Internet Resources and Services for International Real Estate Information Sheau-Yu J.

Chao,2001-02-28 You're investing in real estate, relocating to a new state, or maybe moving to a new country. You go to the Internet, an endless source of information. But is it current? Is it accurate? Can you even find what you need? Here is an analytic guide to nearly 2000 real estate Web sites. Data for more than 220 regions, states, and countries are divided into six sections representing the major continents. The book runs the gamut with data resources for broad geographical regions right down to individual localities (including U.S. states). Indexes to Web site titles, key content, sponsors, and country of origin make this guide essential to everyone from real estate practitioners (developers, bankers, and investors, etc.) to students and researchers in the field.

Plant Biotechnology and Agriculture Arie Altman,Paul Michael Hasegawa,2012 As the oldest and largest human intervention in nature, the science of agriculture is one of the most intensely studied practices. From manipulation of plant gene structure to the use of plants for bioenergy, biotechnology interventions in plant and agricultural science have been rapidly developing over the past ten years with immense forward leaps on an annual basis. This book begins by laying the foundations for plant biotechnology by outlining the biological aspects including gene structure and expression, and the basic procedures in plant biotechnology of genomics, metabolomics, transcriptomics and proteomics. It then focuses on a discussion of the impacts of biotechnology on plant breeding technologies and germplasm sustainability. The role of biotechnology in the improvement of agricultural traits, production of industrial products and pharmaceuticals as well as biomaterials and biomass provide a historical perspective and a look to the future. Sections addressing intellectual property rights and sociological and food safety issues round out the holistic discussion of this important topic. Includes specific emphasis on the inter-relationships between basic plant biotechnologies and applied agricultural applications, and the way they contribute to each other Provides an updated review of the major plant biotechnology procedures and techniques, their impact on novel agricultural development and crop plant improvement Takes a broad view of the topic with discussions of practices in many countries

George Washington and the Half-King Chief Tanacharison Paul R. Misencik, 2014-05-02 George Washington and the Half-King Chief Tanacharison details the events in western Pennsylvania that precipitated the French and Indian War. It describes the interpersonal relationship between 22-year-old, inexperienced, but self-assured George Washington and the 54-year-old wily Iroquois Chief Tanacharison, which led to, as Horace Walpole quipped, Washington firing a volley in the backwoods of America that set the world on fire. The book explores the history of the French and English rivalry for the trans-Allegheny territory and its impact on the Indians in the area. It shows how Washington and Tanacharison each sought to influence the other to gain support for their respective agendas. Washington wanted the Indians to endorse Virginia's claim to the Ohio territory, while Tanacharison wanted a war between England and France so that the Iroquois could maintain their dominance over the Ohio Indians. The book describes in detail the sequence of events through which the crafty half-king manipulated Washington into starting the war he wanted, and by his actions implicated Washington in nothing less than a cold-blooded murder.
