The Great Demographic Reversal Charles Goodhart, Manoj Pradhan, 2020-08-08 This original and panoramic book proposes that the underlying forces of demography and globalisation will shortly reverse three multi-decade global trends – it will raise inflation and interest rates, but lead to a pullback in inequality. “Whatever the future holds”, the authors argue, “it will be nothing like the past”. Deflationary headwinds over the last three decades have been primarily due to an enormous surge in the world’s available labour supply, owing to very favourable demographic trends and the entry of China and Eastern Europe into the world’s trading system. This book demonstrates how these demographic trends are on the point of reversing sharply, coinciding with a retreat from globalisation. The result? Ageing can be expected to raise inflation and interest rates, bringing a slew of problems for an over-indebted world economy, but is also anticipated to increase the share of labour, so that inequality falls. Covering many social and political factors, as well as those that are more purely macroeconomic, the authors address topics including ageing, dementia, inequality, populism, retirement and debt finance, among others. This

book will be of interest and understandable to anyone with an interest on where the world's economy may be going.

Violence and Resistance in Sikh Gendered Identity Jaspal Kaur Singh, 2020-04-30 This book examines the constructions and representations of male and female Sikhs in Indian and diasporic literature and culture through the consideration of the role of violence as constitutive of Sikh identity. How do Sikh men and women construct empowering identities within the Indian nation-state and in the diaspora? The book explores Indian literature and culture to understand the role of violence and the feminization of baptized and turbaned Sikh men, as well as identity formation of Sikh women who are either virtually erased from narratives, bodily eliminated through honor killings, or constructed and represented as invisible. It looks at the role of violence during critical junctures in Sikh history, including the Mughal rule, the British colonial period, the Partition of India, the 1984 anti-Sikh riots in India, and the terror of 9/11 in the United States. The author analyzes how violence reconstitutes gender roles and sexuality within various cultural and national spaces in India and the diaspora. She also highlights questions related to women's agency and their negotiation of traumatic memories for empowering identities. The book will interest scholars, researchers, and students of postcolonial English literature, contemporary Indian literature, Sikh studies, diaspora studies, global studies, gender and sexuality studies, religious studies, history,

sociology, media and films studies, cultural studies, popular culture, and South Asian studies.

Toxicologic Pathology Pritam S. Sahota, James A. Popp, Jerry F. Hardisty, Chirukandath Gopinath, Page Bouchard, 2018-08-14 Following the success of the first edition, this book is designed to provide practical and timely information for toxicologic

pathologists working in pharmaceutical drug discovery and development. The majority of the book (Organ Systems) will provide detailed descriptions of histopathological lesions observed in drug development. In addition, it will provide information to assist the pathologist in making determinations of the origin of lesions as well as its relevance to human risk. Toxicologic Pathology: Nonclinical Safety Assessment, Second Edition includes 2 new concept chapters. The first of the new chapters address approaches for the evaluation of unique therapeutic modalities such as cell therapies, gene therapies, and gene expression knockdown therapies. While these still represent new developing therapeutic approaches, there has been significant experience with the therapeutic modalities in the last 5 years. The second new chapter addresses the nonclinical safety assessment of medical devices, a topic of increasing importance that was not addressed in a unique chapter in the first edition. The other concept chapters have been updated and cover important topics including the overview of drug development; principles of nonclinical safety assessment; an introduction to toxicologic pathology; techniques used in toxicologic pathology, clinical pathology, toxicokinetics, and drug development toxicogenomics; and spontaneous lesions. The 13 organ system chapters provide the specifics related to pathologic characteristics, differential diagnosis, and interpretation of toxic responses in each organ system. These chapters are specifically important for the bench pathologist but also for the toxicologist who

interacts with pathologists and function as study toxicologists and project team representatives in the drug development arena.

Social, Political and Cultural Challenges of the BRICS Ribeiro, Gustavo Lins,Dwyer, Tom,2015-02-07

For the almost 40 years of its existence, ANPOCS has contributed to introducing or consolidating new thematic areas in the academic agenda of debates in the Brazilian social sciences. Commensurate with this history, at the 37th Annual meeting, hosted in Águas de Lindoia, São Paulo, in 2013, we organized a large International Symposium, The BRICS and their social, political and cultural challenges on the national and international levels. There were six sessions of debates, gathered under the umbrella of Development and public policies, Social inclusion and social justice, and Emerging powers and transformations in the international system, followed by a final plenary session. Around 30 anthropologists, political scientists, sociologists and researchers in international relations from Brazil, Russia, India, China and South Africa, met over three highly productive days. As might be expected at ANPOCS, the

encounter was marked not only by the diversity of countries and disciplines, but also by the theoretical and political diversity of the participants, something already apparent in the composition of the Brazilian coordinators of the Symposium. This book is just one tangible outcome of the papers and dialogues emerging from this encounter. Like the Symposium, the volume is divided into three sections. Looking to address an international readership, it is published in Portuguese and English

Life Space Management P S Siwach, 2014-09-01 Life Space Management is a book that throws up a new concept of enhancing individual & organisational effectiveness by managing the parameters of Life Space, a word coined by Kurt Lewin. Our entire effectiveness in life depends on how well we create space with others in the environment. All of us intrinsically yet unknowingly practice the art of creating the right space, whenever we interact with others. Our entire relationship blooms and grows or diminishes based on the quantum of life space we create with them. The author has researched on this new subject and put across his views to help the reader evolve and grow more effective in life.

Production of Postcolonial India and Pakistan

Ted Svensson, 2013-07-31 This work seeks to examine the event and concurrent transition that the

inauguration of India and Pakistan as 'postcolonial' states in August 1947 constituted and effectuated. Analysing India and Pakistan together in a parallel and mutually dependant reading, and utilizing primary data and archival materials, Svensson offers new insights into the current literature, seeking to conceptualise independence through partition and decolonisation in terms of novelty and as a 'restarting of time'. Through his analysis, Svensson demonstrates the constitutive and inexorable entwinement of contingency and restoration, of openness and closure, in the establishment of the postcolonial state. It is maintained that those involved in instituting the new state in a moment devoid of fixity and foundation 'anchor' it in preceding beginnings. The work concludes with the proposition that the novelty should not only be regarded as contained in the moment of transition. It should also be seen as contained in the pledge, in the promise and the gesturing towards a future community. Distinct from most other studies on the partition and independence the book assumes the constitutive moment as the focal point, offering a new approach to the study of partition in British India, decolonisation and the institutional of the postcolonial state. This work will be of great interest to students and scholars of international relations, South Asian studies and political and postcolonial theory.

Road to Greatness Pritam S. Sahota Donald A. Assmann Mary Arnella-Venezia Michael Rubell Gulzar S. Sandhu Zbigniew W. Wojcinski, 2022-04-08
"Greatness" has been defined as a quality of being

great, distinguished, or eminent. "Road to Greatness" employs examples of selected individuals who achieved greatness. The road begins with a desire to become successful by creating a personal path to attain exceptional goals. "Genius= 1% Inspiration and 99% Perspiration." - Thomas Edison (Inventor: He made 1000 unsuccessful attempts before inventing the light bulb.) "Never, never, never, never give up." - Sir Winston Churchill (Historian, Nobel Prize Winner in Literature (1953) and Prime Minister of the UK during World War-2.) "A person who never made a mistake never tried anything new." - Albert Einstein (Theoretical physicist; Winner of the 1921 Nobel Prize in Physics.) "If you can dream it, you can do it." - Walt Disney (Entrepreneur, animator, writer, film producer; record holder for individual Academy Awards.) "People do not decide to become extraordinary. They decide to accomplish extraordinary things." Sir Edmund Hillary (Mountaineer, explorer, philanthropist; first climber with Tenzing Norgay to summit Mount Everest in 1953). "Road to Greatness" explores four groupings of over forty success factors that are instrumental in extraordinary achievement: Physical and Mental Fitness Connection of Inner and Outer Circles Constant Learning Skill Development Achieving competence in the success factors enhances an individual's ability to achieve greatness and can be developed through discipline and deliberate practice by incorporation in small increments into routine activities. True greats consistently grow through self-awareness to overcome their limitations, take

on challenges, and endeavor to face the obstacles they encounter. The characteristics and traits that drive greatness are inherent within all of us and can be applied to any field, subject, or discipline. "Road to Greatness" provides a roadmap to create a personalized path to extraordinary achievement for students, parents, teachers and graduates entering the workforce. Although it is uncertain what challenges you will face, the roadmap and exploration of greatness arms you with the tools you will need. As such, only one question remains: Are you willing to embark on your own road to greatness?

Sikh Nationalism and Identity in a Global Age

Giorgio Shani, 2007-12-06 Sikh Nationalism and Identity in a Global Age examines the construction of a Sikh national identity in post-colonial India and the diaspora and explores the reasons for the failure of the movement for an independent Sikh state: Khalistan. Based on a decade of research, it is argued that the failure of the movement to bring about a sovereign, Sikh state should not be interpreted as resulting from the weakness of the 'communal' ties which bind members of the Sikh 'nation' together, but points to the transformation of national identity under conditions of globalization. Globalization is perceived to have severed the link between nation and state and, through the proliferation and development of Information and Communications Technologies (ICTs), has facilitated the articulation of a transnational 'diasporic' Sikh identity. It is argued that this 'diasporic' identity potentially challenges the conventional

narratives of international relations and makes the imagination of a post-Westphalian community possible. Theoretically innovative and interdisciplinary in approach, it will be primarily of interest to students of South Asian studies, political science and international relations, as well as to many others trying to come to terms with the continued importance of religious and cultural identities in times of rapid political, economic, social and cultural change.

Sacred Space John Matthews, 2009-03-26 The identification and positioning of sacred space within contemporary contexts has, to date, received scant attention. In reflecting upon a broad spectrum of conceptions of what constitutes sacred space, this collection of interdisciplinary essays presents a new perspective on an area that is developing into an important theological and philosophical concept.
