(2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

Choices for America in a Turbulent World James Dobbins,Richard H. Solomon,Michael S. Chase,Ryan Henry,F. Stephen Larrabee,Robert J. Lempert,Andrew M. Liepman,Jeffrey Martini,David Ochmanek,Howard J. Shatz,2015-07-23 The first in a series exploring the elements of a national strategy for U.S. foreign policy, this book examines the most critical decisions likely to face the next president. The book covers global and regional issues and spotlights the long-term policy issues and organizational, financial, and diplomatic challenges that will confront senior U.S. officials in 2017 and beyond.

Proxy War Ethics: The Norms of Partnering in Great Power Competition C. Anthony Pfaff,2024-02-16 While proxy relationships can be an effective means international actors use to transfer risk and lower their costs to compete, they also enable actors to circumvent international norms as well as create moral hazards that can make the practice self-defeating if not simply unethical. Applying the framework of the Just War Tradition, this book highlights some of these ethical gaps and addresses how proxy relationships introduce additional obligations for both sponsor and proxy. The author examines specific examples of how current precedents set a very high bar for accountability, and perversely incentivizes sponsors to employ proxies while discouraging any effort to moderate proxy behavior since that could imply effective control. In light of this, the book offers policy recommendations on how to best manage these relationships while maintaining certain moral commitments.

The Beginner's Guide to Nation-Building James Dobbins,Seth G. Jones,Keith Crane,Beth Cole DeGrasse,2007-02-08 Since the end of the Cold War, the United States, NATO, the United Nations, and a range of other states and nongovernmental organizations have become increasingly involved in nation-building operations. Nation-building involves the use of armed force as part of a broader effort to promote political and economic reforms, with the objective of transforming a society emerging from conflict into one at peace with itself and its neighbors. This guidebook is a practical ?how-to? manual on the conduct of effective nation-building. It is organized around the constituent elements that make up any nation-building mission: military, police, rule of law, humanitarian relief, governance, economic stabilization, democratization, and development. The chapters describe how each of these components should be organized and employed, how much of each is likely to be needed, and the likely cost. The lessons are drawn principally from 16 U.S.- and UN-led nation-building operations since World War II and from a forthcoming study on European-led missions. In short, this guidebook presents a comprehensive history of best practices in nation-building and serves as an indispensable reference for the preplanning of future interventions and for contingency planning on the ground.

Interim Governments Karen Guttieri,Jessica Piombo,2007 This edited volume by Karen Guttieri and Jessica Piombo explores various aspects of the newly emerging range of interim regimes, focusing on issues of legitimacy, conflict management, and the increasing participation of the international community in transitions from war to peace. Through a set of theoretical and case-study chapters, they and the volume s contributing authors ask and answer key questions: What sorts of interim governments are in use around the world today, and how do they affect the quality of regime that results once the interim period has ended? How does international involvement affect the balance of power between domestic elites? How does the type of interim regime affect the nature of the post-transition government? Is democracy always the outcome?Timely, insightful, and compelling, *Interim Governments* provides important insights in a world where terms such as regime change and nation building have become common currency and will be a valuable tool for practitioners and academics alike.

Liberty's Surest Guardian Jeremi Suri,2012-07-17 Jeremi Suri--Nobel Fellow and leading light in the next generation of policy makers--looks to America's history to see both what it has to offer failed states around the world and what it should avoid. Far from being cold imperialists, Americans have earnestly attempted to export their invention of representative government. We have had successes (Reconstruction after the American Civil War, the Philippines, Western Europe) and failures (Vietnam), and we can learn a good deal from both. The framers of the Constitution initiated a policy of cautious nation-building, hoping not to conquer other countries, but to build a world of stable, self-governed societies that would support America's way of life--yet no other country has created more problems for itself and for others by intervening in distant lands and pursuing impractical changes. Suri has mined more than two hundred years of American policy in order to explain the five Ps of nation-building: Partners, Process, Problem-solving, Purpose, and People.--From publisher description.

The Economy of Desire (The Church and Postmodern Culture) Daniel M. Jr. Bell,2012-11-01 In this addition to the award-winning Church and Postmodern Culture series, respected theologian Daniel Bell compares and contrasts capitalism and Christianity, showing how Christianity provides resources for faithfully navigating the postmodern global economy. Bell approaches capitalism and Christianity as alternative visions of humanity, God, and the good life. Considering faith and economics in terms of how desire is shaped, he casts the conflict as one between different disciplines of desire. He engages the work of two important postmodern philosophers, Deleuze and Foucault, to illuminate the nature of the postmodern world that the church currently inhabits. Bell then considers how the global economy deforms desire in a manner that distorts human relations with God and one another. In contrast, he presents Christianity and the tradition of the works of mercy as a way beyond capitalism and socialism, beyond philanthropy and welfare. Christianity heals desire, renewing human relations and enabling communion with God.

Europe's Role in Nation-building James Dobbins,2008 The European Union and its member nations have proven adept at mounting small-scale nation-building operations and should be ready to handle more substantial missions. Building on prior RAND work, this volume presents six case studies of recent European-led nation-building missions, in Albania, Sierra Leone, Macedonia, Côte d'Ivoire, the Congo, and Bosnia, as well as a review of the Australian mission to the Solomon Islands.

Public Opinion and Political Response in Palestine Erika Schwarze,2015-12-18 The 2006 elections for the Palestinian Legislative Council, the first in which both Fatah and Hamas fielded candidates, resulted in a

resounding victory for Hamas. Winning 74 out of the 132 seats (compared to Fatah's 45), Hamas election strategy had proved effective against Fatah's ineffectual campaign and failure to properly consider public opinion. Erika Schwarze offers here an in-depth examination of these two separate campaigns, and how Fatah's lack of responsiveness to the popular mood in the run-up to elections following Arafat's death and beyond, led to its defeat in spite of its considerable experience of electioneering. She analyses the conduct of Palestinian leadership during this critical period, exploring the reasons for Fatah's inability to prioritise responsiveness to public opinion, and providing insights into the movement's electoral prospects in the future and its chances of survival and revival.

Securing Tyrants or Fostering Reform? U.S. Internal Security Assistance to Repressive and Transitioning Regimes Seth G. Jones, Olga Oliker, Peter Chalk, C. Christine Fair, Rollie Lal, 2006-11-28 This study examines the results of U.S. assistance to the internal security forces of four repressive states: El Salvador, Uzbekistan, Afghanistan, and Pakistan. Efforts to improve the security, human rights, and accountability of security forces appear more likely to succeed in states transitioning from repressive to democratic systems. In addition, several factors are critical for success: the duration of assistance, viability of the justice system, and support and buy-in from the local government (including key ministries).

NATO Reconsidered Wesley B. Truitt, 2020-10-27 Is NATO still in the best interest of the United States? This provocative work argues that the focus on NATO distracts the U.S. from the vital foreign policy challenges of the 21st century, most notably China's rise in power. Since its beginning in 1949, NATO—the North Atlantic Treaty Organization—has been at the center of U.S. foreign policy. The alliance was crucial during the decades of the Cold War, and the United States collaborated closely with NATO during crises in Kosovo, Afghanistan, and Libya. But does the NATO alliance still serve the best interests of the U.S.? The NATO of today—one that has expanded to 30 member countries—risks involving the U.S. in unwanted military activities of the future, actions that were not intended in the original Atlantic alliance. In addition, the real challenges for foreign policy of 21st century are not in Europe, but in the expanding economic powerhouses in Asia, especially China. NATO Reconsidered argues that the changes in world politics in recent decades requires that the more than 70-year-old alliance should no longer be the principal focus of U.S. foreign policy.

Applied History and Contemporary Policymaking Robert Crowcroft, 2022-10-06 Robert Crowcroft has assembled a world-class, international cast of outstanding scholars and international figures to produce a stimulating collection of essays on applied history and policy making. With contributors such as Philip Bobbitt, Margaret MacMillan, and Jeremy Black, this collection of essays addresses some of the most important geopolitical challenges confronting the world today. From reconstructing collapsed political regimes to security competition in the China Seas and the evolution of Salafi-Jihadi ideology, it explores a range of statecraft, policy, and strategy. The essays span a number of policy areas and historical problems, tackling important questions about what historians do (and should do), and considering the nature and limits of historical judgement. With some examining how applied history can be used to rethink contemporary challenges, others explore how it has been used and abused in the past. Making a splash in intellectual debate by making a definitive case for Applied History, this book demonstrates that a knowledge of the past, and the insight it provides, is imperative to effective statecraft.

Transaction Costs and Security Institutions M. Weiss, 2011-04-12 Examines international cooperation in European security from a transaction cost economics perspective. This book addresses the puzzle of how to approach differing institutional preferences. It argues that the reduction and limitation of transaction costs was the primary determinant of security preferences.

Institution Building in Weak States Andrew Radin, 2020-07-01 The effort to improve state institutions in post-conflict societies is a complicated business. Even when foreign intervention is carried out with the best of intentions and the greatest resources, it often fails. What can account for this failure? In *Institution Building in Weak States*, Andrew Radin argues that the international community's approach to building state institutions needs its own reform. This innovative book proposes a new strategy, rooted in a rigorous analysis of recent missions. In contrast to the common strategy of foreign interveners—imposing models drawn from Western countries—Radin shows how pursuing incremental change that accommodates local political interests is more likely to produce effective, accountable, and law-abiding institutions. Drawing on extensive field research and original interviews, Radin examines efforts to reform the central government, military, and police in post-conflict Bosnia and Herzegovina, Kosovo, Iraq, and Timor-Leste. Based on his own experience in defense reform in Ukraine after 2014, Radin also draws parallels with efforts to improve state institutions outside of post-conflict societies. *Institution Building in Weak States* introduces a domestic opposition theory that better explains why institution building fails and what is required to make it work. With actionable recommendations for smarter policy, the book offers an important corrective for scholars and practitioners of post-conflict missions, international development, peacebuilding, and security cooperation.

Arab-Israeli Military Forces in an Era of Asymmetric Wars Anthony H. Cordesman, 2006-09-30 The reality of the Arab-Israeli balance now consists of two subordinate balances: Israel versus Syria and Israel versus the Palestinians. The book analyzes these two balances in detail and their impact on defense planning in each country

and on the overall strategic risk to the region as a whole. It covers military developments in each of six states- Egypt, Israel, Jordan, Lebanon, Syria, and Palestine-and provides an analytical view with charts and tables of how the changing natures of the military and political threats faced by each is impacting its military force readiness and development. The book has the most comprehensive data on past, current, and future military force structure currently available, drawn from the widest range of sources. Responding to the most recent of events in the region, this book is the first to deal with the effects on the Arab-Israeli military balance of the strategic uncertainty created by the Iraqi insurgency and the Iranian nuclear program. It also studies how the Gaza pullout, the Syrian withdrawal from Lebanon, the changing political landscape in Israel, and the threat of nuclear proliferation are having impacts on the Egyptian-Israeli and Jordanian-Israeli peace accords and the prospects for a settlement between the Palestinians and Israelis. The roles of Hezbollah, Hamas, and Palestinian Islamic Jihad are analyzed in light of the changing political landscape in both Israel and Palestine. Given the role of Syria in the Palestinian-Israeli affairs, the book also explores the ways that internal instability in Lebanon could escalate into a regional conflict.

Competing Without Fighting Seth G. Jones,Emily Harding,Catrina Doxsee,Jake Harrington,Riley McCabe,2023-09-11 China is conducting an unprecedented campaign below the threshold of armed conflict to expand the influence of the Chinese Communist Party (CCP) and weaken the United States and its partners. This campaign involves sophisticated Chinese espionage activities, offensive cyber operations, disinformation on social media platforms, economic coercion, and influence operations targeting companies, universities, and other organizations. This report offers one of the most comprehensive analyses to date of Chinese political warfare activities and examines China's main actions, primary goals, and options for the United States and its partners. It sheds new light on the scope and breadth of Chinese activities and comes to several conclusions.
