Imagining Religious Communities Jennifer B. Saunders,2019 Imagining Religious Communities tells the story of the Gupta family through the personal and religious narratives they tell as they create and maintain their extended family and community across national borders. Based on ethnographic research, the book demonstrates the ways that transnational communities are involved in shaping their experiences through narrative performances. Jennifer B. Saunders demonstrates that narrative performances shape participants' social realities in multiple ways: they define identities, they create connections between community members living on opposite sides of national borders, and they help create new homes amidst increasing mobility. The narratives are religious and include epic narratives such as excerpts from the Ramayana as well as personal narratives with dharmic implications. Saunders' analysis combines scholarly understandings of the ways in which performances shape the contexts in which they are told, indigenous comprehension of the power that reciting certain narratives can have on those who hear them, and the theory that social imaginaries define new social realities through expressing the aspirations of communities. Imagining Religious Communities argues that this Hindu community's religious narrative performances significantly contribute to shaping their transnational lives.

Identifying Citizens David Lyon,2009-06-29 New ID card systems are proliferating around the world. These may use digitized fingerprints or photos using a scanner & may rely on computerized registries of personal information. In this book, David Lyon argues that such IDs represent a fresh phase in the long-term attempts of modern states to find stable ways of identifying citizens.

Library Technology and User Services Anthony S. Chow,Tim Bucknall,2011-11-09 Written as a technology guide for students, practitioners, and administrators, the focus of this book is on introducing current and future trends in library technology and automation within the larger context of strategic and systems planning, implementation, and continuous improvement. Technology is an essential resource for attaining both organizational and patron goals, and planning needs to emphasize the alignment between the clearly defined goals of each. For this alignment to occur on a consistent basis goals must be designed, or engineered, in a systematic fashion where technology fulfils the need to deliver the desired outcomes in an efficient, cost-effective manner. The concept of usability engineering is also examined, where the technology is planned, designed, and implemented in such a way as to maximize utility and ease-of-use for users and employees. Readers of this book will understand both the why and the how of library technology, planning, and implementation articulated in a simple, easy-to-understand fashion. Delivered from academic, public, and school library media perspectives Current and emerging technologies are discussed along with their current and future application in the field of library and information science Technology planning and integration is explained using a systems design process with scenarios and case studies that are articulated in a step-wise, holistic fashion

(En)Gendering the War on Terror Kim Rygiel,2016-03-03 The war on terror has been raging for many years now, and subsequently there is a growing body of literature examining the development, motivation and effects of this US-led aggression. Virtually absent from these accounts is an examination of the central role that gender, race, class and sexuality play in the war on terror. This lack of attention reflects a continued resistance by analysts to acknowledge and engage identity-related social issues as central elements within global politics. As this conflict spreads and deepens, it is more important than ever to examine how diverse international actors are using the war on terror as an opportunity to reinforce existing gendered, raced, classed and sexualized inter/national relations. This book examines the official war stories being told to the international community about why and against whom the war on terror is being waged. The book will benefit students, scholars and practitioners in the areas of international relations, women's studies and cultural studies.

Feminist, Queer, Crip Alison Kafer,2013-05-16 In *Feminist, Queer, Crip* Alison Kafer imagines a different future for disability and disabled bodies. Challenging the ways in which ideas about the future and time have been deployed in the service of compulsory able-

bodiedness and able-mindedness, Kafer rejects the idea of disability as a pre-determined limit. She juxtaposes theories, movements, and identities such as environmental justice, reproductive justice, cyborg theory, transgender politics, and disability that are typically discussed in isolation and envisions new possibilities for crip futures and feminist/queer/crip alliances. This bold book goes against the grain of normalization and promotes a political framework for a more just world.

Demography at the Edge Rasmus Ole Rasmussen, Prescott Ensign, Lee Huskey, 2016-05-23 Addressing the methodological and topical challenges facing demographers working in remote regions, this book compares and contrasts the research, methods and models, and policy applications from peripheral regions in developed nations. With the emphasis on human populations as dynamic, adaptive, evolving systems, it explores how populations respond in different ways to changing environmental, cultural and economic conditions and how effectively they manage these change processes. Theoretical understandings and policy issues arising from demographic modelling are tackled including: competition for skilled workers; urbanisation and ruralisation; population ageing; the impacts of climate change; the life outcomes of Indigenous peoples; globalisation and international migration. Based on a strong theoretical framework around issues of heterogeneity, generational change, temporariness and the relative strength of internal and external ties, *Demography at the Edge* provides a common set of approaches and issues that benefit both researchers and practitioners.

Death by a Thousand Cuts Michael J. Graetz, Ian Shapiro, 2011-01-11 This fast-paced book by Yale professors Michael Graetz and Ian Shapiro unravels the following mystery: How is it that the estate tax, which has been on the books continuously since 1916 and is paid by only the wealthiest two percent of Americans, was repealed in 2001 with broad bipartisan support? The mystery is all the more striking because the repeal was not done in the dead of night, like a congressional pay raise. It came at the end of a multiyear populist campaign launched by a few individuals, and was heralded by its supporters as a signal achievement for Americans who are committed to the work ethic and the American Dream. Graetz and Shapiro conducted wide-ranging interviews with the relevant players: members of congress, senators, staffers from the key committees and the Bush White House, civil servants, think tank and interest group representatives, and many others. The result is a unique portrait of American politics as viewed through the lens of the death tax repeal saga. Graetz and Shapiro brilliantly illuminate the repeal campaign's many fascinating and unexpected turns--particularly the odd end result whereby the repeal is slated to self-destruct a decade after its passage. They show that the stakes in this fight are exceedingly high; the very survival of the long standing American consensus on progressive taxation is being threatened. Graetz and Shapiro's rich narrative reads more like a political drama than a conventional work of scholarship. Yet every page is suffused by their intimate knowledge of the history of the tax code, the transformation of American conservatism over the past three decades, and the wider political implications of battles over tax policy.

Auto-ethnography in Public Policy Advocacy Louise Sinden-Carroll, 2018-07-28 This book explores how public policy advocacy can be used to approach policy issue identification, resolution or, at the least, support the management of wicked policy issues. By describing how this type of advocacy draws on participatory action research, including ethnographic and auto-ethnographic models, this book offers a tool for public policy consumer advocates on how to apply the Human Capabilities Approach to address presenting public policy issues worldwide. By applying these models to the situation of prisoners with hearing loss in New Zealand's prisons, it identifies multiple causal factors for quality-of-life-limiting marginalization, e.g. social barriers (e.g. disability discrimination); environmental limitations (e.g. geographical and those introduced by incarceration); and individual responses in line with negative attitudes - both social and political, including the State's denial of prisoners' right to democratic participation by revoking their right to vote in general elections after sentencing. In addition, two other areas, namely blood safety and broadcast media captioning, are highlighted, showing that the skill of auto-ethnography is transferrable and can be applied to ensure effective consumer advocacy for a diverse range of issues that affect marginalized sectors.

Plastic Money Alya Guseva, Akos Rona-Tas, 2014-02-26 In the United States, we now take our ability to pay with plastic for granted. In other parts of the world, however, the establishment of a credit-card economy has not been easy. In countries without a history of economic stability, how can banks decide who should be given a credit card? How do markets convince people to use cards, make their transactions visible to authorities, assume the potential risk of fraud, and pay to use their own money? Why should merchants agree to pay extra if customers use cards instead of cash? In *Plastic Money*, Akos Rona-Tas and Alya Guseva tell the story of how banks overcame these and other quandaries as they constructed markets for credit cards in eight postcommunist countries. We know how markets work once they are built, but this book develops a unique framework for understanding how markets are engineered from the ground up—by selecting key players, ensuring cooperation, and providing conditions for the valuation of a product. Drawing on extensive interviews and fieldwork, the authors chronicle how banks overcame these hurdles and generated a desire for their new product in the midst of a transition from communism to capitalism.

One Nation Under Goods James J. Farrell, 2014-07-15 Loved and hated, visited and avoided, seemingly everywhere yet endlessly the same, malls occupy a special place in American life. What, then, is this invention that evokes such strong and contradictory emotions in Americans? In many ways malls represent the apotheosis of American consumerism, and this synthetic and wide-ranging investigation is an eye-popping tour of American culture's values and beliefs. Like your favorite mall, *One Nation Under Goods* is a browser's paradise, and in order to understand America's culture of consumption you need to make a trip to the mall with Farrell. This lively, fast-paced history of the hidden secrets of the shopping mall explains how retail designers make shopping and goods "irresistible." Architects, chain stores, and mall owners relax and beguile us into shopping through water fountains, ficus trees, mirrors, and covert security cameras. From food courts and fountains to Santa and security, Farrell explains how malls control their patrons and convince us that shopping is always an enjoyable activity. And most importantly, *One Nation Under Goods* shows why the mall's ultimate promise of happiness through consumption is largely an illusion. It's all here—for one low price, of course.
