Your Emotional Type Michael A. Jawer, Marc S. Micozzi, 2011-10-19 Your emotional type as the means to finding the right treatment for your chronic illness or pain • Provides an easy questionnaire to find your emotional type • Identifies the connections between emotional type and 12 common chronic ailments: asthma, allergies, chronic fatigue, depression, fibromyalgia, hypertension, irritable bowel, migraines, PTSD, psoriasis, rheumatoid arthritis, and ulcers • Explains which of 7 mind/body healing therapies works best for each emotional type Different people process their feelings in different ways--your emotional style is a fundamental aspect of who you are. It affects more than just your outlook on life; it can affect your well-being as well. Many chronic ailments are not the result of germs or genes but are rooted in our emotional biology. The link between emotional type and health explains why modern medicine--which views treatment as "one size fits all"--often fails to successfully treat chronic pain and illness. Examining the interplay of emotions, chronic illness and pain, and treatment success, Michael Jawer and Dr. Marc Micozzi reveal how chronic conditions are intrinsically linked to certain emotional types and how these ailments are best treated by choosing a healing therapy in line with your type. Explaining the emotional ties behind the 12 most common chronic illnesses--asthma, allergies, chronic fatigue, depression, fibromyalgia, hypertension, irritable bowel syndrome, migraines, post-traumatic stress disorder, psoriasis, rheumatoid arthritis, and ulcers--the authors provide an easy assessment survey that allows you to identify your emotional type as well as the ailments you are susceptible to. Extending this connection between mind and body, they assess 7 alternative healing therapies--acupuncture, hypnosis, biofeedback, meditation, yoga, guided imagery, and relaxation techniques--and indicate which methods work best for each emotional type. Empowering you as a patient to seek out the therapies that will work best for you, this book offers a welcome path to effective pain relief and sustainable health.

Hypnerotomachia Poliphili Francesco Colonna, 2019-01-09 Francesco Colonna's weird, erotic, allegorical antiquarian tale, *Hypnerotomachia Poliphili*, together with all of its 174 original woodcut illustrations, has been called the first stream of consciousness novel and was one of the most important documents of Renaissance imagination and fantasy. The author -- presumed to be a friar of dubious reputation -- was obsessed by architecture, landscape and costume (it is not going too far to say sexually obsessed) and its woodcuts are a primary source for Renaissance ideas.

Mobile Messaging Technologies and Services Gwenaël Le Bodic, 2005-07-08 Building on the success of the first edition, *Mobile Messaging Technologies and Services* offers extensive new and revised material based upon the latest research and industry developments. While early implementations targeted person-to-person messaging, MMS has now evolved to facilitate such requirements as the mass delivery of time-sensitive messages for content-to-person messaging. This Second Edition exploits the technical maturity of MMS as it is poised to generate a wealth of new business opportunities across the mobile communications sector. The author provides the fundamental technical background required for SMS, EMS and MMS, and supports this with industry cutting-edge developments. ● Contains a revised section on the fundamentals of MMS, including an updated section on GPRS to explain current commercial implementations such as GRX applications. ● Presents the latest developments in MMS standardization, including the design of synchronized multimedia integration language (SMIL) presentations, Digital Rights Management (DRM),

transcoding techniques, postcard service and support of advanced multimedia formats. ● Describes the processes for standardizing telecommunications services and technologies (3GPP, OMA, GSM Association, IETF and W3C). ● Provides updated sections on SMS, EMS and heavily revised coverage of the developments in MMS, including MMS interworking and the forthcoming MMS version 1.3. This resource will be invaluable for application developers, manufacturers, operators and content providers involved in the design and deployment of messaging services. It will also be of interest to practitioners involved in the process of standardizing telecommunications services and technologies. Postgraduate students and researchers will benefit from having access to state-of-the-art findings backed by numerous illustrative real-world examples. Includes a companion website featuring information on relevant standards, available phones and developers' resources.

The Wallace Anne McKim, 2003-08-01 The Wallace catalogs the sheer brutality of war. We are regaled with such detailed accounts of the sacking of towns and the burning down of buildings full of screaming inhabitants that the smells and sounds, as well as the terrible sights, of war are graphically conveyed in language which seems designed not only to express Wallace's rage and Hary's antipathy but also to incite hatred of the English in his readers.

Artificial Intelligence and Inclusive Education Jeremy Knox, Yuchen Wang, Michael Gallagher, 2019-06-13 This book brings together the fields of artificial intelligence (often known as A.I.) and inclusive education in order to speculate on the future of teaching and learning in increasingly diverse social, cultural, emotional, and linguistic educational contexts. This book addresses a pressing need to understand how future educational practices can promote equity and equality, while at the same time adopting A.I. systems that are oriented towards automation, standardisation and efficiency. The contributions in this edited volume appeal to scholars and students with an interest in forming a critical understanding of the development of A.I. for education, as well as an interest in how the processes of inclusive education might be shaped by future technologies. Grounded in theoretical engagement, establishing key challenges for future practice, and outlining the latest research, this book offers a comprehensive overview of the complex issues arising from the convergence of A.I. technologies and the necessity of developing inclusive teaching and learning. To date, there has been little in the way of direct association between research and practice in these domains: A.I. has been a predominantly technical field of research and development, and while intelligent computer systems and 'smart' software are being increasingly applied in many areas of industry, economics, social life, and education itself, a specific engagement with the agenda of inclusion appears lacking. Although such technology offers exciting possibilities for education, including software that is designed to 'personalise' learning or adapt to learner behaviours, these developments are accompanied by growing concerns about the in-built biases involved in machine learning techniques driven by 'big data'.

What Do Science, Technology, and Innovation Mean from Africa? Clapperton Chakanetsa Mavhunga,2017-06-16 Explorations of science, technology, and innovation in Africa not as the product of "technology transfer" from elsewhere but as the working of African knowledge. In the STI literature, Africa has often been regarded as a recipient of science, technology, and innovation rather than a maker of them. In this book, scholars from a range of disciplines show that STI in Africa is not merely the product of "technology transfer" from elsewhere but the working of African knowledge. Their contributions focus on African ways of looking, meaning-making, and creating. The chapter authors see Africans as intellectual agents whose perspectives constitute authoritative knowledge and whose strategic deployment of both endogenous and inbound things represents an African-centered notion of STI. "Things do not (always) mean the same from everywhere," observes Clapperton Chakanetsa Mavhunga, the volume's editor. Western, colonialist definitions of STI are not universalizable. The contributors discuss topics that include the trivialization of indigenous knowledge under colonialism; the creative labor of chimurenga, the transformation of everyday surroundings into military infrastructure; the role of enslaved Africans in America as innovators and synthesizers; the African ethos of "fixing"; the constitutive appropriation that makes mobile technologies African; and an African innovation strategy that builds on domestic capacities. The contributions describe an Africa that is creative, technological, and scientific, showing that African STI is the latest iteration of a long process of accumulative, multicultural knowledge production. Contributors Geri Augusto, Shadreck Chirikure, Chux Daniels, Ron Eglash, Ellen Foster, Garrick E. Louis, D. A.
