Mass and Heat Transfer T. W. Fraser Russell, Anne Skaja Robinson, Norman J. Wagner, 2008-02-11 This text allows instructors to teach a course on heat and mass transfer that will equip students with the pragmatic, applied skills required by the modern chemical industry. This new approach is a combined presentation of heat and mass transfer, maintaining mathematical rigor while keeping mathematical analysis to a minimum. This allows students to develop a strong conceptual understanding, and teaches them how to become proficient in engineering analysis of mass contactors and heat exchangers and the transport theory used as a basis for determining how critical coefficients depend upon physical properties and fluid motions. Students will first study the engineering analysis and design of equipment important in experiments and for the processing of material at the commercial scale. The second part of the book presents the fundamentals of transport phenomena relevant to these applications. A complete teaching package includes a comprehensive instructor's guide, exercises, case studies, and project assignments.

Civil-Military Relations and Democracy Larry Diamond, Marc F. Plattner, 1996-10-17 Based on a conference held in Washington, DC, 13-14 Mar 1995.

The War and War-games in Bosnia and Herzegovina from 1992 to 1995 Magnus Bjarnason, 2001 This book describes the build-up to the Bosnian War, which took place from 1992-95, and the relation it had with the war in Croatia between 1991-95. The Bosnian war is viewed from two different angles. The first one is the perspective from inside the conflict area, describing the war in the field and its effects. The second one is the perspective of international high politics, where former Yugoslavia is just an object in the world power-game. It describes the Bosnian War's four phases (author's definition), the first phase being the Serbs' struggle to keep as much as possible of the disintegrating state, the second phase being the uncontrolled ethnic war, the third phase being that of corruption and stagnation where the war had a life of its own without much real fighting, and the last phase when the dividing lines were redrawn and formal fighting ended, almost like a pre-planned game of chess. The book concludes by a reflection on future developments and problems in the region.

Sarajevo Marlboro Miljenko Jergovic, 2012-04-26 Miljenko Jergovic's remarkable debut collection of stories, *Sarajevo Marlboro* – winner of the Erich Maria Remarque Peace Prize – earned him wide acclaim throughout Europe. Croatian by birth, Jergovic spent his childhood in Sarajevo and chose to remain there throughout most of the war. A dazzling storyteller, he brings a profoundly human, razor-sharp understanding of the fate of the city's young Muslims, Croats, and Serbs with a subterranean humor and profoundly personal vision. Their offbeat lives and daily dramas in the foreground, the killing zone in the background.

Command in War Martin Van Creveld, 1985 Many books have been written about strategy, tactics, and great commanders. This is the first book to deal exclusively with the nature of command itself, and to trace its development over two thousand years from ancient Greece to Vietnam. It treats historically the whole variety of problems involved in commanding armies, including staff organization and administration, communications methods and technologies, weaponry, and logistics. And it analyzes the relationship between these problems and military strategy. In vivid descriptions of key battles and campaigns—among others, Napoleon at Jena, Moltke's Königgrätz campaign, the Arab-Israeli war of 1973, and the Americans in Vietnam—Martin van Creveld focuses on the means of command and shows how those means worked in practice. He finds that technological advances such as the railroad, breech-loading rifles, the telegraph and later the radio, tanks, and helicopters all brought commanders not only new tactical possibilities but also new limitations. Although vast changes have occurred in military thinking and technology, the one constant has been an endless search for certainty—certainty about the state and intentions of the enemy's forces; certainty about the manifold factors that together constitute the environment in which war is fought, from the weather and terrain to radioactivity and the presence of chemical warfare agents; and certainty about the state, intentions, and activities of one's own forces. The book concludes that progress in command has usually been achieved less by employing more advanced technologies than by finding ways to transcend the limitations of existing ones.

Post-war Identification Torsten Kolind, 2008 Post-war identification is a unique ethnographic study of the remarking of post-war life in a small ethnically mixed town in Bosnia Herzegovina. During the war in the 1990s the local Muslim population was expelled, but today has returned to live alongside former enemies. These people are trying to piece together a life from broken fragments that consist of war-related traumas, nationalist propaganda, ruined economies, disappointment, and memories of pre-war life. In this shattered world Torsten Kolind identifies an everyday based, anti-nationalistic counterdiscourse strongly rooted in pre-war life. This resistance is seldom outspoken, but consists rather of a steady insistence on not using ethnic or national categories in identifying oneself and/or others. In a world of despair, the Muslim everyday counter-discourse gives hope for future coexistence, and points to the intriguing fact that reconciliation often develops from the bottom up, rather than in the political corridors of power. Torsten Kolind's focus on everyday resistance is a highly relevant contribution to contemporary anthropological discussions of the relation between discourse, power, nationalism, and violence. Protecting the Environment During Armed Conflict Elizabeth Mrema,Carl Bruch,Jordan Diamond,2009 This report inventories and analyses the range of international laws that protect the environment during armed conflict. With a view to identifying the current gaps and weaknesses in this system, the authors examine the relevant provisions within four bodies of international law - environmental humanitarian (IHL), international criminal law (ICL), international environmental law (IEL), and international human rights law (HRL). The report concludes with twelve concrete recommendations on ways to strengthen this legal framework and its enforcement. The Environment and Natural Resources are crucial for building and consolidating peace, it is urgent that their protection in times of armed conflict be strengthened. There can be no durable peace if the natural resources that sustain livelihoods are damaged or destroyed. This report provides a basis upon which Member States can draw upon to clarify, expand and enforce international law on environmental protection in times of war.

Shy Radicals Hamja Ahsan,2017-02-17 Drawing together communiqués, covert interviews and underground histories of introvert struggles (Introfada), here for the first time is a detailed documentation of the political demands of shy people. Radicalized against the imperial domination of globalized PR projectionism, extrovert poise and loudness, the Shy Radicals are a vanguard movement intent on trans-rupting the extrovert-supremacist politics and

assertiveness culture of the 21st-century. The movement aims to establish an independent homelandAspergistan, a utopian state for introverted people, run according to Shyria Law and underpinned by Pan-Shyist ideology, protecting the rights of the oppressed quiet and shy people. This anti-systemic manifesto, a quiet and thoughtful polemic, is a satire that uses anti-colonial theory to build a critique of dominant culture and the rising tide of Islamophobia. Shy Radicals author Hamja Ahsan (b. 1981) is an artist, curator and activist based in London. He is the Free Talha Ahsan campaign organizer.

The Activation of Dioxygen and Homogeneous Catalytic Oxidation D.H.R. Barton,Arthur E. Martell,Donald T. Sawyer,2012-12-06 This monograph consists of the proceedings of the Fifth International Symposium on the Activation of Dioxygen and Homogeneous Catalytic Oxidation, held in College Station, Texas, March 14-19, 1993. It contains an introductory chapter authored by Professors D. H. R. Barton and D. T. Sawyer, and twenty-nine chapters describing presentations by the plenary lecturers and invited speakers. One of the invited speakers, who could not submit a manuscript for reasons beyond his control, is represented by an abstract of his lecture. Also included are abstracts of forty-seven posters contributed by participants in the symposium. Readers who may wish to know more about the subjects presented in abstract form are invited to communicate directly with the authors of the abstracts. This is the fifth international symposium that has been held on this subject. The first was hosted by the CNRS, May 21-29, 1979, in Bendor, France (on the Island of Bandol). The second meeting was organized as a NATO workshop in Padova, Italy, June 24-27, 1984. This was followed by a meeting in Tsukuba, Japan, July 12-16, 1987. The fourth symposium was held at Balatonfured, Hungary, September 10-14, 1990.
