The Accelerating Transport Innovation Revolution George Giannopoulos,John F. Munro,2019-04-17 The Accelerating Transport Innovation Revolution: A Global, Case Study-based Assessment of Current Experience, Cross-sectorial Effects and Socioeconomic Transformations, offers a comprehensive view of current state-of-the-art and practices around the world to create innovation on a revolutionary scale and connect research to commercial exploitation of its results. It offers a fascinating new model of the innovation process based on theories of biological ecosystems, general systems theory and basins of attraction (represented through space-time graphs well known in mathematics). Furthermore, it considers – through a number of dedicated chapters - key issues and elements of innovation ecosystems, such as: Causal Factors and system constraints affecting the development and sustainability of innovation ecosystems (Chapter 4); Review of innovation organization and governance in key countries and regions (Chapter 5); the role of technological Spillovers (Chapter 6); Collection and use of data for innovation monitoring and benchmarking (Chapter 7); Intellectual Property protection between competing ecosystems (Chapter 8); Economics of innovation (Chapter 9); Public and private sector involvement in Transport innovation creation (Chapter 10); the role of the individual entrepreneur - innovator in energizing change (Chapter 11). Finally, in Chapter 12, there is a thorough summary of key findings. This book uses a paradigmatic approach to augment the innovation ecosystem model of innovation that integrates beliefs and learning into the innovation ecosystems model. It therefore includes ten case studies from the U.S., Europe and Asia, detailing how innovation is created across continents and different ecosystems and what are the critical lessons to be learned. It does this, effectively, at five different levels of analysis i.e. the individual innovator / entrepreneur level, the organization level (government agency or company), the regional ecosystem level, the nation-state level and the global – systemic or international level. Each level of analysis, reveals unique features of the innovation landscape and the ten case studies allow the reader to assess when and where specific enablers are facilitating innovation especially on a revolutionary scale. The need for the book came from the realization that despite the billions of dollars spent on various research programs over the past 20 years (especially in the public sector), there have been few clear and tangible efforts directed at exploring how innovation production increasingly occurs and the critical factors necessary to sustain large-scale, revolutionary change as the future unfolds. Thus, a primary theme of the book is that understanding how research results translate into market innovation and implementation, especially understanding the nature of revolutionary innovation, is as important as the creation of innovations themselves. While the focus of the book is on Transportation, the concepts and recommendations presented apply to other fields too. Formulates and presents a workable and comprehensive new model of innovation Defines and analyzes many concepts and notions related to innovation, research and market implementation Examines the critical factors affecting innovation production and successful commercial implementation of research results Examines organizational models of coordination, governance, data collection, process analysis and use of intellectual property tools Includes recent, well-researched and documented case studies of successful innovation ecosystems across the world mainly – but not only – in the Transport field

The Buried Sea Rane Arroyo,2008 In Rane Arroyo's poetry we hear echoes of Whitman, Lorca, Neruda. But more important, we hear Arroyo's own song of self rendered with a lyricism that belies its astonishing and redolent honesty. The Buried Sea: New and Selected Poems is a powerful addition to the American literary landscape. --Connie May Fowler.

Stars, Stones and Scholars Andis Kaulins,2008-12-12 The hermetic tradition claims As above, so below. Did the ancients mean that literally? Stars, Stones and Scholars shows that many ancient megalithic sites are not tombs, but are remnants of ancient local, regional and perhaps even larger Neolithic surveys of the Earth by Stone Age astronomy, with gigantic stones being placed as immovable survey markers. Circa 40 photographs, 240 drawings and 80 maps show how megaliths were carved and sculpted with figures and cupmarks (holes in the stones) to represent stars and constellations, long before the modern astrological Zodiac was known. Megalithic sites from England (Stonehenge), Wales (Paviland), Scotland (Clava Cairns), Ireland (Newgrange, Knowth), Germany (Externsteine), Benelux (Weris), France (Carnac), Italy (La Spezia), Malta (Tarxien), Greece, Turkey (Anatolia), Scandinavia (Tanum), the Baltic, Russia, the Near East, the Far East (China and Japan), Africa, Central and South America (Tikal, Maya, Aztecs), Oceania (Hawaii), The USA (Cahokia, Miami Circle, Clovis) and Canada (Peterborough Petroglyphs) are included in this fascinating book.

bookdown Yihui Xie,2016-12-12 bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.

Blindsight Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, Blindsight Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Placekicking in the NFL Rick Gonsalves,2013-12-03 NFL placekicking has an extensive history, from the early days of the dropkick, to the placekick, to kicking barefoot, to soccer style kicking. Each season, approximately 30 percent of all games in pro football are won by field goals. Field goals and extra points account for 20 percent of the league's yearly total points. This book discusses all aspects of NFL placekicking in historical perspective: the effectiveness of different kicking styles; the use of artificial turf and the development of domed stadiums as they relate to placekicking accuracy; individual kickers who helped to change the way a football is kicked; the mental aspects of the skill, so vital to a kicker's success; the development of the square-toe kicking shoe used by straight-on kickers to make better contact with the ball; changes in goal posts and the shape of the ball; and the fine points of centering, blocking and holding for the kicker.

Queen's Guard patrols Shanghai's Thames Town, where pubs and statues of Winston Churchill abound. Gleaming replicas of the White House dot Chinese cities from Fuyang to Shenzhen. These examples are but a sampling of China's most popular and startling architectural movement: the construction of monumental themed communities that replicate towns and cities in the West. Original Copies presents the first definitive chronicle of this remarkable phenomenon in which entire townships appear to have been airlifted from their historic and geographic foundations in Europe and the Americas, and spot-welded to Chinese cities. These copycat constructions are not theme parks but thriving communities where Chinese families raise children, cook dinners, and simulate the experiences of a pseudo-Orange County or Oxford. In recounting the untold and evolving story of China's predilection for replicating the greatest architectural hits of the West, Bianca Bosker explores what this unprecedented experiment in "duplitecture" implies for the social, political, architectural, and commercial landscape of contemporary China. With her lively, authoritative narrative, the author shows us how, in subtle but important ways, these homes and public spaces shape the behavior of their residents, as they reflect the achievements, dreams, and anxieties of those who inhabit them, as well as those of their developers and designers. From Chinese philosophical perspectives on copying to twenty-first century market forces, Bosker details the factors giving rise to China's new breed of building. Her analysis draws on insights from the world's leading architects, critics and city planners, and on interviews with the residents of these developments.

The China Crisis James R. Gorrie,2013-05-08 A controversial look at the impending Chinese economic collapse—the history behind it, its contemporary causes, and its dire implications for the global economy All the experts agree: the 21st century belongs to China. Given America's looming insolvency and the possibility of the collapse of the U.S. dollar, who can doubt that China is poised to take over the role of economic superpower? Written by political economist and leading financial journalist James Gorrie, this book offers a highly controversial, contrarian view of contemporary China. Drawing upon a wealth of historical and up-to-the-minute data, Gorrie makes a strong case that China, itself, is on the verge of an economic crisis of epic proportions. He explains how, caught in a recurrent boom/bust cycle that has played itself out several times over the past sixty years, China is again approaching total economic and social collapse. But with one important difference this time: they may very well take the entire global economy down with them. Explores the Chinese communist party's unfortunate history of making costly and very bloody mistakes on an enormous scale One-by-one Gorrie analyzes those critical mistakes and explains how they may lead to economic collapse in China and global depression Describes Chinese cannibal capitalism, and where its massive abuse of the country's environment, people, and arable lands is leading that country and the world economy Chronicles China's history of recurring economic crisis and explains why all the evidence suggests that history is about to repeat itself
