5th World Congress on Disaster Management: Volume III S. Ananda Babu, 2023-02-16 World Congress on Disaster Management (WCDM) brings researchers, policy makers and practitioners from around the world in the same platform to discuss various challenging issues of disaster risk management, enhance understanding of risks and advance actions for reducing risks and building resilience to disasters. The fifth WCDM deliberates on three critical issues that pose the most serious challenges as well as hold the best possible promise of building resilience to disasters. These are Technology, Finance, and Capacity. WCDM has emerged as the largest global conference on disaster management outside the UN system. The fifth WCDM was attended by more than 2500 scientists, professionals, policy makers, practitioners all around the world despite the prevalence of pandemic.

Handbook of Urban Health Sandro Galea, David Vlahov, 2006-10-12 The editors are two of the most prominent researchers in this area. Both are at the Center for Urban Epidemiologic Studies. David Vlahov is particularly visible and known as the editor of the Journal of Urban Health. Sandro Galea is very prominent for his research on urban health; in particular, research done on PTSD and children post-9/11. Thorough analysis of different populations in urban settings and specific health considerations Useful section on methods for the research audience. Applied in nature with section on prevention and interventions There are over 100 urban health centers in North America and there are no thorough, up-to-date resources.

Secure IT Systems Sonja Buchegger, Mads Dam, 2015-10-26 This book constitutes the proceedings of the 20th Nordic Conference on Secure IT Systems, held in Stockholm, Sweden, in October 2015. The 11 full papers presented together with 5 short papers in this volume were carefully reviewed and selected from 38 submissions. They are organized in topical sections named: cyber-physical systems security, privacy, cryptography, trust and fraud, and network and software security.

Paradise Lost? Ali Riaz, Subho Basu, 2007 Paradise Lost examines the state-society relationships in Nepal and demonstrates that the nature of the state, disjuncture between the state and the society, and the rupture of the ideological hegemony of the ruling class of Nepal have created a situation where existing institutional frameworks are disintegrating and the state is rapidly unraveling. Dr. Ali Riaz and Dr. Subho Basu analyze the roles of ethnicity, identity, and deprivation, in engendering discontent and the rise of the Maoists as a formidable political force. Mindful of the geo-strategic importance of the country, this book contextualizes these domestic developments within the post-9/11 global world. Jointly authored by a political scientist and a historian this book brings together structural and historical perspectives. Written in an engaging language, Paradise Lost? will appeal to political scientists, historians, sociologists, and those interested in current affairs.

International Social Work Lynne Moore Healy, Rebecca Leela Thomas, 2020-07-30 International Social Work: Professional Action in an Interdependent World, Third Edition, is a comprehensive treatment of all dimensions of international social work. The authors' four-part framework includes domestic practice and policy influenced by global forces, professional exchange, international practice, and global social policy. The first section of the book explores globalization, development and human rights as foundational concepts for international social work. The text then provides an overview of global social issues and international organizations related to social welfare. Part II offers an overview of the global history of the profession. Similarities and differences in social work around the world are examined through seven country examples. Part III provides an extensive discussion of current aspects of the global profession, with chapters on ethics, social policy, international development practice, and practice at the international/domestic interface. Modalities of international professional exchange are then explored prior to a concluding chapter that provides recommendations for international action. The text is enlivened by numerous case examples, drawn from many parts of the world. The history chapters include brief biographies of noted social workers on the international scene whose accomplishments serve as inspiration for readers. The text is extensively referenced with updated professional literature and intergovernmental documents. Carefully selected items in the appendix expand the usefulness of the book.

Rice By-products: Phytochemicals and Food Products Application Bee Ling Tan, Mohd Esa Norhaizan, 2020-06-17 Rice is a vitally important staple food for almost half of the world's population. As the global population increases, the demands for rice are expected to remain high. Since the rice industry will remain sustainable for a long time, the production of rice by-products will remain high. Substantial evidence suggests that rice by-products such as rice husk, rice straw, broken rice, rice germ, rice bran, and brewers' rice may possess beneficial effects against oxidative stress and metabolic disorders. These beneficial effects have been linked to the phytochemicals present in rice by-products such as vitamin E, dietary fiber, γ -oryzanol, γ -aminobutyric acid (GABA), and phytosterols. Despite this evidence, the literature pertaining to rice by-products and its derived components has not well been compiled. To this end, Rice By-products: Phytochemicals and Food Products Application provides full coverage of issues pertaining to rice by-products, namely rice demands and rice by-products production, phytonutrients and antioxidant properties of rice by-products, potential health benefits, application in food products, and future prospects. By summarizing all the information in a lucid and comprehensive manner, authors provide a cohesive representation of the literature on the molecular mechanisms involved in the pharmacological effects of the bioactive components that present in rice by-products, as well as plausible means for the prevention of metabolic disorders for readers and allied stakeholders.

The Equitable Forest Carol J. Pierce Colfer, 2010-09-30 While there continues to be refinement in defining and assessing sustainable management, there remains the urgent need for policies that create the conditions that support sustainability and can halt or slow destructive practices already underway. Carol Colfer and her contributors maintain that standardized solutions to forest problems from afar have failed to address both human and environmental needs. Such approaches, they argue, often neglect the knowledge that local stakeholders have accumulated over generations as forest managers and do not address issues involving the diversity and well-being of groups within communities. The contributors note that these problems persist despite clear evidence that equity and social relationships, including gender roles, are important factors in the ways that communities adapt to change and manage forest resources overall. The Equitable Forest offers an alternative to traditional, externally organized strategies for forest management. Termed adaptive collaborative management (ACM), the approach tries to better acknowledge the diversity, complexity, and unpredictability of human and natural systems. ACM works to strengthen local institutions and use the knowledge and capacity of groups in local communities to enhance the health and well-being of both forests and the people who live in and around them. The Equitable Forest provides a detailed explanation of the descriptive, analytical, and methodological tools of ACM, along with accounts of early stages of its implementation in tropical regions of Asia, Africa, and Latin America. Although the contributors make it clear that it is too soon to evaluate the efficacy of ACM, their work is supported by evidence that rural communities do make important contributions when involved in formal forest management; that management strategies are most effective when flexible and tailored to local contexts; and that efforts by outside governmental and nongovernmental organizations to support local management are feasible from the policymaking perspective, and desirable for their impact on human, economic, and environmental well-being.

Promise, Trust and Evolution Rucha Ghatge, Narpal Jodha, Pranab Mukhopadhyay, 2008-01-10 From land management to water rights, this volume looks at the current status of Common Property Resources, or CPRs, in South Asia. Developed countries, have managed to establish well-defined property rights over numerous resources and in some instances extended non-exclusionary rights over privately owned resources over an extended period of time. In the developing world, however, the share of community property is extensive, either as a response to an expanding market or because the exposure to markets is still in its nascent stage. This coupled with the demands of globalization, has led to the co-existence of both community ownership of resources as well as an evolving private property rights market. This tension between public versus private ownership rights is particularly relevant in the developing countries of South Asia, not only because of its shared history but also because of its resources frequently cross national boundaries. This book tells the story of CPRs and the commons in a rapidly changing South Asia. Including contributions from those working with natural resources in Bhutan, India, Nepal, Pakistan, and Sri Lanka, the papers discuss issues such as equity in distribution; efficiency and

productivity of resources; sustainability of resources; and institutional transition and governance.

Medicinal Chemistry with Pharmaceutical Product Development Debarshi Kar Mahapatra, Sanjay Kumar Bharti, 2019-02-04 This volume focuses on novel therapeutics and strategies for the development of pharmaceutical products, keeping the drug molecule as the central component. It discusses current theoretical and practical aspects of pharmaceuticals for the discovery and development of novel therapeutics for health problems. Explaining the necessary features essential for pharmacological activity, it takes an interdisciplinary approach by including a unique combination of pharmacy, chemistry, and medicine along with clinical aspects. It takes into consideration the therapeutic regulations of the USP along with all the latest therapeutic guidelines put forward by WHO, and the US Food and Drug Administration.

Cadastre: Geo-Information Innovations in Land Administration Tahsin Yomralioglu, John McLaughlin, 2017-03-15 This book highlights the latest improvements in cadastre with examples and case studies from various parts of the world. Authors from different continents, in association with national and international organizations and societies, present the most comprehensive forum to date for cadastre, offering a broad overview of land administration and contemporary perspectives on current research and developments, including surveying, land management, remote sensing and geo-information sciences. Cadastre is a universal concept and is defined as “the work of officially mapping and systemically registering the areas, borders and values of all kinds of land and property”. It is normally a parcel-based and up-to-date land information system containing a record of interests in land with rights, restrictions and responsibilities. It may be established for fiscal and legal purposes, to assist in management for better planning and other administrative purposes, and to enable sustainable development and environmental protection. As such, “cadastre” is an important public inventory documenting the records of ownership, bordering and responsibility regarding the land with “title deeds” to parcels and answering the questions of “whose land, where and how much”. The materials included in the book can support courses at universities and related training institutions worldwide, and will greatly improve readers’ understanding of the scholarly fields involved in cadastre: land registration and management, surveying and mapping, and geo-information management, land governance, land taxation and public administration etc.

Sand Mining D. Padmalal, K. Maya, 2014-06-12 This book addresses most of the environmental impacts of sand mining from small rivers. The problems and solutions addressed in this book are applicable to all rivers that drain through densely populated tropical coasts undergoing rapid economic growth. Many rivers in the world are drastically being altered to levels often beyond their natural resilience capability. Among the different types of human interventions, mining of sand and gravel is the most disastrous one, as the activity threatens the very existence of river ecosystem. A better understanding of sand budget is necessary if the problems of river and coastal environments are to be solved.

International Joint Conference SOCO’17-CISIS’17-ICEUTE’17 León, Spain, September 6–8, 2017, *Proceeding* Hilde Pérez García, Javier Alfonso-Cendón, Lidia Sánchez González, Héctor Quintián, Emilio Corchado, 2017-08-21 This volume includes papers presented at SOCO 2017, CISIS 2017, and ICEUTE 2017, all conferences held in the beautiful and historic city of León (Spain) in September 2017. Soft computing represents a collection of computational techniques in machine learning, computer science, and some engineering disciplines, which investigate, simulate, and analyze highly complex issues and phenomena. These proceedings feature 48 papers from the 12th SOCO 2017, covering topics such as artificial intelligence and machine learning applied to health sciences; and soft computing methods in manufacturing and management systems. The book also presents 18 papers from the 10th CISIS 2017, which provided a platform for researchers from the fields of computational intelligence, information security, and data mining to meet and discuss the need for intelligent, flexible behavior by large, complex systems, especially in mission-critical domains. It addresses various topics, like identification, simulation and prevention of security and privacy threats in modern communication networks. Furthermore, the book includes 8 papers from the 8th ICEUTE 2017. The selection of papers for all three conferences was extremely rigorous in order to maintain the high quality and we would like to thank the members of the Program Committees for their hard work in the reviewing process.

Proceedings of the 13th International Conference on Soft Computing and Pattern Recognition (SoCPaR 2021) Ajith Abraham, Andries Engelbrecht, Fabio Scotti, Niketa Gandhi, Pooja Manghirmalani Mishra, Giancarlo Fortino, Virgilijus Sakalauskas, Sabri Pllana, 2022-02-21 This book highlights the recent research on soft computing, pattern recognition, nature-inspired computing and their various practical applications. It presents 53 selected papers from the 13th International Conference on Soft Computing and Pattern Recognition (SoCPaR 2021) and 11 papers from the 13th World Congress on Nature and Biologically Inspired Computing (NaBIC 2021), which was held online, from December 15 to 17, 2021. A premier conference in the field of soft computing, artificial intelligence and machine learning applications, SoCPaR-NaBIC 2021 brought together researchers, engineers and practitioners whose work involves intelligent systems, network security and their applications in industry. Including contributions by authors from over 20 countries, the book offers a valuable reference guide for all researchers, students and practitioners in the fields of computer science and engineering.

Biometric Recognition Zhenan Sun, Gongping Yang, Jie Zhou, Yunhong Wang, Yilong Yin, 2013-11-05 This book constitutes the refereed proceedings of the 8th Chinese Conference on Biometric Recognition, CCBR 2013, held in Jinan, China, in November 2013. The 57 revised full papers presented were carefully reviewed and selected from among 100 submissions. The papers address the problems in face, fingerprint, palm print, vein biometrics, iris and ocular biometrics, behavioral biometrics and other related topics, and contribute new ideas to research and development of reliable and practical solutions for biometric authentication.

Nature, Society, and Marginality Pushkar K. Pradhan, Walter Leimgruber, 2023-01-01 This book focuses on the interrelations between nature and humans, in particular on those segments of societies that have been left behind (marginal groups). Nature is both the friend of humans and their adversary, depending on the way people treat and use it. Consequently, the book adopts a wide perspective of marginality: nature that has been marginalized by man (ecological marginality), but also social groups marginalized by politics, economic interests, and value judgements imbedded in culture. Many chapters deal specifically with issues in Nepal, but along with the other chapters with case studies from Southeast Asia and other regions, they demonstrate that the major man-nature problems are the same everywhere and can only be solved by constructive politics through clear regulations, convincing actions and general acceptance.

Asia and the Pacific Regional Overview of Food Security and Nutrition 2020 Food and Agriculture Organization of the United Nations, World Food Programme, World Health Organization, United Nations International Children's Emergency Fund, 2021-01-19 The 2020 report on the State of Food Security and Nutrition in the Asia and Pacific region, provides an update on progress towards the 2030 targets (SDGs and WHA) at the regional and country level. Selected indicators look at undernourishment, food insecurity, childhood stunting, wasting and overweight, adult overweight, child minimum acceptable diet, exclusive and continued breastfeeding, and anaemia in women and children. While the region continues to work towards ending all forms of malnutrition and achieving Zero Hunger, progress on food security and nutrition has slowed, and the Asia and Pacific region is not on track to achieving 2030 targets. About 350.6 million people in the Asia and Pacific region are estimated to have been undernourished in 2019, about 51 percent of the global total. An estimated 74.5 million children under five years of age were stunted and a total of 31.5 million were wasted in the Asia and Pacific region. The majority of these children in the region live in Southern Asia with 55.9 million stunted and 25.2 million wasted children. Estimates predict a 14.3 percent increase in the prevalence of moderate or severe wasting among children under 5 years of age, equal to an additional 6.7 million children, due to the COVID-19 pandemic. With basic food prices and disposable incomes influencing household decisions on food and dietary intake, they are critical to improve food security and nutrition in the region. However, in the Asia and Pacific region, 1.9 billion people are unable to afford a healthy diet, driven by high prices of fruits, vegetables and dairy products, making it impossible for the poor to achieve healthy diets. In Part 2, the 2020 report promotes a systems approach to healthy maternal and child diets, involving and coordinating institutions and actors in the Food, Water and Sanitation, Health, Social Protection and Education systems, to collectively create the enabling environment for healthy diets. Integration of healthy diets and nutrition-focused Social Behavior Change Communication (SBCC) mainstreamed throughout these systems will lead to greater uptake and sustainability of healthy behaviours and caregiver’s knowledge.

The Era of Artificial Intelligence, Machine Learning, and Data Science in the Pharmaceutical Industry Stephanie K. Ashenden, 2021-04-23 The Era of Artificial Intelligence, Machine Learning and Data Science in the Pharmaceutical Industry examines the drug discovery

process, assessing how new technologies have improved effectiveness. Artificial intelligence and machine learning are considered the future for a wide range of disciplines and industries, including the pharmaceutical industry. In an environment where producing a single approved drug costs millions and takes many years of rigorous testing prior to its approval, reducing costs and time is of high interest. This book follows the journey that a drug company takes when producing a therapeutic, from the very beginning to ultimately benefitting a patient’s life. This comprehensive resource will be useful to those working in the pharmaceutical industry, but will also be of interest to anyone doing research in chemical biology, computational chemistry, medicinal chemistry and bioinformatics. Demonstrates how the prediction of toxic effects is performed, how to reduce costs in testing compounds, and its use in animal research Written by the industrial teams who are conducting the work, showcasing how the technology has improved and where it should be further improved Targets materials for a better understanding of techniques from different disciplines, thus creating a complete guide
