European Landscape Architecture Ian Thompson,Torben Dam,Jens Balsby Nielsen,2007-09-03 Drawing together case studies from all over Europe, this text explores the relationship between the overall idea of the landscape architecture for a site and the design of details. Examining concept sketches and design development drawings in relation to the details of the design, the book offers a more profound understanding of decision making through all stages of the design process. The book includes the study of the choice of materials and techniques of construction, and explores the cultural and symbolic significance of such choices, as well as questions of environmental sustainability. With projects analyzed and evaluated here that have won international acclaim, or have been awarded national prizes, European Landscape Architecture is a core book in the study and understanding of the subject.

Salutogenetische Faktoren hochaltriger Menschen Uwe Porrmann,2005-03-11 Inhaltsangabe:Zusammenfassung: Ziel der Forschungsarbeit war es, Gründe für ein sehr hohes Lebensalter zu finden und Anhaltspunkte aufzuzeigen, die dieses fördern bzw. begünstigen können. Besonderes Gewicht hat dabei das Modell der Salutogenese von Antonovsky, welches durch den ganzen Forschungsprozess bestimmend war. In der vorliegenden Untersuchung wurden in einem Alten- und Pflegeheim sechs hochaltrige Probanden befragt. Methodologisch wurde die Phänomenologie angewandt. Die Forschung war induktiv angelegt. Aus den transkribierten Daten wurden mit der Inhaltsanalyse sechs salutogene Kategorien aus der Perspektive der hochaltrigen Experten gebildet. Dies sind: „Erfahrung, Prägung, Erziehung“, „subjektives Wohlbefinden, Gesundheit -Krankheit“, „soziale Beziehungen“, „Lebensbewältigung“, „Arbeit und Beschäftigung“, „Lebenszufriedenheit“. In der Interpretation und Diskussion der Kategorien wurden das Modell der Salutogenese, ausgewählte Altersstudien sowie gerontologisches Fachwissen herangezogen. Obwohl die Anzahl der interviewten Personen aus den Ergebnissen keine verallgemeinerbaren Aussagen erlaubt, zeigen die Resultate, dass Hochaltrigkeit phänomenologisch fassbar ist, Langlebigkeit aber nicht mono-kausal erklärt werden kann; es gibt keinen „one best way“ für ein langes Leben. Vielmehr ist die Hochaltrigkeit bestimmt durch ein Geflecht von Faktoren, die in unterschiedlichen Korrelationen wirksam sind. Die Tatsache, dass heute mehr Menschen sehr alt werden, hat sicherlich mehrere Gründe, das kann auf jeden Fall gesagt werden. Entscheidend für Langlebigkeit dürften wohl komplexe Wechselbeziehungen zwischen stabilen salutogenen Persönlichkeitsmerkmalen, Umweltfaktoren und genetischen Dispositionen sein. Auch scheint das Bewältigungshandeln in Krisensituationen, eine positiven Lebenseinstellung und die Prägung in jüngeren Jahren eine bedeutsame Rolle zu spielen. Die Entscheidung über ein langes Leben fällt eher vor und nicht erst im hohen Alter. Die abschließenden Empfehlungen richten sich an Pflegende, an die Gerontologie als Fachwissenschaft und an die Gesellschaft im Allgemeinen. Einleitung: Das Modell der Salutogenese von Aaron Antonovsky hat in jüngerer Zeit in den Sozialwissenschaften viel Aufmerksamkeit erfahren. Der Medizinsoziologe Antonovsky kritisiert in seinem Konzept die rein pathogenetische Betrachtungsweise der Medizin und stellt ihr eine salutogenetische Perspektive gegenüber. Er fragte sich, wie es kommt, dass auch unter [...]

Being German, Becoming Muslim Esra Özyürek,2014-11-23 Every year more and more Europeans, including Germans, are embracing Islam. It is estimated that there are now up to one hundred thousand German converts—a number similar to that in France and the United Kingdom. What stands out about recent conversions is that they take place at a time when Islam is increasingly seen as contrary to European values. Being German, Becoming Muslim explores how Germans come to Islam within this antagonistic climate, how they manage to balance their love for Islam with their society's fear of it, how they relate to immigrant Muslims, and how they shape debates about race, religion, and belonging in today's Europe. Esra Özyürek looks at how mainstream society marginalizes converts and questions their national loyalties. In turn, converts try to disassociate themselves from migrants of Muslim-majority countries and promote a denationalized Islam untainted by Turkish or Arab traditions. Some German Muslims believe that once cleansed of these accretions, the Islam that surfaces fits in well with German values and lifestyle. Others even argue that being a German Muslim is wholly compatible with the older values of the German Enlightenment. Being German, Becoming Muslim provides a fresh window into the connections and tensions stemming from a growing religious phenomenon in Germany and beyond.

Aviation strategy Great Britain: Parliament: House of Commons: Transport Committee,2013-05-15 In this report the Transport Committee reject calls for a new hub airport east of London and urges the expansion of Heathrow where a third runway is long overdue. Building an entirely new hub airport east of London could not be done without huge public investment in new ground transport infrastructure, and there could be a substantial impact on wildlife habitat in the Thames estuary. The viability of an estuary hub airport would also require the closure of Heathrow - a course of action that would have unacceptable consequences. Adding new runways to expand a number of other existing airports will not, on its own, provide a long-term solution to the hub capacity problem. The report also rejects the notion of linking existing airports by high-speed rail to form a split-hub; the outcome from this would be highly uncompetitive in terms of passenger transfer times compared to competitor hubs overseas. Other recommendations cover: compensation for people affected by noise from expansion at Heathrow; a national strategy to improve road and rail access to major UK airports; ensure that the High Speed 2 (HS2) rail network serves Heathrow and develop dedicated rail services to serve Gatwick and Stansted; study how far Air Passenger Duty impacts on the UK economy; carry out an objective analysis of the impacts of introducing differential rates of Air Passenger Duty; promotion of airports in regions outside the south east and introduce an APD tax holiday for a 12-month trial period for new services from them.

Uniformity of Customs Administration in the European Union Kathrin Limbach,2015-11-19 Uniform customs administration is of great importance for the EU and the competitiveness of EU businesses in global trade. However, the EU's so-called executive federalism raises the potential for the non-uniform application of EU customs law. This problem has already arisen in the European Communities – Selected Customs Matters WTO dispute settlement. Therefore, the central research question of this book concerns the challenge presented to executive federalism in the EU Customs Union by the WTO. It also examines those safeguard measures for uniform customs administration which are in operation. Valuable empirical analysis of the decision-making procedures and practices of the national customs authorities allows for the fullest understanding of the operation of the customs administration. An important feature of the exploration is its analysis of the reform of EU customs law and of the effectiveness of the European Union's strategies to enhance uniform customs administration. That analysis helps to identify potential weak points in the decentralised administration of EU customs law and suggests ways in which it might be improved. Scholarly, rigorous and timely, this important study will be required reading for all scholars of EU customs law.

Algebra, Geometry and Software Systems Michael Joswig,Nobuki Takayama,2013-03-14 A collection of surveys and research papers on mathematical software and algorithms. The common thread is that the field of mathematical applications lies on the border between algebra and geometry. Topics include polyhedral geometry, elimination theory, algebraic surfaces, Gröbner bases, triangulations of point sets and the mutual relationship. This diversity is accompanied by the abundance of available software systems which often handle only special mathematical aspects. This is why the volume also focuses on solutions to the integration of mathematical software systems. This includes low-level and XML based high-level communication channels as well as general frameworks for modular systems.

Regulated Self-regulation as a Form of Modern Government Wolfgang Schulz,Thorsten Held,2004 Massive changes are taking place all over the world in redefining the relationship between government, public, and private institutions. Nowhere is this redefinition more urgent than in communications, where widespread privatization and deregulation of telecommunication companies and broadcasters has created a need for new modes of corporate governance in the new global marketplace. In this study, Wolfgang Schulz and Thorsten Held set out to find answers to key questions relating to the changing role of government--especially in regulating the transnational communications industry--and to provide a tool kit for what they call regulated self-regulation applicable across the world.

The Bloomsbury Dictionary of Eighteenth-Century German Philosophers Heiner F. Klemme,Manfred Kuehn,2016-06-30 The Bloomsbury Dictionary of Eighteenth-Century German Philosophers is a landmark work. Covering one of the most innovative centuries for philosophical investigation, it features more than 650 entries on the eighteenth-century philosophers, theologians, jurists, physicians, scholars, writers, literary critics and historians whose work has had lasting philosophical significance. Alongside well-known German philosophers of that era-Gottfried Wilhelm Leibniz, Immanuel Kant, and Georg Wilhelm Friedrich Hegel-the Dictionary provides rare insights into the lives and minds of lesser-known individuals who influenced the shape of philosophy. Each entry discusses a particular philosopher's life, contributions to the world of thought, and later influences, focusing not only on their most important published writings, but on relevant minor works as well. Bibliographical references to primary and secondary source material are included at the end of entries to encourage further reading, while extensive cross-referencing allows comparisons to be easily made between different thinkers' ideas and practices. For anyone looking to understand more about the century when enlightenment thinking arrived in Germany and established conceits were challenged, The Bloomsbury Dictionary of Eighteenth-Century German Philosophers is a valuable, unparalleled resource.

International IDEA Handbook on Democracy Assessment Iain Kearton,Sarah Bracking,Stuart Weir,David Beetham,2021-11-15 The International IDEA Handbook on Democracy Assessment is a robust and sensitive guide to assessing the quality of democracy and human rights in any country around the world. The Handbook introduces an easy-to-use and universal methodology for assessing the condition of democracy in any country, or its progress in democratisation, that has been developed in a three-year action programme at IDEA, the inter-governmental Institute for Democracy and Electoral Assistance in Sweden. The Handbook provides a means to measure systematically the full range of values, institutions and issues relating to modern democracy that is sensitive to the underlying principles and democracy and the differences between democracies themselves. It is therefore both universal in application and capable of responding to particular aspects of any one nation's democratic arrangements. The animating principle of the Handbook is that only citizens of a nation themselves are qualified to assess the quality of their own democratic arrangements. Thus, it provides a self-help guide, which gives academics, lawyers, political practitioners, journalists and interested citizens the tools to assess the state of their democracy, or any key aspects of their democracy. The Handbook is above all a practical working document that draws on the actual experience of assessing democracy in different countries, comparative knowledge and research, and democratic principles and practice. It gives a step-by-step guide to the purposes and methods of democracy assessment; who to involve; how to use the research tools; how to validate the findings; what standards of practice to adopt; and how to present and publicise a finished assessment. It contains extracts from completed assessments, guidance on the use of qualitative and quantitative data, examples of codes of democratic practice and international and regional standards, and a vast list of accessible data sources. The methodology was created by a team of political scientists assembled from all regions of the world by International IDEA and has been tried and tested in a variety of countries, including Bangladesh, El Salvador, Italy, Kenya, Malawi, New Zealand, Peru, South Korea and the United Kingdom. International organisations like the World Bank and UNECA are adapting it for in-country use. The four main authors and editors have been directly involved from the inception of the project - in developing and refining the methodology and participating in and advising on the nine country studies that form the essential practical core of experience on which this invaluable Handbook is based.
