Violence and the Body Arturo J. Aldama,2003-05-28 Violence and the Body: Race, Gender, and the State explores the relationship between subalternity, the discourse and technology of the body, and the rise and proliferation of racial, colonial, sexual, domestic, and state violence, examining the materiality of violence on the otherized body. Grounded in U.S./Mexico border and Latin American cultural studies, the essays in this collection intersect discussions of subalternity, violence, and discourses of the body in a transethnic, feminist, and global cultural studies context. They provide a global mapping of contemporary modes and acts of physical and representational violence and demonstrate how discourses of otherization are reinforced and interanimated through violence on what Elizabeth Grosz has called the intensities and flows of the body.

The Human Society and the Internet: Internet Related Socio-Economic Issues Won Kim,Tok-Wang Ling,Yoon-Joon Lee,Seung-Soo Park,2003-06-29 During the past several years, the world has entered the first phase of the Internet Revolution. Investors showed confidence and faith in the prospects of the Internet driven economy. In the US alone, some 30,000 dot com companies have sprung up to support electronic commerce with a wide variety of business models, technologies, and/or items or services to sell or even give away. Traditional businesses, so called brick and mortar, or offline, businesses, have started to respond to challenges by Internet based new competitors by augmenting their own businesses with Internet based, or online, businesses and/or filing lawsuits against them. The initial business to consumer orientation of electronic commerce is giving way to business to business commerce, with large corporations forming electronic exchanges or consortia to conduct commerce among members. Government, industry, and civic groups have started addressing social issues related to the Internet, such as taxation on electronic commerce, privacy, intellectual property rights, security, hacking, cyber crimes, digital divide, etc. Governments have started legitimizing electronic signatures and stepping up efforts to track down perpetrators of cyber crimes. The courts have started to wrestle with issues of privacy, intellectual property rights, crimes, and impediments to Internet driven economy.

Library/Vendor Relationships Sam Brooks,David H. Carlson,2014-05-01 A view of the mutual dependence between libraries and vendors As technology advances, libraries are forced to reach beyond their own resources to find effective ways to maintain accuracy and superior service levels. Vendors provide databases and integrated library systems that perform those functions for profit. Library/Vendor Relationships examines the increasing cooperation in which libraries find they must participate in, and vice versa, with the vendors that provide system infrastructure and software. Expert contributors provide insights from all sides of this unique collaboration, offering cogent perspectives on the give and take process that every librarian, publisher, and database provider/producer can use. The symbiosis between libraries and vendors of databases relies heavily upon open communication to achieve each one's beneficial results. Library/Vendor Relationships explores this partnership between profit and nonprofit entities in detail, focusing on issues of crucial importance for both sides. A variety of diverse types of libraries and vendors give voice to the multitude of issues facing them. Several charts, graphs, and other helpful visuals are included. Topics in Library/Vendor Relationships include: options for preventing systematic downloading of material benefits and challenges of delivering products on multiple platforms—using the American Psychological Association's experiences as a case study book vendors' efforts to help libraries become more efficient comprehensive online support services to help increase interaction between libraries and academic publishers Anatolian University Libraries Consortium's effective relationship with vendors publisher and vendor use of library advisory boards to provide needed feedback a review of the database marketplace fostering a good relationship between library and vendor the future of government libraries in an increasingly technological age collaboration in standards development integrated ecommerce the relationship between OCLC and member institutions libraries' position between commerce and science vendor/community college library relationships e-mail discussion lists and more! PACS and Digital Medicine Yu Liu,Jihong Wang,2010-11-05 To improve efficiency and reduce administrative costs, healthcare providers, insurance companies, and governments are increasingly using integrated electronic health record (EHR) and picture archiving and communication systems (PACS) to manage patients' medical information. Reflecting the latest applications of PACS technology, PACS and Digital Medicine: Essential Principles and Modern Practice discusses the essential principles of PACS, EHR, and related technological advancements as well as practical issues concerning the implementation, operation, and maintenance of PACS and EHR systems. The book focuses on various components of PACS that use state-of-the-art technologies. The authors first present topics to consider prior to implementation, including design principles for PACS components and theory. They also cover post-installation quality control; security and privacy policies; maintenance, including upgrade/integration with other

information systems; and governing standards. Each chapter includes an introduction to basic concepts and principles relevant to the topics, before exploring challenges that PACS users may encounter in daily work. Discussions are supplemented with more than 130 illustrations, along with case studies of implementation in two organizations.
