From Workshop to Waste Magnet

Diane Sicotte, 2016-09-21 Like many industrialized regions, the Philadelphia metro area contains pockets of environmental degradation: neighborhoods littered with abandoned waste sites, polluting factories, and smoke-belching incinerators. However, other neighborhoods within and around the city are relatively pristine. This eye-opening book reveals that such environmental inequalities did not occur by chance, but were instead the result of specific policy decisions that served to exacerbate endemic classism and racism. From Workshop to Waste Magnet presents Philadelphia's environmental history as a bracing case study in mismanagement and injustice. Sociologist Diane Sicotte digs deep into the city's past as a titan of American manufacturing to trace how only a few communities came to host nearly all of the area's polluting and waste disposal land uses. By examining the complex interactions among economic decline, federal regulations, local politics, and shifting ethnic demographics, she not only dissects

what went wrong in Philadelphia but also identifies lessons for environmental justice activism today. Sicotte's research tallies both the environmental and social costs of industrial pollution, exposing the devastation that occurs when mass quantities of society's wastes mix with toxic levels of systemic racism and economic inequality. *From Workshop to Waste Magnet* is a compelling read for anyone concerned with the health of America's cities and the people who live in them.

Natural and Engineered Solutions for Drinking Water Supplies Emily Alcott, Mark S Ashton, Bradford S

Gentry, 2013-03-26 Illuminating opportunities to develop a more integrated approach to municipal water system design, *Natural and Engineered Solutions for Drinking Water Supplies: Lessons from the Northeastern United States and Directions for Global Watershed Management* explores critical factors in the decision-making processes for municipal water system delivery. The book offers vital insights to help inform management decisions on drinking water supply issues in other global regions in our increasingly energy- and carbon-constrained world. The study evaluates how six cities in the northeastern United States have made environmental, economic, and social decisions and adopted programs to protect and manage upland forests to produce clean drinking water throughout their long histories. New York, New York; Boston and Worcester, Massachusetts; New Haven and Bridgeport, Connecticut; and Portland, Maine have each managed city watersheds under different state regulations, planning and development incentives, biophysical constraints, social histories, and ownerships. Some of the overarching questions the book addresses relate to how managers should optimize the investments in their drinking water systems. What is the balance between the use of concrete/steel treatment plants (gray infrastructure) and forested/grassland/wetland areas (green infrastructure) to protect surface water quality? The case studies compare how engineered and/or natural systems are employed to

protect water quality. The conclusions drawn establish that it makes environmental, economic, and social sense to protect and manage upland forests to produce water as a downstream service. Such stewardship is far more preferable than developing land and using engineering, technology, and artificial filtration as a solution to maintaining clean drinking water. Lessons learned from this insightful study provide effective recommendations for managers and policymakers that reflect the scientific realities of how forests and engineering can be best integrated into effective watershed management programs and under what circumstances.

Keith, 2016-07-01 The airwaves in America are being used by armed militias, conspiracy theorists, survivalists, the religious right, white supremacists, neo-Nazis, and other radical groups to reach millions with their messages of hate and fear. Waves of Rancor examines the origin, nature, and impact of right-wing electronic media, including radio, television, cable, the internet, and even music CDs.

The Toxic Schoolhouse Madeleine Kangsen

Scammell, Charles Levenstein, 2016-12-05 The Toxic Schoolhouse is a collection of articles on chemical hazards endangering students, teachers, and staff in the education system of the United States and Canada. Some of the articles were originally published in a special issue of New Solutions: A Journal of

Occupational and Environmental Policy, but all have been updated and several new articles have been added. The book is organized in three sections. The first describes problems ranging from the failures of coordination, monitoring, and siting of school buildings to the hazards of exposure to toxic substances, including lead and PCBs. The second section captures the voices of activists seeking change and describes community and union organizing efforts to improve school conditions. The third section covers policy solutions. The authors include academics, union staff and rank-and-file activists, parent organization leaders, and public health professionals.

Autism and the God Connection William

Stillman,2006-04-01 Everyone who seeks a more compassionate and wise life will benefit from this wonderful, insightful, and beautiful book. — Gary Zukav, author of The Seat of the Soul One in 68 US children have an autism spectrum disorder, and with countless parenting books helping families care for children with special needs, Autism and the God Connection is the crucial, spiritual look at understanding a child with autism. Helping parents realize their child's unique spirit and reaffirm that every one of us is a blessing, this is an inspirational resource to discovering the intellect, beauty, and complexities of children with autism. Through countless interviews, William Stillman documents extraordinary examples of spiritual giftedness, and boldly challenges our traditionally held beliefs about people with disabilities. Readers will discover hope, comfort, inspiration, and love through these affirming anecdotes of ordinary families.

Can you Handle this Messiah? Ian Traill,2010 Jesus Christ is God, the living Word, who became flesh through His miraculous conception by the Holy Spirit and His virgin birth. Therefore, He is perfect Deity and true humanity united in one person forever. He lived a sinless life and voluntarily atoned for the sins of men

by dying on the cross as our substitute, thus satisfying divine justice and accomplishing salvation for all who trust in Him alone. It is His life, the 'Word made flesh', that we will look at in detail in this book. His personality and ministry as set out in the Gospels. By understanding His personality I hope to develop a revelation in your heart of how Emmanuel, "God with us" can enable you to see how Jesus can identify with your infirmities. By studying His personality and His ministry it is hoped that all readers will develop a fuller understand of His attributes so that all can have a healthy perspective of who He is. The reason I say this is that many artists have tried to capture the personality Jesus Christ on canvas, but sad to say they have never been able to encapsulate every attribute or a true perspective of our great God, Jesus. Jesus is the Living Word and therefore we need only to delve into the written Word of God to get a clear picture of Him. He is found in the Word of God and that will leave a deep impression in your heart.

The Modern Papacy Samuel Gregg, 2013-02-21 Since the dawn of the Enlightenment, modernity and the Papacy have experienced a difficult though never severed relationship. The Modern Papacy goes beyond the caricatures to demonstrate how the popes - specifically John Paul II and Benedict XVI - have articulated a sophisticated critique of the post-Enlightenment world, one that acknowledges the real progress made in modernity while simultaneously highlighting its political and philosophical shortcomings. Far from falling on deaf ears, the nature of their engagement with the modern world has sparked criticism and praise from Catholics and non-Catholics alike - sometimes in surprising ways. Whether the subject is faith and reason, religion and the modern sciences, the roots and future of Europe, or the origin and ends of human freedom, John Paul II and Benedict XVI pose questions that simply cannot be ignored, regardless of whether one likes their answers.
