Robin Hood in Outlaw/ed Spaces Lesley Coote, Valerie B.

Johnson, 2016-11-10 Following in the tradition of recent work by cultural geographers and historians of maps, this collection examines the apparently familiar figure of Robin Hood as he can be located within spaces that are geographical, cultural, and temporal. The volume is divided into two sections: the first features an interrogation of the literary and other textually transmitted spaces to uncover the critical grounds in which the Robin Hood 'legend' has traditionally operated. The essays in Part Two take up issues related to performative and experiential space, demonstrating the reciprocal relationship between page, stage, and lived experience. Throughout the volume, the contributors contend with, among other things, modern theories of gender, literary detective work, and the ways in which the settings that once advanced court performances now include digital gaming and the enactment of 'real' lives.

The Films of Robin Williams Johnson Cheu, 2019-05-30 From his first appearance as Mork from Ork on the 1970s sitcom Happy Days, Robin Williams was heralded as a singular talent. In the pre-cable television era, he was one of the few performers to successfully transition from TV to film. An Oscar-winning actor and preternaturally quick-witted comedian, Williams became a cultural

icon, leaving behind a large and varied body of work when he unexpectedly took his own life in 2014. This collection of new essays brings together a range of perspectives on Williams and his oeuvre, including beloved hits like *Mrs. Doubtfire*, *Good Morning, Vietnam*, *Good Will Hunting*, *The Fisher King*, *Dead Poets Society* and *Aladdin*. Contributors explore his earlier work (*Mork and Mindy*, *The World According to Garp*) and his political and satirical films (*Moscow on the Hudson*, *Toys*). Williams's darker, less well-known fare, such as *Being Human*, *One Hour Photo*, *Final Cut* and *Boulevard*, is also covered. Williams's artistry has become woven into the fabric of our global media culture.

The Ecophobia Hypothesis Simon C. Estok, 2018-06-27 The Ecophobia Hypothesis grows out of the sense that while the theory of biophilia has productively addressed ideal human affinities with nature, the capacity of “the biophilia hypothesis” as an explanatory model of human/ environment relations is limited. The biophilia hypothesis cannot adequately account for the kinds of things that are going on in the world, things so extraordinary that we are increasingly coming to understand the current age as “the Anthropocene.” Building on the usefulness of the biophilia hypothesis, this book argues that biophilia exists on a broader spectrum that has not been adequately theorized. The Ecophobia Hypothesis claims that in order to contextualize biophilia (literally, the “love of life”) and the spectrum on which it sits, it is necessary to theorize how very unphilic human uses of the natural world are. This volume offers a rich tapestry of connected, comparative discussions about the new material turn and the urgent need to address the agency of genes, about the complexities of 21st century representations of ecophobia, and about how imagining terror interpenetrates the imagining of an

increasingly oppositional natural environment. Furthermore, this book proposes that ecophobia is one root cause that explains why ecomedia—a veritably thriving industry—is having so little measurable impact in transforming our adaptive capacities. The ecophobia hypothesis offers an equation that determines the variable spectrums of the Anthropocene by measuring the ecophobic implications and inequalities of speciesism and the entanglement of environmental ethics with the writing of literary madness and pain. This work also investigates how current ecophobic perspectives systemically institutionalize the infrastructures of industrial agriculture and waste management. This is a book about revealing ecophobia and prompting transformational change.

Terrorism and the Politics of Fear David L. Altheide, 2017-06-27

This thoughtful text demonstrates how the mass media constructs a politics of fear in the United States. Using a social interactionist perspective, the chapters examines such issues as the expansion of surveillance on the Internet, the construction of a terrorism-fighting hero to promote patriotism, the use of social media by terror groups, the fear of the other fostered by the refugee crisis and western radicalization, as well as the mass-mediated reaction to recent terrorist attacks. Also covered are the politics of fear involving disease (Ebola, Zika), social control efforts, and harsh attacks on American governmental officials for not keeping people safe from harm. All chapters in this new edition have been updated with descriptions and relevant analysis of significant events, including two Israeli-Hamas wars, terrorism attacks (e.g., Boston Marathon, Charlie Hebdo, San Bernadino, etc.), global reactions—often hostility—to refugees in the United States and especially Europe, the development of ISIS, surveillance (Wiki Leaks, Snowden, NSA), and the growing

significance of social media. The text explains how the social construction of fear is used to steer public and foreign policy, arguing that security policies to protect the citizenry from violence have become control systems that most often curtail privacy and civil liberties.

A Bird Watcher's Guide to Robins Rebecca Carey

Rohan,2015-12-15 Winter-weary people everywhere rejoice when they finally spy robins, an early sign of spring. These cheery birds can be seen hopping on lawns, tugging worms out of the ground. This delightful account of a young bird watcher's discoveries about robins will both entertain and educate future ornithologists about the robin's habitat, nest-making behaviors, migratory habits, and other adaptations. Beautifully designed, this volume enthusiastically promotes the hobby of bird-watching.

Mirror in the Sky Simon Morrison,2024-03-19 A stunning musical

biography of Stevie Nicks that paints a portrait of an artist, not a caricature of a superstar. Reflective and expansive, *Mirror in the Sky* situates Stevie Nicks as one of the finest songwriters of the twentieth century. This biography from distinguished music historian Simon Morrison examines Nicks as a singer and songwriter before and beyond her career with Fleetwood Mac, from the Arizona landscape of her childhood to the strobe-lit Night of 1000 Stevies celebrations. The book uniquely: Analyzes Nicks's craft—the grain of her voice, the poetry of her lyrics, the melodic and harmonic syntax of her songs. Identifies the American folk and country influences on her musical imagination that place her within a distinctly American tradition of women songwriters. Draws from oral histories and surprising archival discoveries to connect Nicks's story to those of California's above- and underground music industries, innovations in recording technology,

and gendered restrictions.

Seeing the Light Thomas DeGloma, 2014-11-26 This title explores the distinctly social logic of awakening narratives - autobiographical stories people tell about having once been contained in a world of darkness and ignorance and subsequently awakening to an enlightened understanding of their experiences and situations. It analyses a wide variety of stories spanning roughly ten thousand years of history and pertaining to various philosophical, religious, political, scientific, psychological, and sexual subject matters.

Ecocriticism and Shakespeare Simon C. Estok, 2011-04-25 This book offers the term 'ecophobia' as a way of understanding and organizing representations of contempt for the natural world. Estok argues that this vocabulary is both necessary to the developing area of ecocritical studies and for our understandings of the representations of 'Nature' in Shakespeare.

Peirce Mattering Dorothea Sophia, 2023-04-15 This book explores real valuation through tracing the pragmatic meanings of mattering. Employing Peirce's overall pragmatic method and realism to understand what we mean when we say something matters, it encourages consideration of the practices we engage in, the values attached to those practices, and their consequences.

Springer Handbook of Model-Based Science Lorenzo Magnani, Tommaso Bertolotti, 2017-05-22 This handbook offers the first comprehensive reference guide to the interdisciplinary field of model-based reasoning. It highlights the role of models as mediators between theory and experimentation, and as educational devices, as well as their relevance in testing hypotheses and explanatory

functions. The Springer Handbook merges philosophical, cognitive and epistemological perspectives on models with the more practical needs related to the application of this tool across various disciplines and practices. The result is a unique, reliable source of information that guides readers toward an understanding of different aspects of model-based science, such as the theoretical and cognitive nature of models, as well as their practical and logical aspects. The inferential role of models in hypothetical reasoning, abduction and creativity once they are constructed, adopted, and manipulated for different scientific and technological purposes is also discussed. Written by a group of internationally renowned experts in philosophy, the history of science, general epistemology, mathematics, cognitive and computer science, physics and life sciences, as well as engineering, architecture, and economics, this Handbook uses numerous diagrams, schemes and other visual representations to promote a better understanding of the concepts. This also makes it highly accessible to an audience of scholars and students with different scientific backgrounds. All in all, the Springer Handbook of Model-Based Science represents the definitive application-oriented reference guide to the interdisciplinary field of model-based reasoning.

The Idea of Russia Vladislav Zubok, 2017-01-30 Dmitry Likhachev (1906-1999) was one of the most prominent Russian intellectuals of the twentieth century. His life spanned virtually the entire century - a tumultuous period which saw Russia move from Tsarist rule under Nicholas II via the Russian Revolution and Civil War into seven decades of communism followed by Gorbachev's Perestroika and the rise of Putin. In 1928, shortly after completing his university education, Likhachev was arrested, charged with counter-revolutionary ideas and imprisoned in the Gulag, where he spent the

next five years. Returning to a career in academia, specialising in Old Russian literature, Likhachev played a crucial role in the cultural life of twentieth-century Russia, campaigning for the protection of important cultural sites and historic monuments. He also founded museums dedicated to great Russian writers including Dostoevsky, Pushkin and Pasternak. In this, the first biography of Likhachev to appear in English, Vladislav Zubok provides a thoroughly-researched account of one of Russia's most extraordinary and influential public figures.

Poetry and Truth Jerry Schuchalter, 2009 The 1990s saw the appearance of many new works that have redefined and embellished the canon of Holocaust literature. While many of these works have quickly become classics, some have raised new questions about the processes of canonicity. This study concentrates particularly on works in German by Jewish Holocaust survivors written and published approximately fifty years after the fateful cataclysm, focusing on such crucial issues as genre and testimony. Despite the long shadow cast by the Holocaust on subsequent generations, the author shows that narratives on the Holocaust have continued to thrive, offering inventive interpretations of questions that have been thought to defy explanation.

Fordham College Monthly , 1915

Queen of Spies Paddy Hayes, 2016-01-19 This “fascinating and long overdue” biography reveals the remarkable life of a Baroness who was one of Britain’s most celebrated spies (Washington Post). From living in a shack in Tanzania to becoming Baroness Park of Monmouth, Daphne Park led a most unusual life—one that consisted of a lifelong love affair with the world of Britain’s secret services. In the 1970s, she was appointed to Secret Intelligence Service’s most senior operational

rank as one of its seven Area Controllers. In *Queen of Spies*, Paddy Hayes recounts the evolution of the British Secret Intelligence Service (SIS) from World War II to the Cold War through the eyes of Daphne Park, one of its outstanding and most unusual operatives. It is a fascinating and intimate narrative of how the modern SIS went about its business whether in Moscow, Hanoi, or the Congo, and shows how Park was able to rise through the ranks of a field that had been comprised almost entirely of men. *Queen of Spies* captures all the paranoia, isolation, and deception of Cold War intelligence work, and combines it with the personal story of one extraordinary woman trying to navigate this secretive world. It is “as exciting as any good spy thriller—but it’s all true” (Kirkus, starred review).
