Marine Protected Areas for Whales, Dolphins, and Porpoises Erich Hoyt, 2012
'Erich Hoyt's handbook is an admirable, timely and highly welcome contribution.' Michael Stachowitsch, Marine Ecology
What does it mean to save the whales if their habitat is left unprotected? Marine Protected Areas for Whales, Dolphins and Porpoises is the definitive handbook on this pressing issue and the first to bridge the gap between the disciplines of marine protected areas and cetacean conservation. It launches a new chapter in cetacean conservation with its investigation into the crucial habitat needs and protection requirements of some 84 species. The author, one of the world's foremost experts in this field, takes you around the world to investigate the promising results of the latest conservation research and the strategies for obtaining marine protected areas in coastal waters and on the high seas, using national legislation and regional and international conventions. This is an essential introduction, guide and reference work for those working to ensure a future for whales and dolphins.

Combustion in High-Speed Flows John Buckmaster, Thomas L. Jackson, Ajay Kumar, 2012-12-06 This volume contains the proceedings of the Workshop on Combustion, sponsored by the Institute for Computer Applications in Science and Engineering (ICASE) and the NASA Langley Research Center (LaRC). It was held on October 12-14, 1992, and was the second workshop in the series on the subject. The first was held in 1989, and its proceedings were published by Springer-Verlag under the title Major Research Topics in Combustion, edited by M. Y. Hussaini, A. Kumar, and R. G. Voigt. The focus of the second workshop was directed towards the development, analysis, and application of basic models in high speed propulsion of particular interest to NASA. The

exploration of a dual approach combining asymptotic and numerical methods for the analysis of the models was particularly encouraged. The objectives of this workshop were i) the genesis of models that would capture or reflect the basic physical phenomena in SCRAMJETs and/or oblique detonation-wave engines (ODWE), and ii) the stimulation of a greater interaction between NASA experimental research community and the academic community. The lead paper by D. Bushnell on the status and issues of high speed propulsion relevant to both the SCRAMJET and the ODWE parallels his keynote address which set the stage of the workshop. Following the lead paper were five technical sessions with titles and chairs: Experiments (C. Rogers), Reacting Free Shear Layers (C. E. Grosch), Detonations (A. K. Kapila), Ignition and Structure (J. Buckmaster), and Unsteady Behaviour ('1'. L. Jackson).

Discrete Wavelet Transforms Dr. Awad Al-Asmari, 2013-02-06 Discrete Wavelet Transform is a wavelet (DWT) transform that is widely used in numerical and functional analysis. Its key advantage over more traditional transforms, such as the Fourier transform, lies in its ability to offer temporal resolution, i.e. it captures both frequency and location (or time) information. This book presents a succinct compendium of some of the more recent variants of DWTs and their use to come up with solutions to an array of problems transcending the traditional application areas of image/video processing and security to the relatively newer areas of medicine, artificial intelligence, power systems and telecommunications. The first of the two sections of this book contains three chapters devoted to traditional applications of DWTs in digital image compression, copyright protection and video resolution enhancement. The second section, comprising of five chapters, is devoted to variants of the DWT and their applications in humanoid-robot vision systems;

modeling and simulation recognition of physiological and behavioral traits through human gait and facial images; assessment of agitation and sedation in intensive care patients; maximization of power control systems; and, finally, in demodulation of FM data in free-space optical control systems.

Matsutake Worlds Lieba Faier, Michael J. Hathaway, 2021-07-16 The matsutake mushroom continues to be a highly sought delicacy, especially in Chinese, Japanese, and Korean cuisine. Matsutake Worlds explores this mushroom through the lens of multi-species encounters centered around the matsutake's notorious elusiveness. The mushroom's success, the contributors of this volume argue, cannot be accounted for by any one cultural, social, political, or economic process. Rather, the matsutake mushroom has flourished as the result of a number of different processes and dynamics, culminating in the culinary institution we know today.

Geotechnical Aspects of Underground Construction in Soft Ground IX Arsenio Negro, Werner Bilfinger, Marlísio O. Cecílio, 2017-12 Geotechnical Aspects of Underground Construction in Soft Ground comprises the second Fujita lecture, three keynote lectures and the regular papers presented at the Ninth International Symposium on Geotechnical Aspects of Underground Construction in Soft Ground (IS - Sao Paulo 2017, Sao Paulo, Brazil, 4-6 April 2017). The Symposium was organized by the Brazilian Tunnelling Committee (CBT) of the Brazilian Geotechnical Society (ABMS), under the auspices of the Technical Committee TC204 of the International Society for Soil Mechanics and Geotechnical Engineering (ISSMGE). The contributions cover a wide range of topics: - Deep Excavations - Interaction with Adjacent Structures -

Mechanized Excavations - Sequential Excavations - Physical Modelling and Field Tests - Case Histories Geotechnical Aspects of Underground Construction in Soft Ground is particularly aimed at academics and professionals interested or involved in geotechnical and underground engineering. Similarly to previous editions, the contributions are a valuable source of reference on the current practice on the analysis, design and construction of tunnels, deep excavations and large underground structures, with particular emphasis on the development, effects and control of ground movements, their interaction with existing structures, mitigation measures and risk management. IS - Sao Paulo 2017 is the latest in a series of ISSMGE's TC204 symposia, which began in New Delhi (1993), followed by symposia in London (1996), Tokyo (1999), Toulouse (2002), Amsterdam (2005), Shanghai (2008), Rome (2011) and Seoul (2014).

International Policies for Third World Education Phillip W.

Jones, 2018-05-08 Originally published in 1988. Bringing the world close to universal literacy will be a major legacy of the twentieth century. But the rapid and widespread developments in education that have enabled this to happen have not taken place in a social and political vacuum. In some instances conditions conducive to mass literacy have only come about through popular revolution or rapid economic development, but a less spectacular and frequently less tangible role has been played by a number of international agencies. The most prominent of these is Unesco, which has had the goal of global literacy at the heart of its endeavours ever since its foundation in 1946. Agreement on the best means of achieving this goal, however, has been very difficult to come by, and Unesco's literacy program has been shaped by internal and external politics as well as by local exigencies. This book

outlines how Unesco's literacy program has evolved, and by discussing how idealistic aims and intentions have been given shape and direction by more immediate political and bureaucratic concerns provides a critique, in miniature, of the post-war history of the United Nations and related organisations.

Hybrid Geographies Sarah Whatmore, 2002-08-20 `Hybrid Geographies is one of the most original and important contributions to our field in the last 30 years. At once immensley provocative and productive, it is written with uncommon clarity and grace, and promises to breathe new life not only into geographical inquiry but into critical practice across the spectrum of the

humanities and social sciences - and beyond. An extraordinary achievement' - Professor Derek Gregory, Department of Geography, University of British Columbia Hybrid Geographies critically examines the 'opposition' between nature and culture, the material and the social, as represented in scientific, environmental and popular discourses. Demonstrating that the world is not an exclusively human achievement, Hybrid Geographies reconsiders the relation between human and non-human, the social and the material, showing how they are intimately and variously linked. General arguments - informed by work in critical geography, feminist theory, environmental ethics, and science studies - are illustrated throughout with detailed case-study material. This exemplifies the two core themes of the book: a consideration of hybridity (the human/non-human relation) and of the 'fault-lines' in the spatial organization of society and nature. Hybrid Geographies is essential reading for students in the social sciences with an interest in nature, space and social theory.

When Nature Goes Public Cori Hayden, 2003-11-16 Bioprospecting--the exchange of plants for corporate promises of royalties or community development assistance--has been lauded as a way to develop new medicines while offering southern nations and indigenous communities an incentive to preserve their rich biodiversity. But can pharmaceutical profits really advance conservation and indigenous rights? How much should companies pay and to whom? Who stands to gain and lose? The first anthropological study of the practices mobilized in the name and in the shadow of bioprospecting, this book takes us into the unexpected sites where Mexican scientists and American companies venture looking for medicinal plants and local knowledge. Cori Hayden tracks bioprospecting's contentious new promise--and the contradictory activities

generated in its name. Focusing on a contract involving Mexico's National Autonomous University, Hayden examines the practices through which researchers, plant vendors, rural collectors, indigenous cooperatives, and other actors put prospecting to work. By paying unique attention to scientific research, she provides a key to understanding which people and plants are included in the promise of selling biodiversity to save it--and which are not. And she considers the consequences of linking scientific research and rural enfranchisement to the logics of intellectual property. Roving across UN protocols, botanical collecting histories, Mexican nationalist agendas, neoliberal property regimes, and North-South relations, *When Nature Goes Public* charts the myriad, emergent publics that drive and contest the global market in biodiversity and its futures.

Intimate Encounters Lieba Faier, 2009 Lieba Faier investigates the processes by which Filipina women who emigrated to work in rural Japan in hostess bars have overcome initial hostilities to become regarded as 'ideal, traditional Japanese brides'. 'Intimate Encounters' shows how changes to culture & identity come about through ordinary interpersonal exchanges.

Language Planning in Africa Nkonko Kamwangamalu, Richard Baldauf Jr., Robert B. Kaplan, 2013 This volume focuses on language planning in the Cameroon, Sudan and Zimbabwe, explaining the linguistic diversity, the historical and political contexts and the current language situation (including language-in-education planning), the role of the media, the role of religion and the roles of non-indigenous languages. This book comprises case studies originally published in the journal *Current Issues in Language Planning*.

Anthropology and Politics Joan Vincent, 2022-08-16 In considering how anthropologists have chosen to look at and write about politics, Joan Vincent

contends that the anthropological study of politics is itself a historical process. Intended not only as a representation but also as a reinterpretation, her study arises from questioning accepted views and unexamined assumptions. This wide-ranging, cross-disciplinary work is a critical review of the anthropological study of politics in the English-speaking world from 1879 to the present, a counterpoint of text and context that describes for each of three eras both what anthropologists have said about politics and the national and international events that have shaped their interests and concerns. It is also an account of how intellectual, social, and political conditions influenced the discipline by conditioning both anthropological inquiry and the avenues of research supported by universities and governments. Finally, it is a study of the politics of anthropology itself, examining the survival of theses or schools of thought and the influence of certain individuals and departments.
