, and archives. King also offers careful guidance through the confusing array of federal, state, and tribal offices concerned with CRM. Featuring updated analysis and treatments of key topics, this new edition is a must-have for archaeologists and students, historic preservationists, tribal governments, and others working with cultural resources.

Faunal and Floral Migration and Evolution in SE Asia-Australasia Ian Metcalfe,Jeremy M.B. Smith,Mike Morwood,Iain Davidson,2001-06-01 This multidisciplinary book focuses on the relationships and interactions between palaeobiogeography, biogeography, dispersal, vicariance, migrations and evolution of organisms in the SE Asia-Australasian region. The book investigates biogeographic links between SE Asia and Australasia which go back more than 500 million years. It also focuses on the links between geological evolution and biological migrations and evolution in the region. It was in the SE Asian region that Alfred Russell Wallace established his biogeographic line, now known as Wallace's Line, which was the beginning of biogeography. Wallace also independently developed his theory of evolution based on his work in this area.;The book brings together, for the first time, geologists, palaeontologists, zoologists, botanists, entomologists, evolutionary biologists and archaeologists, in the one volume, to relate the region's geological past to its present biological peculiarities. The book is organized into six sections. Section 1 Paleobiogeographic Background provides overviews of the geological and tectonic evolution of SE Asia-Australasia, and changing patterns of land and sea for the last 540 million years. Section 2 Palaeozoic and Mesozoic Geology and Biogeography discusses Palaeozoic and Mesozoic biogeography of conodonts, brachiopods, plants, dinosaurs and radiolarians and the recognition of ancient biogeographic boundaries or Wallace Lines in the region. Section 3 Wallace's Line focuses on the biogeographic boundary established by Wallace, including the history of its establishment, its significance to biogeography in general and its applicability in the context of modern biogeography.;Section 4 Plant biogeography and evolution includes discussion on primitive angiosperms, the diaspora of the southern rushes, and environmental, climatic and evolutionary implications of plants and palynomorphs in the region. The biogeography and migration of insects, butterflies, birds, rodents and other non-primate mammals is discussed in section 5, Non Primates. The final section 6 Primates focuses on the biogeographic radiation, migration and evolution of primates and includes papers on the occurrence and migration of early hominids and the requirements for human colonization of Australia.

The volume contains also zoogeographical analysis of each group, data about relicts, endemics and sites of importance for conservation. The huge amount of information is provided by more than 56 authors from Bulgaria and abroad. Handbook of Income Inequality Measurement Jacques Silber, 2012-12-06 Amartya Sen Equality, I spoke the word As if a wedding vow Ah, but I was so much older then, I am younger than that now. Thus sang Bob Dylan in 1964. Approbation of equality varies not only with our age (though it is not absolutely clear in which direction the values may shift over one's life time), but also with the spirit of the times. The 1960s were good years for singing in praise of equality. The spirit of the present times would probably be better reflected by melodies in admiration of the Federal Reserve System. And yet the technical literature on the evaluation and measurement of economic inequality has grown remarkably over the last three decades. Even as actual economic policies (especially in North America and Europe) have tended to move towards focusing on virtues other than the avoidance of economic inequality, the professional literature on assessing and gauging economic inequality has taken quite a jump forward. A great many different problems have been addressed and effectively sorted out, and new problems continue to be posed and analyzed. The Contents: A Review Jacques Silber has done a great service to the subject by producing this collection of admirably helpful and illuminating papers on different aspects of the measurement of income inequality. The reach of this collection is quite remarkable. Along with a thorough overview from the editor himself, the major areas in this complex field have been carefully examined and accessibly discussed.

The Ethics of Archaeology Chris Scarre, Geoffrey Scarre, 2006-01-19 The question of ethics and their role in archaeology has stimulated one of the discipline's liveliest debates. In this collection of essays, first published in 2006, an international team of archaeologists, anthropologists and philosophers explore the ethical issues archaeology needs to address. Marrying the skills and expertise of practitioners from different disciplines, the collection produces interesting insights into many of the ethical dilemmas facing archaeology today. Topics discussed include relations with indigenous peoples; the professional standards and responsibilities of researchers; the role of ethical codes; the notion of value in archaeology; concepts of stewardship and custodianship; the meaning and moral implications of 'heritage'; the question of who 'owns' the past or the interpretation of it; the trade in antiquities; the repatriation of skeletal material; and treatment of the dead. This important collection is essential reading for all those working in the field of archaeology, be they scholar or practitioner.

Tribal Cultural Resource Management Darby C. Stapp, Michael S. Burney, 2002-10-23 The entrance of Native Americans into the world of cultural resource management is forcing a change in the traditional paradigms that have guided archaeologists, anthropologists, and other CRM professionals. This book examines these developments from tribal perspectives and articulates native views on the identification of cultural resource, how they should be handled and by whom, and what their meaning is in contemporary life. Stapp and Burney also demonstrate the connections between cultural resource and other issues such as native sovereignty, economic development, human rights, and cultural integrity.

The Destruction of Cultural Heritage in Iraq Peter G. Stone, Joanne Farchakh Bajjaly, 2008 Discussion of the issues surrounding the destruction of cultural property in times of conflict has become a key issue for debate around the world. This book provides an historical statement as of 1st March 2006 concerning the destruction of the cultural heritage in Iraq. In a series of chapters it outlines the personal stories of a number of individuals who were - and in most cases continue to be - involved. These individuals are involved at all levels, and come from various points along the political spectrum, giving a rounded and balanced perspective so easily lost in single authored reports. It also provides the first views written by Iraqis on the situation of archaeology in Iraq under Saddam and an overview and contextualisation of the issues surrounding the looting, theft and destruction of the archaeological sites, the Iraqi National museum and the libraries in Baghdad since the war was launched in 2003. Beyond this, it examines our attitudes towards the preservation of cultural and heritage resources and, in particular, the growing political awareness of their importance. Although related to a single conflict, taking place at a specific time in history, the relevance of this work goes far beyond these self-imposed boundaries. PETER STONE is Professor of Heritage Studies and Head of School of Arts and Cultures at Newcastle University; JOANNE FARCHAKH BAJJALY is a Lebanese archaeologist and Middle East correspondent for the French magazine Archéologia.

Yanomami Rob Borofsky, Bruce Albert, 2005-01-31 Yanomami raises questions central to the field of anthropology - questions concerning the practice of fieldwork, the production of knowledge, and anthropology's intellectual and ethical vision of itself. Using the Yanomami controversy - one of anthropology's most famous and explosive imbroglios - as its starting point, this book considers how fieldwork is done, how professional credibility and integrity are maintained, and how the discipline might change to address central theoretical and methodological problems. Both the most up-to-date and thorough public discussion of the Yanomami controver.

A Shark Going Inland Is My Chief Patrick Vinton Kirch, 2012-08-06 Tracing the origins of the Hawaiians and other Polynesians back to

the shores of the South China Sea, archaeologist Patrick Vinton Kirch follows their voyages of discovery across the Pacific in this fascinating history of Hawaiian culture from about one thousand years ago. Combining more than four decades of his own research with Native Hawaiian oral traditions and the evidence of archaeology, Kirch puts a human face on the gradual rise to power of the Hawaiian god-kings, who by the late eighteenth century were locked in a series of wars for ultimate control of the entire archipelago. This lively, accessible chronicle works back from Captain James Cook’s encounter with the pristine kingdom in 1778, when the British explorers encountered an island civilization governed by rulers who could not be gazed upon by common people. Interweaving anecdotes from his own widespread travel and extensive archaeological investigations into the broader historical narrative, Kirch shows how the early Polynesian settlers of Hawai’i adapted to this new island landscape and created highly productive agricultural systems.
