Towards Principled Oceans Governance Donald R. Rothwell, David L. VanderZwaag, 2006-09-27 Australia and Canada have been at the forefront of efforts to operationalize integrated oceans and coastal management. Throughout the 1990s both countries devoted considerable effort to developing strategies to give effect to international ocean management obligations. This key book focuses on principles of marine environmental conservation and management, maritime regulation and enforcement, and regional maritime planning and implementation. With contributions from respected scholars, this informative book collectively assesses the obligations, compliance, implementation and trends in international ocean law, particularly in giving effect to an Oceans Policy, regional maritime planning, international oceans governance, and maritime security. This book will be of interest to all academics involved with maritime studies and international law.

My First Seas and Oceans Book Matthew Oldham, 2018-07-31 An informative picture book for young children that explores the amazing world beneath the waves. Prepare to explore kaleidoscopic coral reefs, frozen Arctic waters and the deepest, darkest parts of the ocean floor. Lots to look at and talk about. Written in a simple, accessible style, full of rich vocabulary. Internet links to regularly reviewed websites with homework help, virtual tours, reconstructions, games and quizzes. Part of a series which also includes My Very First Animals Book (978147492263), My Very First Dinosaurs Book (9781409564164), My Very First Our World Book (9781474917896) and other titles.

City and Regional Planning Richard T. LeGates, 2022-12-30 City and Regional Planning provides a clearly written and lavishly illustrated overview of the theory and practice of city and regional planning. With material on globalization and the world city system, and with examples from a number of countries, the book has been written to meet the needs of readers worldwide who seek an overview of city and regional planning. Chapters cover the history of cities and city and regional planning, urban design and placemaking, comprehensive plans, planning politics and plan implementation, planning visions, and environmental, transportation, and housing planning. The book pays special attention to diversity, social justice, and collaborative planning. Topics include current practice in resilience, transit-oriented development, complexity in planning, spatial equity, globalization, and advances in planning methods. It is aimed at U.S. graduate and undergraduate city and regional planning, geography, urban design, urban studies, civil engineering, and other students and practitioners. It includes extensive material on current practice in planning for climate change. Each chapter includes a case study, a

biography of an important planner, lists of concepts and important people, and a list of books, articles, videos, and other suggestions for further learning.

Reality Check Donald R. Prothero, 2013-08-01 A thought-provoking look at science denialism “for popular science readers who want better to be able to explain and defend science and scientific methods to others” (Library Journal). The battles over evolution, climate change, childhood vaccinations, and the causes of AIDS, alternative medicine, oil shortages, population growth, and the place of science in our country—all are reaching a fevered pitch. Many people and institutions have exerted enormous efforts to misrepresent or flatly deny demonstrable scientific reality to protect their nonscientific ideology, their power, or their bottom line. To shed light on this darkness, Donald R. Prothero explains the scientific process and why society has come to rely on science not only to provide a better life but also to reach verifiable truths no other method can obtain. He describes how major scientific ideas that are accepted by the entire scientific community (evolution, anthropogenic global warming, vaccination, the HIV cause of AIDS, and others) have been attacked with totally unscientific arguments and methods. Prothero argues that science deniers pose a serious threat to society, as their attempts to subvert the truth have resulted in widespread scientific ignorance, increased risk of global catastrophes, and deaths due to the spread of diseases that could have been prevented. “Prothero’s treatise will give the science-minded something to cheer about, a brief summary of the real data that supports so many critical aspects of modern life.” —Publishers Weekly

Politics, Philosophy, Culture Michel Foucault, 2013-07-04 Politics, Philosophy, Culture contains a rich selection of interviews and other writings by the late Michel Foucault. Drawing upon his revolutionary concept of power as well as his critique of the institutions that organize social life, Foucault discusses literature, music, and the power of art while also examining concrete issues such as the Left in contemporary France, the social security system, the penal system, homosexuality, madness, and the Iranian Revolution.

Climate Change [4 volumes] Brian C. Black, David M. Hassenzahl Ph.D., Jennie C. Stephens, Gary Weisel, Nancy Gift, 2013-01-08 This book provides a holistic consideration of climate change that goes beyond pure science, fleshing out the discussion by considering cultural, historical, and policy-driven aspects of this important issue. Climate change is a controversial topic that promises to reframe rudimentary ideas about our world and how we will live in it. The articles in *Climate Change: An Encyclopedia of Science and History* are designed to inform readers' decision making through the insight of scholars from around the world, each of whom brings a unique approach to this topic. The work goes beyond pure science to consider other important

factors, weighing the cultural, historical, and policy-driven contributors to this issue. In addition, the book explores the ideas that have converged and evolved in order to clarify our current predicament. By considering climate change in this holistic fashion, this reference collection will prepare readers to consider the issue from every angle. Each article in the work is suitable for general readers, particularly students in high school and college, and is intended to inform and educate anyone about climate change, providing valuable information regarding the stages of mitigation and adaptation that are occurring all around us.

The Mystery of Life Jan Paul Schutten,2015-09-01 How did nonliving atoms evolve into modern people? Find out in this engaging illustrated exploration of how nothing became everything. The science of evolution is a topic of utmost importance, especially as the focus on STEM (Science, Technology, Engineering, Math) education continues to increase. Fortunately, important doesn't have to mean boring. From explaining how scientists discovered how life began on earth to speculating about whether space aliens are carnivores, this engaging investigation of all things evolution is infused with fun as well as facts. Coupled with gorgeous illustrations, curious minds young and old will discover how to build a planet, the truth about DNA, whether trees really want to be tall, how to survive without a butt, and much, much more!

The New Systems Reader James Gustave Speth,Kathleen Courrier,2020-10-19 The recognition is growing: truly addressing the problems of the 21st century requires going beyond small tweaks and modest reforms to business as usual—it requires changing the system. But what does this mean? And what would it entail? The New Systems Reader highlights some of the most thoughtful, substantive, and promising answers to these questions, drawing on the work and ideas of some of the world's key thinkers and activists on systemic change. Amid the failure of traditional politics and policies to address our fundamental challenges, an increasing number of thoughtful proposals and real-world models suggest new possibilities, this book convenes an essential conversation about the future we want.

Origins of Life Vlado Valkovic,2021-11-09 The primary purpose of this book is to prepare the ground for coordinated efforts aiming to answer the question: where and when life originated. The appearance of life involves three successive stages: i) the formation of chemical elements and their combination to simple molecules, which is the concern of physicists; ii) the evolution of organized complexity in biomolecules and their reactions, which falls within the field of chemistry; iii) the onset of Darwinian evolution after the appearance of the first cell-like structure, which is studied by biologists.

This book focuses on the first two steps of this process with chapters exploring topics such as chemical element abundances; galaxies, galactic magnetic fields and cosmic rays; galactic chemical evolution. Key Features: Contains extensive lists of reference and additional reading. Includes new hypotheses concerning the origin of life. Combines consideration from nuclear physics, astrophysics, astro- and geochemistry. Despite its interdisciplinary nature, this book remains accessible to nonexperts, and would be a valuable companion for both experts and laypeople.

International Energy Governance Rafael Leal-Arcas, Andrew Filis, Ehab S. Abu Gosh, 2014-11-28 øSelected legal deficiencies relating to international energy governance are identified in this salient book. The currently fragmented and multi-layered international energy governance regime is exposed and reviewed. If governanceø were streamlined for

Mobilizing the Green Imagination Anthony Weston, 2012-05-01 Elegant and audacious possibilities that push the boundaries of contemporary environmentalism Dysfunctional cities, catastrophic climate change, ever-deepening distance from nature-today we see environmental disaster everywhere we look. In Mobilizing the Green Imagination , philosophical provocateur Anthony Weston urges us to move beyond ever more desperate attempts to green the status quo, toward entirely different and far more inviting ecological visions: Life after transportation-decentralized work, inventive infill and self-sufficient micro-communities to facilitate life in place Adaptation with attitude-cities that welcome the rising waters A Great Second Chance-moving beyond exploitation of the whole natural world A cosmic ecology-why not a green space program? These postcards from beyond the leading edge of today's green thinking are bold, audacious, extravagantly hopeful and profoundly inspiring-the perfect antidote to the despair brought on by too many doom and gloom scenarios. Nothing less than a complete reinvention of contemporary environmentalism, Mobilizing the Green Imagination belongs in the back pocket of anyone who dares to dream of a brighter future and a better world.

The Year's Best Science Fiction: Twentieth Annual Collection Gardner Dozois, 2007-04-01 Widely regarded as the one essential book for every science fiction fan, The Year's Best Science Fiction (Winner of the 2002 Locus Award for Best Anthology) continues to uphold its standard of excellence with more than two dozen stories representing the previous year's best SF writing. This year's volume includes Ian R. MacLeod, Nancy Kress, Greg Egan, Maureen F. McHugh, Robert Reed, Paul McAuley, Michael Swanwick, Robert Silverberg, Charles Stross, John Kessel, Gregory Benford and many other talented authors of SF, as well as thorough summations of the year and a recommended reading list.

The Oceans Eelco Rohling, 2020-07-14 The 4.4-billion-year history of the oceans and their role in Earth's climate system It has often been said that we know more about the moon than we do about our own oceans. In fact, we know a great deal more about the oceans than many people realize. Scientists know that our actions today are shaping the oceans and climate of tomorrow—and that if we continue to act recklessly, the consequences will be dire. Eelco Rohling traces the 4.4-billion-year history of Earth's oceans while also shedding light on the critical role they play in our planet's climate system. This timely and accessible book explores the close interrelationships of the oceans, climate, solid Earth processes, and life, using the context of Earth and ocean history to provide perspective on humankind's impacts on the health and habitability of our planet.

China's Law of the Sea Isaac B. Kardon, 2023-03-28 An in-depth examination of the law and geopolitics of China's maritime disputes and their implications for the rules of the international law of the sea China's Law of the Sea is the first comprehensive study of the law and geopolitics of China's maritime disputes. It provides a rigorous empirical account of whether and how China is changing "the rules" of international order—specifically, the international law of the sea. Conflicts over specific rules lie at the heart of the disputes, which are about much more than sovereignty over islands and rocks in the South and East China Seas. Instead, the main contests concern the strategic maritime space associated with those islands. To consolidate control over this vital maritime space, China's leaders have begun to implement "China's law of the sea": building domestic legal institutions, bureaucratic organizations, and a naval and maritime law enforcement apparatus to establish China's preferred maritime rules on the water and in the diplomatic arena. Isaac B. Kardon examines China's laws and policies to defend, exploit, study, administer, surveil, and patrol disputed waters. He also considers other claimants' reactions to these Chinese practices, because other states must acquiesce for China's preferences to become international rules. China's maritime disputes offer unique insights into the nature and scope of China's challenge to international order.

International Law and the Genetic Resources of the Deep Sea David Kenneth Leary, 2006-11-29 Deep-sea genetic resources and the interest of the biotechnology industry in their exploitation are emerging as a significant challenge for international oceans governance. This book is the first comprehensive examination of this issue and explores its relationship with marine scientific research and other activities in the deep sea. As well as a detailed survey of the state of industry interest in this new field of biotechnology it also sets out proposals for future sustainable management of these resources utilizing many existing international law and policy regimes.

The Year's Best Science Fiction: Twenty-Second Annual Collection Gardner Dozois, 2005-07 Science fiction. More than two dozen outstanding tales written in the previous year.

The Year's Best Science Fiction: Twenty-Third Annual Collection Gardner Dozois, 2006-07-11 In the heart of the new millennium, worlds beyond our imagination have opened up, blurring the line between life and art. Embracing the challenges and possibilities of cyberspace, genetics, the universe, and beyond, the world of science fiction has become a porthole into the realities of tomorrow. In *The Year's Best Science Fiction Twenty-third Annual Collection*, our very best SF authors explore ideas of a new world with such compelling stories as: *Beyond the Aquila Rift*: Critically acclaimed author Alastair Reynolds takes readers to the edge of the universe, where no voyager has dared to travel before---or so we think. *Comber*: Our world is an ever-changing one, and award-winning author Gene Wolfe explores the darker side of our planet's fluidity in his own beautiful and inimitable style. *Audubon in Atlantis*: In a world not quite like our own, bestselling author Harry Turtledove shows us that there are reasons some species have become extinct. The twenty-nine stories in this collection imaginatively take us far across the universe, into the very core of our beings, to the realm of the gods, and the moment just after now. Included here are the works of masters of the form and of bright new talents, including: Neal Asher, Paolo Bacigalupi, Stephen Baxter, Elizabeth Bear, Chris Beckett, Dominic Green, Daryl Gregory, Joe Haldeman, Gwyneth Jones, James Patrick Kelley, Jay Lake and Ruth Nestvold, Ken MacLeod, Ian McDonald, Vonda N. McIntyre, David Moles, Derryl Murphy, Steven Popkes, Hannu Rajaniemi, Alastair Reynolds, Robert Reed, Chris Roberson, Mary Rosenblum, William Sanders, Bruce Sterling, Michael Swanwick, Harry Turtledove, Peter Watts, Liz Williams, and Gene Wolfe. Supplementing the stories are the editor's insightful summation of the year's events and a lengthy list of honorable mentions, making this book both a valuable resource and the single best place in the universe to find stories that stir the imagination and the heart.

The Mammoth Book of Best New SF 16 Gardner Dozois, 2011-08-04 Michael Swanwick, Geoff Ryman, Allen Steele, Nancy Kress, Robert Reed, Michael Cassott, Charles Stross are just some of the high-profile names that feature in this volume of what is now regarded as essential reading for every science-fiction fan. This year's edition includes not just the biggest names in science-fiction writing but also many of its other brightest young talents too, as well as even more stories than ever before. All this, and the usual thorough summations of the year, plus a list of recommended reading, more than upholds an established tradition of value and excellence.

The Mighty Angels of Revelation Nathan E. Jones,2019-11-03 A devastating car wreck nearly killed his parents. If not for a lone biker who had stopped at the scene of the accident and administered first aid, some say they would have died before medical help arrived. The problem only one person could recollect the biker ever having been there. Their rescuer had mysteriously disappeared without a trace! The only survivor who could remember insisted they must have been rescued, not by a mere man, but by an actual angel sent from God. This jolting event in the life of one family led author Nathan Jones to set off to explore the greatest source in the study of Angelology the book of Revelation. With its whopping 72 instances of individual and entire groups of angels and demons, Revelation stands apart from all of the other books in the Bible as the most prolific source for learning about angels. Come and travel along with a man called the Elder and his angelic guide as the end times are revealed throughout the book of Revelation in stunning detail. Along the way, meet 72 of God's mighty angels as they proclaim God's messages of warning and hope to a lost world. Together let us encounter the Mighty Angels of Revelation!
