Kulturwissenschaftliche Essays für Max Matter Nils Grosch, Sabine Zinn-Thomas, 2010 Diese Festschrift für Prof. Dr. Max Matter (Ordinarius am Institut für Volkskunde der Albert-Ludwigs-Universität Freiburg) zum 65. Geburtstag versammelt kulturwissenschaftliche Essays zu Themen, die im Mittelpunkt Matters wissenschaftlichen Schaffens standen und stehen: Fremdheit und Migration. Hinzu kommt die Musik – als Bestandteil populär-kulturwissenschaftlicher Forschung, mit der als Direktor des Deutschen Volksliedarchivs befasst war.

A Day on the Farm Nancy Fielding Hulick, 1960 Goes through the day of a farm family and all the chores they do.

Local and Regional Systems of Innovation John de la Mothe, Gilles Paquet, 2012-12-06 In an era of intense globalization, the critical role of the region as a center for economic development has sometimes been overlooked. Moreover, innovation is increasingly being recognized as being a critical driver of economic growth and development. However, innovation is no longer being seen as a function of research and development; nor is R&D being seen as being sufficient for the creation of technology-intensive industries and the valuable economic spillovers that result in high value-added jobs and exports. Indeed, much more than ever before, it is the combination of factors that contributes to innovation - ranging over skills, finance, production, user-producer linkages, the capacity of organizations to learn, and multilayered government policies - that make local regions the favorites of fortune. Using an evolutionary economic perspective, and drawing on a range of disciplines and accomplished

scholars, Local and Regional Systems of Innovation explores important issues at a conceptual, methodological and comparative level concerning how successful locations actually construct their comparative advantage.

Technology, Management and Systems of Innovation Keith Pavitt, 1999-01-01 In this volume, Keith Pavitt assesses the economic impact of technological change and how it relates to public policy and corporate management practices.

Small Countries Facing the Technological Revolution Christopher Freeman, Bengt-Åke Lundvall, 1988

Technological Innovation and Economic Performance Benn Steil, David G. Victor, Richard R. Nelson, 2002-02-03 Commissioned and brought together for the research project by the world-renowned Council on Foreign Relations, the authors have produced an important compendia in applied economics.

The Innovation Policy of the European Union Susana Borrás, 2003-07-29 Recoge: Part 1. Informing innovation policy : measurement issues - Part 2. Improving innovation policy : strategic issues.

The Economics of Technological Diffusion Paul Stoneman, 2001-10-10 This book presents a detailed overview of the economics of technological diffusion in all its various dimensions. Topics covered include: Game-theoretic approaches to the modelling of technological change Finance and technological change Technological change in international trade.

Innovation Kjell Grønhaug, Geir Kaufmann, 1988 This study of innovation brings together a wide array of topics under a theoretical model consisting of two basic dimensions: aggregation level (individual, group, organization and society) and aspects of progress

(generation, evaluation, implementation and diffusion of new ideas and products). The readings, many appearing here for the first time, were written by an international group of experts--including Eric von Hippel, Arthur L. Stinchcombe, L. Richard Hoffman, and Robert A. Burgelman--and represent a variety of disciplines, including psychology, economics, sociology, political science, social anthropology, marketing, engineering and education

Evolutionary Economics Horst Hanusch, 2008-06-26

This volume contains eleven papers - some theoretical, others empirical - given at the 1986 founding meeting of the International Joseph A. Schumpeter Society in Augsburg. By raising questions and offering additional statistical evidence, they further stimulate interest and discussion about the kinds of intuitive ideas that Schumpeter introduced in his seminal period before World War I. Whatever may be the academic mainline trend in economics, two policy-oriented 'disequilibrium' schools have flourished and still thrive: one stresses the need for social redistribution as a counterweight to a negative propensity to unemployment; the other emphasizes the explicit roles of the dynamic entrepreneur, innovation and stressful competition in stimulating economic growth. And while it is possible that the heyday of the demand-side 'age of Keynes' is passing, it also may be true that the time of the supply-side 'age of Schumpeter' is now emerging.

Innovation and Growth F. M. Scherer, 1986 Outlines, in text and illustrations, the development of computers, how they work, and their many uses.

Innovation Patterns in Crisis and Prosperity Alfred Kleinknecht, 1990

Innovation: the Basis of Cultural Change Homer Garner Barnett, 1953

Theory of Innovation Gerhard Mensch,1973

Resistance to New Technology Martin Bauer,Martin W.

Bauer,1995-06-22 This book compares resistance to technology across time, nations, and technologies. Three post-war examples - nuclear power, information technology, and biotechnology - are used in the analysis. The focus is on post-1945 Europe, with comparisons made with the USA, Japan, and Australia. Instead of assuming that resistance contributes to the failure of a technology, the main thesis of the book is that resistance is a constructive force in technological development, giving technology its particular shape in a particular context. Whilst many people still believe in the positive contribution made by science and technology, many have become sceptical. By exploring the idea that modernity creates effects that undermine its own foundations, forms and effects of resistance are explored in various contexts. The book presents a unique interdisciplinary study, including contributions from historians, sociologists, psychologists, and political scientists.

Entrepreneurship Richard Swedberg,2000 A new addition to the series that looks at the culture and role of the entrepreneur from different disciplinary perspectives. Includes all the key readings, introduced by a highly respected editor.

Systems of Innovation Christopher Freeman,2008 This set of essays by Chris Freeman, founder of SPRU and one of the pioneers of innovation studies, will be of interest to anyone wanting to gain a deeper understanding of technical and social change.
