Materials for Total Joint Arthroplasty Robert Sonntag, J. A. N. Philippe KRETZER, 2015-10-14 The replacement of a degenerated joint such as the hip and knee is one of the most outstanding interventions that allows the medical community to restore the patient's quality of life. However,

today's patient is increasingly younger and more active and this presents a challenge for the orthopaedic community as a greater demand has been created for a longer lasting artificial joint that can allow the patient to maintain their lifestyle and thus new approaches in biotribology have been focused on this area of research. This invaluable book provides a broad introduction to the boundary conditions, developments and latest research activities already available to the surgeon and offers an insight into solutions being developed for new high performance bearings in joint replacements. The contributors are leading experts in their field and this is the first complete volume to bring together such unique insights. Orthopaedic engineers, surgeons and researchers concerned with new biomaterials would find this a vital reference volume to evaluate the latest state of research in the area.--

Prime Time Soap Operas on Indian Television

Shoma Munshi, 2020-02-18 This book examines the phenomenon of primetime soap operas on Indian television. An anthropological insight into social issues and practices of contemporary India through the television, this volume analyzes the production of soaps within India's cultural fabric. It deconstructs themes and issues surrounding the everyday and the middle class through the fiction of the popular. In its second edition, this still remains the only book to examine prime time soap operas on Indian television. Without in any way changing the central arguments of the first edition, it adds an

essential introductory chapter tracking the tectonic shifts in the Indian mediascape over the past decade - including how the explosion of regional language channels and an era of multiple screens have changed soap viewing forever. Meticulously researched and persuasively argued, the book traces how prime time soaps in India still grab the maximum eyeballs and remain the biggest earners for TV channels. The book will be of interest to students of anthropology and sociology, media and cultural studies, visual culture studies, gender and family studies, and also Asian studies in general. It is also an important resource for media producers, both in content production and television channels, as well as for the general reader.

New Frontiers in Information and Software as Services Divyakant Agrawal, K. Selçuk Candan, Wen-Syan Li, 2011-01-28 The increasing costs of creating and maintaining infrastructures for delivering services to consumers have led to the emergence of cloud based third party service providers renting networks, computation power, storage, and even entire software application suites. On the other hand, service customers demand competitive pricing, service level agreements, and increased flexibility and scalability. Service consumers also expect process and data security, 24/7 service availability, and compliance with privacy regulations. This book focuses on such challenges associated with the design, implementation, deployment, and management of data and software as a service. The 12 papers presented in this volume were contributed by leaders in academia and industry, and were reviewed and supervised by an expert editorial board. They describe cutting-edge approaches in areas like service design, service security, service optimization, and service migration.

Indian Art History Parul Pandya Dhar, 2011 Papers presented at the Seminar Historiography of Indian Art : Emergent Methodological Concerns, held at New Delhi during 19-21 September 2006.

General Surgical Operations Raymond Maurice Kirk, Robin Charles Noel Williamson, 1987 *General Surgical Operations* is a highly-praised and comprehensive textbook of operative surgery. It is a practical manual aimed at the surgeon who is about to carry out an operation, rather than just a description of the principles suitable for an examiner. This book is aimed primarily at a trainee studying for the UK and Ireland Intercollegiate FRCS and equivalent examinations around the world. It is, however, also intended as a vade mecum for a trained surgeon anywhere, who is about to carry out an infrequently performed procedure, perhaps in emergency conditions. It will therefore serve as a useful reference manual for every surgeon. This is a 'What to do' book. Using it the reader can aspire to gain diagnostic, decision making and operative surgical competence with confidence.

Rethink the MBA Micah Merrick, 2014-03-07 My name is Micah. I got an MBA in 2009 from Wharton. I went to business school to become an entrepreneur. It was a mistake. I believe many people get an MBA for the wrong reasons, like me. If you're interested in an MBA, but don't want to work in Banking or Consulting, this book is for you. I should never have gotten an MBA. Maybe you shouldn't either. This book explains why, and offers suggestions for what you can do instead.
