Charles Darwin's Debt to the Romantics Charles Morris Lansley,2018 This book argues that the Romantic movement influenced Charles Darwin and his theory of natural selection. Given that Darwin has traditionally been placed within Victorian naturalism, these Romantic connections have often been overlooked. The book cleverly follows Darwin's narrative in a search for traces of history in both science and poetry.

Sagas from the Far East Rachel Harriette Busk,1873

Darwin's Argument by Analogy Roger M. White,M. J. S. Hodge,Gregory Radick,2021-11-04 In *On the Origin of Species* (1859), Charles Darwin put forward his theory of natural selection. Conventionally, Darwin's argument for this theory has been understood as based on an analogy with artificial selection. But there has been no consensus on how, exactly, this analogical argument is supposed to work – and some suspicion too that

analogical arguments on the whole are embarrassingly weak. Drawing on new insights into the history of analogical argumentation from the ancient Greeks onward, as well as on in-depth studies of Darwin's public and private writings, this book offers an original perspective on Darwin's argument, restoring to view the intellectual traditions which Darwin took for granted in arguing as he did. From this perspective come new appreciations not only of Darwin's argument but of the metaphors based on it, the range of wider traditions the argument touched upon, and its legacies for science after the Origin.

Wild Pedagogies Bob Jickling, Sean Blenkinsop, Nora

Timmerman, Michael De Danann Sitka-Sage, 2018-06-22 This book explores why the concept of wild pedagogy is an essential aspect of education in these times; a re-negotiated education that acknowledges the necessity of listening to voices in a more than human world, and (re)learning how to dwell in a place. As the geological epoch inexorably shifts to the Anthropocene, the authors argue that learning to live in and engage with the world is increasingly crucial in such times of uncertainty. The editors and contributors examine what wild pedagogy can truly become, and how it can be relevant across disciplinary boundaries: offering six touchstones as working tools to help educators forge an onward path. This collaborative work will be of interest to students and scholars of wild pedagogies, alternative education and the Anthropocene, and for all those engaged in re-wilding education.

Children in the Anthropocene Karen Malone, 2018-12-04

This book elaborates the need, in a rapidly urbanizing world, for recognition of the ecological communities we inhabit in cities and for the development of an ethics for all entities (human and non-human) in this context. Children and their entangled relations with

the human and more-than-human world are located centrally to the research on cities in Bolivia and Kazakhstan, which investigates the future challenges of the Anthropocene. The author explores these relations by employing techniques of intra-action, diffraction and onto-ethnography in order to reveal the complexities of children's lives. These tools are supported by a theoretical framing that draws on posthumanist and new materialist literature. Through rich and complex stories of space-time-mattering in cities, this work connects children's voices with a host of others to address the question of what it means to be a child in the Anthropocene.

Research Handbook on the Sociology of Law Jiří

Příbáň,2020-12-25 This unique Research Handbook maps the historical, theoretical, and methodological concepts in sociology of law, exploring the rich and complex nature of this area of research. It argues that sociology of law flourishes due to its strong capacity for interdisciplinary engagement and links to other scientific concepts, methodologies and research fields.

Research Handbook on Human Rights and Business Surya

Deva,David Birchall,2020-07-31 This authoritative Research Handbook brings together leading international scholars and practitioners to provide in-depth analysis of some of the most hotly debated topics and issues concerning the interface of human rights and business. Research Handbook on the Politics of International Law

Wayne Sandholtz,Christopher A. Whytock,2017-02-24 What is the relationship between politics and international law? Inspired by comparative politics and socio-legal studies, this Research Handbook develops a novel framework for comparative analysis of politics and international law at different stages of governance and in different governance systems. It applies the framework in a

wide range of fields—from human rights and environmental standards, to cyber conflict and intellectual property—to show how the relationship between politics and international law varies depending on the sites where it unfolds.

Research Handbook on Political Representation Maurizio Cotta, Federico Russo, 2020-12-25 At a time when political representation can be said to be facing its ultimate crisis, this crucial work clarifies the terms of the debate, providing an up-to-date analysis of the main conceptual and institutional controversies that have arisen surrounding this topic. Written by leading scholars in the field, contributions focus on how representation is conceptualised and its relation to democracy.

Handbook of Research on Gender and Economic Life

Deborah M. Figart, Tonia L. Warnecke, 2013-01-01 The excellent list of themes and chapters in this volume reflects the maturity reached by feminist economics in its different dimensions. Based on the notion of social provisioning for all as the basic objective of economics, they represent a challenge to conventional economic thought and they show the importance of understanding theory, institutions, empirical work, and policy from a gender perspective. The global perspective provided through themes and authors is a very useful contribution to the literature. Lourdes Bener'a, Cornell University, US Standard economics has a narrow and distorted vision of what the economy is, and how it works. Gender scholars are on the forefront of developing better, more encompassing models of human provisioning for well-being. This volume presents a wonderful sampling of these new theoretical and empirical developments. Paula England, New York University, US This is an impressive collection that delves deeply and broadly into the myriad ways that gender shapes and alters economic lives and illuminates complex facets of the economic and social provisioning process across the globe. The chapters, by an exciting variety of researchers, policy analysts, and practitioners from numerous fields, present a consistent and persuasive vision of economic

well-being as critical to the flourishing of all people. Myra H. Strober, Stanford University, US In the aftermath of global economic downturn, it has never been more important to understand how gender relates to economic life and well-being. This interdisciplinary collection of original research details key areas of intersection, provides a comprehensive overview of the current state of research and proposes avenues for further investigation. The Handbook illuminates complex facets of the economic and social provisioning process across the globe. The contributors academics, policy analysts and practitioners from wide-ranging areas of expertise discuss the methodological approaches to, and analytical tools for, conducting research on the gender dimension of economic life. They also provide analyses of major issues facing both developed and developing countries. Topics explored include civil society, discrimination, informal work, working time, central bank policy, health, education, food security, poverty, migration, environmental activism and the financial crisis. Economists, sociologists and political scientists will find this book to be an invaluable research tool, as will academics, researchers and students with an interest in economics particularly feminist economics gender studies and global studies.

Handbook of Comparative Studies on Community

Colleges and Global Counterparts Rosalind Latiner

Raby,Edward J. Valeau,2018-08-14 This book explores the complexities of community colleges and global counterparts by focusing on critical analysis of governance, leadership, and mission. These complexities represent emerging and evolving phenomena that impact the institutions' ability to a) serve students; b) offer sound curricula; c) admit and retain students; d) increase completion rates; e) create viable and sustained partnerships locally and internationally; f) address the needs of unique populations; g) funding and sustainability, and h) support staff development to enhance faculty and staff excellence. This work will introduce and elaborate upon these topics to highlight not only the challenges of the field in a variety of countries worldwide, but to also begin to build comparative understanding of the field at large. In that these institutions are now identified, it is time to academically address their role in higher education.

Handbook of Research on Entrepreneurship and Creativity Rolf Sternberg, Gerhard Krauss,2014-05-30 This book will appeal to researchers and scholars interested in entrepreneurship and creativity issues, coming from a wide range of academic disciplines. These readers will find an up-to-date presentation of existing and new directions for research in

The Posthuman Child Karin Murris,2016-03-17 The Posthuman Child combats institutionalised ageist practices in primary, early childhood and teacher education. Grounded in a critical posthumanist perspective on the purpose of education, it provides a genealogy of psychology, sociology and philosophy of childhood in which dominant figurations of child and childhood are exposed as positioning child as epistemically and ontologically inferior. Entangled throughout this book are practical and theorised examples of philosophical work with student teachers, teachers, other practitioners and children (aged 3-11) from South Africa and Britain. These engage arguments about how children are routinely marginalised, discriminated against and denied,

especially when the child is also female, black, lives in poverty and whose home language is not English. The book makes a distinctive contribution to the decolonisation of childhood discourses.

Underpinned by good quality picturebooks and other striking images, the book's radical proposal for transformation is to reconfigure the child as rich, resourceful and resilient through relationships with (non) human others, and explores the implications for literary and literacy education, teacher education, curriculum construction, implementation and assessment. It is essential reading for all who research, work and live with children.

Research Handbook on EU Energy Law and Policy Rafael Leal-Arcas, Jan Wouters, 2017-10-27 This authoritative Research Handbook presents, for the first time, a comprehensive overview of the most important research and latest trends in EU energy law and policy. It offers high-quality original contributions that provide state-of-the-art research in this rapidly evolving area, situated in the broader context of international economic law and governance.
