### **Transatlantic Relations in the 21st Century** Erwan

Lagadec, 2012-05-16 This book offers an overview of the interface between European integration, transatlantic relations, and the 'rise of the rest' in the early 21st century. The collapse of the Soviet bloc opened up an era in which the drivers and perceived benefits of the US alliance among European countries have become more variegated and shifting. The proposition that the US remains at once an 'indispensable' and 'intolerable' nation in Europe is a key concept in the alliance, as the US remains inextricably tied to the continent through economic, military and cultural links. This work examines this complex subject area from many angles, including an analysis of the historical and cultural contexts of America's relations with Europe, as well as a discussion of the politics of transatlantic affairs which utilises evidence gleaned from a series of case-studies. In the concluding chapters, the author assesses the likelihood that the West can entrench its global dominance in the realms of soft and hard power, and by effecting a controlled reform that will see multilateral structures open up to emerging powers. This book will be of great interest to students of European Politics, EU integration, transatlantic relations, US foreign policy/diplomacy, International Security and IR in general.

### **Maritime Security Challenges in the South Atlantic**

Érico Duarte, Manuel Correia de Barros, 2018-12-20 This edited volume focuses on the South Atlantic regional and national issues with maritime implications: naval policy, security, transnational organized crime, and Europe's legacy and current influence. The work analyzes the positions in favor and against NATO's extended role in the South Atlantic, the historical and current issues related to the Falklands War, the African national deficits, and

initiatives to attend the regional maritime problems. Including contributions from Angolan, Brazilian, Senegalese, and US collaborators, the volume offers eclectic conceptual frameworks, rich historical backgrounds, updated data, original analysis models, and policy recommendations.

Queering and Querying the Paradise of Paradox Steven F. Butterman, 2021-06-02 Provides the first comprehensive discourse analysis of the dynamics and features of the largest LGBT Pride Parade in the world.

*Blacks & Whites in São Paulo, Brazil, 1888-1988* George Reid Andrews, 1991 In *Buried Indians*, Laurie Hovell McMillin presents the struggle of her hometown, Trempealeau, Wisconsin, to determine whether platform mounds atop Trempealeau Mountain constitute authentic Indian mounds. This dispute, as McMillin subtly demonstrates, reveals much about the attitude and interaction - past and present - between the white and Indian inhabitants of this Midwestern town. McMillin's account, rich in detail and sensitive to current political issues of American Indian interactions with the dominant European American culture, locates two opposing views: one that denies a Native American presence outright and one that asserts its long history and ruthless destruction. The highly reflective oral histories McMillin includes turn *Buried Indians* into an accessible, readable portrait of a uniquely American culture clash and a dramatic narrative grounded in people's genuine perceptions of what the platform mounds mean.

**Nanotechnology and Development** Shyama V. Ramani, 2014-04-28 Nanotechnology is a generic platform with potential applications in many sectors. It promises to be a motor of economic growth with inclusive development through innovation related to materials, foods, medicines,

and so on. This book identifies the nature and magnitude of the nanotechnology divide between high-income countries and the rest of the world. It also studies the determinants of the evolution and functioning of state policy and technology clusters in developed regions like the USA and the EU in order to identify the strategies that can or cannot be replicated elsewhere. Tracing the trajectories in nanotechnology being carved out by four emerging countries: China, India, Brazil and Mexico, it identifies common as well as country-specific factors that influence the rates of return to public and private investment related to nanotechnology in emerging countries. The book also makes policy recommendations to bridge the nanotechnology divide while promoting economic growth and inclusive development.

### **International Encyclopedia of Transportation**

,2021-05-13 In an increasingly globalised world, despite reductions in costs and time, transportation has become even more important as a facilitator of economic and human interaction; this is reflected in technical advances in transportation systems, increasing interest in how transportation interacts with society and the need to provide novel approaches to understanding its impacts.

This has become particularly acute with the impact that Covid-19 has had on transportation across the world, at local, national and international levels. Encyclopedia of Transportation, Seven Volume Set - containing almost 600 articles - brings a cross-cutting and integrated approach to all aspects of transportation from a variety of interdisciplinary fields including engineering, operations research, economics, geography and sociology in order to understand the changes taking place. Emphasising the interaction between these different aspects of research, it offers new solutions to modern-day problems related to transportation. Each of its nine sections is based around familiar themes, but brings together the views of experts from different disciplinary perspectives. Each section is edited by a subject expert who has commissioned articles from a range of authors representing different disciplines, different parts of the world and different social perspectives. The nine sections are structured around the following themes: Transport Modes; Freight Transport and Logistics; Transport Safety and Security; Transport Economics; Traffic Management; Transport Modelling and Data Management; Transport Policy and Planning; Transport Psychology; Sustainability and Health Issues in Transportation. Some articles provide a technical introduction to a topic whilst others provide a bridge between topics or a more future-oriented view of new research areas or challenges. The end result is a reference work that offers researchers and practitioners new approaches, new ways of thinking and novel solutions to problems. All-encompassing and expertly authored, this outstanding reference work will be essential reading for all students and researchers interested in transportation and its global impact in what is a very uncertain world. Provides a forward looking and integrated approach to

transportation Updated with future technological impacts, such as self-driving vehicles, cyber-physical systems and big data analytics Includes comprehensive coverage Presents a worldwide approach, including sets of comparative studies and applications

**Raza Studies** Julio Cammarota, Augustine Romero, 2014-02-27 The well-known and controversial Mexican American studies (MAS) program in Arizona's Tucson Unified School District set out to create an equitable and excellent educational experience for Latino students. *Raza Studies: The Public Option for Educational Revolution* offers the first comprehensive account of this progressive—indeed revolutionary—program by those who created it, implemented it, and have struggled to protect it. Inspired by Paulo Freire's vision for critical pedagogy and Chicano activists of the 1960s, the designers of the program believed their program would encourage academic achievement and engagement by Mexican American students. With chapters by leading scholars, this volume explains how the program used "critically compassionate intellectualism" to help students become "transformative intellectuals" who successfully worked to improve their level of academic achievement, as well as create social change in their schools and communities. Despite its popularity and success inverting the achievement gap, in 2010 Arizona state legislators introduced and passed legislation with the intent of banning MAS or any similar curriculum in public schools. *Raza Studies* is a passionate defense of the program in the face of heated local and national attention. It recounts how one program dared to venture to a world of possibility, hope, and struggle, and offers compelling evidence of success for social justice education programs.

*Paulo Freire: Relevance to Indian Teacher Education*  
DR. UDAY MEHTA, DR. SHEFALI PANDYA,

Syrian and Lebanese Patricios in Sao Paulo Oswaldo Truzzi, 2018-08-30 Syrian and Lebanese immigrants to Brazil chose to settle in urban areas, a marked contrast to many other migrant groups. In São Paulo, these newcomers embraced new lives as merchants,

shopkeepers, and industrialists that made them a dominant force in the city's business sector. Oswaldo Truzzi's original work on these so-called patrícios changed the face of Brazilian studies. Now available in an English translation, Truzzi's pioneering book identifies the complex social paths blazed by Syrian and Lebanese immigrants and their descendants from the 1890s to the 1960s. He considers their relationships to other groups within São Paulo's kaleidoscopic mix of cultures. He also reveals the differences--real and perceived--between Syrians and Lebanese in terms of religious and ethnic affinities and in the economic sphere. Finally, he compares the two groups with their counterparts in the United States and looks at the wave of Lebanese Muslims to São Paulo that began in the 1960s.

The Untranslatable Image Alessandra Russo, 2014  
Moving beyond the dominant model of syncretism, this extensively illustrated volume proposes a completely different approach to the field known as Latin American colonial art, positioning it as a constitutive part of Renaissance and early modern art history. From the first contacts between European conquerors and the peoples of the Americas, objects were exchanged and treasures pillaged, as if each side were seeking to appropriate tangible fragments of the world of the other. Soon, too, the collision between the arts of Renaissance Europe and pre-Hispanic America produced new objects and new images with the most diverse usages and forms. Scholars have used terms such as syncretism, fusion, juxtaposition, and hybridity in describing these new works of art, but none of them, asserts Alessandra Russo, adequately conveys the impact that the European artistic world had on the Mesoamerican artistic world or treats the ways in which pre-Hispanic traditions, expertise, and techniques--as well as the creation of post-Conquest images--transformed the course of Western art. This innovative study focuses on three sets of paradigmatic images created in New Spain between the sixteenth and seventeenth centuries--feather mosaics, geographical maps, and graffiti--to propose that the singularity of these creations arises not from a syncretic impulse, but rather from a complex process of untranslatability. Foregrounding the distances and differences between incomparable theories and practices

of images, Russo demonstrates how the constant effort to understand, translate, adapt, decode, transform, actualize, and condense Mesoamerican and European aesthetics, traditions, knowledge, techniques, and concepts constituted an exceptional engine of unprecedented visual and verbal creativity in the early modern transatlantic world.
