Supporting Training Strategies for Brigade Combat Teams Using Future Combat Systems (FCS) Technologies

Michael G. Shanley, 2007 This study seeks to help the Army identify options to improve its future (i.e., circa 2016) training strategies for Brigade Combat Teams (BCTs) equipped with Future Combat System (FCS) technologies. Key findings are that live training will need to remain at the core of training programs for FCS units, and that adaptation to changing operational requirements will be a primary training challenge. Overall, the findings indicate that planned training enhancements can provide important improvements across a wide spectrum; however, the overall training capability achieved will likely be less than that needed to meet future training requirements. Unit time, the potential for technological advancement, and training budgets were found to be key constraints. While the study stresses greater emphasis on training manpower support in battle command training as the Army's best chance for significant near-term improvement, it concludes that longer-term improvement will depend on how closely the Army monitors and manages its enhancement programs. The process of shaping and balancing future training enhancements, for example, would benefit from better information and improved evaluative capabilities. These changes would be further enhanced by developing better metrics for the quality, quantity, and adaptability of training, by continuing to improve spiral development processes to evolve training methods and means, and by improving the visibility of financial information across training categories.

The New York Times Almanac 2002 John Wright, 2006-05-23 The New York Times Almanac 2002 is the almanac of record. Drawing on the resources of the world's premier news organization, it provides readers with a wealth of data about the United States and the world in a readable and more easily accessible form than other fact finders. Unrivalled in scope and unsurpassed in comprehensiveness. The New York Times Almanac pays careful attention to significant issues, topics, and developments of the day and sets them in historical context. It gives the stories and the stories behind the stories. The New York Times Almanac is the first choice for students, journalists, and researchers—for anyone who needs timely, accurate information about the United States and other nations around the globe. The New York Times Almanac 2002 includes: The first results of the 2000 Census; Comprehensive coverage of all the states and every nation in the world; World Series results and the most comprehensive sports section of any almanac; Notable obituaries from the worlds of politics, entertainment, and science; More information about the Internet, the worldwide AIDS epidemic, and world population than any other almanac; The most complete coverage of environmental issues, the economy, and the workings of the federal government; All major Academy Award winners since 1928 and the names of all Nobel Laureates and why they won and much, much more.

A Methodology for Developing Army Acquisition Strategies for an Uncertain Future John E. Peters,2007 This monograph addresses the following two specific questions: What should a robust acquisition investment strategy look like-one designed to perform well against all anticipated threats? How should the Army acquisition community assess the appropriateness of its investment strategy over time? The study proposes adaptation of a RAND tool called Assumption-Based Planning to help Army personnel maintain proper alignment between strategic guidance and the Army acquisition program and budget. It uses this tool to create a model that recommends acquisition investments across a broad range of capabilities. The model works toward the goal of satisfying the complex and evolving requirements specified in the national security guidance. The model applies five main steps, by identifying (1) the assumptions that underlie Army acquisition policy; (2) load-bearing assumptions, i.e., important assumptions that underpin and shape Army acquisition plans; (3) signposts or indicators that an assumption is becoming vulnerable; (4) shaping actions that can be taken to keep assumptions viable, and (5) hedging actions that can be taken to prepare for unwelcome but unpreventable developments. For the acquisitions community, shaping and hedging actions both take the form of investments.

Integrating Program Management and Systems Engineering ,2017-02-02

Integrate critical roles to improve overall performance in complex engineering projects Integrating Program Management and Systems Engineering shows how organizations can become more effective, more efficient, and more responsive, and enjoy better performance outcomes. The discussion begins with an overview of key concepts, and details the challenges faced by System Engineering and Program Management practitioners every day. The practical framework that follows describes how the roles can be integrated successfully to streamline project workflow, with a catalog of tools for assessing and deploying best practices. Case studies detail how real-world companies have successfully implemented the framework to improve cost, schedule, and technical performance, and coverage of risk management throughout helps you ensure the success of your organization's own integration strategy. Available course outlines and PowerPoint slides bring this book directly into the academic or corporate classroom, and the discussion's practical emphasis provides a direct path to implementation. The integration of management and technical work paves the way for smoother projects and more positive outcomes. This book describes the integrated goal, and provides a clear framework for successful transition. Overcome challenges and improve cost, schedule, and technical performance Assess current capabilities and build to the level your organization needs Manage risk throughout all stages of integration and performance improvement Deploy best practices for teams and systems using the most effective tools Complex engineering systems are prone to budget slips, scheduling errors, and a variety of challenges that affect

the final outcome. These challenges are a sign of failure on the part of both management and technical, but can be overcome by integrating the roles into a cohesive unit focused on delivering a high-value product. Integrating Program Management with Systems Engineering provides a practical route to better performance for your organization as a whole.

Application of Lightweighting Technology to Military Aircraft, Vessels, and Vehicles National Research Council, Division on Engineering and Physical Sciences, National Materials and Manufacturing Board, Committee on Benchmarking the Technology and Application of Lightweighting, 2012-04-27 Lightweighting is a concept well known to structural designers and engineers in all applications areas, from laptops to bicycles to automobiles to buildings and airplanes. Reducing the weight of structures can provide many advantages, including increased energy efficiency, better design, improved usability, and better coupling with new, multifunctional features. While lightweighting is a challenge in commercial structures, the special demands of military vehicles for survivability, maneuverability and transportability significantly stress the already complex process. Application of Lightweighting Technology to Military Vehicles, Vessels, and Aircraft assesses the current state of lightweighting implementation in land, sea, and air vehicles and recommends ways to improve the use of lightweight materials and solutions. This book considers both lightweight materials and lightweight design; the availability of lightweight materials from domestic manufacturers; and the performance of lightweight materials and their manufacturing technologies. It also considers the trade space—that is, the effect that use of lightweight materials or technologies can have on the performance and function of all vehicle systems and components. This book also discusses manufacturing capabilities and affordable manufacturing technology to facilitate lightweighting. Application of Lightweighting Technology to Military Vehicles, Vessels, and Aircraft will be of interest to the military, manufacturers and designers of military equipment, and decision makers.

Complex Contracting Trevor L. Brown, Matthew Potoski, David M. Van Slyke, 2013-08-08 Complex Contracting draws on core social science concepts to

provide wide-ranging practical advice on how best to manage complex acquisitions. Using a strong analytical framework, the authors assess contract management practices, suggesting strategies for improvement and ways to avoid the pitfalls of managing contracts for large and sophisticated projects. An in-depth analysis of the US Coast Guard's Deepwater program is included to illustrate ways to respond to real-world contracting challenges. This high-profile and controversial case consisted of a projected 25-year, \$24 billion contract through which the US Coast Guard would buy a system of new boats, aircraft, communications, and control architecture to replace its aging fleet. The authors explore the reasons why this program, launched with such promise, turned out so poorly, and apply the lessons learned to similarly complex contracting scenarios. This engaging and accessible book has broad applicability and will appeal to policymakers, practitioners, scholars and students.

Educating the Consumer-citizen Joel Spring, 2003-05-14 In *Educating the Consumer-Citizen: A History of the Marriage of Schools, Advertising, and Media*, Joel Spring charts the rise of consumerism as the dominant American ideology of the 21st century. He documents and analyzes how, from the early 19th century through the present, the combined endeavors of schools, advertising, and media have led to the creation of a consumerist ideology and ensured its central place in American life and global culture. Spring first defines consumerist ideology and consumer-citizen and explores their 19th-century origins in schools, children's literature, the commercialization of American cities, advertising, newspapers, and the development of department stores. He then traces the rise of consumerist ideology in the 20th century by looking closely at: the impact of the home economics profession on the education of women as consumers and the development of an American cuisine based on packaged and processed foods; the influence of advertising images of sports heroes, cowboys, and the clean-shaven businessman in shaping male identity; the outcomes of the growth of the high school as a mass institution on the development of teenage consumer markets; the consequences of commercial radio and television joining with the schools to educate a consumer-oriented population so that, by the 1950s, consumerist images were tied to the Cold War and presented as the American way of life in both media and schools; the effects of the civil rights movement on integrating previously excluded groups into the consumer society; the changes the women's movement demanded in textbooks, school curricula, media, and advertising that led to a new image of women in the consumer market; and the ascent of fast food education. Spring carries the story into the 21st century by examining the evolving marriage of schools, advertising, and media and its ongoing role in educating the consumer-citizen and creating an integrated consumer market. This book will be of wide interest to scholars, professionals, and students across foundations of education, history and sociology of education, educational policy, mass communications, American history, and cultural studies. It is highly appropriate as a text for courses in these areas.
