**A Girl's Guide to Poker** Amanda Botfeld,2019-12-09 So you want to play poker. Maybe it's the challenge. Maybe it's the cash. Maybe you're turned on by guys in hoodies and sunglasses. Whatever the reason, if you're a girl - or guy! - who wants to learn poker, then this book is handier than your high school cheat sheet. Learn everything from insider poker lingo (bluff! checkraise! snapcall!) to fancy winning plays with the help of easy-to-read mini-chapters and quizzes. Most poker books read like a math textbook. This one reads like Cosmo. The only poker book that teaches card playing strategy and how to bluff your boyfriend, A Girl's Guide to Poker will make you the belle of the ball - or the cardshark of the casino. Amanda Botfeld isn't your average poker player - how many hold their cards with a red nail polish manicure? Not enough! Nicknamed the Bridget Jones of poker, she seeks to turn the tables for women everywhere, writing a sassy how-to guide so more women can join the game. A writer at heart, her work has previously been published in the Wall Street Journal, Los Angeles Times, and Huffington Post.

**Food, Energy, and Society, Third Edition** David Pimentel, Ph.D.,Marcia H. Pimentel, M.S.,2007-10-04 Since the publication of the first edition of Food, Energy, and Society, the world's natural resources have become even more diminished due to the rapid expansion of the global human population. We are faced with dwindling food supplies in certain geographic areas, increasing pressure on energy resources, and the imminent extinction of many threatened species. In light of these major issues, this third edition presents an updated and expanded analysis on the interdependency of food, energy, water, land, and biological resources. Written by internationally renowned experts, the book includes new material on livestock production and energy use, the impacts of pesticides on the environment, and the conservation of biodiversity in agricultural, forestry, and marine systems. It also compares the energy inputs of crop production in developing and developed countries, covers the agricultural and environmental issues related to water resources, and details the threat of soil erosion to food and the environment. In addition, the book explores the very timely topics of solar energy, biomass systems, and ethanol production. Offering a startling glimpse at what our planet may become, this edition shows how to achieve the necessary balance between basic human needs and environmental resources and provides potential solutions to the host of problems we face today.

**How to Read Like a Writer** Mike Bunn, When you Read Like a Writer (RLW) you work to identify some of the choices the author made so that you can better understand how such choices might arise in your own writing. The idea is to carefully examine the things you read, looking at the writerly techniques in the text in order to decide if you might want to adopt similar (or the same) techniques in your writing. You are reading to learn about writing. Instead of reading for content or to better understand the ideas in the writing (which you will automatically do to some degree anyway), you are trying to understand how the piece of writing was put together by the author and what you can learn about writing by reading a particular text. As you read in this way, you think about how the choices the author made and the techniques that he/she used are influencing your own responses as a reader. What is it about the way this text is written that makes you feel and respond the way you do?

*Buyology* Martin Lindstrom,2010-02-02 NEW YORK TIMES BESTSELLER • "A fascinating look at how consumers perceive logos, ads, commercials, brands, and products."—Time How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can "cool" brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? *Buyology* is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.
