**Stem Cells** Ariff Bongso, Eng Hin Lee, 2011 Stem cell biology has drawn tremendous interest in recent years as it promises cures for a variety of incurable diseases. This book deals with the basic and clinical aspects of stem cell research and involves work on the full spectrum of stem cells isolated today. It also covers the conversion of stem cell types into a variety of useful tissues which may be used in the future for transplantation therapy. It is thus aimed at undergraduates, postgraduates, scientists, embryologists, doctors, tissue engineers and anyone who wishes to gain some insight into stem cell biology. This book is important as it is comprehensive and covers all aspects of stem cell biology, from basic research to clinical applications. It will have 33 chapters written by renowned stem cell scientists worldwide. It will be up-to-date and all the chapters include self-explanatory figures, color photographs, graphics and tables. It will be easy to read and give the reader a complete understanding and state of the art of the exciting science and its applications.

*Abortion Worldwide* , 2009 This report assesses progress over the past decade regarding the legality, safety and accessibility of abortion services worldwide. It summarizes developments in policy and documents recent trends in abortion incidence, with a focus on unsafe abortion. It also examines the relationship between unintended pregnancy, contraception and abortion, placing abortion within the broader context of women's reproductive lives. - p. 4.

**For the Sake of Learning** Ann Blair, Anja-Silvia Goeing, 2016-06-27 In this tribute to Anthony Grafton, fifty-eight contributors present new research across the many areas in which Grafton has been active in the history of scholarship and learned culture.

*GGE Biplot Analysis* Weikai Yan, Manjit S. Kang, 2002-08-28 Research data is expensive and precious, yet it is seldom fully utilized due to our inability of comprehension. Graphical display is desirable, if not absolutely necessary, for fully understanding large data sets with complex interconnectedness and interactions. The newly developed GGE biplot methodology is a superior approach to the graphical analysis

**Electric Power Systems** João P. S. Catalão, 2017-12-19 Electric Power Systems: Advanced Forecasting Techniques and Optimal Generation Scheduling helps readers develop their skills in modeling, simulating, and optimizing electric power systems. Carefully balancing theory and practice, it presents novel, cutting-edge developments in forecasting and scheduling. The focus is on understanding and solving pivotal problems in the management of electric power generation systems. Methods for Coping with Uncertainty and Risk in Electric Power Generation Outlining real-world problems, the book begins with an overview of electric power generation systems. Since the ability to cope with uncertainty and risk is crucial for power generating companies, the second part of the book examines the latest methods and models for self-scheduling, load forecasting, short-term electricity price forecasting, and wind power forecasting. Toward Optimal Coordination between Hydro, Thermal, and Wind Power Using case studies, the third part of the book investigates how to achieve the most favorable use of available energy

sources. Chapters in this section discuss price-based scheduling for generating companies, optimal scheduling of a hydro producer, hydro-thermal coordination, unit commitment with wind generators, and optimal optimization of multigeneration systems. Written in a pedagogical style that will appeal to graduate students, the book also expands on research results that are useful for engineers and researchers. It presents the latest techniques in increasingly important areas of power system operations and planning.

**Escape from Freedom** Erich Fromm, 2013-03-26 Why do people choose authoritarianism over freedom? The classic study of the psychological appeal of fascism by a New York Times–bestselling author. The pursuit of freedom has indelibly marked Western culture since Renaissance humanism and Protestantism began the fight for individualism and self-determination. This freedom, however, can make people feel unmoored, and is often accompanied by feelings of isolation, fear, and the loss of self, all leading to a desire for authoritarianism, conformity, or destructiveness. It is not only the question of freedom that makes Fromm's debut book a timeless classic. In this examination of the roots of Nazism and fascism in Europe, Fromm also explains how economic and social constraints can also lead to authoritarianism. By the author of *The Sane Society* and *The Anatomy of Human Destructiveness*, this is a fascinating examination of the anxiety that underlies our darkest impulses, an enlightening volume perfect for readers of Eric Hoffer or Hannah Arendt. This ebook features an illustrated biography of Erich Fromm including rare images and never-before-seen documents from the author's estate.

Ray Brown's Bass Method Ray Brown, 1999 (Bass Instruction). Legendary jazz bassist Ray Brown reveals his lessons and teaching philosophy in this in-depth book. Includes: solo exercises and arpeggios; music fundamentals; right- and left-hand positions; scales; chords; exercises in tenths; rhythm patterns with drops; diminished chords; runs and variations; blues patterns; extension scales; and much more.

Plant Cuticles G. Kerstiens, 1996-10 The cuticle, together with its associated waxes, acts as a diffusion barrier against the uncontrolled loss of water and solutes from leaves. It forms a mechanical barrier against penetration by fungi and pests and communicates with them via chemical signals.

*Yavneh* Raz Kletter, Irit Ziffer, Wolfgang Zwickel, 2010 In the words of late Professor Moshe Kochavi, the Philistine repository pit at Yavneh is the kind of discovery made only once every fifty years. It is the richest repository pit ever found from Bronze and Iron Ages Israel/Palestine, containing thousands of cultic finds originating from a temple, including an unprecedented number - more than a hundred - of cult stands (so-called 'architectural models') carrying rich figurative art, dozens of fire-pans, chalices and other objects. The present volume includes the full publication of the excavation, the stratigraphy, the cult stands and the figures detached from cult stands, several clay and stone altars and some pottery vessels related to burning of plant material, most likely incense. This exceptional book raises a host of highly important and intriguing questions. Is this a favissa, or even a genizah? Why are many cult stands badly broken, while some are intact - were cult stands broken on purpose? What is the explanation for the unique stratigraphy and for the layer of gray ash in the pit - was fire kindled inside as part of a ritual? How do we know that these finds are Philistine? Are they part of the

'furniture' of the temple or objects dedicated by worshippers as votives? Do the figures on the cult stands represent mortal beings, or divinities? If divinities, can we relate them with Biblical or extra-biblical data on the gods of the Philistines? What was the function/s of cult stands? Were they models of buildings, supports for images, offering tables, altars, or perhaps incense burners? Why are female figures dominant, while male figures are virtually absent? In discussing such topics, Yavneh I treats issues that are central to many fields of study: religion and cult in Iron Age Israel/Palestine; the history and archaeology of the Philistines and their 'western' relations; Near Eastern iconography, the meaning of cult stands/architectural models and the understanding of votive objects and of repository pits in general. Literally salvaged from the teeth of a bulldozer, these rare finds are now published. Generations of scholars will discuss and reinterpret them - there is no 'final word' for such finds and hence, this final excavation volume is not an end, but a beginning.

**Genotype by Environment Interaction** Manjit S. Kang, Hugh G. Gauch, 1996-02-06 Genotype-by-Environment Interaction (GEI) is a prevalent issue among crop farmers, plant breeders, geneticists, and production agronomists. This book brings together contributions from expert plant breeders and quantitative geneticists to better understand the relationship between crop performance and environment. This information can reduce the cost of extensive genotype evaluation by eliminating unnecessary testing sites and by fine-tuning breeding programs. Molecular aspects of GEI are discussed for the first time and key bibliographical references on GEI are included in an appendix.

**Fractures of the Foot and Ankle** George Gumann, 2004 This book is a definitive reference on foot and ankle fractures, covering all of the common fractures, as well as variations, detailing the mechanisms of injury, physical findings, and treatment options. Controversies in treatment and inappropriate treatment are also included.

**OECD Health Policy Studies A Good Life in Old Age? Monitoring and Improving Quality in Long-term Care**

OECD, European Union, 2013-06-17 This book offers evidence and examples of useful experiences to help policy makers, providers and experts measure and improve the quality of long-term care services.

*The Dry Forests and Woodlands of Africa* Emmanuel N. Chidumayo, Davison J. Gumbo, 2010-09-23 The dry forests and woodlands of Sub-Saharan Africa are major ecosystems, with a broad range of strong economic and cultural incentives for keeping them intact. However, few people are aware of their importance, compared to tropical rainforests, despite them being home to more than half of the continent's population. This unique book brings together scientific knowledge on this topic from East, West, and Southern Africa and describes the relationships between forests, woodlands, people and their livelihoods. Dry forest is defined as vegetation dominated by woody plants, primarily trees, the canopy of which covers more than 10 per cent of the ground surface, occurring in climates with a dry season of three months or more. This broad definition - wider than those used by many authors - incorporates vegetation types commonly termed woodland, shrubland, thicket, savanna, wooded grassland, as well

as dry forest in its strict sense. The book provides a comparative analysis of management experiences from the different geographic regions, emphasizing the need to balance the utilization of dry forests and woodland products between current and future human needs. Further, the book explores the techniques and strategies that can be deployed to improve the management of African dry forests and woodlands for the benefit of all, but more importantly, the communities that live off these vegetation formations. Thus, the book lays a foundation for improving the management of dry forests and woodlands for the wide range of products and services they provide.

*Mystic Regimes* Matthijs Bos, van den, 2021-11-08 *Mystic Regimes* is a social-scientific and Iranological study of two Iranian, Shi'ite Sufi orders in the twentieth century. It studies their comparative social development in relation to political regimes and explores the cultural repertoires that Sufis have used to cope with these. The introductory part examines the interpretation and the development, until the end of the Qajar era, of Iranian Sufism. The second part explores Sufism in the Pahlavi era. The third part deals with the Sufi orders in the Islamic Republic. The fourth part provides afterthoughts on the relations between Sufi cultural repertoires and civil society. Because of its unique archival and field material, *Mystic Regimes* is especially important for scholars in Iranian and Sufi studies.

**Zinn & the Art of Road Bike Maintenance** Lennard Zinn, 2009 From shifters to derailleurs, pedals to handlebars, this book covers every component of a road bike, lists the tools bike owners need to tackle simple and advanced projects, and demonstrates with 295 detailed illustrations how to work on each part.

*Transactions on Large-Scale Data- and Knowledge-Centered Systems XX* Abdelkader Hameurlain, Josef Küng, Roland Wagner, Sherif Sakr, Lizhe Wang, Albert Zomaya, 2015-03-31 The LNCS journal *Transactions on Large-Scale Data- and Knowledge-Centered Systems* focuses on data management, knowledge discovery, and knowledge processing, which are core and hot topics in computer science. Since the 1990s, the Internet has become the main driving force behind application development in all domains. An increase in the demand for resource sharing across different sites connected through networks has led to an evolution of data- and knowledge-management systems from centralized systems to decentralized systems enabling large-scale distributed applications providing high scalability. Current decentralized systems still focus on data and knowledge as their main resource. Feasibility of these systems relies basically on P2P (peer-to-peer) techniques and the support of agent systems with scaling and decentralized control. Synergy between grids, P2P systems, and agent technologies is the key to data- and knowledge-centered systems in large-scale environments. This, the 20th issue of *Transactions on Large-Scale Data- and Knowledge-Centered Systems*, presents a representative and useful selection of articles covering a wide range of important topics in the domain of advanced techniques for big data management. Big data has become a popular term, used to describe the exponential growth and availability of data. The recent radical expansion and integration of computation, networking, digital devices, and data storage has provided a robust platform for the explosion in big data, as well as being the means by which big data are generated, processed, shared, and analyzed. In general, data are only useful if meaning and value can be extracted from them. Big data discovery enables data scientists

and other analysts to uncover patterns and correlations through analysis of large volumes of data of diverse types. Insights gleaned from big data discovery can provide businesses with significant competitive advantages, leading to more successful marketing campaigns, decreased customer churn, and reduced loss from fraud. In practice, the growing demand for large-scale data processing and data analysis applications has spurred the development of novel solutions from both industry and academia.
