*The Encyclopedia of Philosophy* Donald M. Borchert,1996 The first English-language reference of its kind, The Encyclopedia of Philosophy was hailed as 'a remarkable and unique work' (Saturday Review) that contained 'the international who's who of philosophy and cultural history' (Library Journal).

*The Problems of Philosophy* Bertrand Russell,2022-05-17 The Problems of Philosophy is a book by the philosopher Bertrand Russell, in which the author attempts to create a brief and accessible guide to the problems of philosophy. He introduces philosophy as a repeating series of (failed) attempts to answer the same questions: Can we prove that there is an external world? Can we prove cause and effect? Can we validate any of our generalizations? Can we objectively justify morality? He asserts that philosophy cannot answer any of these questions and that any value of philosophy must lie elsewhere than in offering proofs to these questions. Wittgenstein suggested further that these questions are empty and the value of philosophy is as an assistant to science.Focusing on problems he believes will provoke positive and constructive discussion, Russell concentrates on knowledge rather than metaphysics: If it is uncertain that external objects exist, how can we then have knowledge of them but by probability. There is no reason to doubt the existence of external objects simply because of sense data.\_x000D\_\_x000D\_\_x000D\_

**Localizing and Transnationalizing Contentious Politics** Teresa S. Encarnacion Tadem,2009 The Philippines makes an interesting case for examining direct and collective acts of contention against the neoliberal project of economic globalization. Crippled by foreign debt, indiscriminate liberalization of trade, falling stock markets, and perpetual corruption, the Philippines is also a democratic polity and one of the few countries in Asia with a vibrant and dynamic civil society sector. This collection has chapters on the Freedom from Debt Coalition's campaign on debt relief, the Stop-the-New-Round Coalition's advocacy to change international trade rules and barriers, the global taxation initiative as embodied in Tobin tax advocacy in the country, the Transparency and Accountability Network's anti-corruption effort, and the Philippine Fair Trade Forum's enterprise on fair trade. Localizing and Transnationalizing Contentious Politics is the first work of its kind to focus on five global civil society movements in the Philippines and their responses to the inequities of neoliberal globalization. Northern scholars have acknowledged the persistent absence of the South in research on activism around global issues, and this book can help fill this gap. Using political process theory as a framework, the book traces the emergence, development and diffusion of these social movements in the Philippines. Globalization is taken as the environment in which they operate to highlight the role of increased interdependence and internationalization, and the predominance of a particular ideology in the dynamics of contention.

**Navigating Cross-Cultural Ethics** Eileen Morgan, 2012-09-10 Through the personal stories of managers running global business, this book takes an inside look into the dilemmas of managers who are asked to make profits ethically according to the dictates of their company's ethics code. It examines what companies think they are doing to help managers in those situations and how those managers are actually affected. Thanks to the boost from the 1991 Sentencing Guidelines which minimizes penalties for companies with ethics codes caught in ethical wrongdoing, more than 85% of US companies and two thirds of all Canadian companies and half of all European companies now have Codes of Ethics. Yet, over and over, we hear of stories of personal dilemmas and conflicts experienced by individual managers navigating those business waters in other cultures

Collegiality and Service for Tenure and Beyond Franklin H. Silverman, 2003-11-30 This book candidly provides assistant professors and graduate students contemplating a career in academia with practical information that will facilitate their meeting collegiality and service expectations for promotion and tenure. The focus is on meeting departmental and institutional expectations for collegiality and service. While a superior record for collegiality and service are unlikely to compensate for a weak teaching or publishing record, an inadequate record for one or both of these can result in denial of tenure and promotion. Following the recommendations in this book can substantially increase the likelihood of meeting collegiality and service expectations.

Part II concludes with two essays regarding the applicability of the Hart-Devlin debate on the 'enforcement of morals' vis-à-vis the International Criminal Court and an essay on what the historian Arnold Toynbee would have commented on the 'contingency' v 'teleology' debate between two palaeontologists the late Stephen Jay Gould and Simon Conway Morris.

*Libraries in the Twenty-First Century* Stuart J. Ferguson, 2007-05-31 *Libraries in the Twenty-First Century* brings together library educators and practitioners to provide a scholarly yet accessible overview of library and information management and the challenges that the twenty-first century offers the information profession. The papers in this collection illustrate the changing nature of the library as it evolves into its twenty-first century manifestation. The national libraries of Australia and New Zealand, for instance, have harnessed information and communication technologies to create institutions that are far more national, even democratic, in terms of delivery of service and sheer presence than their print-based predecessors. Aimed at practitioners and students alike, this publication covers specific types of library and information agencies, discusses specific aspects of library and information management and places developments in library and information services in a number of broad contexts: socio-economic, ethico-legal, historical and educational.

**The Craft of Research, 2nd edition** Wayne C. Booth, Gregory G. Colomb, Joseph M. Williams, 2008-04-15 Since 1995, more than 150,000 students and researchers have turned to *The Craft of Research* for clear and helpful guidance on how to conduct research and report it effectively. Now, master teachers Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams present a completely revised and updated version of their classic handbook. Like its predecessor, this new edition reflects the way researchers actually work: in a complex circuit of thinking, writing, revising, and rethinking. It shows how each part of this process influences the others and how a successful research report is an orchestrated conversation between a researcher and a reader. Along with many other topics, *The Craft of Research* explains how to build an argument that motivates readers to accept a claim; how to anticipate the reservations of thoughtful yet critical readers and to respond to them appropriately; and how to create introductions and conclusions that answer that most demanding question, So what? Celebrated by reviewers for its logic and clarity, this popular book retains its five-part structure. Part 1 provides an orientation to the research process and begins the discussion of what motivates researchers and their readers. Part 2 focuses on finding a topic, planning the project, and locating appropriate sources. This section is brought up to date with new information on the role of the Internet in research, including how to find and evaluate sources, avoid their misuse, and test their reliability. Part 3 explains the art of making an argument and supporting it. The authors have extensively revised this section to present the structure of an argument in clearer and more accessible terms than in the first edition. New distinctions are made among reasons, evidence, and reports of evidence. The concepts of qualifications and rebuttals are recast as acknowledgment and response. Part 4 covers drafting and revising, and offers new information on the visual representation of data. Part 5 concludes the book with an updated discussion of the ethics of research, as well as an expanded bibliography that includes many electronic sources. The new edition retains the accessibility, insights, and directness that have made *The Craft of Research* an indispensable guide for anyone doing research, from students in high school through advanced graduate study to businesspeople and government employees. The authors demonstrate convincingly that researching and reporting skills can be learned and used by all who undertake research projects. New to this edition: Extensive coverage of how to do research on the internet, including how to evaluate and test the reliability of sources New information on the visual representation of data Expanded bibliography with many electronic sources

*Maritime Issues in the South China Sea* Nien-Tsu Alfred Hu, Ted L. McDorman, 2013-10-31 South China Sea (SCS) issues are complex and dynamic, ranging from historic claims to present day military occupation, from military security to regional stability, from rhetorical appeasements to national interests, from intraregional competition to extraregional involvement. The submissions made in 2009 by several Southeast Asian states to the United Nations Commission on the Limits of the Continental Shelf (CLCS) respecting outer limits of extended continental shelves beyond 200 nautical miles in

the South China Sea resulted in renewed attention to the maritime disputes over the insular features and the waters of the South China Sea among several claimant States. Questions have resurfaced about the future of cooperation in the region. Furthermore, the improvement of cross-Strait relations between Taiwan and China after 2008 has added a new element to the evolution of South China Sea issues. This book describes these recent developments in depth and provides an examination of possible future developments in the South China Sea. The articles in this book were originally published as special sections in *Ocean Development & International Law*.

Northeast Asian Perspectives on International Law Seokwoo Lee, Hee Eun Lee, 2013-08-29 *Northeast Asian Perspectives on International Law: Contemporary Issues and Challenges* contends that international law is not only poised to take a bigger role in bringing about a resolution to the modern questions confronted by Japan, the People's Republic of China, and North and South Korea, but that international lawyers of the region are working to bring about greater regional cooperation and integration as seen in other regions in the world. This edited volume was inspired by the first joint international academic conference of international lawyers from the Chinese Society of International Law, Japanese Society of International Law, and Korean Society of International Law which took place in Seoul, Korea on July 3, 2010. With a range of timely topics including, but not limited to, North Korean human rights, the South China Sea, and Japan's efforts in UN peacekeeping operations, the esteemed contributors to *Northeast Asian Perspectives on International Law: Contemporary Issues and Challenges* examine how international law can promote peace and justice in Northeast Asia.

*Blessed Are the Peacemakers* Daniel L. Buttry, In the pages of this book, you will meet more than 100 heroes, but most of them are not the kind of heroes our culture celebrates for muscle, beauty and wealth. These are peacemakers. They circle the planet. A few are famous like Gandhi and Bono of U2. But most of them you will discover for the first time in these stories. Watch out! Reading about their lives may inspire you to step up into their courageous circle.

**Plato's Philebus** George H. Rudebusch, 2023-03-23 Written in the fourth century BCE, *Philebus* is likely one of Plato's last Socratic dialogues. It is also famously difficult to read and understand. A multilayered inquiry into the nature of life, *Philebus* has drawn renewed interest from scholars in recent years. Yet, until now, the only English-language commentary available has been a work published in 1897. This much-needed new commentary, designed especially for philosophers and advanced students of ancient Greek, draws on up-to-date scholarship to expand our understanding of Plato's complex work. In his in-depth introduction, George Rudebusch places the *Philebus* in historical, philosophical, and linguistic context. As he explains, the dialogue deals with the question of whether a good life consists of pleasure or knowing. Yet its exploration of this question is riddled with ambiguity. With the goal of facilitating comprehension, particularly for students of philosophy, Rudebusch divides his commentary into twenty discrete subarguments. Within this framework, he elucidates the significance—and possible interpretations—of each passage and dissects their philological details. In particular, he analyzes how Plato uses inference indicators (that is, the Greek words for “therefore” and “because”) to establish the structure of the arguments, markers difficult to present in translation. A detailed and thorough commentary, this volume is both easy to navigate and conducive to new interpretations of one of Plato's most intriguing dialogues.

*Soft Computing in Humanities and Social Sciences* Rudolf Seising, Veronica Sanz González, 2011-11-05 The field of Soft Computing in Humanities and Social Sciences is at a turning point. The strong distinction between “science” and “humanities” has been criticized from many fronts and, at the same time, an increasing cooperation between the so-called “hard sciences” and “soft sciences” is taking place in a wide range of scientific projects dealing with very complex and interdisciplinary topics. In the last fifteen years the area of Soft Computing has also experienced a gradual rapprochement to disciplines in the Humanities and Social Sciences, and also in the field of Medicine, Biology and even the Arts, a phenomenon that

did not occur much in the previous years. The collection of this book presents a generous sampling of the new and burgeoning field of Soft Computing in Humanities and Social Sciences, bringing together a wide array of authors and subject matters from different disciplines. Some of the contributors of the book belong to the scientific and technical areas of Soft Computing while others come from various fields in the humanities and social sciences such as Philosophy, History, Sociology or Economics. Rudolf Seising received a Ph.D. degree in philosophy of science and a postdoctoral lecture qualification (PD) in history of science from the Ludwig Maximilians University of Munich. He is an Adjoint Researcher at the European Centre for Soft Computing in Mieres (Asturias), Spain. Veronica Sanz earned a Ph.D. in Philosophy at the University Complutense of Madrid (Spain). At the moment she is a Postdoctoral Researcher at the Science, Technology and Society Center in the University of California at Berkeley.
