Social Media in Industrial China Xinyuan Wang, 2016-09-13

Life outside the mobile phone is unbearable.’ Lily, 19, factory worker. Described as the biggest migration in human history, an estimated 250 million Chinese people have left their villages in recent decades to live and work in urban areas. Xinyuan Wang spent 15 months living among a community of these migrants in a small factory town in southeast China to track their use of social media. It was here she witnessed a second migration taking place: a movement from offline to online. As Wang argues, this is not simply a convenient analogy but represents the convergence of two phenomena as profound and consequential as each other, where the online world now provides a home for the migrant workers who feel otherwise ‘homeless’. Wang’s fascinating study explores the full range of preconceptions commonly held about Chinese people – their relationship with education, with family, with politics, with ‘home’ – and argues why, for this vast population, it is time to reassess what we think we know about contemporary China and the evolving role of social media.

In the Green Grace McLean, 2020-12-15 As a young girl, medieval saint, healer, visionary, exorcist, and composer Hildegard von Bingen was locked in a cloister's cell after demonstrating a preternatural sensitivity to the world around her. Sequestered with Hildegard is Jutta, a woman who has spent her life secluded in an effort to recover a whole self after deepest trauma. Under Jutta's

guidance, Hildegard attempts to reassemble her own fragmented self while her mentor proselytizes a rejection of brokenness. IN THE GREEN is a musical unlike any you've seen, an astonishingly sonically sophisticated saga of two exceptional women broken by the world and their journey of healing that changed history.

Silent Sky Lauren Gunderson, 2015-01-01 THE STORY: When Henrietta Leavitt begins work at the Harvard Observatory in the early 1900s, she isn't allowed to touch a telescope or express an original idea. Instead, she joins a group of women "computers," charting the stars for a renowned astronomer who calculates projects in "girl hours" and has no time for the women's probing theories. As Henrietta, in her free time, attempts to measure the light and distance of stars, she must also take measure of her life on Earth, trying to balance her dedication to science with family obligations and the possibility of love. The true story of 19th-century astronomer Henrietta Leavitt explores a woman's place in society during a time of immense scientific discoveries, when women's ideas were dismissed until men claimed credit for them. Social progress, like scientific progress, can be hard to see when one is trapped among earthly complications; Henrietta Leavitt and her female peers believe in both, and their dedication changed the

way we understand both the heavens and Earth.

A Decadal Survey of the Social and Behavioral Sciences

National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on a Decadal Survey of Social and Behavioral Sciences for Applications to National Security, 2019-07-26 The primary function of the intelligence analyst is to make sense of information about the world, but the way analysts do that work will look profoundly different a decade from now. Technological changes will bring both new advances in conducting analysis and new risks related to technologically based activities and communications around the world. Because these changes are virtually inevitable, the Intelligence Community will need to make sustained collaboration with researchers in the social and behavioral sciences (SBS) a key priority if it is to adapt to these changes in the most productive ways. A Decadal Survey Of The Social and Behavioral Sciences provides guidance for a 10-year research agenda. This report identifies key opportunities in SBS research for strengthening intelligence analysis and offers ideas for integrating the knowledge and perspectives of researchers from

these fields into the planning and design of efforts to support intelligence analysis.

Metroethnicity, Naming and Mocknolect John C.

Maher, 2021-05-15 Language is a social space, an aesthetic, a form of play and communication, a geographical reference, a jouissance, a producer of numerous social and personal identities. This book takes up salient issues of sociolinguistics with a specific focus on Japan: language and gender (the married name controversy), language and the 'portable' identities being fashioned around traditional, essentialist notions of ethnicity (metroethnicity) endangerment, slang, taboo and discriminatory language in Japanese especially regarding minorities, place-names from indigenous languages, the fellowship and parody of children's songs, and the diversity of nicknames among children and young people. This book gives radical and new perspectives on the sociolinguistics of Japanese.

Wikipedia @ 20 Joseph Reagle, Jackie Koerner, 2020-10-13

Wikipedia's first twenty years: how what began as an experiment in collaboration became the world's most popular reference work. We have been looking things up in Wikipedia for twenty years. What began almost by accident--a wiki attached to an nascent online encyclopedia--has become the world's most popular reference

work. Regarded at first as the scholarly equivalent of a Big Mac, Wikipedia is now known for its reliable sourcing and as a bastion of (mostly) reasoned interaction. How has Wikipedia, built on a model of radical collaboration, remained true to its original mission of free access to the sum of all human knowledge when other tech phenomena have devolved into advertising platforms? In this book, scholars, activists, and volunteers reflect on Wikipedia's first twenty years, revealing connections across disciplines and borders, languages and data, the professional and personal.

Humanism and Resilience in Residency Training Ana

Hategan, Karen Saperson, Sheila Harms, Heather Waters, 2020-06-24

This book aims to help identify pre-existing adaptive traits and positive perspectives in resident trainees, while challenging those that are less adaptive by building a formal curriculum for medical education that focuses on the humanistic aspects of medicine. Humanism in medicine is threatened by the false narrative that good physicians are superhumans who do not have their own needs. Written by experts in the field, this book is designed to be a concise, integrated guide to resilience during residency training. Through this guide, trainees learn (i) the usefulness of psychotherapeutic strategies for their own stress management and

well-being; (ii) techniques and strategies that are useful in the practice of medicine; and (iii) to consider lifestyle modifications to improve physical and psychological health and well-being, through identification of positive and negative lifestyle factors influencing physicians' response to stress. Since it is designed for busy trainees and physicians, this volume meticulously provides easy-to-use, evidence-based learning tools and therapeutic techniques, including case studies, skill-building exercises, self-test questionnaires, illustrations, useful practice-reminder tips, and other features. *Humanism and Resilience in Residency Training* is an excellent resource for all medical trainees and professionals who need to incorporate humanism and resilience in their practice, both for accreditation requirements and for personal well-being. This includes medical students and residents, psychiatrists, addiction medicine specialists, family physicians, medical education professionals, hospitalists, nurses, and all healthcare providers

And the Sun Stood Still Dava Sobel, 2016-03-01 Using her deep knowledge, her skills as a storyteller, and her imagination, Dava Sobel illuminates one of history's most significant and far-reaching meetings. In the spring of 1539, a young German mathematician--Georg Joachim Rheticus--journeyed hundreds of

miles to northern Poland to meet the legendary, elderly cleric and reluctant astronomer Nicolaus Copernicus. Some two decades earlier, Copernicus had floated the mind-boggling theory that the Sun, not the Earth, was stationary at the center of the universe, and he was rumored to have crafted a book that could prove it. Though exactly what happened between them can never be known, Rheticus shepherded Copernicus's great work into production and *De revolutionibus orbium coelestium* ultimately changed the course of human understanding. Dava Sobel imagines their dramatic encounter, and with wit and erudition gives them personality. Through clever and dramatic dialogue, she brings alive the months Rheticus and Copernicus spent together--the one a heretical Lutheran, the other a free-thinking Catholic--and in the process illuminates the historic tension between science and religion. An introduction by Dava Sobel will set the stage, putting the scenes in historical context, and an afterword will describe what happened after Copernicus's book was published detailing the impact it had on science and on civilization.

Yabar David Lipset, 2017-03-27 This book analyses the dual alienations of a coastal group rural men, the Murik of Papua New Guinea. David Lipset argues that Murik men engage in a

Bakhtinian dialogue: voicing their alienation from both their own, indigenous masculinity, as well as from the postcolonial modernity in which they find themselves adrift. Lipset analyses young men's elusive expressions of desire in courtship narratives, marijuana discourse, and mobile phone use—in which generational tensions play out together with their disaffection from the state. He also borrows from Lacanian psychoanalysis in discussing how men's dialogue of dual alienation appears in folk theater, in material substitutions—most notably, in the replacement of outrigger canoes by fiberglass boats—as well as in rising sea-levels, and the looming possibility of resettlement.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the

time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

The Voice of the Turtle John Van Druten, 1944 **THE STORY:** Although the plot is contrived with the artful ingenuity, which is to be expected in any van Druten play, the interest here centers largely upon a most attractive and charming young man and an equally attractive young woman who, by gradu
