All About Particles Naoko Chino,2012-08-03 Students of Japanese are familiar with the term particle, and realize that they, like English prepositions, require a special effort to master. This handbook provides all the information one would need on these tricky units of grammar. All About Particles covers more than 70 particles those that are used regularly as well as those used less frequently in more than 200 uses. The book can be approached as a guiding textbook and studied from beginning to end. It is as a reference book, however, that All About Particles shines. It is light and easy to carry, slim enough to fit into the corner of a shoulder bag, and concise enough to quickly clarify particle-related questions. It is a priceless tool for any serious student of Japanese. In its previous incarnation as a part of the Power Japanese Series, ISBN 978-0-87011-954-5, and sold more than 40,000 copies worldwide.

Amsterdam's Canal District Jan Nijman, 2020-09-10 In terms of design, scale, and blending of ecological and aesthetic function, Amsterdam's seventeenth-century Canal District is a European marvel. Its survival for four centuries is a testament to its ingenuity, reflected in its designation as a UNESCO World Heritage Site in 2010. The Canal District today is an extraordinary example of resilient historic design and cultural heritage in a living city, but it is not without present-day challenges: in recent years, its urban ecology has become subject to severe pressures of global tourism and supergentrification. This edited volume brings together seventeen reputable scholars to debate questions about the origins, evolution, and future of the Canal District. With these differing approaches and perspectives on the Canal District the contributions render a collection where the whole is much more than the sum of the parts. The book breaks new ground in our understanding of the District's historic design, its evolution over four hundred years, and the fundamental issues in future-facing strategies and policies. While the main focus is clearly on Amsterdam, the discussions in this collection have an important bearing on broader questions of urban historic preservation elsewhere, and on questions about enduring urban design.

Dating Undated Medieval Charters Michael Gervers,2002 Many of the millions of medieval charters surviving in European archives and repositories were written without any reference to a date of issue. The proliferation of undated charters in England and Normandy indicates that the custom was especially peculiar to lands under Norman rule, but charters issued by major religious houses are often also undated. The DEEDS Project at the University of Toronto has developed a computerised methodology for dating charters, relying on analysis of vocabulary, syntax and formulae. In this volume an international group of scholars concerned with the problem of charter chronology consider the potential of the computerised methodology compared to other more traditional methods of dating, such as identification of names, changing in wording and address, and handwriting. Discussion

also touches on regional differences in the production, use and distribution of charters, and on ways both manual and mechanical to date and analyse the content of large numbers of them. MICHAEL GERVERS is Director of the DEEDS Project at the University of Toronto, Canada. Contributors: MICHAEL GERVERS, RODOLFO FIALLOS, MARJORIE CHIBNALL, VÉRONIQUE GAZEAU, BENOIT-MICHEL TOCK, NICHOLAS VINCENT, GEORGES DECLERCQ, ZSOLT HUNYADIR, ATTILA ZSOLDOS, MARIA HILLEBRANDT, TREVOR CHALMERS, LAZSLO VESZPRÉMI, P.D.A. Land, Liberties, and Lordship in a Late Medieval Countryside Richard C. Hoffmann, 2017-01-31
Richard C. Hoffman's monumental study of rural life in medieval eastern Europe focuses on one region, the Duchy of Wroclaw, from the twelfth to sixteenth centuries. The duchy is in many ways a microcosm of medieval European society, and thus Hoffman's analysis addresses issues central to a broader understanding of a vanished society. His analysis of the records of the Duchy of Wroclaw challenges the western stereotypes of east central Europe that have been imposed on its medieval past by modern nationalisms. Honorable Mention, Wallace K. Ferguson Prize of the Canadian Historical Association.

The Russian Peasantry 1600-1930 David Moon, 2014-07-16 This impressive work, set to become the standard history on the subject, offers a definitive survey of peasant society in Russia, from the consolidation of serfdom and tsarist autocracy in the 17th century through to the destruction of the peasant's traditional world under Stalin. Over three-quarters of Russian society were peasants in these years, and David Moon explores all aspects of their life xxx; including the rural economy, peasant households, village communities xxx; and their political role, including protest against the

landowning elites. In the process he presents a fresh perspective on the history of Russia itself. A big book in every way xxx; and compellingly readable.

Imagining Archives Hugh A. Taylor, 2003 Hugh A. Taylor is one of the most important thinkers in the English-speaking world of archives. A retired civil servant and archival educator, he was named to the prestigious Order of Canada, his nation's highest civilian award. The fifteen essays in this volume are presented in chronological order so that readers may appreciate the broadening evolution and rich interconnections in Taylor's thought as these occurred over more than three decades. These essays link archives to social life and contemporary ideas. Long before postmodern scholars' recent fascination with 'the archive,' Taylor was intent on constructing archives anew, imagining them as places where archivists connect their records with social issues, with new media and technologies, with the historical tradition of archives, with the earth's ecological systems, and with broader spiritual meaning. Also included are two original essays by editors Terry Cook and Gordon Dodds
