pHealth 2019 B. Blobel,M. Giacomini,2019-05-29 Smart mobile systems like micro-systems, smart textiles and implants and sensor-controlled medical devices, together with related networks and cloud services, are important enablers for telemedicine and pervasive health to become the next generation of health services. Social media and gamification have added further to pHealth as an ecosystem. This book presents the proceedings of pHealth 2019, the 16th in a series of international conferences on personalized health, held in Genoa, Italy, from 10 – 12 June 2019. The book includes 1 keynote, 2 of 4 invited talks, 36 oral presentations and 7 poster presentations from a total of 141 international authors. All submissions were critically reviewed by at least two independent experts and a member of the Scientific Program Committee. This process resulted in a full paper rejection rate of more than 30%. Besides wearable or implantable micro and nano technologies for personalized medicine, this volume addresses topics such as legal, ethical, social, and organizational requirements and impacts as well as necessary basic research for enabling future proof care paradigms. Such participatory, predictive, personalized, preventive, and effective care settings combine medical services and public health, prevention, social and elderly care, but also wellness and personal fitness. The multilateral benefits of pHealth technologies for all stakeholder communities offer enormous potential for the

improvement of both care quality and industrial competitiveness, and also for the management of health care costs. Hence, the book will be of interest to all those involved in the provision of healthcare.

  Trust, Complexity and Control Piotr Cofta,2007-09-27 An increasing reliance on the Internet and mobile communication has deprived us of our usual means of assessing another party's trustworthiness. This is increasingly forcing us to rely on control. Yet the notion of trust and trustworthiness is essential to the continued development of a technology-enabled society. Trust, Complexity and Control offers readers a single, consistent explanation of how the sociological concept of 'trust' can be applied to a broad spectrum of technology-related areas; convergent communication, automated agents, digital security, semantic web, artificial intelligence, e-commerce, e-government, privacy etc. It presents a model of confidence in which trust and control are driven and limited by complexity in one explanatory framework and demonstrates how that framework can be applied to different research and application areas. Starting with the individual's assessment of trust, the book shows the reader how application of the framework can clarify misunderstandings and offer solutions to complex problems. The uniqueness of Trust, Complexity and Control is its interdisciplinary treatment of a variety of diverse areas using a single framework. Sections featured include: Trust and distrust in the digital world. The impact of convergent communication and networks on trust. Trust, economy and commerce. Trust-enhancing technologies.

Trust, Complexity and Control is an invaluable source of reference for both researchers and practitioners within the Trust community. It will also be of benefit to students and lecturers in the fields of information technology, social sciences and computer engineering.

Sexuality Education from an Islamic Perspective G. Hussein Rassool,Muhammad Aftab Khan,Shaikh Abdul Mabud,Muhammad Ahsan,2020-02-13 We live in an over-sexualised culture where sex and sexuality have become part of the public domain. This sexual revolution challenges Judeo-Christian and Islamic norms and boundaries. As such, sexuality education is a sensitive and extremely important issue, and its current implementation in schools has raised public concerns. This book explores the subject, contextualising it within the matrix of Islamic beliefs and practices. Islam binds sexuality and sexual education to a moral grid with rights and obligations, justice and equity. There is a dominant discourse and stereotype around 'Islamic sexuality', which presents sex and sexuality as the biggest taboo, fraught with fear and

seldom discussed. This book dispels such myths and misconceptions, providing an overview of sexuality education in the modern world and the need for such education.

  Ecological Modelling for Sustainable Development (Penerbit USM) Koh Hock Lye,Teh Su Yean,Shahrul Anuar Mohd Sah,Zary Shariman Yahaya,Anita Talib,2015-08-21 In view of the current global scenario, which highlighted the importance of sustainable development and sustaining natural resources, the theme selected for the 2nd Regional ECOMOD 2007 Conference was indeed appropriate. This conference has generated overwhelming interest and I am sure the participants have focussed diligently on the serious issues concerning important environmental issues and steps needed to be taken towards a sustainable development and management of our natural resources and environment. As governments in the Asian region introduce new initiatives and development policies to rejuvenate and protect their environment and natural resources, it is imperative that universities and research institutions play a fundamental role in ensuring that the objectives of these policies are realized. Such institutions can complement government proposals by embarking on research that is relevant and valuable to the needs of respective nations and pursuing extensive research so that the outcome and technology generated

can be transferred effectively to the end users. This concerted effort by all the researchers from different fields to improve and manage our natural resources should be lauded. I strongly believe that this conference is an extraordinary testimony to our capacity building at regional and local levels. I believe USM has something interesting to share with all of you in this area. Finally, on behalf of the Organizing Committee, I hope readers will find this book of proceedings useful, informative and stimulating.

  Affective Feedback in Intelligent Tutoring Systems Samantha Jiménez,Reyes Juárez-Ramírez,Victor H. Castillo,Juan José Tapia Armenta,2018-07-09 Affective components are as important as cognitive components in tutoring assisted learning process. Feedback from tutors is essential in keeping students motivated. Affectivity and motivation are also significant in computer-based tutoring systems. However, several educational frameworks do not include this kind of interaction between students and tutoring systems.

In those cases, the students learning interest and motivation to learn could be negatively affected, and student profits from the system could be impoverished. This is why tutoring systems need to provide direct and affective interaction with students; it can encourage them and increase the motivation to learn. This book introduces a broad range of topics in affective learning in computer-based systems. The text offers a deep conceptual background, covering relevant concepts of affectivity, feedback and motivational components in learning environments. It describes the design of a proposed model for providing affective feedback, the mathematical validation of the conceptual model and its implementation. Moreover, it presents an analysis of the impact of the affective feedback on student motivation to learn. Finally, the book offers research perspectives of the impact and applicability of the affective feedback in computer-based tutoring environments. Affective Feedback in Intelligent Tutoring Systems can be used by human tutors who want to include motivational and affective elements in the learning process, researchers in Human-Computer Interaction and Education and by software developers who want to develop learning systems using these elements.

Digital Psychology's Impact on Business and Society Anshari, Muhammad,Razzaq, Abdur,Fithriyah, Mia,Kamal, Akmal Nasri,2022-12-19 Individuals, businesses, organizations, and countries all benefit from having access to data. People who generate data do it voluntarily, forming their habits, patterns, and behaviors in the process. Their psychological characteristics will be better understood as a result of the data that they generate, allowing them to make intelligent decisions. Organizations are motivated by the desire to collect and analyze as much data as possible from the general public or future customers in order to better understand their psychological features and influence them to purchase their products or services. As a result, there has been a great deal of debate concerning the use of data from the perspectives of individuals, organizations, the public, and the government. Digital Psychology's Impact on Business and Society considers the phenomena of digital psychology and society in general and evaluates individual strategies and those of businesses, organizations, and even nations. Covering topics such as big data, marketing, social media, and social computing, this reference work is ideal for policymakers, psychologists, business owners, managers, industry professionals, researchers, scholars, practitioners, academicians, instructors, and students.

Design research in software development: Constructing and Linking Research Questions, Objectives, Methods and Outcomes (UUM Press) Norshuhada

Shiratuddin ,Shahizan Hassan,2010-01-01 Design research is grounded on the iterative Triangulation Methodology (ITM), where theoretical, development and empirical research approaches are triangulated to accomplish the design research objectives. Constructing and associating research gaps, questions, objectives, methods and outcomes are imperative in a research. However, not linking all these and choosing the wrong and poorly designed methods are common especially among inexperienced researchers and students. Therefore, researchers should practice strategies in identifying the right methods to collect data or perform experiment that can meet the predefined objectives and determined research problems. This book is aimed at providing some of the likely strategies. It contains personalized strategies and examples that are useful for starting a design research in any field particularly in software and application development. The examples described are real studies that we conducted together with our research team members.

  Brunei English David Deterding,Salbrina Sharbawi,2013-05-13 This detailed survey of Brunei English reflects the burgeoning academic interest in the many new varieties of English which are fast evolving around the world. Wholly up to date, the study is based on careful analysis of a substantial dataset that provides real-life examples of usage to illustrate the narrative throughout. As well as a thorough account of the pronunciation, grammar, vocabulary usage, and discourse patterns of Brunei English, the volume explores its historical and educational background and current developmental

trends, providing an in-depth review of the patterns of English usage within this multilingual, oil-rich society on the north-western coast of Borneo. Written in a non-technical style throughout that will assist non-specialists wishing to grasp the fundamentals of this unique brand of the English language, the work is a worthy addition to Springer's series on multilingual education that plugs a gap in the coverage of the numerous varieties of English being used across South East Asia. "The authors bring renewed and badly needed attention to the long-overlooked development of Brunei English. Their examination of the variety not only documents the features and functions of English within Brunei society, it also suggests the development of regional or global varieties of English that extend beyond Brunei, and even beyond South East Asia." Andrew Moody, University of Macau
