**The Environmental Brief** Richard Hyde, Steve Watson, York St John Business School  
Steve Watson, Wendy Cheshire, Mark Thomson, 2007-01-24 The built environment is responsible for an estimated forty-five per cent of all greenhouse gas emissions. As the greatest opportunities for reducing these emissions occur during the briefing and design processes, the pathway to better design lies in preparing environmental briefs, and using these to drive building design and produce buildings of high environmental performance. This process-driven book looks at the theoretical issues involved in an environmental brief, and outlines methods by which architects can approach the writing of a brief that considers all aspects of the natural and the built environment, and relates these concepts to a number of case studies from around the world.

Queer Teaching - Teaching Queer Declan Fahie, Aideen Quilty, Renée DePalma Ungaro, 2020-06-09 This book draws upon contemporary Irish and international research which explores the critical interplay between education studies and sexualities. Scholars from Ireland, Canada, Spain, the U.K. and Sweden employ the conceptual lens of Queer Theory to interrogate and destabilise long-standing regimes of truth/knowledge, and in so doing, highlight the suitability and applicability of this theoretical perspective within educational discourses. By reframing and repositioning gender identity/expression as a performative expression on a fluid continuum, this book provokes readers to (re)view how they see education, pedagogy and schooling. The book interrogates what happens to teaching, and teachers, when queerness permeates their practice, thus exposing the ways in which heteronormativity informs and shapes our places/sites of education. This book was originally published as a special issue of the Irish Educational Studies journal.

Inside the Crosshairs Col. Michael Lee Lanning, 2013-06-19 The American sniper could be regarded as the greatest all-around rifleman the world has ever known. . . . At the start of the war in Vietnam, the United States had no snipers; by the end of the war, Marine and army precision marksmen had killed more than 10,000 NVA and VC soldiers--the equivalent of an entire division--at the cost of under 20,000 bullets, proving that long-range shooters still had a place in the battlefield. Now noted military historian Michael Lee Lanning shows how U.S. snipers in Vietnam--combining modern technology in weapons, ammunition, and telescopes--used the experience and traditions of centuries of expert shooters to perfect their craft. To provide insight into the use of American snipers in Vietnam, Lanning interviewed men with combat trigger time, as well as their instructors, the founders of the Marine and U.S. Army sniper programs, and the generals to whom they reported. Backed by hard information and firsthand accounts, the author demonstrates how the skills these one-shot killers honed in the jungles of Vietnam provided an indelible legacy that helped save American lives in Grenada, the Gulf War, and Somalia and continues to this day with American troops in Bosnia.

**A Generous and Merciful Enemy** Daniel Krebs, 2013-04-30 Some 37,000 soldiers from six German principalities, collectively remembered as Hessians, entered service as British auxiliaries in the American War of Independence. At times, they constituted a third of the British army in North America, and thousands of them were imprisoned by the Americans. Despite the importance of Germans in the British war effort, historians have largely overlooked these men. Drawing on research in German military records and common soldiers' letters and diaries, Daniel Krebs places the prisoners on center stage in *A Generous and Merciful Enemy*, portraying them as individuals rather than simply as numbers in casualty lists. Setting his account in the context of British and European politics and warfare, Krebs explains the motivations of the German states that provided contract soldiers for the British army. We think of the Hessians as mercenaries, but, as he shows, many were conscripts. Some were new recruits; others, veterans. Some wanted to stay in the New World after the war. Krebs further describes how the Germans were made

prisoners, either through capture or surrender, and brings to life their experiences in captivity from New England to Havana, Cuba. Krebs discusses prison conditions in detail, addressing both the American approach to war prisoners and the prisoners' responses to their experience. He assesses American efforts as a "generous and merciful enemy" to use the prisoners as economic, military, and propagandistic assets. In the process, he never loses sight of the impact of imprisonment on the POWs themselves. Adding new dimensions to an important but often neglected topic in military history, Krebs probes the origins of the modern treatment of POWs. An epilogue describes an almost-forgotten 1785 treaty between the United States and Prussia, the first in western legal history to regulate the treatment of prisoners of war.

*Exploring Career Trajectories of Men in the Early Childhood Education and Care Workforce* David L. Brody, Kari Emilsen, Tim Rohrmann, Jo Warin, 2020-11-25 The role of men in early childhood education and care is crucial for the future of all children growing up in a gender sensitive world. Achieving greater diversity and gender balance in the workforce has proved a challenging goal, despite concerted efforts on the part of individuals, institutions, and governments around the world. Many men remain reluctant to enter the profession, and once they choose this work many leave. This book explores how men in the field make their career decisions to remain in or leave the profession. Taking a broad international perspective and exploring the role of gender in these career decisions, contributors from around the globe unpack how gender concepts influence men's career trajectories. Through their collaborative research, the team of 17 gender and early childhood researchers investigate various critical and relevant factors such as professionalisation, workplace environment, leadership, day to day interactions in the workplace, societal considerations, internal motivations, agency, masculinities, and critical moments in career decision making. Using cultural, racial, ethnic, and social class lenses to examine men's career decisions over their professional lives, the contributors' unique approach uncovers the complexity of the issue and offers evidence-based recommendations for policy both on national and local levels. These include practical suggestions to directors and managers who care about achieving a gender-mixed workforce. Accessible and enlightening, this is a unique resource for scholars, policymakers, and any others in the education community who support boosting the inclusion of men in early childhood education.

**Sustainable Development** Mark Mawhinney, 2008-04-15 Can there be a common definition of sustainable development? Views on sustainable development range from those of the mainstream economist to the hardened environmentalist – via many shades of green. This book offers a clear overview of the debates and sets out the various theories, providing an accessible introduction for all who now need to understand how sustainable development affects their working practices. The text is structured around key questions on the concept of sustainable development: Does it define a starting point, a process, or the end-goal? Can it provide a coherent theory? Is it a workable concept in practice? Is it 'balanced' or does 'balance' form part of the solution? Mark Mawhinney explores the various strands of thought that claim to define sustainable development - as a concept, a theory or as a set of principles. He also highlights gaps in understanding that often arise and attempts to break down the barriers to a common understanding - redefining current concepts in terms that will help to progress the debate on sustainable development.

**Religious Education at Schools in Europe** Martin Rothgangel, Robert Jackson, Martin Jäggle, 2014-05-14 The project Religious Education at Schools in Europe (REL-EDU), which is divided up into six volumes (Central Europe, Western Europe, Northern Europe, Southern Europe, South-Eastern Europe, Eastern Europe), aims to research the situation with regard to religious education in Europe. The second volume outlines the organisational form of religious education in the countries of Western Europe (England, Ireland, Northern Ireland,

Scotland, Wales, Belgium, France, Luxembourg, Netherlands). This is done on the basis of thirteen key issues, which allows specific points of comparison between different countries in Europe. Thereby the volume focusses the comparative approach and facilitates further research into specific aspects of the comparison.

English Teachers at Work Brenton Doecke, David Homer, Helen Nixon, 2003 By taking a global perspective on teaching English, this work takes into account a wide variety of challenges English teachers face and stresses the importance of networking and communicating with colleagues around the world as a means of overcoming those challenges. A richly differentiated view on what it means to be an English teacher is offered, as are fascinating narratives about the diverse efforts of teachers in different communities. Points of view from contributors in North America, Australia, Chile, New Zealand, New Guinea, South Africa, and the United Kingdom are expressed and placed in an illuminating context with practical and theoretical considerations about teaching English.

*Compassion and Respect* John J. Mawhinney, 2020-11-20 This book is primarily for a general audience of persons of good will, regardless of faith or non-faith, as well as for professionals who counsel others on the issues discussed. Written in a simple, straightforward language, it is meant to help people dialogue on acrimoniously divisive issues that divide and undermine our nation--such as abortion, family planning, contraception, in-vitro fertilization (IVF), and LGBTQ issues--through respectful dialogue in public forums (small or large) by searching for mediating middle ground compromises, just as trade and peace negotiators do. No one in the dialogue may be satisfied with the concessions they have to make but they can at least live with them until better solutions are found. Those engaging in such dialogue must be open to understanding where others are coming from, and be respectful of the good-faith consciences of others, and avoiding passing laws that would hurt the consciences of others.

**The Well-Balanced Teacher** Mike Anderson, 2010-09-16 This book is designed to improve the way that teachers care for themselves in five key areas, so that they may more effectively attend to the needs of their students.

School Leadership and Complexity Theory Keith Morrison, 2012-12-06 Interest in complexity theory, a relation of chaos theory, has become well established in the business community in recent years. Complexity theory argues that systems are complex interactions of many parts which cannot be predicted by accepted linear equations. In this book, Keith Morrison introduces complexity theory to the world of education, drawing out its implications for school leadership. He suggests that schools are complex, nonlinear and unpredictable systems, and that this impacts significantly within them. As schools race to keep up with change and innovation, he suggests that it is possible to find order without control and to lead without coercion. Key areas: \* schools and self-organisation \* leadership for self-organisation \* supporting emergence through the learning organisation \* schools and their environments \* communication \* fitness landscapes This book will be of interest to headteachers and middle managers, and those on higher level courses in educational leadership and management.

**International Construction** Mark Mawhinney, 2008-04-15 A recent construction project in Singapore involved a Russian plant, a Japanese management team, Australian and Italian engineers, Thai steel workers and a labour force from throughout Asia ... The

recent growth explosion of multi-nationals and the lowering of trade barriers is pushing the globalization of construction at a startling pace. Mark Mawhinney has brought together for the first time, advice, information and evidence on this developing arena from a wide range of sources. This book offers a clear understanding of the international construction market and an explanation of what knowledge is required to operate successfully in it. It also helps readers become familiar with some of the analytical tools available. Drawing on both contractor and consultant case studies and including a practical 'hints and signposts' section, *International Construction* provides a lively and informed introduction for construction professionals moving into international work.

History and Hope Brian Eggins, 2015-03-02 In 1970, a group of people had what many commentators felt was a ludicrous dream, that politics in Northern Ireland 'should not be dominated by division, but should be about co-operation, partnership and reconciliation'. This dream was to become the Alliance Party of Northern Ireland. In the years since, this ambition to overcome tribal politics for a greater good has been preserved, through good times and bad. This book, the first full record of the development of the Alliance Party, charts that journey of hope and of history.

**Impact of Diversity on Organization and Career Development** Hughes, Claretha, 2014-11-30 Today's workforce represents individuals of various backgrounds and experiences. The influence of such individuals is becoming an important component in the workplace and researchers continue to explore the challenges of understanding the connection between employee profiles and the overall success of a company. *Impact of Diversity on Organization and Career Development* brings together a reflective discussion on the previous approaches and strategies of companies in relation to the paradigm shift in workplace equity of today's workforce. By examining both old and new strategies, the research included in this publication will present a unique approach for future company enhancement and employee success. This publication is an essential reference source for researchers, practitioners, managers, and students interested in the effects of multicultural representation on both a company and its employees through professional growth and advancement.

**Rethinking Negotiation Teaching** Christopher Honeyman, James Coben, Giuseppe De Palo,

The Reception of Husserlian Phenomenology in North America Michela Beatrice Ferri, 2019-06-05 This book presents a historiographical and theoretical analysis of how Husserlian Phenomenology arrived and developed in North America. The chapters analyze the different phases of the reception of Edmund Husserl's thought in the USA and Canada. The volume discusses the authors and universities that played a fundamental role in promoting Husserlian Phenomenology and clarifies their connection with American Philosophy, Pragmatism, and with Analytic Philosophy. Starting from the analysis of how the first American Scholars of Edmund Husserl's thought opened the door to the reception of his texts, the book explores the first encounters between Pragmatism and Husserlian Phenomenology in American Universities. The study focuses, then, on those Scholars who fled from Europe to America, from 1933 onwards, to escape Nazism - Felix Kaufmann, Alfred Schutz, Aron Gurwitsch, Herbert Spiegelberg, Fritz Kaufmann, among the most notable - and illustrates how their teaching provided the very basis for the spreading of Husserlian Phenomenology in North America. The volume examines, then, the action of the 20th Century North-American Husserl Scholars, together with those places, societies, centers, and journals, specifically created to represent the development of the studies devoted to Husserlian Phenomenology in the U.S., with a focus of the Regional Phenomenological Schools.

*Ecology and Conservation of North American Sea Ducks* Jean-Pierre L. Savard, Dirk V. Derksen, Dan Esler, John M. Eadie, 2015-04-13 The past decade has seen a huge increase in the interest and attention directed toward sea ducks, the Mergini tribe. This has been inspired, in large part, by the conservation concerns associated with numerical declines in several sea duck species and populations, as well as a growing appreciation for their interesting ecological attributes. Reflecting the considerable research recently conducted on this tribe, *Ecology and Conservation of North American Sea Ducks* examines the 15 extant species of sea ducks from North America. Chapters are organized conceptually to focus on, compare, and contrast the ecological attributes of the tribe. Experts provide in-depth treatments of a range of topics, including: Population dynamics and genetics Infectious diseases and parasites Breeding costs and cross-seasonal effects Contaminant burdens Foraging behavior and energetics Migration strategies, molt ecology, and habitat affinities and dynamics Breeding systems and reproductive behavior Harvest history The book presents a comprehensive synthesis of sea duck ecology, documents factors that have caused population declines of some species, and provides managers with measures to enhance recovery of depressed populations of sea ducks in North America. Capturing the current state of knowledge of this unique tribe, it provides a benchmark for where we are in conservation efforts and suggests future directions for researchers, managers, students, conservationists, and avian enthusiasts.

*Boots on the Ground* Karl Zinsmeister, 2004-10-05 The author, a correspondent for The National Review, describes his experiences as an embedded reporter with the 82nd Airborne Division.
