An Introduction to HTML and JavaScript David R. Brooks,2007-06-30 Dual-use technological writing at its best. This book presents HTML and JavaScript in a way that uniquely meets the needs of students in both engineering and the sciences. The author shows how to create simple client-side applications for scientific and engineering calculations. Complete HTML/JavaScript examples with science/engineering applications are used throughout to guide the reader comprehensively through the subject. The book gives the reader a sufficient understanding of HTML and JavaScript to write their online applications. This book emphasises basic programming principles in a modern Web-oriented environment, making it suitable for an introductory programming course for non-computer science majors. It is also ideal for self-study.

The objective of these systems is to make this process more convenient and easier to achieve which has been met with varying levels of success. This Course Selection Portal will be operated by three users, the administrator, students and lecturers. This system will be developed using PHP, MySQL, jQuery, HTML, JavaScript, CSS and Bootstrap. The front-end is designed using PHP with excerpts of code written using jQuery, HTML, JavaScript, CSS and Bootstrap. The back-end is designed and managed through MySQL using a software called WAMP Server. This system software is more secured, user-friendly and less time-consuming.
