The Ultimate Guide to Homesteading Nicole Faires, 2011-03-10 Can you make your own bread (sans bread machine)? Grow a garden all winter? What can you use instead of toilet paper? What if the power went out for a month? What if the grocery store closed? Can you make a solar oven? Store food without electricity? Raise a water buffalo? Make fine linen from stinging nettle? Make your own shampoo? Deliver a baby? Is it possible to be totally self-sufficient? This massive, full-color book answers all these questions and thousands more and includes checklists, diagrams, and instructions on how to buy a sheep. All of the information included meets these criteria: It is something that anyone can do, without special training. It can be done with relatively few supplies or with stuff you can make yourself. It has been tried and tested—either by the author, the military, doctors, or other homesteaders. The Ultimate Guide to Homesteading is not a storybook or a cookbook. It is a practical guide with nitty-gritty details on everything a homesteader can do, step-by-step with hundreds of color illustrations and pen and ink sketches. You can do it! This book can help.

The Routledge Research Companion to Travel Writing Alasdair Pettinger, Tim Youngs, 2019-07-30 Showcasing established and new patterns of research, The Routledge Research Companion to Travel Writing takes an interdisciplinary approach to scholarship and to travel texts themselves. The volume adopts a thematic approach, with each contributor considering a specific aspect of travel writing – a recurrent motif, an organising principle or a literary form. All of the essays include a discussion of representative travel texts, to ensure that the volume as a whole represents a broad historical and geographical range of travel writing. Together, the 25 essays and the editors’ introduction offer a comprehensive and authoritative reflection of the state of travel writing criticism and lay the ground for future developments.

Sensing China Shengqing Wu, Xuelei Huang, 2022-08-16 This book presents the first collection of studies of the senses and sensory experiences in China, filling a gap in sensory research while offering new approaches to Chinese Studies. Bringing together 12 chapters by literary scholars and historians, this book critically interrogates the deeply rooted meanings that the senses have coded in Chinese culture and society. Built on an exploration of the sensorium in early Chinese thought and late imperial literature, this book reveals the sensory manifestations of societal change and cultural transformation in China from the nineteenth century to the present day. It features in-depth examinations of a variety of concepts, representations, and practices, including aural and visual paradigms in ancient Chinese texts; odours in Ming-Qing literature and Republican Shanghai; the tactility of kissing and the sonic culture of community singing in the Republican era; the socialist sensorium in art, propaganda, memory, and embodied experiences; and contemporary-era multisensory cultural practices. Engaging with the exciting sensory turn, this original work makes a unique contribution to the world history of the senses, and will be a valuable resource to scholars and students of Chinese Literature, History, Cultural Studies, and Media.

Aullando en los bosques Reidar Müller, 2019-09-19 Tras el fenómeno de El libro de la madera, llega la nueva estrella noruega del Nature Writing. «Reidar Müller parece estar poseído por la riqueza del bosque y por su oscuro misterio. Ha escrito un libro fascinante.» Arne Dvergsal, Dagbladet En las profundidades del bosque húmedo y espeso, Reidar Müller, un hombre habitualmente reservado, aúlla. ¿Cómo ha acabado ahí, desgañitándose como un hombre lobo? Esta es la historia de un naturalista que quería investigar los árboles, su importancia como hábitat de plantas y animales, y el lugar que ocupan en la imaginación del ser humano, pero que termina obsesionado con los lobos, de modo que aprende de la mano de leñadores experimentados a rastrear en la espesura a esos misteriosos depredadores que normalmente solo habitan nuestro imaginario, y mientras espera el ansiado encuentro, reflexiona sobre el futuro del bosque, un ecosistema de 385 millones de años que ha sobrevivido a asteroides, volcanes en erupción y bombas nucleares y se enfrenta hoy al impacto del hombre. La crítica ha dicho... «Reidar Müller parece estar poseído por la riqueza del bosque y por su oscuro misterio. Ha escrito un libro fascinante y comovedor en el que palabras como bautismo y abstinencia dan buena cuenta de su profunda fascinación por el bosque y de la dependencia que crea la búsqueda del lobo.» Arne Dvergsal, Dagbladet «Destacan su fascinación por el lobo, los mitos que lo rodean, o cómo se ha convertido en objeto casi incomprensible de odio. [...] Es difícil de encontrar una recomendación mejor.» Prof. Dag Hessen «Reidar Müller amplifica en este libro los misterios del bosque.» Aftenposten «Aullando en los bosques, de Reidar Müller, se ha vendido a cinco idiomas en la Feria del Libro de Frankfurt de este año.» Norwegian Arts «El sueño del autor de conocer a los lobos se convirtió en una experiencia que lo dejó marcado para siempre y le enseñó a establecer una relación consciente con la naturaleza: ese entorno que compartimos los hombres y los animales.» Arne Dvergsal, Dagbladet

L'Odore del Suono Rob Carrey, 2013-11-17 Presentazione Il romanzo rientra nella macro-area del thriller/spy story/poliziesco. Si distingue specialmente per fabula e intreccio, complessi e ben architettati, e per la corallità con cui si presenta al lettore nella gestione dei diversi personaggi: pare quasi non vi sia un vero protagonista bensì tanti protagonisti, ognuno re della propria sotto trama. Persino gli antagonisti assumono un valore narrativo così pregnante da non sembrare neppure antagonisti a qualcuno ma attori che hanno un valore in sé. Anche gli altri attori principali non sono solamente “buoni” o solamente “cattivi”: anche questo aspetto permette alla storia narrata di stratificarsi nei rapporti tra personaggi e le dà valore. Molto stratificati e ampi sono anche il contesto storico e le ambientazioni. A prima vista sono attendibili (Guerra fredda, 11 Settembre, assassinio di Kennedy, guerre in Afghanistan, ecc.). Tuttavia, tali eventi storici sono rielaborati in un’ottica di spiccata finzione, con alcuni sconfinamenti verso una fantascienza relativamente realistica e verso una dimensione ucronica. Questo ha il pregio di non fossilizzarsi sui dettagli storici e di dare un respiro più ampio alla storia. Sinossi Un'arma sonica, l'oggetto del contendere. Un'arma micidiale, distruttiva, mortale... in grado di liquefare i cervelli. Qualcuno ne è già in possesso. Ma chi? Nessuna traccia, nessun indizio. Tranne due cadaveri ritrovati in un vicolo col cervello fuso. La corsa per impossessarsene è frenetica. August Livrosky è disposto a tutto pur d'impadronirsene. Si tratta di uno psicopatico, un pazzo criminale, in grado di condizionare la mente di Osama bin Laden e fargli compiere l'attentato dell'Undici Settembre. Ma la cosa più pericolosa è che rappresenta la Russia. A contrastarlo c'è la CryPtA, organizzazione segreta che si cela dietro la CIA, l'FBI e l'NSA. Il professor Mike Greenfield si trova in una stanza all'interno della stazione di polizia di Boston.

L'ispettore Lionel Morgan lo sta interrogando perché è accusato dell'omicidio della madre. Sopraggiungono gli agenti della CIA che prelevano il professore. Lionel Morgan sfrutterà le sue capacità per comprendere cosa sta accadendo: è in grado di ascoltare tutte le verità celate tra le onde sonore. Oscuri misteri, segreti, complotti... Questo è ciò che ascolterà. Si innescherà un circolo vizioso senza più ritorno...

Sensory Arts and Design Ian Heywood,2020-05-27 Artists, designers and researchers are increasingly seeking new ways to understand and explore the creative and practical significance of the senses. This ground-breaking book brings art and design into the field of sensory studies providing a clear introduction to the field and outlining important developments and new directions. A compelling exploration of both theory and practice, *Sensory Arts and Design* brings together a wide variety of examples from contemporary art and design which share a sensory dimension in their development or user experience. Divided into three parts, the book examines the design applications of new technology with sensing capacities; the role of the senses in creating new imaginative environments; and the significance of the senses within different cultural practices. The thirteen chapters cover a highly diverse range of issues – from the urban environment, architecture and soundscapes to gustatory art, multisensory perception in painting, music and drawing, and the relationship between vision and smell. Initiated by Insight, a research group at Lancaster Institute for the Contemporary Arts –widely recognised as a center of research excellence – the project brings together a team of experts from Britain, Europe and North America. This timely book is destined to make a significant contribution to the scholarly development of this emerging field. An important read for students and scholars in sensory studies, design, art, and visual culture.

SMELL Andreas Philippopoulos-Mihalopoulos,Danilo Mandic,Caterina Nirta,Andrea Pavoni,2023-12-04 Although somewhat marginal in relation to the other senses, smell is the most potent way of anchoring ourselves to the world. We subconsciously find our place in it by sniffing our body, the body of the one next to us, the room in which we are, the culture with which we are familiar. There is an incessant olfactory flow consisting of bodies, human and nonhuman, that are agents of generation, consumption, diffusion, reproduction and dissolution of odours. As they move or pause, as they cluster with others or try to move away, these bodies constantly partake in this olfactory flow, this dense planetary swirl that leaves nothing outside. The law aims at presenting itself as rational and objective. Smell, on the other hand, is one of the least integrated senses in the legal edifice, in comparison to, say, seeing and hearing. This can be attributed mainly to the fact that sense-making of smell and law are different, even antithetical. Smell operates undercurrent, tickling the olfactory antennas of individual and collective bodies while habitually hiding behind other sensory volumes. Law, on the other hand, has an interest in appearing present, universal, constant. Olfactory sense-making relies on its elusiveness; legal sense-making invests in its obviousness. Yet, the two can interact in most unexpected ways, as this volume amply shows. If anything, smell airs the way in which law conceptualises and contextualises its own actuality. Smell brings law forth by allowing it to show its underbelly, its elusive sense-making that is invariably sacrificed in preference to the necessity of legal impressions of constancy. However, smell’s fragmentary, discontinuous and unstable nature, despite all the ordering that goes to it, poses a peculiar challenge to the law. This volume sets out to investigate this juncture.

Blood on the Table Jean Anderson,Carolina Miranda,Barbara Pezzotti,2018-04-10 Written from a multicultural and interdisciplinary perspective, this collection of new essays explores the semiotics of food in the 20th- and 21st-century crime fiction of authors such as Anthony Bourdain, Arthur Upfield, Sara Paretsky, Andrea Camilleri, Fred Vargas, Ruth Rendell, Stieg Larsson, Leonardo Padura, Georges Simenon, Paco Ignacio Taibo II, and Donna Leon. The collection covers a range of issues, such as the provision of intra-, peri- or paratextual recipes, the aesthetics and ethics of food, eating rituals as indications of cultural belonging, and regional, national and supranational identities. It also tackles eating disorders and other seemingly abnormal habits as signs of Otherness. Also mentioned are the television productions of the Inspector Montalbano series (1999-ongoing), the Danish-Swedish Bron/Broen (2011, The Bridge), and its remakes The Tunnel (2013, France/UK) and The Bridge (2013, USA).

For the Enjoyment of the People Mary E. Stuckey,2023-07-25 National parks are widely revered as “America’s best idea”—they are abundantly popular and remarkably noncontroversial in the United States. American presidents use these parks to stake their claims to environmentalism, assert a singular national history, and define a unified national identity, often doing so inside the parks themselves. However, the establishment and history of almost every national park has been riddled with conflict over competing claims to land, knowledge, and economic interests. Like any major area of public policy, the fissures present in debates over the national parks also represent important fracture lines in the public understanding of the meaning of America and of individual claims to citizenship. The park system, in other words, does a lot of political work for both presidents and the mass public, even though much of that work goes largely unnoticed. This book explores that political work by addressing themes of national origins and the dispossession of Indigenous peoples; monuments to the national past, heritage, and the assertion of a national narrative; environmentalism and natural resources; and exploitation of the national landscape for economic gain. In *For the Enjoyment of the People*, Mary Stuckey looks at the politics of the parks as well as what the parks can teach us about citizenship and what it means to be American. Stuckey asserts that through the national parks we can hope to explain the past, clarify the present, and project the future. Combining interdisciplinary conversations about tourism, public memory, national history, park history, the presidency, and national identity, Stuckey contributes insightful ideas to the conversation on the history of national parks while examining the natural, military, and patriotic nature of America’s best idea.

players to bring attention to racial inequality in America.

Differences, Deceits and Desires Mirna Cicioni,Nicoletta Di Ciolla,2008 Italian crime fiction (known as gialli in Italy) has developed from a popular genre to a fully-fledged literary genre; and in the past thirty years it has gradually become the focus of growing interest from literary critics as well as the reading public. This collection of twelve essays is the first one in English to deal exclusively with Italian crime fiction. The essays are scholarly yet accessible contributions to the growing research in this field. They analyze texts by well-known authors (such as Umberto Eco, Leonardo Sciascia and Andrea Camilleri) as well as works by younger writers. They bring together four of the most significant strands of Italian gialli: the way gialli develop or subvert the tradition and conventions of the crime genre; regional specificity within Italian crime fiction; gialli by and about women, lesbians and gay men; and representations of Italy in gialli written by English-speaking writers.

Challenges in Endocrine Disruptor Toxicology and Risk Assessment Alexandra Fucic,Alberto Mantovani,2020-12-08 Insight into the role of hormones, particularly estrogen and testosterone, in health and disease etiology - including interactions with other hormone pathways - has dramatically changed. Estrogen and androgen receptors, with their polymorphisms, are key molecules in all tissues and are involved in a number of homeostatic mechanisms but also pathological processes including carcinogenesis and the development of metabolic and neurological disorders such as diabetes and Alzheimer's disease. Endocrine disrupting chemicals (EDCs) can interfere with the endocrine (hormone) systems at certain dosages and play a key role in the pathology of disease. Most known EDCs are manmade and are therefore an increasing concern given the number commonly found in household products and the environment. This book will cover the mechanisms of EDC pathology across the spectrum of disease, as well as risk assessment and government and legal regulation to provide a holistic view of the current issues and cutting-edge research in the topic. With contributions from global leaders in the field, this book will be an ideal reference for toxicologists, endocrinologists and researchers interested in developmental biology, regulatory toxicology and the interface between environment and human health.
