Storied and Supernatural Places Ülo Valk, Daniel Sävborg, 2018-05-09 This book addresses the narrative construction of places, the relationship between tradition communities and their environments, the supernatural dimensions of cultural landscapes and wilderness as they are manifested in European folklore and in early literary sources, such as the Old Norse sagas. The first section "Explorations in Place-Lore" discusses cursed and sacred places, churches, graveyards, haunted houses, cemeteries, grave mounds, hill forts, and other tradition dominants in the micro-geography of the Nordic and Baltic countries, both retrospectively and from synchronous perspectives. The supernaturalisation of places appears as a socially embedded set of practices that involves storytelling and ritual behaviour. Articles show, how places accumulate meanings as they are layered by stories and how this shared knowledge about environments can actualise in personal experiences. Articles in the second section "Regional Variation, Environment and Spatial Dimensions" address ecotypes, milieu-morphological adaptation in Nordic and Baltic-Finnic folklores, and the active role of tradition bearers in shaping beliefs about nature as well as attitudes towards the environment. The meaning of places and spatial distance as the marker of otherness and sacrality in Old Norse sagas is also discussed here. The third section of the book "Traditions and Histories Reconsidered" addresses major developments within the European social histories and mentalities. It scrutinizes the history of folkloristics, its geopolitical dimensions and its connection with nation building, as well as looking at constructions of the concepts Baltic, Nordic and Celtic. It also sheds light on the social base of folklore and examines vernacular views toward legendry and the supernatural.

Naturopathic Physical Medicine Leon

Chaitow,2008-05-30 NATUROPATHIC PHYSICAL MEDICINE provides a philosophical naturopathic perspective, as well as practical clinical applications, for manual and physical approaches to health care. A wide range of bodywork and movement approaches and modalities are evaluated in relation to their ability to be appropriately used in naturopathic treatment and rehabilitation settings. The model of care emphasised in this text recognizes that naturopathically oriented therapeutic interventions usually focus on achieving one or all of the following: enhancement of function so that the person, system or part, can better self-regulate in response to adaptive demands; modification or removal of adaptive load factors; and symptomatic relief without creation of significant additional adaptive changes.

Mythic Discourses Frog, Anna-Leena Siikala, Eila

Stepanova, 2012-12-31 Mythic discourses in the present day show how vernacular heritage continues to function and be valuable through emergent interpretations and revaluations. At the same time, continuities in mythic images, motifs, myths and genres reveal the *longue durée* of mythologies and their transformations. The eighteen articles of *Mythic Discourses* address the many facets of myth in Uralic cultures, from the Finnish and Karelian world-creation to Nenets shamans, offering multidisciplinary perspectives from twenty eastern and western scholars. The mythologies of Uralic peoples differ so considerably that mythology is approached here in a broad sense, including myths proper, religious beliefs and associated rituals. Traditions are addressed individually, typologically, and in historical perspective. The range and breadth of the articles, presenting diverse living mythologies, their histories and relationships to traditions of other cultures such as Germanic and Slavic, all come together to offer a far richer and more developed perspective on Uralic traditions than any one article could do alone.

Folklore Matters Alan Dundes, 1989 '... not a large book, but that makes all the more admirable the way the more admirable the way the author succeeds in doing justice to so many of the most important subjects in folkloristics. This book is a key work, and should be made compulsory reading in every university in which folkloristics is studied.'-Jon Hnefill Aolasteinsson, *Asian Folklore Studies*

Loci Sacri Thomas Coomans, 2012 Sacred places are not static entities but reveal a historical dynamic. This volume explores both the cultural developments that have shaped them and their varied multidimensional levels of significance.

Vernacular Religion in Everyday Life Marion

Bowman,Ulo Valk,2014-10-14 Vernacular religion is religion as people experience, understand, and practice it. It shapes everyday culture and disrupts the traditional boundaries between 'official' and 'folk' religion. The book analyses vernacular religion in a range of Christian denominations as well as in indigenous and New Age religion from the nineteenth century to today. How these differing expressions of belief are shaped by their individual, communal and national contexts is also explored. What is revealed is the consistency of genres, the persistence of certain key issues, and how globalization in all its cultural and technological forms is shaping contemporary faith practice. The book will be valuable to students of ethnology, folklore, religious studies, and anthropology.

Legend-Tripping Online Michael Kinsella,2011-05-17 On the Internet, seekers investigate anonymous manifestos that focus on the findings of brilliant scientists said to have discovered pathways into alternate realities. Gathering on web forums, researchers not only share their observations, but also report having anomalous experiences, which they believe come from their online involvement with these veiled documents. Seeming logic combines with wild twists of lost Moorish science and pseudo-string theory. Enthusiasts insist any obstacle to revelation is a sure sign of great and wide-reaching efforts by consensus powers wishing to suppress all the liberating truths in the Incunabula Papers (included here in complete form). In Legend-Tripping Online, Michael Kinsella explores these and other extraordinary pursuits. This is the first book dedicated to legend-tripping, ritual quests in which people strive to explore and find manifest the very events described by supernatural legends. Through collective performances, legend-trippers harness the interpretive frameworks these

stories provide and often claim incredible, out-of-this-world experiences that in turn perpetuate supernatural legends. Legends and legend-tripping are assuming tremendous prominence in a world confronting new speeds of diversification, connection, and increasing cognitive load. As guardians of tradition as well as agents of change, legends and the ordeals they inspire contextualize ancient and emergent ideas, behaviors, and technologies that challenge familiar realities. This book analyzes supernatural legends and the ways in which the sharing spirit of the Internet collectivizes, codifies, and makes folklore of fantastic speculation.

Legend and Belief Linda Dégh, 2001-11-14 Industrial advancement has not changed the basic fragility of human life, and the commercialization and consumer orientation of the mass media has actually helped legends travel faster and farther. Legends are communicated not only orally, face to face, but also in the press, on radio and television, on countless Web sites, and by e-mail, perpetuating new waves of the culture of fear.--BOOK JACKET.

Haunting Experiences Diane Goldstein, Sylvia Grider, Jeannie Banks Thomas, 2007-09-15 Ghosts and other supernatural phenomena are widely represented throughout modern culture. They can be found in any number of entertainment, commercial, and other contexts, but popular media or commodified representations of ghosts can be quite different from the beliefs people hold about them, based on tradition or direct experience. Personal belief and cultural tradition on the one hand, and popular and commercial representation on the other, nevertheless continually feed each other. They frequently share space in how people think about the supernatural. In *Haunting Experiences*, three well-known folklorists seek to broaden the discussion of ghost lore by examining it from a

variety of angles in various modern contexts. Diane E. Goldstein, Sylvia Ann Grider, and Jeannie Banks Thomas take ghosts seriously, as they draw on contemporary scholarship that emphasizes both the basis of belief in experience (rather than mere fantasy) and the usefulness of ghost stories. They look closely at the narrative role of such lore in matters such as socialization and gender. And they unravel the complex mix of mass media, commodification, and popular culture that today puts old spirits into new contexts.

The European Folktale Max Lüthi, 1986-09-22 Niles' excellent translation should bring Lüthi's sensitive and articulate study the recognition it deserves among English readers. —Library Journal Lüthi demonstrates how the folktale, by its very distance from reality, can play upon the most important themes of human existence.

Legends and Landscape Terry Gunnell, 2008 Suitable for family historians, students and those interested in social history, this title offers an overview of the struggle for women to gain the vote in Great Britain and explores who the women were that formed and led or became members of the women's suffrage movement.

Genre - text - interpretation Kaarina Koski, Frog, Ulla Savolainen, 2016-01-01 This book presents current discussions on the concept of genre. It introduces innovative, multidisciplinary approaches to contemporary and historical genres, their roles in cultural discourse, how they change, and their relations to each other. The reader is guided into the discussion surrounding this key concept and its history through a general introduction, followed by eighteen chapters that represent a variety of discursive practices as well as analytic methods from several scholarly traditions. This volume will have wide appeal to several academic audiences within the humanities, both in Finland

and abroad, and will especially be of interest to scholars of folklore, language and cultural expression.

Theoretical Milestones Lauri O. Honko, 2013 Lauri Honko (1932-2002) was among the leading folklorists of his time. In particular, he developed theories and concepts relating to folk belief, genre and epic. The present collection represents a selection of Honko's key articles, which he considered worthy of republication himself. They relate to Honko's own research, to the debates and discussions he took part in; some are introductions to article collections produced by groups of researchers. Honko's writings combine a typically strong empiricism with clear theoretical thought. His own theoretical framework was above all one of functionalism, within which he united other currents within folkloristics, such as 'composition in performance', 'ecology of tradition' and 'textualisation'. He was occupied by the question of how the individual performer used folklore, be he a teller of proverbs or jokes, a singer of oral

poetry or a producer of written epic. Honko was at no stage a representative of the traditional 'Finnish school' of folklore research, and origins and developments were a research challenge to him particularly from the perspective of how folklore adapts in different ways to its setting and circumstances of performance by means of variation, and how regularity may be discerned within this.

Meeting the Other Crowd Eddie Lenihan, Carolyn Eve Green, 2004-02-02 The Other Crowd, The Good People, The Wee Folk, and Them are a few of the names given to the fairies by the people of Ireland. Honored for their gifts and feared for their wrath, the fairies remind us to respect the world we live in and the forces we cannot see. In these tales of fairy forts, fairy trees, ancient histories, and modern true-life encounters with The Other Crowd, Eddie Lenihan opens our eyes to this invisible world with the passion and bluntness of a seanchai, a true Irish storyteller.

Legendary Hawai'i and the Politics of Place Cristina Bacchilega, 2011-06-03 Hawaiian legends figure greatly in the image of tropical paradise that has come to represent Hawai'i in popular imagination. But what are we buying into when we read these stories as texts in English-language translations? Cristina Bacchilega poses this question in her examination of the way these stories have been adapted to produce a legendary Hawai'i primarily for non-Hawaiian readers or other audiences. With an understanding of tradition that foregrounds history and change, Bacchilega examines how, following the 1898 annexation of Hawai'i by the United States, the publication of Hawaiian legends in English delegitimized indigenous narratives and traditions and at the same time constructed them as representative of Hawaiian culture. Hawaiian mo'olelo were translated in popular and scholarly English-language publications to market a new cultural product: a space constructed

primarily for Euro-Americans as something simultaneously exotic and primitive and beautiful and welcoming. To analyze this representation of Hawaiian traditions, place, and genre, Bacchilega focuses on translation across languages, cultures, and media; on photography, as the technology that contributed to the visual formation of a westernized image of Hawai'i; and on tourism as determining postannexation economic and ideological machinery. In a book with interdisciplinary appeal, Bacchilega demonstrates both how the myth of legendary Hawai'i emerged and how this vision can be unmade and reimagined.

Primitive Beliefs in the Northeast of Scotland J. m. McPherson, 2013-10 This is a new release of the original 1929 edition.

The Location of Religion Kim Knott, 2015-08-12 The ways in which humans interact with their location is an important topic within sociological studies of religion. It is integral to the place of religion in secular society. 'The Location of Religion: A Spatial Analysis' offers an overview of the ways in which religion can be located within social, cultural and physical space. It examines contemporary spatial theory - notably the work of the influential sociologist Henri Lefebvre - and the many disciplines that have contributed to the spatial study of religion. This volume will be invaluable to all those interested in the role of religion in spatial analysis.
