*The Politics of Health in the Canadian Welfare State* Toba Bryant, Dennis Raphael, 2020-08-14 The first book to discuss the Canadian welfare state through a health-focused lens, *The Politics of Health in the Canadian Welfare State* argues that the nature of Canada's liberal welfare state shapes the health care system, the social determinants of health, and the health of all Canadians. Documenting decades of work on the social determinants of health, authors Toba Bryant and Dennis Raphael explore topics such as power and influence in Canadian society, socially and economically marginalized populations, and approaches to promoting health. Each chapter examines different aspects of the links between public policy, health, and the welfare state, investigating how broader societal structures and processes of the country's economic and political systems shape living and working conditions and, inevitably, the overall health of Canadians. Contextualizing the history and status of Canadian health and health care systems with Canada's welfare state, this concise and timely text is well suited as a supplementary resource for health studies, sociology of health, and nursing courses in universities across Canada.

**The Political Power of Global Corporations** John Mikler, 2018-02-12 We have long been told that corporations rule the world, their interests seemingly taking precedence over states and their citizens. Yet, while states, civil society, and international organizations are well drawn in terms of their institutions, ideologies, and functions, the world's global corporations are often more simply sketched as mechanisms of profit maximization. In this book, John Mikler re-casts global corporations as political actors with complex identities and strategies. Debunking the idea of global corporations as exclusively profit-driven entities, he shows how they seek not only to drive or modify the agendas of states but to govern in their own right. He also explains why we need to re-territorialize global corporations as political actors that reflect and project the political power of the states and regions from which they hail. We know the global corporations' names, we know where they are headquartered, and we know where they invest and operate. Economic processes are increasingly produced by the control they possess, the relationships they have, the leverage they employ, the strategic decisions they make, and the discourses they create to enhance acceptance of their interests. This book represents a call to study how they do so, rather than making assumptions based on theoretical abstractions.
