Biometrics: Advanced Identity Verification Julian Ashbourn,2014-01-13 Biometric identity verification (BIV) offers a radical alternative to passports, PIN numbers, ID cards and driving licences. It uses physiological or behavioural characteristics such as fingerprints, hand geometry, and retinas to check a person's identity. It is therefore much less open to fraudulent use, which makes it ideal for use in voting systems, financial transactions, benefit payment administration, border control, and prison access. This is the first book to provide business readers with an easy-to-read, non-technical introduction to BIV systems. It explains the background and then tells the reader how to get their system up and running quickly. It will be an invaluable read for practitioners, managers and IT personnel - in fact for anyone considering, or involved in, implementing a BIV system. Julian Ashbourn was one of the pioneers in integrating biometric technology and has provided input into many prototype BIV systems around the world.

The Year-Round Hoophouse Pam Dawling,2018-11-13 Design and build a hoophouse or polytunnel, and grow abundant produce year-round in any climate The Year-Round Hoophouse is the comprehensive guide to designing and building a hoophouse and making a success of growing abundant, delicious fresh produce all year, whatever your climate and land size. Chapters include: Hoophouse siting, size, style, frame construction, and tools Bed layout, soil, crop rotations, and extensive coverage of various crops for all seasons Organic solutions to pests and diseases Disaster preparation Tested resources for each chapter. The Year-Round Hoophouse is ideal for farmers who wish to move into protected growing, as well as beginning farmers in rural and urban spaces. It is an essential reference resource for professors and students of courses in sustainable agriculture, as well as interns and apprentices learning on the job. Growing in hoophouses – also known as high tunnels or polytunnels – reduces the impact of an increasingly unpredictable climate on crops, mitigates soil erosion, extends the growing season, keeps leafy greens alive through the winter, and enables growers to supply more regional food needs.

Verified Software: Theories, Tools, Experiments Natarajan Shankar,Jim Woodcock,2008-09-26 This volume contains the proceedings of the second working conference on Verified Software: Theories, Tools, and Experiments, VSTTE 2008, held in Toronto, Canada, in October 2008. The 16 papers presented together with 4 invited talks were carefully revised and selected for inclusion in the book. This second conference formally inaugurates the Verified Software Initiative (VSI), a fifteen-year, co-operative, international project directed at the scientific challenges of large-scale software verification. The scope of the cooperative effort includes the sharing and interoperability of tools, the alignment of theory and practice, the identification of challenge problems, the construction of benchmark suites, and the execution of large-scale experiments.

Validation of Exceptional Longevity Bernard Jeune,1999 While not quite on a par with Mel Brooks' 2,000 Year-Old Man, this volume reports on some folks who've been around for a long time. Contributors to 15 papers indicate that such longevity rarely existed prior to the 19th century. Appends statistical data on predicting age distribution, and documentation of a family's exceptional longevity. Lacks an index. Distributed in the US by ISBS. <u>Neoliberal Chicago</u> Euan Hague,2016-12-12 The neoliberal philosophy of fiscal austerity aligned with reduced regulation has transformed Chicago. As pursued by mayor Rahm Emanuel and his predecessor Richard M. Daley, neoliberalism led officials to privatize everything from parking meters to schools, gut regulations and social services, and promote gentrification wherever possible. The essayists in Neoliberal Chicago explore an essential question: how does neoliberalism work on the ground in today's Chicago? Contextual chapters explore race relations, physical development, and why Chicago embraced neoliberalism. Other contributors delve into aspects of the neoliberal vision, neoliberalism's impact on three iconic city spaces, and how events like the 2008 foreclosure crisis and the bid to attract the Olympic Games reveal the workings of neoliberalism. Contributors: Stephen Alexander, Larry Bennett, Michael Bennett, Carrie Breitbach, Sean Dinces, Kenneth Fidel, Roberta Garner, Euan Hague, Black Hawk Hancock, Christopher Lamberti, Michael J. Lorr, Martha Martinez, Brendan McQuade, Alex G. Papadopoulos, Rajiv Shah, Costas Spirou, Carolina Sternberg, and Yue Zhang.

Biometric Specifications for Personal Identity Verification nist,2013-12-12 Homeland Security Presidential Directive HSPD-12, Policy for a Common Identification Standard for Federal Employees and Contractors [HSPD-12], called for new standards to be adopted governing interoperable use of identity credentials to allow physical and logical access to Federal government locations and systems. The Personal Identity Verification (PIV) standard for Federal Employees and Contractors, Federal Information Processing Standard Personal Identity Verification (PIV) of Federal Employees and Contractors (FIPS 201), was developed to define procedures and specifications for issuance and use of an interoperable identity credential. This document, Special Publication 800-76 (SP 800-76), is a companion document to FIPS 201. It describes technical acquisition and formatting specifications for the PIV system, including the PIV Card itself. It also establishes minimum accuracy specifications for deployed biometric authentication processes. The approach is to enumerate procedures and formats for collection and preparation of fingerprint, iris and facial data, and to restrict values and practices included generically in published biometric standards. The primary design objective behind these particular specifications is to enable high performance and universal interoperability. The introduction of iris and face specifications into the current edition adds alternative modalities for biometric authentication and extends coverage to persons for whom fingerprinting is problematic. The addition of oncard comparison offers an alternative to PIN-mediated card activation as well as an additional authentication method.

<u>Biometric Technologies and Verification Systems</u> John R. Vacca,2007-03-16 Biometric Technologies and Verification Systems is organized into nine parts composed of 30 chapters, including an extensive glossary of biometric terms and acronyms. It discusses the current state-of-the-art in biometric verification/authentication, identification and system design principles. It also provides a

step-by-step discussion of how biometrics works; how biometric data in human beings can be collected and analyzed in a number of ways; how biometrics are currently being used as a method of personal identification in which people are recognized by their own unique corporal or behavioral characteristics; and how to create detailed menus for designing a biometric verification system. Only biometrics verification/authentication is based on the identification of an intrinsic part of a human being. Tokens, such as smart cards, magnetic stripe cards, and physical keys can be lost, stolen, or duplicated. Passwords can be forgotten, shared, or unintentionally observed by a third party. Forgotten passwords and lost smart cards are a nuisance for users and an expensive time-waster for system administrators. Biometric security solutions offer some unique advantages for identifying and verifying/ authenticating human beings over more traditional security methods. This book will serve to identify the various security applications biometrics can play a highly secure and specific role in. * Contains elements such as Sidebars, Tips, Notes and URL links * Heavily illustrated with over 150 illustrations, screen captures, and photographs * Details the various biometric technologies and how they work while providing a discussion of the economics, privacy issues and challenges of implementing biometric security solutions

Hardware Security Training, Hands-on! Mark Tehranipoor,N. Nalla Anandakumar,Farimah Farahmandi,2023-06-29 This is the first book dedicated to hands-on hardware security training. It includes a number of modules to demonstrate attacks on hardware devices and to assess the efficacy of the countermeasure techniques. This book aims to provide a holistic hands-on training to upper-level undergraduate engineering students, graduate students, security researchers, practitioners, and industry professionals, including design engineers, security engineers, system architects, and chief security officers. All the hands-on experiments presented in this book can be implemented on readily available Field Programmable Gate Array (FPGA) development boards, making it easy for academic and industry professionals to replicate the modules at low cost. This book enables readers to gain experiences on side-channel attacks, fault-injection attacks, optical probing attack, PUF, TRNGs, odometer, hardware Trojan insertion and detection, logic locking insertion and assessment, and more.

The Sourcebook to Public Record Information Peter Julius Weber,Michael L. Sankey,2004-10 Stop Searching . . . Start Finding! Professionals frustrated with searching for public records can now get accurate and current information on how to obtain records directly from the government. The revised and updated 5th edition of The Sourcebook to Public Record Information profiles-in-detail over 20,000 government agencies that house public records. More than a directory, the agency profiles found in The Sourcebook include access procedures, access restrictions, fees, online capabilities, turnaround times, along with addresses, phone/fax numbers, and additional information.Comprehensive Coverage! The Sourcebook contains an informative ?Public Record Primer? and the industry?s most comprehensive and current and profiles of County Courts, County Recording Offices, State Agencies, Federal Courts, plus, a place name/ZIP Code/county cross index to locate the correct county location. Also includes state/county maps.This extensive guide of over 1,840 pages is a superb time saving and cost cutting resource for background investigations, libraries, legal research, people/asset location and background screening.

Computer Aided Verification David L. Dill,1994 This volume contains the proceedings of the 6th Conference on Computer Aided Verification, held at Stanford University in June 1994. The in total 37 included papers were selected in a highly competetive reviewing process from 121 submissions; in total they document many of the most important advances achieved in CAV research and applications since the predecessor conference held in June 1993. The volume is organized in sections on Real-Time Systems, CAV Theory, CAV Applications, Symbolic Verification, Hybrid Systems, Model Checking, Improving Efficiency, and Hardware Verification.--PUBLISHER'S WEBSITE.

Software Quality Approaches: Testing, Verification, and Validation Michael Haug,Eric W. Olsen,Luisa Consolini,2012-12-06 C. Amting Directorate General Information Society, European Commission, Brussels th Under the 4 Framework of European Research, the European Systems and Soft ware Initiative (ESSI) was part ofthe ESPRIT Programme. This initiative funded more than 470 projects in the area ofsoftware and system process improvements. The majority of these projects were process improvement experiments carrying out and taking up new development processes, methods and technology within the software development process ofa company. In addition, nodes (centres ofexper tise), European networks (organisations managing local activities), training and dissemination actions complemented the process improvementexperiments. ESSI aimed at improving the software development capabilities of European enterprises. It focused on best practice and helped European companies to develop world class skills and associated technologies to build the increasingly complex and varied systems needed to compete in the marketplace. The dissemination activities were designed to build a forum, at European level, to exchange information and knowledge gained within process improvement ex periments. Their major objective was to spread the message and the results of experiments to awider audience, through a variety ofdifferent channels. The European Experience Exchange ~UR~X) project has been one ofthese dis semination activities within the European Systems and Software Initiative.~UR~)(has collected the results of practitioner reports from numerous workshops in Europe and presents, in this series of books, the results of Best Practice achieve ments in European Companies over the last few years.
