New York (N.Y.). Department of Taxes and Assessments

**Revoked Allison Frankel,2020** [The report] finds that supervision -- probation and parole -- drives high numbers of people, disproportionately those who are Black and brown, right back to jail or prison, while in large part failing to help them get needed services and resources. In states examined in the report, people are often incarcerated for violating the rules of their supervision or for low-level crimes, and receive disproportionate punishment following proceedings that fail to adequately protect their fair trial rights.--Publisher website.

*Black and White* Timothy Thomas Fortune,1884 In discussing the political and industrial problems of the South, I base my conclusions upon a personal knowledge of the condition of classes in the South, as well as upon the ample data furnished by writers who have pursued, in their way, the question before me. That the colored people of the country will yet achieve an honorable status in the national industries of thought and activity, I believe, and try to make plain. In discussion of the land and labor problem I but pursue the theories advocated by more able and experienced men, in the attempt to show that the laboring classes of any country pay all the taxes, in the last analysis, and that they are systematically

victimized by legislators, corporations and syndicates.

**Mitochondria** Immo E. Scheffler, 2011-09-20 This volume inspires. It certainly will be much appreciated by cell biologists all over the world. Quarterly Review of Biology, March 2009 This book is the eagerly awaited second edition of the best-selling **Mitochondria**, a book widely acknowledged as the first modern, truly comprehensive authored work on the important, scientifically fundamental topic of the cellular organelles known as mitochondria. This new edition brings readers completely up to date on the many significant findings that have occurred in the eight years since the book was first published. As in that seminal first edition, the second edition tackles the biochemistry, genetics, and pathology of mitochondria in different organisms. The new edition provides thorough updates of all literature concerning this vital organelle, its functions, ongoing research surrounding it, and its importance vis-à-vis a broad range of issues in cellular and molecular biology. The book includes detailed descriptions of current and developing technologies around mitochondrial research and discovery, and highlights subjects that are growing, such as the use of proteomics. This book is an invaluable resource for all geneticists, biologists, and educators in life sciences. It is also of interest for advanced

students in genetics and molecular biology.

Integration of Medical and Dental Care and Patient Data

Valerie Powell, Franklin M. Din, Amit Acharya, Miguel Humberto

Torres-Urquidy, 2012-01-18 This book informs readers of the needs

and rationale for the integration of medical and dental care and

information with an international perspective as to how and where

medical and dental care separated into specific domains. It provide

high level guidance on issues involved with care and data

integration and how to achieve an integrated model of health care

supported by integrated HIT. A patient typically expects that a visit

to a dentist can usually be resolved immediately. This expectation

places a premium on instant, accurate, thorough, and current

information. The state-of-the-art of fully integrated (dental-medical)

electronic health record (EHR) is covered and this is contrasted

with the current state of dental-medical software. While dentists in

the US Veterans Health Administration (VHA), the US Indian

Health Service (IHS), or the US military, for example, have access

to fully integrated health records, most US clinicians still gather

information from separate sources via fax or phone calls. The

authors provide an in-depth discussion of the role of informatics

and information science in the articulation of medical and dental

practices and clinical data with the focus on applied clinical informatics to improve quality of care, practice efficiency, coordination and continuity of care, communication between physicians and dentists and to provide a more comprehensive care for the patients. Lastly, the book examines advances in medical and dental research and how these may affect dentistry in the future. Most new advances in healthcare research are information-intensive.

**Wildlife of Pennsylvania and the Northeast Charles**

Fergus, Amelia Hansen, 2000 Natural history narratives for more than 300 species of mammals, birds, reptiles, and amphibians found in Pennsylvania and throughout the northeastern United States-written in an engaging, straightforward style. An invaluable addition to any nature-lover's library. Each narrative offers a species description as well as up-to-date information on habitat, breeding behavior, feeding habits, biology, migration, and current population status, as well as the author's personal observations of the animal's life in the wild. Includes game and nongame mammals, birds of prey, songbirds, waterfowl, snakes, turtles, frogs, toads, and more.

***Reframing the Practice of Philosophy* George**

Yancy,2012-01-01 This daring and bold book is the first to create a textual space where African American and Latin American philosophers voice the complex range of their philosophical and meta-philosophical concerns, approaches, and visions. The voices within this book protest and theorize from their own standpoints, delineating the specific existential, philosophical, and professional problems they face as minority philosophical voices.

**Hoax: A History of Deception** Ian Tattersall, Peter

Néвраumont,2018-03-20 An entertaining collection of the most audacious and underhanded deceptions in the history of mankind, from sacred relics to financial schemes to fake art, music, and identities. World history is littered with tall tales and those who have fallen for them. Ian Tattersall, a curator emeritus at the American Museum of Natural History, has teamed up with Peter Néвраumont to tell this anti-history of the world, in which Michelangelo fakes a masterpiece; Arctic explorers seek an entrance into a hollow Earth; a Shakespeare tragedy is rediscovered; a financial scheme inspires Charles Ponzi; a spirit photographer snaps Abraham Lincoln's ghost; people can survive ingesting only air and sunshine; Edgar Allen Poe is the forefather of fake news; and the first human was not only British but played

cricket. Told chronologically, HOAX begins with the first documented announcement of the end of the world in 2800 BC and winds its way through controversial tales such as the Loch Ness Monster and the Shroud of Turin, past proven fakes such as the Thomas Jefferson's ancient wine and the Davenport Tablets built by a lost race, and explores bald-faced lies in the worlds of art, science, literature, journalism, and finance.

*Panel to the Screen* Drew Morton, 2016-11-28 Over the past forty years, American film has entered into a formal interaction with the comic book. Such comic book adaptations as Sin City, 300, and Scott Pilgrim vs. the World have adopted components of their source materials' visual style. The screen has been fractured into panels, the photographic has given way to the graphic, and the

steady rhythm of cinematic time has evolved into a far more malleable element. In other words, films have begun to look like comics. Yet, this interplay also occurs in the other direction. In order to retain cultural relevancy, comic books have begun to look like films. Frank Miller's original Sin City comics are indebted to film noir while Stephen King's The Dark Tower series could be a Sergio Leone spaghetti western translated onto paper. Film and comic books continuously lean on one another to reimagine their formal attributes and stylistic possibilities. In Panel to the Screen, Drew Morton examines this dialogue in its intersecting and rapidly changing cultural, technological, and industrial contexts. Early on, many questioned the prospect of a low art form suited for children translating into high art material capable of drawing colossal box office takes. Now the naysayers are as quiet as the queued crowds at Comic-Cons are massive. Morton provides a nuanced account of this phenomenon by using formal analysis of the texts in a real-world context of studio budgets, grosses, and audience reception.

*Better Off Without 'Em* Chuck Thompson, 2012-08-14 The author of Smile When You're Lying describes his controversial road trip investigation into the cultural divide of the United States during which he met with possum-hunting conservatives, trailer park lifers

and prayer warriors before concluding that both sides might benefit if former Confederacy states seceded.

Mothering by Degrees Jillian M. Duquaine-Watson, 2017-05-31

In *Mothering by Degrees*, Jillian Duquaine-Watson shows how single mothers pursuing college degrees must navigate a difficult course as they attempt to reconcile their identities as single moms, college students, and in many cases, employees. They also negotiate a balance between what they think a good mother should be, and what society is telling them, and how that affects their choices to go to college, and whether to stay in college or not. The first book length study to focus on the lives and experiences of single mothers who are college students, *Mothering by Degrees* points out how these women are influenced by dominant American ideologies of motherhood, and the institutional parameters of the schools they attend, and argues for increased attention to the specific ways in which the choices, challenges, and opportunities available to mothers are shaped within their specific environments, as well as the ways in which mothers help shape those environments...

Human Rights Education and Peacebuilding Tracey Holland, J.

Paul Martin, 2014-04-24 This book assesses the role of human

rights education (HRE) in the peacebuilding field. Today, most governments, international organisations and non-governmental organisations recognise the importance of human rights in peace- and democracy-building activities in post-conflict regions. However, compared with other components of peacebuilding, little attention and funding have been given to the cultivation of human rights knowledge and skills within these populations. Almost nothing has been committed to understanding how HRE is best accomplished in such difficult circumstances. Human Rights Education and Peacebuilding demonstrates the promise of HRE programs to help bring about peace within challenging post-conflict contexts. Each chapter of this book (a) identifies the short and medium term impacts of seven different HRE programs on their respective target groups, and (b) provides an analysis of the peculiar local contextual factors that influenced each program's rationale for human rights education. More specifically, each chapter addresses these critical questions: - How are communities around the world using HRE to help rebuild their lives in the aftermath of an armed conflict? - How does HRE respond local problems and needs? How similar are the human rights impacts in the different projects? - How can we understand the promise and challenges associated

with HRE as a component of community peace-building? This book will be of much interest to students of peacebuilding, conflict resolution, human rights, education studies and IR in general.

*Curating Art* Janet Marstine, Oscar Ho Hing Kay, 2021-12-30

*Curating Art* provides insight into some of the most socially and politically impactful curating of historical and contemporary art since the late 1990s. It offers up a museological framework for understanding watershed developments of curating in art museums. Representing the plurality of theory and practice around the expanded field of relational curating, the book focuses on curating that prioritises the quality of relationships between people and objects, between institutions and people and among people. It has wide international breadth, with particularly strong representation in East and Southeast Asia, including four papers never before translated into English. This Asian cluster illuminates the globalisation of the field and challenges dichotomies of East and West while acknowledging distinctions within specific, but often transnational, cultural spheres. The compelling philosophical perspectives and case studies included within *Curating Art* will be of interest to students and researchers studying curating, exhibition development and art museums. The book will also inspire current

and emerging curators to pose challenging but important questions about their own practice and the relationships that this work sustains.

**Handbook on Ontologies** Steffen Staab,Rudi Studer,2013-04-17

An ontology is a description (like a formal specification of a program) of concepts and relationships that can exist for an agent or a community of agents. The concept is important for the purpose of enabling knowledge sharing and reuse. The Handbook on Ontologies provides a comprehensive overview of the current status and future prospectives of the field of ontologies. The handbook demonstrates standards that have been created recently, it surveys methods that have been developed and it shows how to bring both into practice of ontology infrastructures and applications that are the best of their kind.

imperialism and global domination, this title combines academic and activist perspectives to propose a fresh vision for theoretically and practically realizing another world.

**How Not to Network a Nation** Benjamin Peters,2016-06-03

How, despite thirty years of effort, Soviet attempts to build a national computer network were undone by socialists who seemed

to behave like capitalists. Between 1959 and 1989, Soviet scientists and officials made numerous attempts to network their nation—to construct a nationwide computer network. None of these attempts succeeded, and the enterprise had been abandoned by the time the Soviet Union fell apart. Meanwhile, ARPANET, the American precursor to the Internet, went online in 1969. Why did the Soviet network, with top-level scientists and patriotic incentives, fail while the American network succeeded? In *How Not to Network a Nation*, Benjamin Peters reverses the usual cold war dualities and argues that the American ARPANET took shape thanks to well-managed state subsidies and collaborative research environments and the Soviet network projects stumbled because of unregulated competition among self-interested institutions, bureaucrats, and others. The capitalists behaved like socialists while the socialists behaved like capitalists. After examining the midcentury rise of cybernetics, the science of self-governing systems, and the emergence in the Soviet Union of economic cybernetics, Peters complicates this uneasy role reversal while chronicling the various Soviet attempts to build a “unified information network.” Drawing on previously unknown archival and historical materials, he focuses on the final, and most ambitious of

these projects, the All-State Automated System of Management (OGAS), and its principal promoter, Viktor M. Glushkov. Peters describes the rise and fall of OGAS—its theoretical and practical reach, its vision of a national economy managed by network, the bureaucratic obstacles it encountered, and the institutional stalemate that killed it. Finally, he considers the implications of the Soviet experience for today's networked world.

**On the Job** Heather Akou, 2024-02-22 Through a variety of archival documents, artefacts, illustrations, and references to primary and secondary literature, *On the Job* explores the changing styles, business practices, and lived experiences of the people who make, sell, and wear service-industry uniforms in the United States. It highlights how the uniform business is distinct from the fashion business, including how manufacturing developed outside of the typical fashion hubs such as New York City; and gives attention to the ways that various types of employers (small business, corporate, government and others) differ in their ambitions and regulations surrounding uniforms. *On the Job* sheds new light on an understudied yet important field of dress and clothing within everyday life, and is an essential addition to any fashion historian's library, appealing to all those interested in material culture, the

service industry, heritage and history.

## Embracing the Beat of Expression: An Psychological Symphony within **Valeria Pennsylvania.htm**

In a global taken by displays and the ceaseless chatter of quick transmission, the melodic splendor and mental symphony developed by the written term often fade in to the backdrop, eclipsed by the constant noise and distractions that permeate our lives.
