Tango Uniform Tom Wilson, 1994 As the enemy masses for its greatest assault of the Vietnam War--the Tet Offensive--the American high command receives a daring new plan that could result in a quick and decisive victory. Original.

Termite Hill Tom Wilson, 2002 In 1966, the tide of the air war above North Vietnam is turning against the United States. F-105 Thunderchiefs, and the elite fighter pilots who fly them, are being slaughtered. To destroy the greatest array of sophisticated anti-aircraft weapons ever assembled, the Pentagon creates the Wild Weasel. The mission of Lt. Colonel Mack MacLendon's 357th Tactical Fighter Squadron is to fly these technological demons straight into the teeth of North Vietnam's deadly air defenses and destroy the SAMs and Soviet MiGs that have killed their friends, and now seek their death.

Batcats Jack Sikora, 2003-11-10 Written by men who flew the missions and gathered together the recollections of their comrades, this is an account of the political, social, cultural, technical and combat context of an extraordinary side of the Vietnam conflict. An account touching on topics ranging from Thai supernaturalism to high tech warfare, it is also the very human story of American airmen obliged to keep heady secrets and perform demanding tasks under menacing conditions. A good read for aviation enthusiasts, students of the Vietnam War, veterans and those wishing to learn more about Southeast Asia, this book is more than a history. It is a holistic portrait of a little known and less understood aspect of the Vietnam era.

Knowing the Salween River: Resource Politics of a Contested Transboundary River Carl Middleton, Vanessa Lamb, 2019-08-12 This open access book focuses on the Salween River, shared by China, Myanmar, and Thailand, that is increasingly at the heart of pressing regional development debates. The basin supports the livelihoods of over 10 million people, and within it there is great socio-economic, cultural and political diversity. The basin is witnessing intensifying dynamics of resource extraction, alongside large dam construction, conservation and development intervention, that is unfolding within a complex terrain of local, national and transnational governance. With a focus on the contested politics of water and associated resources in the Salween basin, this book offers a collection of empirical case studies that highlights local knowledge and perspectives. Given the paucity of grounded social science studies in this contested basin, this book provides conceptual insights at the intersection of resource governance, development, and politics of knowledge relevant to researchers, policy-makers and practitioners at a time when rapid change is underway. - Fills a significant knowledge gap on a major river in Southeast Asia, with empirical and conceptual contributions - Inter-disciplinary perspective and by a range of writers, including academics, policy-makers and civil society researchers, the majority from within Southeast Asia - New policy insights on a river at the cross-roads of a major political and development transition

WorldMinds Donald G. Janelle, Barney Warf, Kathy Hansen, 2004-03-31 WorldMinds

provides broad exposure to a geography that is engaged with discovery, interpretation, and problem solving. Its 100 succinct chapters demonstrate the theories, methods, and data used by geographers, and address the challenges posed by issues such as globalization, regional and ethnic conflict, environmental hazards, terrorism, poverty, and sustainable development. Through its theoretical and practical applications, we are reminded that the study of Geography informs policy making.

Poverty Strategies in Asia John Weiss, Haider Khan, 2006-01-01 . . . the volume makes interesting reading. . . The language of the text is indeed lucid and the organization of the materials could not have been better. Arup Mitra, *The Developing Economies* This is an important book making a convincing case that structural elements are of crucial importance in filtering the impact of growth on poverty. A successful development strategy needs to address these structural elements at the country level and modify them in order to take greater advantage of the potential benefits of globalization in reducing poverty. Erik Thorbecke, Cornell University, US This volume makes an important contribution to our understanding of the complex relationship between economic growth and poverty reduction. The focus on assessing the impact of specific poverty-reduction interventions at the disaggregated, case-study level marks an important and welcome departure from the standard approach to research in this area . . . researchers and practitioners working in the field of poverty reduction and development in Asia and beyond will

find much to interest them in this stimulating and informative volume. Colin Kirkpatrick, University of Manchester, UK Poverty Strategies in Asia is an examination of a wide range of measures aimed at reducing poverty in the region. It is widely recognized that while high and sustained economic growth is critical for poverty reduction, there are other policy interventions that may also be significant in a growth plus approach to poverty reduction. This volume brings together a series of case studies on the poverty impact of alternative interventions in a broad range of Asian economies. The measures examined within the book cover trade liberalization both in general and in a specific market, infrastructure investment (particularly in roads), population policies, cash transfers, microfinance, employment guarantee programs and contract farming. The countries covered include the Philippines, Lao PDR, Pakistan, India and Thailand. While the results illustrated by the contributors are mixed, they demonstrate the potential for further progress in poverty reduction. This latest joint publication by the ADBI and Edward Elgar Publishing will be warmly welcomed by scholars and researchers of Asian studies and development. Professional economists within international and bilateral development agencies and policymakers will also find much to engage them.

Architects of Buddhist Leisure Justin Thomas McDaniel, 2017-04-01 Buddhism, often described as an austere religion that condemns desire, promotes denial, and idealizes the contemplative life, actually has a thriving leisure culture

in Asia. Creative religious improvisations designed by Buddhists have been produced both within and outside of monasteries across the region—in Nepal, Japan, Korea, Macau, Hong Kong, Singapore, Laos, Thailand, and Vietnam. Justin McDaniel looks at the growth of Asia's culture of Buddhist leisure—what he calls “socially disengaged Buddhism”—through a study of architects responsible for monuments, museums, amusement parks, and other sites. In conversation with noted theorists of material and visual culture and anthropologists of art, McDaniel argues that such sites highlight the importance of public, leisure, and spectacle culture from a Buddhist perspective and illustrate how “secular” and “religious,” “public” and “private,” are in many ways false binaries. Moreover, places like Lek Wiriyaphan's Sanctuary of Truth in Thailand, Suối Tiên Amusement Park in Saigon, and Shi Fa Zhao's multilevel museum/ritual space/tea house in Singapore reflect a growing Buddhist ecumenism built through repetitive affective encounters instead of didactic sermons and sectarian developments. They present different Buddhist traditions, images, and aesthetic expressions as united but not uniform, collected but not concise: Together they form a gathering, not a movement. Despite the ingenuity of lay and ordained visionaries like Wiriyaphan and Zhao and their colleagues Kenzo Tange, Chan-soo Park, Tadao Ando, and others discussed in this book, creators of Buddhist leisure sites often face problems along the way. Parks and museums are complex adaptive systems that are changed and influenced by budgets,

available materials, local and global economic conditions, and visitors. Architects must often compromise and settle at local optima, and no matter what they intend, their buildings will develop lives of their own. Provocative and theoretically innovative, *Architects of Buddhist Leisure* asks readers to question the very category of “religious” architecture. It challenges current methodological approaches in religious studies and speaks to a broad audience interested in modern art, architecture, religion, anthropology, and material culture. Genre Analysis of Online Encyclopedias Anna Tereszkievicz, 2013-05 The book is the first complete discussion of the genre of online encyclopedias. The first part of the book, preceded by a theoretical introduction into the concept of webgenres, gives a detailed overview of the types of encyclopedic websites, presenting the characteristics of their content, form and functionality. The second part of the publication concerns Wikipedia--the

most popular online encyclopedia. The presentation of the structure of the portal is followed by an in-depth discussion of Wikipedia discourse features, describing the most conspicuous properties of the stylistic layer of this encyclopedia. The value of the book is additionally enhanced by many illustrations reproducing the analyzed websites.

White Gold: The Commercialisation of Rice Farming in the Lower Mekong Basin
Rob Cramb, 2020-01-03 This open access book is about understanding the processes involved in the transformation of smallholder rice farming in the Lower Mekong Basin from a low-yielding subsistence activity to one producing the surpluses needed for national self-sufficiency and a high-value export industry. For centuries, farmers in the Basin have regarded rice as “white gold”, reflecting its centrality to their food security and well-being. In the past four decades, rice has also become a commercial crop of great importance to Mekong farmers, augmenting but not replacing its role in securing their subsistence. This book is based on collaborative research to

(a) compare the current situation and trajectories of rice farmers within and between different regions of the Lower Mekong, (b) explore the value chains linking rice farmers with new technologies and input and output markets within and across national borders, and (c) understand the changing role of government policies in facilitating the on-going evolution of commercial rice farming. An introductory section places the research in geographical and historical context. Four major sections deal in turn with studies of rice farming, value chains, and policies in Northeast Thailand, Central Laos, Southeastern Cambodia, and the Mekong Delta. The final section examines the implications for rice policy in the region as a whole.

New Dimensions of Connectivity in the Asia-Pacific Christopher

Findlay, Somkiat Tangkitvanich, 2021-11-10 There is no bigger policy agenda in the East Asian region than connectivity. Costs of international connectivity are indeed falling, in the movement of goods, services, people and data, leading to greater flows, and to the reorganisation of business and the emergence of new forms of international transactions. There are second-round effects on productivity and growth, and on equity and inclusiveness. Participating in trade across borders involves significant set-up costs and, if these costs are lowered due to falling full costs of connectivity, more firms will participate, which is a driver of productivity growth and innovation at the firm level. Connectivity investments are linked to poverty reduction, since they reduce the costs of participating in markets. This

volume includes chapters on the consequences of changes in both physical and digital connectivity for trade, for the location of economic activity, for forms of doing business, the growth of e-commerce in particular, and for the delivery of new services, especially in the financial sector. A study of China's Belt and Road Initiative (BRI) is also included. These studies are preceded by an assessment of the connectivity performance in the Asia-Pacific region and followed by a discussion of impediments to investment in projects that contribute to productivity. The collection as a whole provides the basis for a series of recommendations for regional cooperation. The Pacific Trade and Development (PAFTAD) conference series has been at the forefront of analysing challenges facing the economies of East Asia and the Pacific since its first meeting in Tokyo in January 1968.

Successful Scientific Writing Janice R. Matthews, Robert W.

Matthews, 2007-10-11 The detailed, practical, step-by-step advice in this user-friendly guide will help students and researchers to communicate their work more effectively through the written word. Covering all aspects of the writing process, this concise, accessible resource is critically acclaimed, well-structured, comprehensive, and entertaining. Self-help exercises and abundant examples from actual typescripts draw on the authors' extensive experience working both as researchers and with them. Whilst retaining the user-friendly and pragmatic style of earlier editions, this third edition has been updated and broadened to incorporate such timely topics as guidelines

for successful international publication, ethical and legal issues including plagiarism and falsified data, electronic publication, and text-based talks and poster presentations. With advice applicable to many writing contexts in the majority of scientific disciplines, this book is a powerful tool for improving individual skills and an eminently suitable text for classroom courses or seminars.

Doing Science, 2005 A module to help students to understand the key concepts of the scientific method. By experiencing the process of scientific inquiry, students come to recognize the role of science in society.

wd~50 Wylie Dufresne, Peter Meehan, 2017-10-17 The first cookbook from groundbreaking chef Wylie Dufresne—the story of wd~50, his pioneering restaurant on Manhattan’s Lower East Side, and the dishes that made it famous. When it opened in 2003, wd~50 was New York’s most innovative, cutting-edge restaurant. Mastermind Wylie Dufresne ushered in a new generation of experimental and free-spirited chefs with his wildly unique approach to cooking, influenced by science, art, and the humblest of classic foods like bagels and lox, and American cheese. A cookbook that doubles as a time capsule, wd~50 explores one of the most exciting decades in modern culinary history through the lens of an unforgettable restaurant—one that was so distinctive that upon its closing in 2014, New York Times critic Pete Wells was inspired to compare it to the notorious music venue CBGB, “with way nicer bathrooms.” With gorgeous photography, detailed recipes explaining Wylie’s

iconic creations, and stories from the last days of the restaurant, wd~50 is an essential piece of culinary memorabilia.

Building an Inclusive Development Community Karen Heinicke-Motsch, Susan Sygall, 2004 * An essential resource for all development agencies seeking to include people with disabilities* User-friendly tools and practical advice from experienced practitioners There are four hundred million people with disabilities living in developing countries today. All too often they live in poverty and isolation. If development is to truly address the needs of the poor and marginalized, the inclusion of people with disabilities is crucial. *Building an Inclusive Development Community* is a toolkit for development agencies and others concerned with the participation of people with disabilities at all levels and in all areas of the international development process. The manual is organized into issues and includes helpful worksheets, best practice examples, resources and much more.

Meat, milk and more: Policy innovations to shepherd inclusive and sustainable livestock systems in Africa Malabo Montpellier Panel, 2020-07-29 *Meat, Milk & More: Policy Innovations to Shepherd Inclusive and Sustainable*

Livestock Systems in Africa highlights options for sustainably promoting growth in the livestock sector, drawing from what four African countries—Ethiopia, Mali, South Africa, and Uganda—have done successfully in terms of institutional and policy innovation as well as programmatic interventions. By adapting these lessons to countries' specific contexts and scaling them up across the continent, African governments can meet their national and international commitments to agricultural growth and transformation.

Progress in Iron Research Chaim Hershko, Abraham M. Konijn, Philip Aisen, 2012-12-06 The 4th International Conference on Hemochromatosis and the 11th International Conference on Iron and Iron Proteins took place in Jerusalem on April 27 -30 and on May 2 -7 1993, respectively. The first, a clinical meeting, and the second, a forum designed primarily for basic scientists. Both meetings are held regularly on alternate years and represent probably the most important forum for the exchange of information in iron research. The present volume Progress in Iron Research is based on a selection of presentations delivered at these meetings. However, this volume represents much more than a publication of conference proceedings. It offers a comprehensive state-of-the-art review on most aspects of iron metabolism. We have tried to offer a balanced review of the most important recent developments in iron research including both basic research and clinical investigation. However, the scope of chapters was based, by definition, on

the actual participants at the meetings and some important fields in iron research such as plant physiology, microbial aspects of iron metabolism, and free radical research have not been dealt with. Many of the authors of the 40 chapters have been personally responsible for some of the most important developments in iron research ~~~rights into iron physiology and pathophysiology. The Editors wish to express their gratitude for the outstanding and timely cooperation of all contributors to this volume.
