Youth Studies James Côté,2017-09-16 The burgeoning field of youth studies encompasses multiple viewpoints, presenting a confusing picture to novices and experts alike. This insightful text goes to the heart of the fundamental issues and debates that characterize this developing field, giving readers a clearer understanding of its current progress and future prospects. James Côté's lively, debate-focused overview of the underlying paradigms and theories in youth studies - drawn from the overlapping disciplines of sociology, psychology and cultural studies – functions both as an introduction to the area and as an exercise in critical thinking, putting its readers on the cutting-edge of the field. The chapters move from identifying the key 'threshold meta-concepts' that influence research, to showing readers how to critically evaluate key debates in areas that are central to students' lives, including education, work, family, technologies, youth culture, identity and politics. Youth Studies is the ideal companion to youth-related degree programmes and to youth modules in sociology, social work, social policy, psychology and other related disciplines.

*Tears of laughter* Nigel Mather,2019-01-04 'Tears of laughter' examines the interactions of comedy and drama in three vital thematic strands of British cinema during the 1990s: comedies exploring issues of class, culture and community in British society, 'ethnic' comedy-dramas engaging with complex issues of identity and allegiance in modern Britain, and romantic comedies featuring characters searching (somewhat desperately or frantically) for a suitable and desirable long-term or short-term partner. Films to be discussed in detail include 'Brassed Off' (1996), 'The Full Monty' (1997), 'East is East' (1999), 'Four Weddings and a Funeral' (1994), 'Notting Hill' (1999) and a post-1990s romantic comedy, 'Love Actually' (2003). The study discusses these specific films and a range of other 1990s British comedy-drama films within the context of community-orientated Ealing comedy classics, contentious situation comedies treating race relations as both a laughing matter and a site of conflict ('Till Death Us Do Part' and 'Love Thy Neighbour'), and romantic comedies set and produced in Britain. It is aimed at film studies academics, students and film enthusiasts.

Neuroscience and Social Work Practice Rosemary L. Farmer,2008-12-17 Over the past 30 years, findings in the neurosciences have grown exponentially and have provided a profound understanding of the link between behavior and biology. Although the Social Work community has long taken pride in using a bio-psycho-social-spiritual (BPSS) framework in conceptualization and intervention, the biological aspect of this BPSS framework has been sorely missing. Neuroscience and Social Work Practice provides the critical missing link. Introducing the latest neuroscience research, it gives practitioners essential data—in an easily accessible form—with which to take on the challenges of increasingly complex human problems and diagnoses. Key Features Takes readers on a tour of the brain and makes dense scientific material more engaging Provides a framework for how human

service professionals can understand and implement neuroscience clinical data with the use of the Transactional Model Uses case vignettes to explain how neuroscience findings have been applied to specific practice situations Offers a deeper understanding of the links between neuroscience research and social work in such areas as trauma, attachment, psychotherapy, substance abuse, and the effects of psychotropic medications Intended Audience This cutting-edge text is indispensable for practitioners in the human services field and is an essential supplement for upper-level undergraduate or graduate students of courses in Human Behavior in the Social Environment and Social Work Direct Practice as well as courses on Interpersonal Practice with Individuals, Children, and Families.

**Creating Cyber Libraries** Kathleen W. Craver, 2002-05-30 As prices of traditional library materials increase, and space to house them shrinks, savvy school library media specialists are creating cyber libraries, or school libraries on the Internet. These libraries offer students and their parents 24-hour access and are invaluable for providing up-to-date information in a way traditional materials cannot. This guide outlines the steps library media specialists can take to create a cyber library, provide content and policies for use, and maintain it for maximum efficiency. Craver justifies the need for cyber libraries in the 21st century, and how they can help librarians to meet the standards in Information Power (1998). She explains the different types of cyber libraries available, along with their advantages and disadvantages. She discusses how to construct them using portals or by acquiring fee-based cyber libraries, and what policies should be in place to protect both the school and its students. Also included are instructions for establishing remote access to subscription databases, creating cyber reading rooms, and providing instructional services to student users. Once a cyber library is created, it must be maintained and evaluated to keep it useful and current, and this book provides guidelines to do so. Finally, there is a chapter on promoting the cyber library, so the school community is aware of its features and participates in its growth process. No school library should be without this volume!
