**Going to Pot** William J. Bennett, Robert A. White, 2015-02-03 William J. Bennett, former director of the National Drug Control policy under President George H.W. Bush and bestselling author of *The Book of Virtues*, and co-author Robert White provide strong societal and scientific arguments against the legalization of marijuana. Marijuana, once considered worthy of condemnation, has in recent years become a medicine, legalized fully in four states, with others expected to follow. But the dangers are clear. According to Bennett's research, more Americans are admitted to treatment facilities for marijuana use than for any other illegal drug. Studies have shown a link between marijuana use and abnormal brain structure and development. From William Bennett comes a call-to-action for the 46 states that know better than to support full legalization, and a voice of reason for millions who have jumped on the legalization bandwagon because they haven't had access to the facts.

Psychiatric Disorders in Pregnancy and the Postpartum Victoria Hendrick, 2008-08-20 A panel of top experts in perinatal psychiatry reviews the many recent studies on the use of psychiatric medications in pregnancy and postpartum and assesses their impact on the diagnosis and treatment of pregnant/postpartum women. The authors focus on each of the major psychiatric illnesses, including depression, anxiety disorder, bipolar disorder, schizophrenia, substance abuse, eating disorders, and mental illness, as well as on the potential impact of these illnesses on infants and children. Interpreting conflicting and inconclusive clinical findings, they spell out the lesser-known risks of prenatal medication exposure and illuminate a variety of issues that must be taken into account in choosing such treatments as medications, psychotherapy, parental education, and social skills training.

Research Handbook on Post-Conflict State Building Paul R. Williams, Milena Sterio, 2020-08-28 As a conflict ends and the parties begin working towards a durable peace, practitioners and peacebuilders are faced with the thrilling possibilities and challenges of building new or reformed political, security, judicial, social, and economic structures. This Handbook analyzes these elements of post-conflict state building through the lens of international law, which provides a framework through which the authors contextualize and examine the many facets of state building in relation to the legal norms, processes, and procedures that guide such efforts across the globe. The volume aims to provide not only an introduction to and explanation of prominent topics in state building, but also a perceptive analysis that augments ongoing conversations among researchers, lawyers, and advocates engaged in the field.

**Laszlo Moholy-Nagy** Joyce Tsai, 2018-04-06 Laszlo Moholy-Nagy is the first monograph on Moholy to attend to the fraught but central role painting played in shaping his aesthetic project. His reputation has been that of an artist far more interested in exploring the possibilities offered by photography, film, and other new media than in working with what he once called the 'anachronistic' medium of painting. And yet, with the exception of the period between 1928 and 1930, Moholy painted throughout his career. Joyce Tsai argues that his investment in painting, especially after 1930, emerged not only out of pragmatic and aesthetic considerations, but also out of a growing recognition of the economic, political, and ethical compromises required by his large-scale, technologically mediated projects aimed at reforming human vision. Without abandoning his commitment to fostering what he called New Vision, Moholy came to understand painting as a particularly plastic field in which the progressive possibilities of photography, film and other emergent media could find provisional expression.--Provided by publisher.

*Science and Spiritual Practices* Rupert Sheldrake, 2018-08-28 I have personally adopted many of the practices Rupert describes in his book and experienced more love, joy, empathy, gratitude, and equanimity as a result. We are all indebted to Rupert, who has tirelessly brought us deep insights from both science and spirituality.” —Deepak Chopra The effects of spiritual practices are now being investigated scientifically as never before, and many studies have shown that religious and spiritual practices generally make people happier and healthier. In this pioneering book, Rupert Sheldrake shows how science helps validate seven practices on which many religions are built, and which are part of our common human heritage: meditation, gratitude, connecting with nature, relating to plants, rituals, singing and chanting, and pilgrimage and holy places. Sheldrake summarizes the latest scientific research on what happens when we take part in these practices, and suggests ways that readers can explore these fields for themselves. For those who are religious, *Science and Spiritual Practices* will illuminate the evolutionary origins of their own traditions and give a new appreciation of their power. For the nonreligious, this book will show how the core practices of spirituality are accessible to all. This is a book for anyone who suspects that in the drive toward radical secularism, something valuable has been left behind. Rupert Sheldrake compellingly argues that by opening ourselves to the spiritual dimension, we may find the strength to live more fulfilling lives.

The Psychiatric Evaluation and Treatment of Refugees J. David Kinzie, M.D., George A. Keepers, M.D., 2020-04-28 The Psychiatric Evaluation and Treatment of Refugees is a cutting-edge volume of contributions that help mental health professionals better understand the outcomes and solutions for the complicated mix of trauma and immigration with culture and worldview found in the treatment of refugee patients. Written by experts in cross-cultural psychiatry, the book holds a balance between up-to-date science and the collective experiential wisdom of the Intercultural Psychiatric Program at the Oregon Health & Science University, providing a key reference for psychiatrists and other mental health professionals working in cross-cultural trauma. The editors and authors of this volume have contributed to an understanding of the blend of necessary science/evidence and compassion that gives mental health providers insight as to how to understand and treat these often traumatized patients--

Handbook for Teaching and Learning in Higher Education Heather Fry, Steve Ketteridge, Stephanie Marshall, 2003 While white racism has global dimensions, it has an unshakeable lease on life in South African political organizations and its educational system. Donnarae MacCann and Yulisa Maddy here provide a thorough and provocative analysis of South African children's literature during the key decade around Nelson Mandela's release from prison. Their research demonstrates that the literature of this period was derived from the same milieu -- intellectual, educational, religious, political, and economic -- that brought white supremacy to South Africa during colonial times. This volume is a signal contribution to the study of children's literature and its relation to

racism and social conditions.

Regimes of Terror and Memory Manfred Henningsen,2023-07-31 This book compares genocidal and other regimes of terror with Nazi Germany’s Holocaust regime. Yet the author’s interest extends to the question how societies have dealt with their respective records of evil.

**Pot, Inc.** Greg Campbell,2012-04-03 Greg Campbell, coauthor of the bestselling *Flawless* and *Blood Diamonds*, presents a compelling, close-up investigation of a hot-button topic: America’s schizophrenic attitude to the legalization of pot. Campbell, a suburban father whose biggest vice is a cold beer, seems like the last person who would grow weed in his basement. But his attitude changed in 2009, when his home state of Colorado led the nation in mainstreaming medical marijuana. Watching with fascination as above-board and financially thriving dispensaries popped up everywhere, Campbell wondered, “Why not me?” *Pot, Inc.* chronicles Greg’s journey into DIY ganjapreneurialism, as he learns how to cultivate marijuana, examines America’s often unduly harsh laws, and unearths ignorance about pot’s centuries-old therapeutic value--ignorance the government is desperate to maintain. Along the way, he also gains a very personal insight into the drug’s medicinal value that shapes his opinion about legalization.
