Breaking the Appalachian Barrier John Hrastar,2018-02-26 In 1750 the Appalachian Mountains were a formidable barrier between the British colonies in the east and French territory in the west, passable only on foot or horseback. It took more than a century to break the mountain barrier and open the west to settlement. In 1751 a private Virginia company pioneered a road from Maryland to Ohio, challenging the French and Indians for the Ohio country. Several wars stalled the road, which did not start in earnest until after Ohio became a state in 1803. The stone-paved Cumberland Road--from Cumberland, Maryland, to Wheeling, Virginia--was complete by 1818 and over the next 30 years was traversed by Conestoga wagons and stagecoaches. The Baltimore and Ohio Railroad--the first general purpose railroad in the world--started in Baltimore in the 1820s and reached Wheeling by 1852, uniting east and west.

The Shark's Paintbrush Jay Harman,2013-06-25 The wave of the future has been around since the beginning of times: it's called Nature. Let inventor and entrepreneur Jay Harman introduce you to stunning solutions to some of the world's thorniest problems. Why does the bumblebee have

better aerodynamics than a 747? How can copying a butterfly wing reduce the world's lighting energy bill by 80%? How will fleas' knees and bees' shoulders help scientists formulate a near-perfect rubber? Today an interdisciplinary and international group of scientists, inventors and engineers is turning to nature to innovate and find elegant solutions to human problems. The principle driving this transformation is called biomimicry, and Harman shares a wide range of examples of how we're borrowing from natural models to invent profitable, green solutions to pressing industrial challenges. Aimed at a business audience, aspiring entrepreneurs, environmentalists and general science readers, *The Shark's Paintbrush* reflects a force of change in the new global economy that does more than simply gratify human industrial ambition; it teaches us how to live in harmony with nature and opens bright opportunities for a better future.

Hachiman Taro Ned Greenwood, 2011-07 'Soon after becoming the Supreme Commander of Allied Powers, MacArthur ordered all Japanese weapons confiscated and destroyed. This order includes swords, even Shinto temple swords of great beauty and value. Some of these art swords, called nippon-to, are documented national treasures. At the same time, Japanese secret societies, such as Showa and the Kanesuka Brotherhood, are to sell them to bigtime foreign collectors for the lucrative profit they will bring. The Johkai Priest of the nearby Sengaku-ji Temple and his assistant, Yoshida Nobu, have asked us to smuggle two extremely valuable swords out of Japan and keep them hidden until political conditions are favorable for their return.' Charged with smuggling priceless swords out of Japan to protect them from being destroyed by Allied forces or sold on the black market by criminal organizations, Blaz Carvajal, Ragnor Ragnvold, and Magwitch Russell conceal the swords and transport them back to the United States for safekeeping. Among the swords is the Hachiman Taro, invaluable Samurai sword from the sixteenth century. Showa, a Japanese secret society, sends Watanabe, a brutal, Japanese POW guard, to retrieve the swords from the trio. Once in the United States, Watanabe covertly tracks down the swords' locations. Can Blaz, Ragnor, and Magwitch keep the swords from falling into Showa's hands? What lengths of brutality will Showa go to retrieve the swords? Who will emerge victorious in the battle for the blades? Follow the path of the swords in the history-rich, action-packed *Hachiman Taro: Firstborn of the God of War*.

Kingdoms, Empires, and Domains Mark A. Ragan, 2023 This work explores how living organisms have been classified at the highest level. The earliest ideas of nature emphasised transformation. Aristotle recognised that certain objects in the sea share properties of plants and animals; these became known as zoophytes. The narrative follows zoophytes and other transgressive beings through subsequent philosophical and religious traditions, myths, travellers' tales, the occult literature, alchemy, scholasticism, the consolidation of vernacular languages, and the rise of scientific botany and zoology. Leeuwenhoek's discovery of microscopic beings, and Trembley studies on Hydra, complicated the plant-animal dichotomy. Transformation returned as Needham, Buffon and others observed plant material to generate motile animalcules; Linnaeus proposed a Regnum Chaoticum. New challenges arose as the Great Chain of Being was abandoned, algae were observed to liberate free-swimming zoospores, and cell theory was refined. Biology developed differently in France, Germany and Britain, and we follow the rise and fall of supernumerary kingdoms in each environment. Haeckel positioned Protista as one of two, three or four kingdoms. In the Twentieth century the living world was divided between prokaryotes and eukaryotes, while mitochondria and plastids were recognised as descendants of endosymbiotic bacteria. Molecular evidence revealed three domains (Archaea, Bacteria, Eukaryota), although many genomes are linked in a dynamic network of genetic relationships. Environmental genomes now threaten to undermine Eukaryota as an independent domain of life--

A History of Travel in 50 Vehicles (History in 50) Paula Grey,2016-09-06 Paula Grey explores how creative thinkers—collaborating or competing and always building on the work of their predecessors—have envisioned new ways to move about in the world. The story of travel is the human story. From the first migrations out of Africa on weary feet to horses, camels, rafts, chariots, steamships, trains, hot air balloons, cars, submarines, and moon rockets, humans have combined imagination, daring, and technical brilliance to create new vehicles and improve existing ones. Geography and culture have influenced the development of vehicles in far-flung parts of the world, and human travel has, in turn, exerted a profound influence on society and the environment. Whether escaping deprivation, pestilence, persecution, oppression, or fear—or seeking abundance, freedom, fame, fortune, or a fresh start—we have always been a traveling species, and it seems we always will be. Here is the story of humankind’s restless impulse to see what’s over the next ridge, beyond the next sunrise, on the next planet. Enjoy the journey!

A New History of Mississippi Dennis J. Mitchell,2014-05-27 Creating the first comprehensive narrative of Mississippi since the bicentennial history was published in 1976, Dennis J. Mitchell recounts the vibrant and turbulent history of a Deep South state. The author has condensed the massive scholarship produced since that time into an appealing narrative, which incorporates people missing from many previous histories including American Indians, women, African Americans, and a diversity of other minority groups. This is the story of a place and its people, history makers and ordinary citizens alike. Mississippi’s rich flora and fauna are also central to the story, which follows both natural and man-made destruction and the major efforts to restore and defend rare untouched areas. Hernando De Soto, Sieur d’Iberville, Ferdinand Claiborne, Thomas Hinds, Aaron Burr, Greenwood LeFlore, Joseph Davis, Nathan Bedford Forrest, James D. Lynch, James K. Vardaman, Mary Grace Quackenbos, Ida B. Wells, William Alexander Percy, William Faulkner, Eudora Welty, Muddy Waters, B.B. King, Elvis Presley, John Grisham, Jack Reed, William F. Winter, Jim Barksdale, Richard Howorth, Christopher Epps, and too many more to list—this book covers a vast and rich legacy. From the rise and fall of American Indian culture to the advent of Mississippi’s world-renowned literary, artistic, and scientific contributions, Mitchell vividly brings to life the individuals and institutions that have created a fascinating and diverse state.

Lost Victory Raj K. Mehta,2010 Anyone who has studied the over 30-year-old Sri Lankan conflict with detachment will perhaps agree that not other phrase can define the Prabhakaran conundrum better than Lost Victory. He had almost succeeded in his goal of getting a Tamil Eelam with most of his conditions agreed to by the Sri Lankan Government.
