**The Secret History of the Reptilians** Scott Alan Roberts, 2013-02-25 Fortunately, Scott Roberts boldly goes where few men have surfaced from, providing a well-balanced, innovative, and insightful approach to the topic. -Philip Coppens, author of The Ancient Alien Question Where the bloodlines of the Nephilim leave off, the real story just begins. Or does it go back even further than that? The very real probability that non-human intelligences visited and even copulated with primordial humans is detailed in civilization's most ancient cultural and religious records. These historical records further reveal that these intelligences were reptilian in nature--or, at the very least, have been represented throughout human history in reptilian form. From the Serpent, Nawcash, in the Garden of Eden; Atum, the Egyptian snake-man; and Quetzalcoatl, the feathered serpent god of the Mayans to the double-helix snake symbol of Enki/Ea in ancient Sumerian literature, the serpent has been the omnipresent link between humans and the gods in every culture. In The Secret History of the Reptilians, Scott Alan Roberts investigates and examines the pervasive presence of the serpent in human history, religion, culture, and politics. Are we the product of an extraterrestrial race that moves and breathes--and even breeds--beneath the surface of all of human history? Put on your thinking cap and take an historical, anthropological, archaeological plunge into the heady waters of extraterrestrial origins.

**The Temple: A Reptilian Alien Movie Trilogy** Glorianna Arias, 2014-08-23 The Temple is book 1 of

a new movie script trilogy being published as a book series. The title of the series is The Temple: A Reptilian Alien Movie Trilogy. This is Book 1: Descent to Inner Earth. Google the Temple Trilogy for more official info about this book. If you like Ancient Aliens and the Reptilian Agenda, you will love The Temple. Once upon a time, there were caverns deep below the surface of the Earth. Even prehistoric humans were afraid to venture into the obscure realms that later came to be known as Inner Earth. For millennia, these depths remained unexplored until, one day, an ancient race of reptilian aliens arrived in our planet to colonize it. In order to protect themselves from the vicious predators that roamed the surface at the time, the reptilian explorers built underground shelters. As time passed, the reptilian aliens evolved at a much faster rate than their human counterparts. They engaged in genetic research and made scientific breakthroughs that were unfathomable to our prehistoric ancestors. Our troubles began when experimenting with animals was no longer enough for the reptilians. With our primitive defense tactics and rudimentary weapons, we stood no chance against them. Today, it is said that this mighty species still lurks in the dark depths of Inner Earth, right under our feet.

**Flying Serpents and Dragons** R. A. Boulay, 1999-07  
A highly original work that deals a shattering blow to all our preconceived notions about our past and human origins. Worldwide legends refer to giant flying lizards and dragons that came to this planet and founded the ancient civilizations of Mesopotamia, Egypt, India and China. Who were these reptilian creatures? What was the real reason for mans creation? Why did Adam lose his chance at immortality in the Garden of Eden? Who were the Nefilim who descended from heaven and mated with human women? Why did the serpent take

such a bad rap in history? Why didnt Adam and Eve wear clothes? What were the crystals or stones that the gods fought over? Why did the ancient Sumerians call their major gods USHUMGAL, which means literally great fiery, flying serpent? What were the boats of heaven in ancient Egypt and the sky chariots of the Bible? This book tells it all.

**UFOs, Chemtrails, and Aliens** Donald R. Prothero, Timothy D. Callahan, 2017-08-02 A wide-ranging survey offers "entertainment as well as wisdom for everyone who's ever wondered what's behind so many conspiracy theories and paranormal phenomena" (Publishers Weekly). UFOs. Aliens. Strange crop circles. Giant figures scratched in the desert surface along the coast of Peru. The

amazing alignment of the pyramids. Strange lines of clouds in the sky. The paranormal is alive and well in the American cultural landscape. In *UFOs, Chemtrails, and Aliens*, Donald R. Prothero and Tim Callahan explore why such demonstrably false beliefs thrive despite decades of education and scientific debunking. Employing the ground rules of science and the standards of scientific evidence, Prothero and Callahan discuss a wide range of topics including the reliability of eyewitness testimony, psychological research into why people want to believe in aliens and UFOs, and the role conspiratorial thinking plays in UFO culture. They examine a variety of UFO sightings and describe the standards of evidence used to determine whether UFOs are actual alien spacecraft. Finally, they consider our views of aliens and the strong cultural signals that provide the shapes and behaviors of these beings. While their approach is firmly based in science, Prothero and Callahan also share their personal experiences of Area 51, Roswell, and other legendary sites, creating a narrative that is sure to engross both skeptics and believers.

**Reptilian Faunas of the Torrejon, Puerco, and Underlying Upper Cretaceous Formations of San Juan County, New Mexico** Charles Whitney Gilmore, 1919

*Earth's Top Predator - the Reptilians* Andrew Norbert, 2017-07-02 The Reptilians or Reptoids alien race (which is a word mixed from reptilians and humanoids and are the same creature) are human looking lizard creatures that can shape shift. They are also known as dinosauroids, lizardfolk, lizardmen Saurians alpha draconians, and Sauroids. Reptilians are tall, around 7 to 9 feet, have green scaly skin, three long fingers and an opposable thumb with talons on the ends, holes for ears, muscular legs and arms, and large eyes. There have been reports of Reptilians with and without tails, with and without wings, and hidden

genitalia. They have been sighted wearing very little clothes except for armor but are always seen with some sort of utility belt said to be used to help them become invisible. Reptilians are a very dangerous alien species that are bent on the domination of Earth. They are very intelligent, known as evil, have telekinetic powers and have a warlike mentality that has driven them to secretly incorporate themselves into our society for their cause. Some conspiracy theories suspect that many important leaders are actually Reptilians acting as humans in order to help them with their agenda. There are a few different theories as to where the Reptilians actually come from. Some say that they were here on Earth before us humans and live in secret underground, in various caverns around the world while others believe that they are from the Alpha Draconi star system of the Orion Constellation or both. The Reptilians have been around since the beginning of man kind and have been thought to have given the human race much of it's early technology, helped build the pyramids, worked with the Mayans, and helped start early religions pretending to be Gods and manipulating Adam and Eve in the Bible (While dealing with the story of the Garden of Eden, the Midrash also deals with the serpent. It declares that before causing Adam and Eve to sin, it had legs (Bereishit Rabbah, 19). According to this, the serpent was once a tall, splendid and regal creature. When its fate was decided and it is written that upon thy belly shall thou go (Bereishit 3:14), the ministering angels descended and cut off its arms and legs (Bereishit Rabbah, 20). This tradition gives the image of the enticing serpent an impressive dimension, that has repercussions on many viewpoints of the ancient world, which saw the serpent as representing forces of evil on one hand and as possessing supernatural powers on the other

hand.)). Unfortunately their final goal is to eventually enslave the human race in the New World Order and use humans for mining and other physical tasks when the time is right. Out of all the different types of aliens visiting Earth the Reptilians are by far the most dangerous to our very existence as humans. They have very little respect for us and want the Earth for themselves. Some say that the greys have been working against the Reptilians in order to help the human race but it is unclear why. They may have a similar agenda and just don't want the reptilians to acquire the Earth before them.

**Captured by Aliens?** Nigel Watson, 2020-05-22 New Hampshire couple Betty and Barney Hill provided Americans with what is essentially the original alien abduction story. Since their story became public in the early 1960s, many thousands of Americans have likewise come forward with similar stories of traumatic experiences. Sometimes the abductee has little conscious recollection of these events, but through nightmares, dreams, flashbacks and hypnosis they eventually learn more. Sometimes the participants are bewildered. To get a better understanding of the opposing viewpoints of skeptic and believer, the Betty and Barney Hill case is used to examine the wider context of such encounters, their historical origins, media influences and the latest extraterrestrial, psychological, paranormal, conspiracy and sociological theories that surround them.

Ghosh, 2020-08-24 This book presents a comprehensive overview of DNA barcoding and molecular phylogeny, along with a number of case studies. It discusses a number of areas where DNA barcoding can be applied, such as clinical microbiology, especially in relation to infection management; DNA database management; and plant - animal interactions, and also presents valuable information on the DNA barcoding and molecular phylogeny of microbes, algae, elasmobranchs, fishes, birds and ruminant mammals. Furthermore it features unique case studies describing DNA barcoding of reptiles dwelling in Saudi Arabian deserts, genetic variation studies in both wild and hatchery populations of *Anabas testudineus*, DNA barcoding and molecular phylogeny of Ichthyoplankton and juvenile fishes of Kuantan River in Malaysia, and barcoding and molecular phylogenetic analysis of indigenous bacteria from fishes dwelling in a tropical tidal river.
