*World Development Report 2020* World Bank,2019-11-19 Global value chains (GVCs) powered the surge of international trade after 1990 and now account for almost half of all trade. This shift enabled an unprecedented economic convergence: poor countries grew rapidly and began to catch up with richer countries. Since the 2008 global financial crisis, however, the growth of trade has been sluggish and the expansion of GVCs has stalled. Meanwhile, serious threats have emerged to the model of trade-led growth. New technologies could draw production closer to the consumer and reduce the demand for labor. And trade conflicts among large countries could lead to a retrenchment or a segmentation of GVCs. *World Development Report 2020: Trading for Development in the Age of Global Value Chains* examines whether there is still a path to development through GVCs and trade. It concludes that technological change is, at this stage, more a boon than a curse. GVCs can continue to boost growth, create better jobs, and reduce poverty provided that developing countries implement deeper reforms to promote GVC participation; industrial countries pursue open, predictable policies; and all countries revive multilateral cooperation.

*Tourism in Northeastern Argentina* Penny Seymoure,Jeffrey L. Roberg, utilizes in-depth case studies developed from field work to explore the physical and psychological impact of tourism on local communities, indigenous cultures, and the environment in northeastern Argentina. Society, Space, and Social Justice Jennifer Y. Pomeroy,Vandana Wadhwa,2019-11-15 *Society, Space, and Social Justice* addresses multiple contextual intersectionalities, highlighting the underlying processes and causes contributing to the genesis and regeneration of emergent and extant spaces of (in)justice. Employing quantitative and qualitative techniques underpinned by elucidatory theoretical frameworks, the contributors to this collection investigate intersections of class, disability, gender, race, and "the other" within sociocultural and political-economic structures in varied geographic scales in Brazil, India, South Africa, Sri Lanka, Uganda, and the United States. This book's thematic diversity—the environment and outdoors, employment and labor, gendered/othered violence, health and disease, housing, infrastructure, and urban design—gives it interdisciplinary appeal. This timely collection examines and unpacks the complex mechanisms by which social justice can be perverted, thwarted, or achieved.

**The Homework Myth** Alfie Kohn,2007-04-03 Death and taxes come later; what seems inevitable for children is the idea that, after spending the day at school, they must then complete more academic assignments at home. The predictable results: stress and conflict, frustration and exhaustion. Parents respond by reassuring themselves that at least the benefits outweigh the costs. But what if they don't? In *The Homework Myth*, nationally known educator and parenting expert Alfie Kohn systematically examines the usual defenses of homework--that it promotes higher achievement, reinforces learning, and teaches study skills and responsibility. None of these assumptions, he shows, actually passes the test of research, logic, or experience. So why do we continue to administer this modern cod liver oil -- or even demand a larger dose? Kohn's incisive analysis reveals how a mistrust of children, a set of misconceptions about learning, and a misguided focus on competitiveness have all left our kids with less free time and our families with more conflict. Pointing to parents who have fought back -- and schools that have proved educational excellence is possible without homework -- Kohn shows how we can rethink what happens during and after school in order to rescue our families and our children's love of learning.

Bilingual Education Rosa Castro Feinberg,2002-03-01 Focuses on the purposes of bilingual education programs in schools and their historical development from the 1960s to the present. In this timely resource, educator Rosa Castro Feinberg surveys the developing field of bilingual education--its history, its theories, its practices, and the conflicts that swirl around it. She begins with an annotated chronology that describes influential people and events and traces themes in bilingual education from precolonial times to the present. In three detailed chapters, Feinberg summarizes the widely varied state and local policies and bilingual programs across the country, and demonstrates the profound impact of federal legislation, policies, and court decisions. She also examines the political challenge to linguistic diversity by anti-immigration groups and the common myths about bilingual education that have grown out of the media's handling of identity politics.

**Encyclopedia of Immigration and Migration in the American West** Gordon Morris Bakken,Alexandra Kindell,2006-02-24 The *Encyclopedia of Immigration and Migration in the American West* provides much more than ethnic groups crossing the plains, landing at ports, or crossing borders; this two-volume work makes the history of the American West an important part of the American experience. Through sweeping entries, focused biographies, community histories, economic enterprise analysis, and demographic studies, this *Encyclopedia* presents the tapestry of the West and its population during various periods of migration. The two volumes examine the settling of the West and include coverage of movements of American Indians, African Americans, and the often-forgotten role of women in the West's development.

**Microbiological Examination Methods of Food and Water** Neusely da Silva,Marta H. Taniwaki,Valéria C.A. Junqueira,Neliane Silveira,Margarete Midori Okazaki,Renato Abeilar Romeiro Gomes,2018-11-13 *Microbiological Examination Methods of Food and Water* (2nd edition) is an illustrated laboratory manual that provides an overview of current standard microbiological culture methods for the examination of food and water, adhered to by renowned international organizations, such as ISO, AOAC, APHA, FDA and FSIS/USDA. It includes methods for the enumeration of indicator microorganisms of general contamination, indicators of hygiene and sanitary conditions,

sporeforming, spoilage fungi and pathogenic bacteria. Every chapter begins with a comprehensive, in-depth and updated bibliographic reference on the microorganism(s) dealt with in that particular section of the book. The latest facts on the taxonomic position of each group, genus or species are given, as well as clear guidelines on how to deal with changes in nomenclature on the internet. All chapters provide schematic comparisons between the methods presented, highlighting the main differences and similarities. This allows the user to choose the method that best meets his/her needs. Moreover, each chapter lists validated alternative quick methods, which, though not described in the book, may and can be used for the analysis of the microorganism(s) dealt with in that particular chapter. The didactic setup and the visualization of procedures in step-by-step schemes allow the user to quickly perceive and execute the procedure intended. Support material such as drawings, procedure schemes and laboratory sheets are available for downloading and customization. This compendium will serve as an up-to-date practical companion for laboratory professionals, technicians and research scientists, instructors, teachers and food and water analysts. Alimentary engineering, chemistry, biotechnology and biology (under)graduate students specializing in food sciences will also find the book beneficial. It is furthermore suited for use as a practical/laboratory manual for graduate courses in Food Engineering and Food Microbiology.

**A Strategy for Resolving Europe's Problem Loans** Mr. Shekhar Aiyar, Mr. Wolfgang Bergthaler, Jose M Garrido, Ms. Anna Ilyina, Andreas Jobst, Mr. Kenneth H Kang, Dmitriy Kovtun, Ms. Yan Liu, Mr. Dermot Monaghan, Ms. Marina Moretti, 2015-09-24 Europe's banking system is weighed down by high levels of non-performing loans (NPLs), which are holding down credit growth and economic activity. This discussion note uses a new survey of European country authorities and banks to examine the structural obstacles that discourage banks from addressing their problem loans. A three pillared strategy is advocated to remedy the situation, comprising: (i) tightened supervisory policies, (ii) insolvency reforms, and (iii) the development of distressed debt markets.

**The Globalizers** Ngaire Woods, 2014-11-15 The IMF and the World Bank have integrated a large number of countries into the world economy by requiring governments to open up to global trade, investment, and capital. They have not done this out of pure economic zeal. Politics and their own rules and habits explain much of why they have presented globalization as a solution to challenges they have faced in the world economy.—from the Introduction The greatest success of the International Monetary Fund and the World Bank has been as globalizers. But at whose cost? Would borrowing countries be better off without the IMF and World Bank? This book takes readers inside these institutions and the governments they work with. Ngaire Woods brilliantly decodes what they do and why they do it, using original research, extensive interviews carried out across many countries and institutions, and scholarship from the fields of economics, law, and politics. The Globalizers focuses on both the political context of IMF and World Bank actions and their impact on the countries in which they intervene. After describing the important debates between U.S. planners and the Allies in the 1944 foundation at Bretton Woods, she analyzes understandings of their missions over the last quarter century. She traces the impact of the Bank and the Fund in the recent economic history of Mexico, of post-Soviet Russia, and in the independent states of Africa. Woods concludes by proposing a range of reforms that would make the World Bank and the IMF more effective, equitable, and just.

*A Global Security Triangle* Valeria Bello, Belachew Gebrewold, 2009-10-16 This book considers the interactions between Africa, Asia and Europe, analysing the short and long term strategies various states have adopted to external relations. The urgency attached to the agenda of international terrorism and human and drugs- trafficking has forced the European Union into new cooperation with Africa and Asia. These inter-regional relations have taken on new dimensions in the context of contemporary international politics framed by new security challenges, and new competitive forces particularly from Asia. This book provides both conceptual and empirical arguments to offer an innovative perspective on the EU as a global actor. It demonstrates how these three regions interact politically and economically to address global challenges as well as global opportunities, and thus provides an assessment of the multilateralism which the EU clearly stated in its Security Strategy paper. Addressing a broad range of topical issues, the book features chapters on European Security; European Migration Policy; African Union and its peace and security policy; Terrorism and international security; China and its fast growing global role; India, the biggest democracy in the world; and the impact of the Asian economic growth on the global economy. Further it compares the different backgrounds, forms and priorities of regional integrations. A Global Security Triangle will be of interest to all scholars of European politics, security studies, African and Asian studies, and International Relations.

**The Skills Balancing Act in Sub-Saharan Africa** Omar Arias, David K. Evans, Indhira Santos, 2019-06-20 Despite strong recent economic growth, Sub-Saharan Africa has levels of economic transformation, poverty reduction, and skill development far below those of other regions. Smart investments in developing skills—aligned with the policy goals of productivity growth, inclusion, and adaptability—can help to accelerate the region's economic transformation in the 21st century. Sub-Saharan Africa's growing working-age population presents a major opportunity to increase shared prosperity. Countries in the region have invested heavily in building skills; public expenditure on education increased sevenfold over the past 30 years, and more children are in school today than ever before. Yet, systems for building skills in this population have fallen short, and these shortcomings significantly impede economic prospects. In half of the countries, fewer than two in every three children complete primary school; even fewer reach and complete higher levels of education. Learning outcomes have been persistently poor, leading to substantial gaps in basic cognitive skills—literacy and numeracy—among children, young people, and adults. The literacy rate of the adult population is below 50 percent in many countries; functional literacy and numeracy rates are even lower. Systemwide change is required to achieve significant progress. Multiple agencies at the central and local levels are involved in skills development strategies, making skills “everyone's problem but no one's responsibility.” Policies and reforms need to build capacity for evidence-based policies and create incentives to align the behaviors of all stakeholders with the pursuit of national skills development goals. The Skills Balancing Act in Sub-Saharan Africa: Investing in Skills for Productivity, Inclusivity, and Adaptability lays out evidence to inform the policy choices that countries will make in skill investments. Each chapter addresses a set of specific questions, drawing on original analysis and synthesis of existing studies to explore key areas: • How the skills appropriate to each stage of the life cycle are acquired and what market and institutional failures affect skills formation • What systems are needed for individuals to access these skills, including family investments, private sector institutions, schools, and other public programs • How those systems can be strengthened • How the most vulnerable individuals—those who fall outside the standard systems and have missed critical building blocks in skills acquisition—can be

supported. Countries will face trade-offs—often stark ones—that will have distributional impacts and a bearing on their development path. Committed leaders, reform coalitions, and well-coordinated policies are essential for taking on the skills balancing act in Sub-Saharan Africa.

*Global Institutions and Development* Morten Boas, Desmond McNeill, 2004-03 This unique book explores a very broad range of ideas and institutions and provides thorough and detailed case studies in the context of broader theoretical analysis. Key topics such as poverty, global governance, sustainable development and the environment are closely examined, with detailed case studies of the World Bank, the WTO, the IMF, Asian Development Bank, UN Development Programme and the OECD's Development Assistance Committee. The impact multilateral institutions such as the World Bank and IMF have on development is hotly debated, but few doubt their power and influence. This book examines the concepts that have powerfully influenced development policy and, more broadly, looks at the role of ideas in international development institutions and how they have affected current development discourse. The authors analyze why some ideas are taken up by these institutions, how the ideas travel within the systems and how they are translated into policy, modified, distorted or resisted.

*A Companion to Women's Military History* Barton Hacker, Margaret Vining, 2012-08-17 This volume addresses the changing relationships between women and armed forces from antiquity to the present: eight chapters review the existing literature, an extended picture essay visually documents women's military work, and eight chapters illustrate more restricted topics.

**Democracy and Trade Policy in Developing Countries** Bumba Mukherjee, 2016-06-17 Since the 1970s, developing countries have experienced two notable trends: the rise of new democratic regimes and the rush to free trade. These joint trends have led some to argue that democracy and free-trade go hand in hand in the developing world, each supporting the other. Mukherjee argues that trade politics in developing countries resists such easy categorization. Instead, his book offers an innovative theoretical framework identifying the specific economic conditions and democratic institutions that influence trade policy in developing countries. He focuses particularly on the changing domestic political interactions among parties, party leaders, and labor and capital in developing nations. He draws upon large time-series datasets as well as cross-national survey data analysis to test hypotheses. Then, looking more closely at Brazil, India, Indonesia, and South Africa, he also provides comparative case-study evidence, such as within-country data on trade barriers and campaign contributions. The most comprehensive treatment of the subject to date, *Democracy and Trade Policy in Developing Countries* will be essential reading for scholars and policymakers alike, not only for the understanding it provides for trading strategies now, but for what it reveals about the prospects for international economic cooperation in the future.

*Visualizing Taste* Ai Hisano, 2019 Ai Hisano exposes how corporations, the American government, and consumers shaped the colors of what we eat and even the colors of what we consider natural, fresh, and wholesome. The yellow of margarine, the red of meat, the bright orange of natural oranges--we live in the modern world of the senses created by business. Ai Hisano reveals how the food industry capitalized on color, and how the creation of a new visual vocabulary has shaped what we think of the food we eat. Constructing standards for the colors of food and the meanings we associate with them--wholesome, fresh, uniform--has been a business practice since the late nineteenth century, though one invisible to consumers. Under the growing influences of corporate profit and consumer expectations, firms have sought to control our sensory experiences ever since. *Visualizing Taste* explores how our perceptions of what food should look like have changed over the course of more than a century. By examining the development of color-controlling technology, government regulation, and consumer expectations, Hisano demonstrates that scientists, farmers, food processors, dye manufacturers, government officials, and intermediate suppliers have created a version of natural that is, in fact, highly engineered. Retailers and marketers have used scientific data about color to stimulate and influence consumers'--and especially female consumers'--sensory desires, triggering our appetites and cravings. Grasping this pivotal transformation in how we see, and how we consume, is critical to understanding the business of food.

*Neoliberalism, Accountability, and Reform Failures in Emerging Markets* Luigi Manzetti, 2010-04-02 The agenda of neoliberal market reform known as the Washington Consensus, which was meant to turn around the economies of developing and postcommunist countries and provide the bedrock of economic success on which stable democracies could be built, has largely proved to be a failure, with Russia and many Latin American countries like Argentina left in severe economic crisis by the end of the 1990s. Some proponents of neoliberal reform, such as Anne Krueger, have attributed this failure to the piecemeal and incomplete implementation of reform measures, while others, including Nobel Prize economist and former World Bank vice president Joseph Stiglitz, have pointed to technical flaws in the policies. While both of these assessments focus narrowly on economic factors, Luigi Manzetti highlights the crucial importance of political institutions and processes to a fully adequate explanation. His argument is that the ideology of neoliberal reform, rooted in the theories of Friedrich von Hayek and Milton Friedman, assumed political checks and balances that did not exist in many of these countries undergoing market reform, and that only by taking political accountability as an influential variable in the equation for success can we really understand what happened. Where accountability was weak, patterns of corruption, collusion, and patronage worked to undermine the intended aims of market reform. Manzetti uses both large N statistical analyses and small N case studies (of Argentina, Chile, and Russia) to provide empirical evidence for his argument.

**Governance of Communicable Disease Control Services** Monica Das Gupta, Peyvand Khaleghian, Rakesh Sarwal, 2003 Das Gupta, Khaleghian, and Sarwal study the impact of governance and administrative factors on communicable disease prevention in the Indian state of Karnataka using survey data from administrators, frontline workers, and elected local representatives. They identify a number of key constraints to the effective management of disease control in India, in misaligned incentives, and the institutional arrangements for service delivery. The authors discuss these under five headings: administrative issues; human resource management; horizontal coordination; decentralization, community involvement, and public accountability; and implementation of public health laws and regulations. They find that India's public health system is configured to be highly effective at top-down reactive work, such as bringing disease outbreaks under control, but not for the more routine collaborations required for proactive disease prevention. The authors conclude with policy recommendations that take into account the complexity of India's system of public administration and the need for simple reforms that can be easily implemented. This paper--a product of Public Services, Development Research Group--was prepared as background for the World Development Report 2004: Making Services Work for Poor People.

*Key Topics in Perinatal Mental Health* Mauro Percudani,Alessandra Bramante,Valeria Brenna,Carmine Pariante,2022-03-15 The book offers a comprehensive and up-to-date overview of key issues in perinatal mental health. Classic topics such as screening, assessment, pharmacological, psychological and psychosocial interventions of the most common conditions (depression, anxiety disorders, etc.) are combined with lesser known issues, such as mother-infant relationship disorders or thoughts of infant-related harm and aggressive behaviors, sleep disturbances in puerperium, obsessional disorders, fetal death etc., paying particular attention to specific groups of perinatal patients like mothers with cancer, adolescents, fathers, migrants, and preterm babies. The chapters written by health professionals working in hospitals, community services or voluntary agencies alternate with contributions from researchers whose fields of expertise include biology and neuroscience, diagnosis and special needs, treatment and prognosis, etc., striking a balance between scientific investigation and clinical practice.The book offers a valuable tool for a wide range of professionals like psychiatrists, psychologists, gynecologists, midwives, oncologists, pediatricians, and social workers, who want to improve their clinical practice and the effectiveness of their treatment pathways using evidence from perinatal health research.
