The Imjin and Kapyong Battles S.P. MacKenzie, 2013-03-12 An "excellent history" of a massive Communist offensive and the brigades that resisted it (H-War). The sacrifice of the British regiment known as the "Glorious Glosters" in defense of the Imjin River line and the hilltop fights of Australian and Canadian battalions in the Kapyong Valley have achieved great renown. Using official and unofficial source material ranging from personal interviews to war diaries, this in-depth study, the first of its kind, seeks to disentangle the mythology surrounding both battles and explain why events unfolded as they did. Based on thorough familiarity with all available sources, many not previously utilized, it sheds new light on fighting "the forgotten war." "In Korea, on the night of 22nd April 1951, communist forces unleashed what remains, to this day, their greatest offensive since Zhukov's storm on Berlin. In the desperate fighting that followed, the key flanks of free world forces were held by one British and one Commonwealth brigade. The former took on a Chinese army; the latter, a Chinese division. Six decades later, an American historian has dismantled the barriers between Australian, British, Canadian, and New Zealand accounts of those whirlwind days to compose the only comparative analysis of the tragedy on the Imjin and the stand at Kapyong."—Andrew Salmon, author of *Scorched Earth, Black Snow: Britain and Australia in the Korean War, 1950*

99 Jumpstarts for Kids' Social Studies Reports Peggy Whitley, Susan Williams Goodwin, 2007-06-30 Building on the success and maintaining the 99 Jumpstarts format of the two previous books, 99 Jumpstarts for Kids' Social Studies Reports is divided into broad topical sections. Each topic is arranged in alphabetical order under its section. Topics are all new to this title and include the Ancient World, Historic World Events, State and Local History, US History, Government and Citizenship, Sociology, Culture and Economics. The book includes the following sections in each Jumpstart: A cited quote about the topic, Related Jumpstarts, New Words, You are There, Topics to Consider, Books, Internet, For the Teacher, and a relevant activity. Each Jumpstart provides a helpful pathfinder that enables students to efficiently access information and learn new information literacy skills as they research topics of personal interest or gather information for school reports. Grades 3-8.

Ad Nauseam Carrie McLaren, Jason Torchinsky, 2009-06-23 With the style and irreverence of Vice magazine and the critique of the corporatocracy that made Naomi Klein's *No Logo* a global hit, the cult magazine *Stay Free!*—long considered the *Adbusters* of the United States—is finally offering a compendium of new and previously published material on the impact of consumer culture on our lives. The book questions, in the broadest sense, what happens to human beings when their brains are constantly assaulted by advertising and corporate messages. Most people assert that advertising is easily ignored and doesn't have any effect on them or their decision making, but *Ad Nauseam* shows that consumer pop culture does take its toll. In an engaging, accessible, and graphically appealing style, Carrie McLaren and Jason Torchinsky (as well as contributors such as David Cross, *The Onion*'s Joe Garden, *The New York Times*'s Julie Scelfo, and others) discuss everything from why the TV program *CSI* affects jury

selection, to the methods by which market researchers stalk shoppers, to how advertising strategy is like dog training. The result is an entertaining and eye-opening account of the many ways consumer culture continues to pervade and transform American life.

Genealogist's Address Book. 6th Edition Elizabeth Petty Bentley,2009-02 This book is the answer to the perennial question, What's out there in the world of genealogy? What organizations, institutions, special resources, and websites can help me? Where do I write or phone or send e-mail? Once again, Elizabeth Bentley's Address Book answers these questions and more. Now in its 6th edition, The Genealogist's Address Book gives you access to all the key sources of genealogical information, providing names, addresses, phone numbers, fax numbers, e-mail addresses, websites, names of contact persons, and other pertinent information for more than 27,000 organizations, including libraries, archives, societies, government agencies, vital records offices, professional bodies, publications, research centers, and special interest groups.

A Dictionary of Iowa Place-Names Tom Savage,2007-08-01 Lourdes and Churchtown, Woden and Clio, Emerson and Sigourney, Tripoli and Waterloo, Prairie City and Prairieburg, Tama and Swedesburg, What Cheer and Coin. Iowa's place-names reflect the religions, myths, cultures, families, heroes, whimsies, and misspellings of the Hawkeye State's inhabitants. Tom Savage spent four years corresponding with librarians, city and county officials, and local historians, reading newspaper archives, and exploring local websites in an effort to find out why these communities received their particular names, when they were established, and when they were incorporated. Savage includes information on the place-names of all 1,188 incorporated and unincorporated communities in Iowa that meet at least two of the following qualifications: twenty-five or more residents; a retail business; an annual celebration or festival; a school; church, or cemetery; a building on the National Register of Historic Places; a zip-coded post office; or an association with a public recreation site. If a town's name has changed over the years, he provides information about each name; if a name's provenance is unclear, he provides possible explanations. He also includes information about the state's name and about each of its ninety-nine counties as well as a list of ghost towns. The entries range from the counties of Adair to Wright and from the towns of Abingdon to Zwingle; from Iowa's oldest town, Dubuque, starting as a mining camp in the 1780s and incorporated in 1841, to its newest, Maharishi Vedic City, incorporated in 2001. The imaginations and experiences of its citizens played a role in the naming of Iowa's communities, as did the hopes of the huge influx of immigrants who settled the state in the 1800s. Tom Savage's dictionary of place-names provides an appealing genealogical and historical background to today's map of Iowa. "It is one of the beauties of Iowa that travel across the state brings a person into contact with so many wonderful names, some of which a traveler may understand immediately, but others may

require a bit of investigation. Like the poet Stephen Vincent Benét, we have fallen in love with American names. They are part of our soul, be they family names, town names, or artifact names. We identify with them and are identified with them, and we cannot live without them. This book will help us learn more about them and integrate them into our beings.”—from the foreword by Loren N. Horton “Primghar, O’Brien County. Primghar was established by W. C. Green and James Roberts on November 8, 1872. The name of the town comes from the initials of the eight men who were instrumental in developing it. A short poem memorializes the men and their names: Pumphrey, the treasurer, drives the first nail; Roberts, the donor, is quick on his trail; Inman dips slyly his first letter in; McCormack adds M, which makes the full Prim; Green, thinking of groceries, gives them the G; Hayes drops them an H, without asking a fee; Albright, the joker, with his jokes all at par; Rerick brings up the rear and crowns all ‘Primghar.’ Primghar was incorporated on February 15, 1888.”

On and Around the Cincinnati Arch and Niagara Escarpment Geological Society of America. North-Central Section. Meeting, 2012-01-01 This volume, produced in conjunction with the GSA North-Central Section Meeting held in Dayton, Ohio, April 2012, has a mix of papers ranging from stratigraphy, paleontology, and hydrogeology, to geomorphology, drainage basins, and building stones. The geographic spread of the chapters focuses mainly on an area bounded by those counties adjacent to Montgomery County, but also extends beyond -- from Paulding County in the north to Georgetown, Kentucky, in the south. Topics include the Silurian stratigraphy of southwestern Ohio, drainage basins of the Mad River and Little Miami River, the relationship between geology and groundwater of the Inner Bluegrass Region, Kentucky (and its connection to the distilling and aging of bourbon), and the building stones of Dayton, as well as an introduction to the geology of the Dayton area.

Introduction to Environmental Physics Peter Hughes, N.J. Mason, 2001-05-29 The changing climate and its affect on all of us is becoming increasingly apparent - ozone depletion, hurricanes, floods and extreme weather behaviour. Introduction to Environmental Physics challenges the way we think about how and why environmental change occurs. This authoritative book aims to cover some of the more common and popular topics addressed in physics of the earth, physics of the environment and environmental physics courses. It provides an essentially non-mathematical treatment suitable for a first year undergraduate level course. The principle topics covered are the physics of the built environment, the physics of human survival, energy for living, environmental health, revealing the planet, the sun and the atmosphere, the biosphere, the global climate and climate change. With contributions from well-respected experts on the subject, this textbook contains a summary, references and questions at the end of each chapter. This is an ideal textbook for first year undergraduates in a variety of courses, particularly physical geography, physics, environmental and earth science, with worked examples illustrating principles and vignettes from scientists who have made a significant contribution to the field enlightening the student along the way. As the authors say in the preface to this book, At the outset of the 21st century there are many environmental challenges to be wrestled with, and though the environment is changing, the Physics is not!

Brand vs. Wild Jonathan David Lewis, 2017-04-21 Today’s business leaders operate in an increasingly harsh

environment. Uncertainty in the economy causes paralysis. Quarterly goals drive short-term and shortsighted decisions. Workforce mobility kills loyalty. Iconic products decline as fast as start-ups create new categories. And the pressure to do more with less, combined with the multiplicity of available marketing tools and technology, can be overwhelming. Now more than ever, brands and the people who lead them need clarity and guidance. The good news is that people have found ways to thrive in harsh environments for millennia. Author Jonathan David Lewis, combining the lessons of group survival dynamics with more than a decade of proprietary research into the factors that cause companies to lose their way, shows leaders how to thrive in unforgiving business environments by learning to: Focus on navigating risk instead of trying to measure or reduce it. Cultivate your brand's will to live by staying positive and asking the most important question: Are you worth it? Read the brand signs by observing the market, keeping an eye on performance measures, engaging your team, and listening to your gut. Develop a concept of mission to ensure internal alignment and reduce friction. Act with urgency rather than waiting for the right circumstance. Brand vs. Wild helps readers understand the wilderness in which they find their companies and identify the specific steps they must take to thrive in the Brand Wilderness. There is hope in a harsh business world. And Brand vs. Wild is it.

Fragmented Identities Denise Roman, 2007-04-16 Observing postcommunist Romania with the dual vision of a native and a scholar, Denise Roman focuses on the fluid act of identity-formation, and the construction or absence of identity-politics, in several minority or disempowered groups: youth, Jews, women, and queers. Roman shows how both aesthetic and moral judgments are born from and embedded in popular culture. *Fragmented Identities* is rich in observation and analysis, broad in scope, and exuberant in its account of cultural innovation and discourse wrought in response to the end of Communism and the influence of globalization.

An Informed Cosmos Peter S. Williams, 2023-07-14 After a substantial author's preface recounting the author's life-journey with the question of science and design in nature, *An Informed Cosmos* pulls together essays that jointly cover the core arguments for a scientific theory of intelligent design. Along with a foreword by philosopher of science and leading design theorist Stephen C. Meyer, and a wide range of recommended resources, *An Informed Cosmos* offers an informed overview of the contemporary case for intelligent design.

Science Fiction Authors Maura Heaphy, 2008-11-30 For students, scholars, readers' advisors, and curious SF readers and fans, this guide provides an easy-to-use launch pad for researching and learning more about science fiction writers and their work. Emphasizing the best popular and contemporary authors, this book covers 100 SF writers, providing for each: • a brief biographical sketch, including a quote from the author, awards, etc. • a list of the author's major works (including editions and other writings) • research sources-biographies, criticism, research guides, and web sites • In addition, you'll find read-alike lists for selected authors. For anyone wanting to find information on popular SF authors, this should be the first stop.

The Martyrs of Columbine J. Watson, 2003-05-02 On April 20, 1999, Eric Harris and Dylan Klebold killed twelve fellow students and one teacher at Columbine High School in Littleton, Colorado. Two of the victims of the

Columbine massacre, Cassie Bernall and Rachel Scott, reportedly were asked by the gunmen if they believed in God. Both supposedly answered 'Yes' and were killed. Within days of their death, Cassie and Rachel were being hailed as modern-day martyrs and are seen by many American evangelicals as the sparks of a religious revival among teenagers. Cassie and Rachel, as innocents martyred for faith, also became useful symbols for those seeking to advance a conservative political agenda and to lay the blame for Columbine at the feet of their liberal opponents. According to police investigators, however, Cassie and Rachel may never have been asked by their killers about God. They may have been simply victims of a senseless crime rather than martyrs to a cause. *The Martyrs of Columbine* provides a careful examination of the available evidence and attempts to discover what really occurred. Despite these questions the martyr-stories continued to be told and the religious and political use of Cassie and Rachel continues. The popular significance of the martyrs of Columbine persists, and may even be growing. How and why is this happening? *The Martyrs of Columbine* is a groundbreaking investigation of what this tragedy has come and will come to mean in American religion, politics, and culture.

Women, Modernity, and Landscape Architecture Sonja Dümpelmann, John Beardsley, 2015-02-11 Modernity was critically important to the formation and evolution of landscape architecture, yet its histories in the discipline are still being written. This book looks closely at the work and influences of some of the least studied figures of the era: established and less well-known female landscape architects who pursued modernist ideals in their designs. The women discussed in this volume belong to the pioneering first two generations of professional landscape architects and were outstanding in the field. They not only developed notable practices but some also became leaders in landscape architectural education as the first professors in the discipline, or prolific lecturers and authors. As early professionals who navigated the world of a male-dominated intellectual and menial work force they were exponents of modernity. In addition, many personalities discussed in this volume were either figures of transition between tradition and modernism (like Silvia Crowe, Maria Teresa Parpagliolo), or they fully embraced and furthered the modernist agenda (like Rosa Kliass, Cornelia Oberlander). The chapters offer new perspectives and contribute to the development of a more balanced and integrated landscape architectural historiography of the twentieth century. Contributions come from practitioners and academics who discuss women based in USA, Canada, Brazil, New Zealand, South Africa, the former USSR, Sweden, Britain, Germany, Austria, France and Italy. Ideal reading for those studying landscape history, women's studies and cultural geography.

Evolution Scientific American, 2008-09-15 From the Scopes "Monkey Trial" of 1925 to the court ruling against the Dover Area School Board's proposed intelligent design curriculum in 2005, few scientific topics have engendered as much controversy—or grabbed as many headlines—as evolution. And since the debate shows no signs of abating, there is perhaps no better time to step back and ask: What is evolution? Defined as the gradual process by which something changes into a different and usually more complex and efficient form, evolution explains the formation of the universe, the nature of viruses, and the emergence of humans. A first-rate summary of the actual science of evolution, this Scientific American reader is a timely collection that gives readers an opportunity to consider

evolution's impact in various settings. Divided into four sections that consider the evolution of the universe, cells, dinosaurs, and humans, Evolution brings together more than thirty articles written by some of the world's most respected evolutionary scientists. As tour guides through the genesis of the universe and complex cells, P. James E. Peebles examines the evidence in support of an expanding cosmos, while Christian de Duve discusses the birth of eukaryotes. In an article that anticipated his book Full House, Stephen Jay Gould argues that chance and contingency are as important as natural selection for evolutionary change. And Ian Tattersall makes two fascinating contributions, submitting his view that the schematic of human evolution looks less like a ladder and more like a bush. With the latest on what's being researched at every level of evolutionary studies, from prospects of life on other planets to the inner working of cells, Evolution offers general readers an opportunity to update their knowledge on this hot topic while giving students an introduction to the problems and methodologies of an entire field of inquiry.

At the Breaking Point of History Janet Phelan, 2021-09-14 Today, we find ourselves embroiled in the midst of a pandemic, one which has collapsed economies, caused death by starvation, and has resulted in severe new restrictions on civil rights in the US and elsewhere. Numerous medical professionals and researchers are questioning the genesis of the Covid-19 agent, whether or not it was bioengineered and deliberately released and are also questioning the course taken to shut down whole countries and demand that people stay at home. Questions have also been raised as to the verifiability of the numbers alleged to have died from this novel coronavirus, pointing to dictates from the CDC to list deaths not directly caused by the virus as virus-caused deaths. In the midst of this chaos, these articles, written long before the Covid-19 pandemic, point to a monstrous political agenda, implicating media, government, and foreign nations in the plan to launch this. As the country begins to reopen, the trajectory of these articles should result in grave concern for what the future may hold.
