The Politics of Fossil Fuel Subsidies and Their Reform Harro van Asselt, 2018-08-31 Fossil fuel subsidies strain public budgets, and contribute to climate change and local air pollution. Despite widespread agreement among experts about the benefits of reforming fossil fuel subsidies, repeated international commitments to eliminate them, and valiant efforts by some countries to reform them, they continue to persist. This book helps explain this conundrum, by exploring the politics of fossil fuel subsidies and their reform. Bringing together scholars and practitioners, the book offers new case studies both from countries that have undertaken subsidy reform, and those that have yet to do so. It explores the roles of various intergovernmental and non-governmental institutions in promoting fossil fuel subsidy reform at the international level, as well as conceptual aspects of fossil fuel subsidies. This is essential reading for researchers and practitioners, and students of political science, international relations, law, public policy, and environmental studies. This title is also available as Open Access.

Introduction to Political Science Fred Van Geest, 2017-07-04 Evangelical Christian Publishers Association Top Shelf Book Cover Award 2017 We are political beings and our lives are shaped by political institutions. Being a good citizen involves understanding these institutions and how

they can be used to promote the common good. Christians further believe these institutions are integral to God's created order, intended by God to promote justice and help people flourish. Christians thus have good reason to be informed about political science as they seek to be ambassadors for Christ in a diverse society. *Introduction to Political Science: A Christian Perspective* is an accessible guide to the study of politics. Written for students who may not have any prior knowledge about political life, this textbook provides a nonpartisan introduction to the key concepts, institutions, and policies that shape politics today. Fred Van Geest draws on a variety of sources and examples to present a balanced Christian perspective on political science. Christians, he argues, are called to engage in political action in order to advance public justice, even though full shalom is ultimately the work of God alone. IVP Instructor Resources include an Instructor's Guide and Student's Study Guide.

Mary Courtney from QUT and David Briggs from Uni of New England.

The Globalization of Addiction Bruce Alexander, 2010-03-04 Addiction is increasing all around the world, and the conventional remedies don't work. *The Globalization of Addiction* argues that the cause of this failure to control addiction is that past treatments have focused too single-mindedly on the afflicted individual addict. This book presents a radical rethink about the nature of addiction.

Human Development Report 2007/2008 United

Nations Development Programme, 2007-11-29 This year's Human Development Report explains why we have less than a decade to change course and start living within our global carbon budget, and how climate change will create long-run low human development traps, pushing vulnerable people into a downward spiral of deprivation.

What We Owe Each Other Minouche

Shafik, 2022-08-23 From one of the leading policy experts of our time, an urgent rethinking of how we can better support each other to thrive Whether we realize it or not, all of us participate in the social contract every day through mutual obligations among our family, community, place of work, and fellow citizens. Caring for others, paying taxes, and benefiting from public services define the social contract that supports and binds us together as a society. Today, however, our social contract has been broken by changing gender roles, technology, new models of work, aging, and the perils of climate change. Minouche Shafik takes us through stages of life we all experience—raising children, getting educated, falling ill, working, growing old—and shows how a reordering of our societies is possible. Drawing on evidence and examples from around the world, she shows how every country can provide citizens with the basics to have a decent life and be able to contribute to society. But we owe each other more than this. A more generous and inclusive society would also share more risks collectively and ask everyone to contribute for as long as they can so that everyone can fulfill their potential. What We Owe Each Other identifies the key elements of a better social contract that recognizes our interdependencies, supports and invests more in each other, and expects more of individuals in return. Powerful, hopeful, and thought-provoking, What We Owe Each Other provides practical solutions to current challenges and demonstrates

how we can build a better society—together.

Handbook of Applied Developmental Science
Richard M. Lerner, Francine Jacobs, Donald Wertlieb, 2003 The Handbook of Applied Developmental Science is the only work to comprehensively present the latest theory, research, and application from applied developmental science (ADS) and the positive psychology movement. It summarizes and synthesizes the best scientific knowledge from ADS to help readers understand the efforts being made around the world to ensure that all children and adolescents develop into healthy adults who contribute positively to society. The Handbook is also the first resource to organize and integrate both the prevention and promotion approaches to programs and policies for children, adolescents, and families. In addition, the Handbook provides a detailed road map for future research and for actions that will promote positive child, youth, and family development. Published in four volumes, the Handbook features 95 chapters by more than 150 contributors, many of who are renowned leaders in the field. Volume 1 describes the foundation of applied developmental science, its historical development, and current scientific and professional efforts to develop policies and programs that promote positive child, adolescent, and family development. Volume 2 examines public policy and government service systems. Volume 3 discusses community systems for enhancing citizenship and promoting a civil society. Finally, Volume 4 outlines methods for university engagement and academic outreach. Fisheries Subsidies, Sustainable Development and the WTO Anja von Moltke, 2014-10-14 The fisheries sector is in crisis. Inappropriate subsidies to the fishing industry are a key factor responsible for worldwide fisheries depletion, overcapitalization and ecosystem degradation. There is an urgent need for an international mechanism to promote the appropriate restructuring of fisheries subsidies in order to create a more sustainable industry. In recent years the leading international forum charged with providing such a mechanism has been the World Trade Organization (WTO). This book explains why and how the reform of fisheries subsidies has become one of the most concrete and potentially successful international efforts to achieve global environmental, economic and developmental policy coherence. It describes the history and current status of the discussions at the WTO, drawing on UNEP's key documents and reflecting on the major issues. Accompanying the book are downloadable resources containing full-text versions of the most important source material used in the publication. The book is

aimed at a broad stakeholder audience, including policymakers in the fields of trade, fisheries, environmental economics and international environmental governance, as well as academics and others looking for an overview of the fisheries subsidies issue and an introduction to its technical components. Published with the United Nations Environment Programme (UNEP)

Safeguarding Companies' Rights in Competition and Anti-dumping/anti-subsidies Proceedings
Themistoklis K. Giannakopoulos, 2011-01-01 Focusing on the rules safeguarding procedural due process in the administrative procedures of the Commission, this fully updated edition of a widely used handbook covers the four principal fields that entail enforcement of substantive competition rules: antitrust, merger, anti-dumping/antisubsidies, and State aid. Among the many practical issues raised are the following: the right of directly involved parties to bring an action before the European Courts in merger, anti-dumping/anti-subsidies, and State-aid cases; the rights of complainants in antitrust cases; the rights and obligations of beneficiaries in State-aid cases; the extent to which the right to confidential communication between lawyer and client in these cases is recognised by the European Commission and the European Courts; the right to silence to avoid self-incrimination in antitrust cases; the right to respect for confidentiality and the right to be heard during the preliminary factfinding procedure of the Commission; the obligations of an undertaking during the fact-finding procedure of the Commission; the right of access to the Commission's file; the right to a fair hearing of all the parties concerned by the Commission proceedings; and the applicability of Article 6 of the European Convention of Human Rights (ECHR) to EU antitrust procedures. Three tables consolidate briefly and comparatively the

rights and the obligations of the private parties in the four proceedings, as well as their right to bring an action before the European Courts. These tables give the reader the opportunity to easily check out what is the situation in the four proceedings regarding a specific right or obligation. The author's analysis draws on all the relevant judgments of the European Courts, and the book comes with a wealth of reference material, including detailed footnotes, lists of legislation and cases in both chronological and alphabetical order, and an extensive bibliography.

Sixty Years of EU State Aid Law and Policy
Eugene Stuart, Iana Roginska-Green, 2016-04-24 If an EU industrial policy can be said to exist, its contours may be found in the complex and evolving concept of State aid. Because approaching any State aid issue can be fraught with multiple and sometimes conflicting interpretations, an in-depth analysis of the rationales, initiatives, and regulations that constitute the State aid system is much needed. In response to this need, this book provides a fine-grained clarifying context through which recent reforms, policy shifts, and judicial decisions concerning State aid can be understood and applied to specific situations. Focusing on the impacts of landmark cases and policy developments leading up to a deeply informed critique of the current State Aid Modernisation Programme, the authors cover such issues and topics as the following: - linkages to other established and evolving EU common policies and common strategies; - effect of EU State aid rules in the expanding geopolitical regions of EU influence; - interaction with the WTO Subsidies and Countervailing Measures Agreement; - the problem of a 'subsidies culture'; - how the European Commission's notion of 'bad' State aid has evolved; - effect of EU policy imperatives (e.g., environmental goals) which implicitly argue

for increased subsidisation; - nexus with EU tax harmonisation; - competition among undertakings versus competition among Member State policies; and - nature of the quasi-devolution of regulatory responsibilities to EU Member States. This book is a crucially important source of both theoretical enlightenment and practical wisdom that will greatly enhance confident progress through any legal matter involving EU State aid rules. It will prove of immeasurable value to practitioners, in-house counsel, policymakers, and academics for many years to come.

Environment and Social Justice Dorceta E. Taylor,2010-08-26 The environmental justice movement, an organized social and political force in America in the '80s, is a global phenomenon today as activists worldwide try to understand the relationship between environment, race/ethnicity and social inequality. This volume examines domestic and international environmental issues.

Trade Remedies Thomas Weishing Huang,2003-01-01 As international trade turns increasingly toward China, it is crucial for trade practitioners to grasp the law of trade remedies as practiced in that country. Since China acceded to the World Trade Organization in 2002, its liberal and even enthusiastic interpretation of the WTO rules (and exceptions) on dumping, subsidies and safeguards?frequently noted in its rigorous antidumping enforcement activity?has revealed China?s adherence to the ?infant industry? theory of international trade. China?s concerted use of trade remedies can be best understood as the government?s support of its industries?which not long ago were merely units in a centrally-planned economy?as they struggle toward competitive advantage. However, for trade professionals outside of China, these specialized circumstances

can give rise to serious legal difficulties. It is in order to forestall such problems, with keen analysis and informed insight, that this book has been written. The reader will find enormously helpful analysis of, and information about, such relevant details as the following, among many more: the role of the China State Economic and Trade Commission (SETC) and other official bodies; how petitions for antidumping and anti-subsidy investigations are filed; ?normal value? and ?constructed value? and their adjustments; actionable and non-actionable subsidies; assistance to disadvantaged regions, for reform activities, and for environmental reasons; indirect taxes; injury criteria of dumping and subsidies; fact patterns that give rise to safeguards; subject matter jurisdiction of judicial review; and administrative review. Trade Remedies: Law of Dumping, Subsidies and Safeguards in China expertly covers an important area of practice where little or no reliable materials existed before. In a world trade environment where China's significance is growing rapidly, this book's value for legal practitioners, trade officials, trade policymakers and academics in international trade law, anywhere in the world, cannot be overstated.

Take the Rich Off Welfare Mark Zepezauer, 2004
Just in time to add fuel to the 2004 elections comes an all-new edition of this widely popular exposé of those who feed on the public trough. In the eight years since *Take the Rich Off Welfare* was first published, the total amount of taxpayers' money going to subsidize corporations and rich individuals has grown from about \$448 billion to over \$800 billion—and the tax payments coming from those flush companies and individuals continues to shrink. In this greatly expanded and updated version, Mark Zepezauer explains how programs once intended to profit the

public now benefit only the corporate bottom line. A prolific writer of humorous but cutting analyses of government policy, Zepezauer provides us with tools to expose the political chicanery of current and past administrations.

Fisheries Subsidies and Overfishing Programme des Nations Unies pour l'environnement, Gareth Porter, 2003

Trade Liberalisation and Environment Linkages

Michelle Pressend, 2006 One of the most controversial aspects of the negotiations at the World Summit on Sustainable Development in 2002 was an attempt by some delegations to require that multilateral environmental agreements be made fully compatible with trade rules before they could be ratified.

Thailand's Political Peasants Andrew

Walker, 2012-08-06 When a populist movement elected Thaksin Shinawatra as prime minister of Thailand in 2001, many of the country's urban elite dismissed the outcome as just another symptom of rural corruption, a traditional patronage system dominated by local strongmen pressuring their neighbors through political bullying and vote-buying. In *Thailand's Political Peasants*, however, Andrew Walker argues that the emergence of an entirely new socioeconomic dynamic has dramatically changed the relations of Thai peasants with the state, making them a political force to be reckoned with. Whereas their ancestors focused on subsistence, this generation of middle-income peasants seeks productive relationships with sources of state power, produces cash crops, and derives additional income through non-agricultural work. In the increasingly decentralized, disaggregated country, rural villagers and farmers have themselves become entrepreneurs and agents of the state at the local level, while the state has changed from an extractor of taxes to a supplier of subsidies and

a patron of development projects. Thailand's Political Peasants provides an original, provocative analysis that encourages an ethnographic rethinking of rural politics in rapidly developing countries. Drawing on six years of fieldwork in Ban Tiam, a rural village in northern Thailand, Walker shows how analyses of peasant politics that focus primarily on rebellion, resistance, and evasion are becoming less useful for understanding emergent forms of political society.
