*The Jaina Path of Purification* Padmanabh S. Jaini, 1998 The religious tradition of the Jainas, unique in many respects, presents a fascinating array of doctrinal and social structures that stem from the anti-vedic movements of ancient times. Drawing extensively on primary sources, Professor Jaini provides a comprehensive introduction to the Jaina experience. Beginning with the Life of Mahavira the author elucidates the essentials of Jaina cosmology and philosophy as well as of the path of purification through which the soul may escape from its Karmic defilements and attain eternal salvation. This path constitutes the integral element within the broader frame-work of Jaina literature, lay ritual and the socio-historical factors, which enabled Jainism to survive and prosper to the present day. In particular, the author has examined the cardinal doctrine of ahimsa (non-harming), both in its impact upon Jaina religious consciousness and as a standard in applying its sacred principles to the conduct of every day life.

Mathematical Thinking Masami Isoda, Shigeo Katagiri, 2012 Developing mathematical thinking is one of major aims of mathematics education. In mathematics education research, there are a number of researches which describe what it is and how we can observe in experimental research. However, teachers have difficulties developing it in the classrooms. This book is the result of lesson studies over the past 50 years. It describes three perspectives of mathematical thinking: Mathematical Attitude (Minds set), Mathematical Methods in General and Mathematical Ideas with Content and explains how to develop them in the classroom with illuminating examples.

**Riches and Renunciation** James Laidlaw, 1995 The Jains of India are a flourishing and prosperous community, but their religion is focused on the teaching and example of ascetic renouncers, whose austere regime is actually dedicated to ending worldly life and often culminates in a fast to death. This book, which draws upon a detailed study of Jainism in the city of Jaipur, shows how renunciation and ascetism play a central part in the life of a thriving business community, and how world-renunciation combines for Jain families with the pursuit of worldly happiness.

*Pedagogical Content Knowledge in STEM* Stephen Miles Uzzo, Sherryl Browne Graves, Erin Shay, Marisa Harford, Robert Thompson, 2018-10-25 This volume represents both recent research in pedagogical content knowledge (PCK) in science, technology, engineering and math (STEM), as well as emerging

innovations in how PCK is applied in practice. The notion of “research to practice” is critical to validating how effectively PCK works within the clinic and how it can be used to improve STEM learning. As the need for more effective educational approaches in STEM grows, the importance of developing, identifying, and validating effective practices and practitioner competencies are needed. This book covers a wide range of topics in PCK in different school levels (middle school, college teacher training, teacher professional development), and different environments (museums, rural). The contributors believe that vital to successful STEM education practice is recognition that STEM domains require both specialized domain knowledge as well as specialized pedagogical approaches. The authors of this work were chosen because of their extensive fieldwork in PCK research and practice, making this volume valuable to furthering how PCK is used to enlighten the understanding of learning, as well as providing practical instruction. This text helps STEM practitioners, researchers, and decision-makers further their interest in more effective STEM education practice, and raises new questions about STEM learning.
