**Theorising NATO** Mark Webber,Adrian Hyde-Price,2015-11-19 Scholarship on NATO is often preoccupied with key episodes in the development of the organisation and so, for the most part, has remained inattentive to theory. This book addresses that gap in the literature. It provides a comprehensive analysis of NATO through a range of theoretical perspectives that includes realism, liberalism and constructivism, and lesser-known approaches centred on learning, public goods, securitisation and risk. Focusing on NATO's post-Cold War development, it considers the conceptualisation, purpose and future of the Alliance. This book will be of interest to students and scholars of international organisation, international relations, security and European Politics.

*MEDINFO 2021: One World, One Health — Global Partnership for Digital Innovation* P. Otero,P. Scott,S.Z. Martin,2022-08-05 The World Health Organization defines health as “a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity”, and its constitution also asserts that health for all people is “dependent on the fullest co-operation of individuals and States”. The ongoing pandemic has highlighted the power of both healthy and unhealthy information, so while healthcare and public health services have depended upon timely and accurate data and continually updated knowledge, social media has shown how unhealthy misinformation can be spread and amplified, reinforcing existing prejudices, conspiracy theories and political biases. This book presents the proceedings of MedInfo 2021, the 18th World Congress of Medical and Health Informatics, held as a virtual event from 2-4 October 2021, with pre-recorded presentations for all accepted submissions. The theme of the conference was One World, One Health – Global Partnership for Digital Innovation and submissions were requested under 5 themes: information and knowledge management; quality, safety and outcomes; health data science; human, organizational and social aspects; and global health informatics. The Programme Committee received 352 submissions from 41 countries across all IMIA regions, and 147 full papers, 60 student papers and 79 posters were accepted for presentation after review and are included in these proceedings. Providing an overview of current work in the field over a wide range of disciplines, the book will be of interest to all those whose work involves some aspect of medical or health informatics.

Aikido and the Dynamic Sphere Adele Westbrook,Oscar Ratti,2012-10-16 Aikido and the Dynamic Sphere: An Illustrated Introduction provides a complete foundation in the practice of one of the most distinctive and effective Japanese martial arts. Aikido was created in Japan in the 1920's by Morihei Ueshiba, also known as Osensei. To possess the skills, techniques and attitude of the true practitioner of aikido, one must achieve a very high level of integration of the powers of mind and body, the harmonious combination of physical means and ethical motives. By controlling body position and learning how to harmonize vital physical and mental powers, anyone (regardless of size, strength or weight) can fend off attacks using this sophisticated martial art. Written and illustrated by husband/wife team, Oscar Ratti and Adele Westbrook, Aikido and the Dynamic Sphere, with over 1,200 illustrations, includes many Aikido techniques in chapters such as: What is Aikido? The Foundations of Aikido The Practice of Aikido The Basic Techniques of Neutralization Advanced Practice And more!

**Legal Knowledge Representation:Automatic Text Analysis in Public International and European Law** Erich Schweighofer,1999-10-19 This volume is a presentation of all methods of legal knowledge representation from the point of view of jurisprudence as well as computer science. A new method of automatic analysis of legal texts is presented in four case studies. Law is seen as an information system with legally formalised information processes. The achieved coverage of legal knowledge in information retrieval systems has to be followed by the next step: conceptual indexing and automatic analysis of texts. Existing approaches of automatic knowledge representations do not have a proper link to the legal language in information systems. The concept-based model for semi-

automatic analysis of legal texts provides this necessary connection. The knowledge base of descriptors, context-sensitive rules and meta-rules formalises properly all important passages in the text corpora for automatic analysis. Statistics and self-organising maps give assistance in knowledge acquisition. The result of the analysis is organised with automatically generated hypertext links. Four case studies show the huge potential but also some drawbacks of this approach.

*Identity and Experience at the India-Bangladesh Border* Debdatta Chowdhury,2018-06-28 The effects of the partition of India in 1947 have been more far-reaching and complex than the existing partition narratives of violence and separation reveal. The immediacy of the movement of refugees between India and the newly-formed state of Pakistan overshadowed the actual effect of the drawing of the border between the two states. The book is an empirical study of border narratives across the India-Bangladesh border, specifically the West Bengal part of India's border with Bangladesh. It tries to move away from the perpetrator state-victim civilian framework usually used in the studies of marginal people, and looks at the kind of agencies that the border people avail themselves of. Instead of looking at the border as the periphery, the book looks at it as the line of convergence and negotiations—the 'centre of the people' who survive it every day. It shows that various social, political and economic identities converge at the borderland and is modified in unique ways by the spatial specificity of the border—thus, forming a 'border identity' and a 'border consciousness'. Common sense of the civilians and the state machinery (embodied in the border guards) collide, cooperate and effect each other at the borderlands to form this unique spatial consciousness. It is the everyday survival strategies of the border people which aptly reflects this consciousness rather than any universal border theory or state-centric discourses about the borders. A bottom-up approach is of utmost importance in order to understand how a spatially unique area binds diverse other identities into a larger spatial identity of a 'border people'. The book's relevance lies in its attempt to explore such everyday narratives across the Bengal border, while avoiding any major theorising project so as not to choke the potential of such experience-centred insights into the lives of a unique community of people. In that, it contributes towards a study of borders globally, providing potential approaches to understand border people worldwide. Based on detailed field research, this book brings a fresh approach to the study of this border. It will be of interest to researchers in the field of South Asian studies, citizenship, development, governance and border studies.

**Drug Discovery and Clinical Research** SK Gupta,2011-06 The Drug Discovery and Clinical Research bandwagon has been joined by scientists and researchers from all fields including basic sciences, medical sciences, biophysicists, biotechnologists, statisticians, regulatory officials and many more. The joint effort and contribution from all is translating into the fast development of this multi-faceted field. At the same time, it has become challenging for all stakeholders to keep abreast with the explosion in information. The race for the finish-line leaves very little time for the researchers to update themselves and keep tabs on the latest developments in the industry. To meet these challenges, this book entitled Drug Discovery and Clinical Research has been compiled. All chapters have been written by stalwarts of the field who have their finger on the pulse of the industry. The aim of the book is to provide succinctly within one cover, an update on all aspects of this wide area. Although each of the chapter dealt here starting from drug discovery and development, clinical development, bioethics, medical devices, pharmacovigilance, data management, safety monitoring, patient recruitment, etc. are topics for full-fledged book in themselves, an effort has been made via this book to provide a bird's eye view to readers and help them to keep abreast with the latest development despite constraints of time. It is hoped that the book will contribute to the growth of readers, which should translate into drug discovery and clinical research industry's growth.

**The Roman Collegia** Jonathan S. Perry,2017-07-31 This book traces the history of scholarship on an ancient Roman institution, exploring the roles of modern social, political, and economic thought on individual scholars, especially in the turbulent years between 1843 and 1945.

A Cross Too Heavy P. O'Shea,2011-04-25 The papacy of Pius XII (1939-1958) has been a source of near-constant criticism and debate since his death, particularly because of his alleged silence during the Holocaust. Paul O'Shea examines his little-studied pre-papal life to demonstrate that Pius was neither an anti-Semitic villain nor a 'lamb without stain.'

**Not One Inch** M. E. Sarotte,2021-11-30 Thirty years after the Soviet Union's collapse, this book reveals how tensions between America, NATO, and Russia transformed geopolitics in the decade after the fall of the Berlin Wall "The most engaging and carefully documented account of this period in East-West diplomacy currently available."—Andrew Moravcsik, Foreign Affairs Not one inch. With these words, Secretary of State James Baker proposed a hypothetical bargain to Soviet leader Mikhail Gorbachev after the fall of the Berlin Wall: if you let your part of Germany go, we will move NATO not one inch eastward.

Controversy erupted almost immediately over this 1990 exchange—but more important was the decade to come, when the words took on new meaning. Gorbachev let his Germany go, but Washington rethought the bargain, not least after the Soviet Union’s own collapse in December 1991. Washington realized it could not just win big but win bigger. Not one inch of territory needed to be off limits to NATO. On the thirtieth anniversary of the Soviet collapse, this book uses new evidence and interviews to show how, in the decade that culminated in Vladimir Putin’s rise to power, the United States and Russia undermined a potentially lasting partnership. Prize-winning historian M. E. Sarotte shows what went wrong.

**Pervasive Collaborative Networks** Luis M. Camarinha-Matos,Willy Picard,2008-08-27 COLLABORATIVE NETWORKS Becoming a pervasive paradigm In recent years the area of collaborative networks is being consolidated as a new discipline (Camarinha-Matos, Afsarmanesh, 2005) that encompasses and gives more structured support to a large diversity of collaboration forms. In terms of applications, besides the “traditional” sectors represented by the advanced supply chains, virtual enterprises, virtual organizations, virtual teams, and their breeding environments, new forms of collaborative structures are emerging in all sectors of the society. Examples can be found in e-government, intelligent transportation systems, collaborative virtual laboratories, agribusiness, elderly care, silver economy, etc. In some cases those developments tend to adopt a terminology that is specific of that domain; often the involved actors in a given domain are not fully aware of the developments in the mainstream research on collaborative networks. For instance, the grid community adopted the term “virtual organization” but focused mainly on the resource sharing perspective, ignoring most of the other aspects involved in collaboration. The European enterprise interoperability community, which was initially focused on the intra-enterprise aspects, is moving towards inter-enterprise collaboration. Collaborative networks are thus becoming a pervasive paradigm giving basis to new socio-organizational structures.
