Critical Thinking About Sex, Love, and Romance in the Mass Media Mary-Lou Galician, Debra L. Merskin, 2007-07-10 This distinctive volume explores how romantic coupleship is represented in books, magazines, popular music, movies, television, and the Internet within entertainment, advertising, and news/information. This reader offers diverse theoretical perspectives and methodological approaches on the representation of romantic relationships across the media spectrum. Filling a void in existing media scholarship, this collection explores the media's influence on perceptions and expectations in relationships, including the myths, stereotypes, and prescriptions manifested throughout the press. Featuring fresh voices, as well as the perspectives of seasoned veterans, contributions include quantitative and qualitative studies along with cultural/critical, feminist, and descriptive analyses. This anthology has been developed for use in courses on mass media and society, media studies, and media literacy. In addition to its use in coursework, it is highly relevant for scholars, researchers, and others interested in how the media influence the personal lives of individuals.

The Politics of Religion in South and Southeast Asia Ishtiaq Ahmed, 2011-05-04 The notion of a 'politics of religion' refers to the increasing role that religion plays in the politics of the contemporary world. This book presents comparative country case studies on the politics of religion in South and South Asia, including India, Pakistan and Indonesia. The politics of religion calls into question the relevance of modernist notions of secularism and democracy, with the emphasis instead on going back to indigenous roots in search of authentic ideologies and models of state and nation building. Within the context of the individual countries, chapters focus on the consequences that politics of religion has on inclusive nation-building, democracy and the rights of individuals, minorities and women. The book makes a contribution to both the theoretical and conceptual literature on the politics of religion as well as shed light on the implications and ramifications of the politics of religion on contemporary South Asian and South East Asian countries. It is of interest to students and scholars of South and South East Asian Studies, as well as Comparative Politics.

Style and Form in the Hollywood Slasher Film Wickham Clayton, 2015-10-12

Style and Form in the Hollywood Slasher Film fills a broad scholastic gap by analysing the elements of narrative and stylistic construction of films in the slasher subgenre of horror that have been produced and/or distributed in the Hollywood studio system from its initial boom in the late 1970s to the present.

Nursing Theory - E-Book Martha Raile Alligood, 2013-12-27 Nursing Theory: Utilization & Application, 5th Edition covers the development of nursing theory; the application of different nursing theories, models and philosophies; and the expansion of these practices with a look toward the future. This text provides the opportunity for students who have learned the background of nursing theory using the companion title, Nursing Theorists and Their Work, to apply what they have learned to actual nursing practice through various patient scenarios. Real-life case history examples included in application chapters promotes evidence-based practice and further demonstrates how a theory is used in practical situations. Consistent case history featuring the patient Debbie in every chapter and the nursing plan that follows help you apply philosophies, theories and models presented in the text. Critical thinking exercises provide a more application-based approach rather than just contemplation of theories presented. Chapters written by contributors who utilize the work offer a unique approach to using theory in practice. Nursing metaparadigm discussion illustrates the four center concepts with which the discipline is concerned to help you see the scope of concern for the profession. Logical organization presents content in three distinct parts. Glossary offers quick access to key terms throughout the text. NEW! Nursing Care sections demonstrate how theories apply to

certain situations and particular types of nurses. NEW! QSEN competencies throughout the book relate nursing theories to today's important focus on patient safety and quality improvement. NEW! Nursing theory timeline helps you place different nursing theories and theorists in history, illustrating the progression of the content. NEW! Fresh design helps you visually identify the text's relationship with its Nursing Theorists companion.

The Changed Valentines, and Other Plays for St. Valentine's Day Elizabeth F. Guptill, 2022-06-02 This work is a collection of three short dramas by Elizabeth F. Encountering the Transnational Meena Sharify-Funk, 2016-04-29 When Muslim women from diverse national and cultural contexts meet one another through transnational dialogue and networking, what happens to their sense of identity and social agency? Addressing this question, Meena Sharify-Funk encountered women activists and intellectuals in North America, the Middle East, South Asia and Southeast Asia - women whose lives and visions have become linked by 'the transnational' despite their differing circumstances

and intellectual backgrounds. The resultant work provides a rich and cliché-bursting account of women's reflections on a wide range of topics including: the status of women in Islam, the role of women as interpreters of religious norms, the relationship between secular and religious forms of self-identification, perceptions of Islamic-Western relations, experiences of marginalization, and opportunities for empowerment. Giving careful attention both to common threads in Muslim women's experiences and to the unique voices of remarkable women, this is a compelling account of conversations that are bringing new energy and dynamism into women's activism in a world of collapsing distances.

Religious Transnational Actors and Soft Power Jeffrey Haynes, 2016-03-23
Haynes looks at religious transnational actors in the context of international relations, with a focus on both security and order. With renewed scholarly interest in the involvement of religion in international relations, many observers and scholars have found this move unexpected because it challenges conventional wisdom about the nature and long-term historical impact of secularisation. The 'return' of religion to international relations necessarily involves deprivatisation. Recent challenges to international security and order emanate from various entities, notably 'extremists', people often said to be 'excluded' from the benefits of globalisation for reasons of culture, history and geography. This study looks at the dynamics of this new religious pluralism as it influences the global political landscape. Several specific transnational religious actors are examined in the chapters including: American Evangelical Protestants, Roman Catholics, the Organisation of the Islamic Conference, Sunni extremist groups (al Qaeda and Lashkar-e-Taiba), and Shia transnational networks. While

varying widely in what they seek to achieve, they also share an important characteristic: each seeks to use religious soft power to advance their interests. In sum, these religious transnational actors all wish to see the spread and development of certain values and norms, which impact on international security and order.

Measuring and Analyzing Informal Learning in the Digital Age Mejiuni, Olutoyin, 2015-04-30 In the twenty-first century, learning—and the definition of education—is changing. New digital, online, and social tools have the ability to transform the classroom and engage learners like never before. In the midst of this technological revolution, it is crucial for educators and administrators to be able to gauge the impact of digital tools on learners in a variety of settings. Measuring and Analyzing Informal Learning in the Digital Age addresses the need for educators, administrators, and professionals across industries to be more attentive to the learning process outside of a traditional classroom setting. As online learning, and MOOCs in particular, become more mainstream, tracking informal learning becomes difficult despite the necessity of feedback and measurement in non-formal learning environments. Investigating some of the primary technologies being used in educational settings and how a less structured and more open learning environment can effectively motivate students and non-traditional learners, this premier reference is a crucial source of information for educators, administrators, theorists, and other professionals in the field of education.
