**Monetary Policy Normalization** Paolo Savona,Rainer Stefano Masera,2023-08-18 In light of the pickup of inflation at the end of 2021 and monetary policy shifts by the world's major central banks, this book examines interrelated issues in the normalization of monetary policy. It covers topics including the role of technological innovations such as derivatives and cryptocurrencies in monetary and financial management, the role of monetary policy in financial crises (especially public debt), and the major repricing needed for central banks and the global economy. **Proclaiming Jesus** Thomas H. L. Cornman,2007-01-01 In the days immediately following 9/11, Joseph Stowell attended a special Chicago Prayer Breakfast. He was encouraged to learn there was much interest in God and spirituality among the attendees. He was troubled, however, by the subtle implication common among the speakers that day that Jesus, with His exclusive claims, was unwelcome. That, "given the broad diversity of religions in America, we now need to give up the 'traditions' that divide those of us who believe in God. Stowell left the breakfast even more determined to preach the centrality of Christ in the church. Proclaiming Jesus is a collection of essays, written by faculty of the Moody Bible Institute in honor of Dr. Stowell, that take up the message he proclaimed, making it clear that every area of church life and ministry is about Jesus.

**Italian Renaissance Humanism in the Mirror** Patrick Baker,2015-09-29 This important study takes a new approach to understanding Italian Renaissance humanism, based not on scholarly paradigms or philosophical concepts but on a neglected yet indispensable perspective: the humanists' understanding of themselves. Through a series of close textual studies, Patrick Baker excavates what humanists thought was important about humanism, how they viewed their own history, what goals they enunciated, what triumphs they celebrated - in short, he attempts to reconstruct humanist identity. What emerges is a small, coherent community dedicated primarily not to political ideology, a philosophy of man, an educational ethos, or moral improvement, but rather to the pursuit of classical Latin eloquence. Grasping the significance this stylistic ideal had for the humanists is essential to understanding both their sense of themselves and the importance they and others attached to their movement. For eloquence was no mere aesthetic affair but rather appeared to them as the guarantor of civilisation itself.

**Occult Imperium** Christian Giudice,2022-02-03 Christian Giudice's Occult Imperium explores Italian national forms of Occultism, chiefly analyzing Arturo Reghini (1878-1946), his copious writings, and Roman Traditionalism. Trained as a mathematician at the prestigious University of Pisa, Reghini was one of the three giants of occult and esoteric thought in Italy, alongside his colleagues Julius Evola (1898-1974) and Giulian Kremmerz (1861-1930). Using Reghini's articles, books, and letters, as a guide, Giudice explores the interaction between occultism, Traditionalism, and different facets of modernity in early-twentieth-century Italy. The book takes into consideration many factors particular to the Italian peninsula: the ties with avant-garde movements such as the Florentine Scapigliatura and Futurism, the occult vogues typical to Italy, the rise to power of Benito Mussolini and Fascism, and, lastly, the power of the Holy See over different expressions of spirituality. Occult Imperium explores the convergence of new forms of spirituality in early twentieth-century Italy.

**Reframing Rights** Sheila Jasanoff,2011 Legal texts have been with us since the dawn of human history. Beginning in 1953, life too became textual. The discovery of the structure of DNA made it possible to represent the basic matter of life with permutations and combinations of four letters of the alphabet, A, T, C, and G. Since then, the biological and legal conceptions of life have been in constant, mutually constitutive interplay--the former focusing on life's definition, the latter on life's entitlements. Reframing Rights argues that this period of transformative change in law and the life sciences should be considered bioconstitutional.Reframing Rights explores the evolving relationship of biology, biotechnology, and law through a series of national and cross-national case studies. Sheila Jasanoff maps out the conceptual territory in a substantive editorial introduction, after which the contributors offer snapshots of developments at the frontiers of biotechnology and the law. Chapters examine such topics as national cloning and xenotransplant policies; the politics of stem cell research in Britain, Germany, and Italy; DNA profiling and DNA databases in criminal law; clinical trials in India and the United States; the GM crop controversy in Britain; and precautionary policymaking in the European Union. These cases demonstrate changes of constitutional significance in the relations among human bodies, selves, science, and the state.

**Gramsci's Laboratory** Alvaro Bianchi,2019-12-16 A milestone in the contemporary Brazilian reception of Gramsci, focusing on the unity of politics, philosophy and history in Gramsci's Quaderni del carcere.

**Blackening Europe** Heike Raphael-Hernandez,2012-11-12 Traditional Scholars have often looked at African American studies through the lens of European theories, resulting in the secundarization of the African American presence in Europe and its contributions to European culture. Blackening Europe reverses this pattern by using African American culture as the starting point for a discussion of its influences over traditional European

structures. Evidence of Europe's blackening abound, from French ministers of Hip-hop and British incarnations of Shaft to slavery memorial in the Netherlands and German youth sporting dreadlocks. Collecting essays by scholars from both sides of the Atlantic and fields as diverse as history, literature, politics, social studies, art, film and music, Blackening Europe explores the implications of these cultural hybrids and extends the growing dialogues about Europe's fascination with African America.

European Democratic Institutions and Administrations Francesco Merloni, Alessandra Pioggia, 2018-09-03 This book presents the results of extensive international comparative research into the effects of the economic and financial crisis on democratic institutions and social cohesion policies. The collected studies describe and analyse the measures (often referred to as reforms) adopted to counter the crisis and the effects of these measures. It investigates three areas: the impact on the functioning of institutions, with respect to the relationship between representative institutions and governments, and the organisational structure of administrations at national and local levels; the impact that the austerity policies on public spending have on social rights; and the impact on traditional instruments of public action (administrative simplification, public services delivering, the use of common assets). The general findings highlight the effect of reducing the administrative and government capacity of the democratic institutions: the public sector, rather than being innovative and made more effective, declines, offering increasingly poor public services and making bad decisions, fuelling substantive or formal privatisation solutions, which in turn cause further weakening.
