**Time-Driven Activity-Based Costing** Robert S. Kaplan, Steven R.

Anderson, 2007-02-22 In the classroom, ABC looks like a great way to manage a company's resources. But many executives who have tried to implement ABC on a large scale in their organizations have found the approach limiting and frustrating. Why? The employee surveys that companies used to estimate resources required for business activities proved too time-consuming, expensive, and irritating to employees. This book shows you how to implement time-driven activity-based costing (TDABC), an easier and more powerful way to implement ABC. You can now estimate directly the resource demands imposed by each business transaction, product, or customer. The payoff? You spend less time and money obtaining and maintaining TDABC data—and more time addressing problems that TDABC reveals, such as inefficient processes, unprofitable products and customers, and excess capacity. The authors also show how to use TDABC to link strategic planning to operational budgeting, to enhance the due diligence process for mergers and acquisitions, and to support continuous improvement activities such as lean management and benchmarking. In presenting their model, the authors define the two questions required to build TDABC: 1) How much does it cost per time unit to supply resource capacity for each business process? 2) How much resource capacity (time) is required to perform work for a company's many transactions,

products, and customers? The book demonstrates how to develop simple, valid answers to these two questions. Kaplan and Anderson illustrate the TDABC approach with a wealth of case studies, in diverse settings, based on actual implementations.

The AIDS Conspiracy Nicoli Nattrass, 2012 Examines conspiracy theories surrounding HIV and AIDS, focusing on two main widely believed falsehoods-- that America manufactured AIDS to be a biological weapon and the belief that HIV is harmless and the true cause of AIDS are antiretroviral drugs.

*AIDS at 30* Victoria A. Harden, Anthony Fauci, MD, 2012-01-01 Society was not prepared in 1981 for the appearance of a new infectious disease, but we have since learned that emerging and reemerging diseases will continue to challenge humanity. *AIDS at 30* is the first history of HIV/AIDS written for a general audience that emphasizes the medical response to the epidemic. Award-winning medical historian Victoria A. Harden approaches the AIDS virus from philosophical and intellectual perspectives in the history of medical science, discussing the process of scientific discovery, scientific evidence, and how laboratories found the cause of AIDS and developed therapeutic interventions. Similarly, her book places AIDS as the first infectious disease to be recognized simultaneously worldwide as a single phenomenon. After years of believing that vaccines and antibiotics would keep deadly epidemics away, researchers, doctors, patients, and the public were forced to

abandon the arrogant assumption that they had conquered infectious diseases. By presenting an accessible discussion of the history of HIV/AIDS and analyzing how aspects of society advanced or hindered the response to the disease, AIDS at 30 illustrates for both medical professionals and general readers how medicine identifies and evaluates new infectious diseases quickly and what political and cultural factors limit the medical community's response.

**East German Foreign Intelligence** Kristie Macrakis, Thomas Wegener Friis, Helmut Müller-Enbergs, 2009-09-10 This edited book examines the East German foreign intelligence service (Hauptverwaltung Aufklärung, or HVA) as a historical problem, covering politics, scientific-technical and military intelligence and counterintelligence. The contributors broaden the conventional view of East German foreign intelligence as driven by the inter-German conflict to include its targeting of the United States, northern European and Scandinavian countries, highlighting areas that have previously received scant attention, like scientific-technical and military intelligence. The CIA's underestimation of the HVA was a major intelligence failure. As a result, East German intelligence served as a stealth weapon against the US, West German and NATO targets, acquiring the lion's share of critical Warsaw Pact intelligence gathered during the Cold War. This book explores how though all of the CIA's East German sources were double agents controlled by the Ministry of State Security, the CIA was still able to

declare victory in the Cold War. Themes and topics that run through the volume include the espionage wars; the HVA's relationship with the Russian KGB; successes and failures of the BND (West German Federal Intelligence Service) in East Germany; the CIA and the HVA; the HVA in countries outside of West Germany; disinformation and the role and importance of intelligence gathering in East Germany. This book will be of much interest to students of East Germany, Intelligence Studies, Cold War History and German politics in general. Kristie Macrakis is Professor at the Georgia Institute of Technology, Atlanta. Thomas Wegener Friis is an Assistant Professor at the University of Southern Denmark's Centre for Cold War Studies. Helmut Müller-Enbergs is currently a Visiting Professor at the University of Southern Denmark and holds a tenured senior staff position at the German Federal Commission for the STASI Archives in Berlin.

**Spymaster** Oleg Kalugin, 2009-03-03 Oleg Kalugin oversaw the work of American spies, matched wits with the CIA, and became one of the youngest generals in KGB history. Even so, he grew increasingly disillusioned with the Soviet system. In 1990, he went public, exposing the intelligence agency's shadowy methods. Revised and updated in the light of the KGB's enduring presence in Russian politics, Spymaster is Kalugin's impressively illuminating memoir of the final years of the Soviet Union.

KGB Lexicon Vasili Mitrokhin, 2013-01-11 In this volume Mitrokhin presents

two dictionaries produced by the KGB itself to define their activities in both offensive and defensive intelligence work. The translated documents tell the story of the KGB's methods and targets and should interest the general public as well as the specialist.

**Warriors of Disinformation** Alvin A. Snyder, 2012-05-01 Have you ever thought about what really goes on behind the walls of the White House or the Pentagon? Particularly in times of political upheaval, it often seems that the government and the media work together to keep the voting public confused and distracted. In *Warriors of Disinformation*, Alvin A. Snyder, a former director of USIA's Television and Film Service, reveals the various propaganda campaigns sent out by the United States during the Cold War, one of the most strained, uncertain times in American political history. Snyder examines the "shady" billion-dollar dealings dedicated to "an exaggerated version of the truth," and how President Reagan deceived the Soviets with well-plotted plans of fabrication. Readers will be shocked by the lengths that our government went to in order to hide the truth, and to consistently lie to not only the Soviets, but also to the American people about what was going on in the "land of the free." *Warriors of Disinformation* is an incredible look inside the government from someone who was on the front line. Hear stories that were never supposed to leave confidential meeting rooms and

find out firsthand what went on behind closed doors. Snyder has a story to tell you, and you'd be crazy not to listen.

**The KGB and Soviet Disinformation** Ladislav Bittman,1985 Fortæller om hvordan falske oplysninger udsprede og om fænomenets uhyggelige omfang. De enkelte operationer udføres meget dygtigere samt er meget farligere og meget vanskeligere at afsløre, end man i Vesten er klar over.
