*Literature Suppressed on Social Grounds* Dawn B. Sova, 2014-05-14 *Literature Suppressed on Social Grounds*, Revised Edition discusses writings that have been banned over the centuries because they offended or merely ignored official truths; challenged widely held assumptions; or contained ideas or language unacceptable to a state, religious institution, or private moral watchdog. The entries new to this edition include the Captain Underpants series, *We All Fall Down* by Robert Cormier, and *Jake and Honeybunch Go to Heaven* by Margaret Zemach. Also included are updates to the censorship histories of such books as *To Kill a Mockingbird* and *Of Mice and Men*.

French-speaking Women Documentarians Janis L. Pallister, Ruth A. Hottell, 2005 *French-Speaking Women Documentarians* is a guide for teachers of French and others interested in selecting and researching the work of female French-speaking documentarians. Represented in this book are filmmakers from Canada, various African nations, the Antilles, Lebanon, Switzerland, Belgium, and several other countries, with emphasis on Agnès Varda of France - arguably the greatest female documentarian of all. The book includes information on each filmmaker, classified by country of origin, and lists and describes her works, giving factual information such as date, duration, credits, and synopses, and pointing out critical treatments, both in English and in French, of her most important films. Shorts, docudramas, and works of animation are also discussed, as they, too, reflect history and culture. This guide will lead to the viewing of films that shed understanding on the culture being portrayed and to a greater appreciation of the contribution of French-speaking women filmmakers to this important, if not always objective, film genre.

**Spygate** Dan Bongino,D.C. McAllister,Matt Palumbo,2018-10-09 Everyone has an opinion about whether or not Donald Trump colluded with the Russians to defeat Hillary Clinton in 2016. The number of actors involved is staggering, the events are complicated, and it’s hard to know who or what to

believe. Spygate bypasses opinion and brings facts together to expose the greatest political scandal in American history. Former Secret Service agent and NYPD police officer Dan Bongino joins forces with journalist D.C. McAllister to clear away fake news and show you how Trump's political opponents, both foreign and domestic, tried to sabotage his campaign and delegitimize his presidency. By following the names and connections of significant actors, the authors reveal:

- Why the Obama administration sent a spy connected to the Deep State into the Trump campaign
- How Russians were connected to the opposition research firm hired by the Clinton campaign to find dirt on Trump
- How the FBI failed to examine DNC computers after they were hacked, relying instead on the findings of a private company connected to the DNC and the Obama administration
- Why British intelligence played a role in building the collusion narrative
- What role Ukrainians played in legitimizing the perception that Trump was conspiring with the Russians
- How foreign players in the two events that kickstarted the Trump-Russia collusion investigation were connected to the Clinton Foundation, and
- What motivated the major actors who sought to frame the Trump campaign and secure a win for Hillary Clinton

**Seeking Sustainable Development on a Level Playing Field** Mark Everard, 2023-12-21 Back Cover

Copy Humans have exploited a huge diversity of materials throughout history. Today's conflict between rising demands and dwindling resources raises searching questions about how optimally to meet humanity's needs efficiently and safely, challenging common assumptions. Plastics support many facets of modern life yet raise associated problems, whilst 'natural' materials may be far from benign when inputs extending their longevity are considered. PVC (polyvinyl chloride) is a plastic with adaptable, durable and other properties used in diverse construction, medical, information technology, domestic and many applications besides. However, PVC has faced significant NGO pressure relating to its chlorine content and the range of additives conferring desirable properties. Yet, unlike organochlorine pesticides, PVC plastic is inert and recyclable after providing long service life. This book is not 'pro-PVC', but draws on lessons learned from how the PVC value chain, particularly across Europe, has engaged with problems and made further progress under voluntary commitments to sustainable development. The book advocates a 'level playing field' of common sustainability principles for assessment of the benefits and risks of the use of all materials in the context of their incorporation within whole product life cycles, from raw material extraction to beyond end-of-life. The use of every material raises specific challenges, but also shares common problems arising from society's legacy of wasteful, linear resource use. Activities surrounding the PVC value chain have generated novel ideas, assessment techniques and reconsideration of regulatory approaches relevant to sustainability

assessment of the use of all materials in the context of whole product life cycles on a common 'level playing field', which best supports the meeting of the diversity of human needs in the safest and most efficient manner. This book is aimed at industry, regulatory and NGO audiences and influence on wider media.

**Racialized Bodies, Disabling Worlds** Parin Dossa, 2009-02-14 In *Racialized Bodies, Disabling Worlds*, Parin Dossa explores the lives of Canadian Muslim women who share their stories of social marginalization and disenfranchisement in a disabling world. She shows how these women, who are subjected to social erasure in policy and research, define their identities and claim their humanity using the language of everyday life. Based on narrative ethnography, *Racialized Bodies, Disabling Worlds* makes a case for positive acknowledgement of perceived differences of nationality, religion, multiple-abilities, and gendered and race-based identities. It offers a powerful argument for bridging two disparate bodies of work: disability studies and anti-racist feminism. Most significantly, it shows how

racialized Muslim women with disabilities are redefining the parameters of their social worlds and developing a distinctively pluralistic understanding of abilities. This ground-breaking work gives presence to the lives of people who are otherwise rendered socially invisible.

**Howard Fast** Gerald Sorin, 2012-11-05 A biography of the Jewish American, left-wing author of *Spartacus* that explores his identity, his work, and his politics. Howard Fast's life, from a rough-and-tumble Jewish New York street kid to the rich and famous author of close to one hundred books, rivals the Horatio Alger myth. Author of bestsellers such as *Citizen Tom Paine*, *Freedom Road*, *My Glorious Brothers*, and *Spartacus*, Fast joined the American Communist Party in 1943 and remained a loyal member until 1957, despite being imprisoned for contempt of Congress. Gerald Sorin illuminates the connections among Fast's Jewishness, his writings, and his left-wing politics and explains Fast's attraction to the Party and the reasons he stayed in it as long as he did. Recounting the story of his private and public life with its adventure and risk, love and pain, struggle, failure, and success, Sorin also addresses questions such as the relationship between modern Jewish identity and radical movements, the consequences of political myopia, and the complex interaction of art, popular culture, and politics in twentieth-century America. "A notable study of a thorny protagonist whose life has much to reveal about the times in which he lived and about the interplay of political belief, personal identity, art, and ambition." —*Publishers Weekly* "Sorin . . . has written a heavily researched critical biography of Fast. . . . The volume's strength is its explication and analysis of the complex social and political context of Fast's activism and creative work. . . . Sorin's lengthy critique of Fast's adherence to Communism long after most American writers and intellectuals had abandoned the party, and his shameful public silence on Stalin's crimes and Soviet anti-Semitism, are of significant import. . . . Recommended." —*Choice* "An intriguing biography, not least for its examination of how Fast interwove his political activism, his Jewishness and his art during the heyday of McCarthyism. Recommended." —*Recorder* (Melbourne)

**How the Bible Begins** John R. Heapes, 2021-05-24 How the Bible Begins: A Sociological Study uses a Dramaturgical Approach, borrowed from Erving Goffman. This theatrical metaphor has readers imagining society like a play in five acts: Genesis, Exodus, Leviticus, Numbers, and Deuteronomy. The curtain goes up in Genesis to an empty, dark stage that, shortly afterwards, has its first performers appear—Adam, and then Eve. The foundation of this book rests on six fundamental questions which are answered within its pages: who, what, when, where, why, and how. Readers learn how many people populate each biblical book, each book's theme, when events took place, where action happened, what each book's purpose was, and how each book was composed. These books chronicled the passage of travelers who first departed Mesopotamia in search of the promised land, and later they left Egypt after four hundred years of slavery. Guided by God, these people formed a nation out of these epic journeys.

*The Beast and Babylon* J.B. Whitelaw-Stevens, 2017-07-06 The Beast and Babylon answers some age-old questions about the two symbolic entities featured in the book of Revelation. These symbols have historically been typified as a revived Roman Empire, and its God-opposing religious counterparts that rise up (in Europe), prior to the Second Coming of Jesus Christ. In contrast, this informative and timely study reveals that the latter-day beast power rises out of not one, but out of three defunct previous empires in the Middle East; known via Daniel's metaphors as the lion, bear, and leopard kingdoms. It appears from Daniel 7:11-12, that long after the last manifestation of the Roman Empire is destroyed, these three dormant empires are revived for a season and a time. During their rejuvenation, they reappear in Revelation 13 and 17 in the form of a tripartite, seven-headed, political/religious beast power that emerges from the topographies of the ancient Grecian (leopard), Persian (bear), and Babylonian (lion) kingdoms. Furthermore, these combined territories encompass ten sovereign Islamic horn nations that were revealed after the Ottoman Empire was abolished ninety-five years ago. Today, many of these Islamic nations contain embedded terrorist groups whose fanatical Jihadist leaders are determined to resurrect a radical pan-Islamic Caliphate, by which to establish Sharia law throughout the World. To achieve these objectives, the latter-day nascent imperial beast power in conjunction with ten like-minded insurgent leaders must initiate a global Jihad to incite war on the people of God, and conspire to destroy a religious city called Mystery, Babylon the Great.

Environmental Innovation Jack Buffington, 2024-04-02 A guide for our future that Booklist praises as a practical and compelling deep dive into high-level solutions to address climate change, its impact on the economy, and our very survival." Defines the challenges facing climate goals and offers achievable solutions to meet these goals by 2050—without sacrificing economic growth. Climate change and other environmental dangers are considered an existential threat, yet mankind is falling further behind in addressing these challenges. Policies aimed at fixing these issues have consistently

missed the mark by focusing on the symptoms, such as CO2 emissions, rather than the root cause problems, such as the limitations of human systems and global poverty. In *Environmental Innovation*, Jack Buffington provides a unique perspective on environmental sustainability and how it can be addressed: rather than assuming humans can solve environmental challenges as a global community and indirectly blaming poverty and overpopulation on the poor, Buffington points to 21st-century solutions to reduce poverty levels, transform human systems, and enable environmental innovation. If we correct the failures of environmental policy that has existed for five decades, there are great possibilities for solving the planet’s existential crisis. Buffington also highlights innovation opportunities in energy, food systems, water, materials, geopolitics, and ecosystems. Ultimately, *Environmental Innovation* provides a comprehensive perspective of how the world needs to define the problem of environmental sustainability, with specific focus on the great divide between the rich Global North and the poor and developing Global South. Readers will come away with a clear, detailed roadmap for how environmental sustainability can be achieved by 2050 and what technologies are required to achieve this balance between the natural and built environments. For humanity to succeed, Buffington argues we must replace the grandiose notions of the so-called global community and instead create new models for action that are consistent with human progress over thousands of years.
