99 Jumpstarts for Kids' Social Studies

Reports Peggy Whitley 2007-06-30 Building on the success and maintaining the 99 Jumpstarts format of the two previous books, 99 Jumpstarts for Kids' Social Studies Reports is divided into broad topical sections. Each topic is arranged in alphabetical order under its section. Topics are all new to this title and include the Ancient World, Historic World Events, State and Local History, US History, Government and Citizenship, Sociology, Culture and Economics. The book includes the following sections in each Jumpstart: A cited quote about the topic, Related Jumpstarts, New Words, You are There, Topics to Consider, Books, Internet, For the Teacher, and a relevant activity. Each Jumpstart provides a helpful pathfinder that enables students to efficiently access information and learn new information literacy skills as they research topics of personal interest or gather information for school reports. Grades 3-8.

Research Handbook on Post-Conflict State Building Paul R. Williams 2020-08-28 As a

conflict ends and the parties begin working towards a durable peace, practitioners and peacebuilders are faced with the thrilling possibilities and challenges of building new or reformed political, security, judicial, social, and economic structures. This Handbook analyzes these elements of post-conflict state building through the lens of international law, which provides a framework through which the authors contextualize and examine the many facets of state building in relation to the legal norms, processes, and procedures that guide such efforts across the globe. The volume aims to provide not only an introduction to and explanation of prominent topics in state building, but also a perceptive analysis that augments ongoing conversations among researchers, lawyers, and advocates engaged in the field.

Science and Spiritual Practices Rupert Sheldrake 2018-08-28 "I have personally adopted many of the practices Rupert describes in his book and experienced more love, joy, empathy, gratitude, and equanimity as a result. We are all indebted to Rupert, who has tirelessly brought us deep insights from both science and spirituality." —Deepak Chopra The effects of spiritual practices are now being investigated scientifically as never before, and many studies have shown that religious and spiritual practices generally make people happier and healthier. In this pioneering book, Rupert Sheldrake shows how science helps validate seven practices on which many religions are built, and which are part of our common human heritage: meditation, gratitude, connecting with nature, relating to plants, rituals, singing and chanting, and pilgrimage and holy places. Sheldrake summarizes the latest scientific research on what happens when we take part in these practices, and suggests ways that readers can explore these fields for themselves. For those who are religious, Science and Spiritual Practices will illuminate the evolutionary origins of their own traditions and give a new appreciation of their power. For the nonreligious, this book will show how the core practices of spirituality are accessible to all. This is a book for anyone who suspects that in the drive toward radical secularism, something valuable has been left

behind. Rupert Sheldrake compellingly argues that by opening ourselves to the spiritual dimension, we may find the strength to live more fulfilling lives.

Manual of School Health - E-Book Keeta DeStefano Lewis 2008-06-23 Completely updated, the 3rd edition of this practical, highly portable manual offers quick access to the most relevant health and wellness information for children -- from birth through age 21 - in the school setting. Web site resources at the end of each chapter provide reliable sources for further information and research. A convenient Glossary familiarizes you with important terminology and definitions used throughout the book. New, user-friendly design helps you find key information quickly with helpful boxes, tables, and headings. New 8-page color insert serves as an instant visual reference to help you identify rashes and skin lesions.

and other dermatological conditions that are common among school-age children. A separate chapter on first aid walks you through the management of common injuries and emergency situations. Revised mental health chapter presents current, detailed information on the major mental disorders that affect school-age children such as depression, autism, and Asperger's, with an extensive psychotropic medication table. A new chapter devoted to disaster management includes the latest information on bioterrorism and homeland security threats to help you create an action plan for disaster situations. A revised chapter on violence addresses sexual assault, self-mutilation, suicide, domestic violence, and violence in the schools, to help you stay informed about current societal trends, issues, and developments. New information on teen pregnancy offers helpful guidelines on communicating with students about this important issue.

Pot, Inc. Greg Campbell 2012-04-03 Greg Campbell, coauthor of the bestselling *Flawless* and *Blood Diamonds*, presents a compelling, close-up investigation of a hot-button topic: America's schizophrenic attitude to the legalization of pot. Campbell, a suburban father whose biggest vice is a cold beer, seems like the last person who would grow weed in his basement. But his attitude changed in 2009, when his home state of Colorado led the nation in mainstreaming medical marijuana. Watching with fascination as above-board and financially thriving dispensaries popped up everywhere, Campbell wondered, "Why not me?" *Pot, Inc.* chronicles Greg's journey into DIY ganjapreneurialism, as he learns how to cultivate marijuana, examines America's often unduly harsh laws, and unearths ignorance about pot's centuries-old therapeutic value--ignorance the government is desperate to maintain. Along the way, he also gains a very personal insight into the drug's medicinal value that shapes his opinion about legalization.

Cannabiz John Geluardi 2016-01-08 *Cannabiz* tells one of the most important political and business stories of our generation: the transformation of a counterculture movement into a growth industry with staggering potential. Charting the rise of medical marijuana in California and 14 other states, award-winning journalist John Geluardi vividly recounts the movement's early activism, its legal challenges and victories, and its emergence as a commercial and political force. Tracing the history of marijuana in the United States, *Cannabiz* also reports on the industry's key players, political allies and opponents, internal strife, and audacious aspirations—including a 2010 ballot initiative to legalize the adult use of marijuana in California. Along the way, Geluardi describes local efforts to regulate dispensaries, ranging from workable ordinances in some cities to bureaucratic paralysis in Los Angeles, where dispensaries came to outnumber McDonalds franchises. He also reports on efforts in Humboldt County, the heartland of marijuana cultivation, to keep pot illegal—and prices high. Adroitly profiling this unique industry, *Cannabiz* tells a distinctively American story—one whose colorful characters and fascinating details evoke Prohibition and the Gold Rush.

Psychiatric Disorders in Pregnancy and the Postpartum Victoria Hendrick 2008-08-20 A panel of top experts in perinatal psychiatry reviews the many recent studies on the use of psychiatric medications in pregnancy and postpartum and assesses their impact on the

diagnosis and treatment of pregnant/postpartum women. The authors focus on each of the major psychiatric illnesses, including depression, anxiety disorder, bipolar disorder, schizophrenia, substance abuse, eating disorders, and mental illness, as well as on the potential impact of these illnesses on infants and children. Interpreting conflicting and inconclusive clinical findings, they spell out the lesser-known risks of prenatal medication exposure and illuminate a variety of issues that must be taken into account in choosing such treatments as medications, psychotherapy, parental education, and social skills training. *Laszlo Moholy-Nagy* Joyce Tsai 2018-04-06 "Laszlo Moholy-Nagy is the first monograph on Moholy to attend to the fraught but central role painting played in shaping his aesthetic project. His reputation has been that of an artist far more interested in exploring the possibilities offered by photography, film, and other new media than in working with what he once called the 'anachronistic' medium of painting. And yet, with the exception of the period between 1928 and 1930, Moholy painted throughout his career. Joyce Tsai argues that his investment in painting, especially after 1930, emerged not only out of pragmatic and aesthetic considerations, but also out of a growing recognition of the economic, political, and ethical compromises required by his large-scale, technologically mediated projects aimed at reforming human vision. Without abandoning his commitment to fostering what he called New Vision, Moholy came to understand painting as a particularly plastic field in which the progressive possibilities of photography, film and other emergent media could find provisional expression."--Provided by publisher.

Going to Pot William J. Bennett 2015-02-03 William J. Bennett, former director of the National Drug Control policy under President George H.W. Bush and bestselling author of *The Book of Virtues*, and co-author Robert White provide strong societal and scientific arguments against the legalization of marijuana. Marijuana, once considered worthy of condemnation, has in recent years become a "medicine," legalized fully in four states, with others expected to follow. But the dangers are clear. According to Bennett,

research, more Americans are admitted to treatment facilities for marijuana use than for any other illegal drug. Studies have shown a link between marijuana use and abnormal brain structure and development. From William Bennett comes a call-to-action for the 46 states that know better than to support full legalization, and a voice of reason for millions who have jumped on the legalization bandwagon because they haven't had access to the facts.

Stirring the Pot with Benjamin Franklin Rae

Katherine Eighmey 2018-01-16 In this remarkable work, Rae Katherine Eighmey presents Franklin's delight and experimentation with food throughout his life. At age sixteen, he began dabbling in vegetarianism. In his early twenties, citing the health benefits of water over alcohol, he convinced his printing-press colleagues to abandon their traditional breakfast of beer and bread for "water gruel," a kind of tasty porridge he enjoyed. Franklin is known for his scientific discoveries, including electricity and the lightning rod, and his curiosity and logical mind extended to the kitchen. He even conducted an electrical experiment to try to cook a turkey and installed a state-of-the-art oven for his beloved wife Deborah. Later in life, on his diplomatic missions--he lived fifteen years in England and nine in France--Franklin ate like a local. Eighmey discovers the meals served at his London home-away-from-home and analyzes his account books from Passy, France, for insights to his farm-to-fork diet there. Yet he also longed for American foods; Deborah, sent over favorites including cranberries, which amazed his London kitchen staff. He saw food as key to understanding the developing culture of the

United States, penning essays presenting maize as the defining grain of America. *Stirring the Pot with Benjamin Franklin* conveys all of Franklin's culinary adventures, demonstrating that Franklin's love of food shaped not only his life but also the character of the young nation he helped build.

Constructing Genocide and Mass Violence

Maureen S. Hiebert 2017-03-16 This book addresses two closely related questions: what is the process by which the relatively short and violent genocides of the twentieth century and beyond have occurred? Why have these instances of mass violence been genocidal and not some other form of state violence, repression, or conflict? Hiebert answers these questions by exploring the structures and processes that underpin the decision by political elites to commit genocide, focusing on a sustained comparison of two cases, the Nazi 'Final Solution' and the Cambodian genocide. The book clearly differentiates the structures and processes - contained within a larger overall process - that leads to genocidal violence. Uncovering the mechanisms by which societies (at least in the contemporary era) come to experience genocide as a distinct form of destruction and not some other form of mass or political violence, Hiebert is able to highlight a set of key process that lead to specifically genocidal violence. Providing an insightful contribution to the burgeoning literature in this area, this book will be of interest to students and scholars of genocide, international relations, and political violence.

The Psychiatric Evaluation and Treatment of Refugees

J. David Kinzie, M.D 2020-04-28 "The Psychiatric Evaluation and Treatment of Refugees is a cutting-edge volume of contributions that help mental health professionals better understand the outcomes and solutions for the complicated mix of trauma and immigration with culture and worldview found in the treatment of refugee patients. Written by experts in cross-cultural psychiatry, the book holds a balance between up-to-date science and the collective experiential wisdom of the Intercultural Psychiatric Program at the Oregon Health & Science University, providing a key reference for psychiatrists and other mental health professionals working in cross-cultural trauma. The editors and authors of this volume have contributed to an understanding of the blend of necessary science/evidence and compassion that gives mental health providers insight as to how to understand and treat these often traumatized patients"--

The Melting Pot Stephen M. Schaub 2013-03-28 Mention the Roaring Twenties, and all the usual icons come to mind: flappers, prohibition, and jazz. But the humor of the 1920s has been mostly overlooked. In this book you will find a sample of 1920s humor in the form of The Melting Pot, a newspaper column from that era. Carefully restored from many rolls of a slowly deteriorating microfilm, The Melting Pot has been preserved as a small piece of a time long gone in years, but still relevant in its effects upon the thoughts, values and customs of our own modern-day world. Inside this book, in a fascinating blend of history and humor, The Melting Pot will educate and entertain

you.

Branding Bud David Paleschuck 2021-05-25 Never before has a book been compiled on cannabis brands and the consumers they appeal to. Once an underground commodity, with legalization in more and more states and countries, cannabis is now marketed under a variety of national brands, each with its own unique approach to targeting consumers. The global legal cannabis market was valued at US\$17.7 billion in 2019 and is expected to reach US\$73.6 billion in 2027. Celebrities, athletes, politicians, and large corporations alike are investing and competing in this fast-paced industry. But what makes a cannabis brand successful? What techniques do companies use to brand and market their products? What segments have been established? In *Branding Bud: The Commercialization of Cannabis*, David Paleschuck answers these questions, digging deep into this evolving industry to uncover what both small companies and large corporations are doing to introduce their products to the hearts and minds of cannabis consumers. The results of his exploration may surprise you. *Branding Bud* showcases the exciting range of products that cannabis consumers will be able to buy in a local dispensary once legalization comes to their state. The book offers a comprehensive overview and contextualization of this new segment, examining the multitude of emerging brands, their creative assets, and the strategies behind them, and the political, legal, and cultural aspects of cannabis that inform the brand landscape of today. This book is a must-read for entrepreneurs, investors, marketers, designers, and anyone interested in the rapidly growing cannabis industry. -- David Paleschuck

Zoo-A-Logical Math Thomas Kearney 2012-04 The work for this book began with a course I created and taught called Animal Behavior. I always knew that there was a strong magnetic bond between people and animals, but it wasn't until I began working on my curriculum that I truly found out how strong this bond really was. Millions of people, young and old, will visit zoos and aquariums each year. People stand in front of the animals, hypnotized by the every movement of the animal. People seemed to be looking not just at the animal, but almost as if they were looking inside these animals, wondering and questioning about the lives of some of our most distant animal relatives. In my classroom, I found the exact same

kinds of responses. The discussions and questions of my students motivated me to share with you the lives and abilities of some of the most amazing living creatures in the world. People realize that humans are also animals, but the belief that we have superior intelligence and problem solving abilities makes us think we are far superior to all of the rest of our Animal World. As I began to learn more and lead my student discussions, I soon realized that maybe our intelligence was the only thing that we really did have in our superiority over the rest of our animal relatives. I began to look into the idea of comparing humans to animals in a wide variety of behaviors and activities, and soon a brand new window into the REAL world of animals began to open up. I soon realized that even the most "insignificant" animals in our world were really superstars when compared to humans. By using math, we are able to truly get a comparison of animals and how they relate to our own human abilities. As I began to create the problems and "do-the-math," it became very evident, that I began to get the responses that I had hoped for. I soon began to call these responses, the "Wow factor." A number of times, the teachers that have worked on the problems would actually go back and do the problems a second time because "there has to be a mistake" or "no way that this can be true." There were no mistakes and the math did not lie. The math allowed us to look at the animals in a totally different way. I hope that you too will be amazed and "wowed" by some of these amazing animals that we share our world with.
