New Directions in Mobile Media and Performance Camille C. Baker, 2018-09-03 New Directions in Mobile Media and Performance explores various performative projects and forms of expression that have emerged since the onset of the smartphone. It focuses mainly on new concepts and developments that have emerged in mobile media performance. It showcases the intimate and phenomenological mobile aesthetic that has been unfolding within networked performance and media art projects for over a decade and a half. This aesthetic utilises the potential and affordances with each iteration and update of modern smartphones. Themes of embodiment, presence, liveness and connection through mobile, networked, and remote technology are revisited in the context of HD mobile cameras, selfies and live video streaming from the phone, as well as the impact of peer production, opensource and Maker culture on mobile media performance practices. It explores the surge in development of wearable devices in performance, as well as how the 'quantified-self movement' has affected performance works. It deals with concepts and developments in intermedial performance that incorporate mobile and wearable devices, especially from the artist's, designer's or dramaturge's perspective as the creator and their creative process, working with technology as a collaborator, not just a tool or guide. The book demonstrates how artists have repurposed the device – transforming it from merely a communication device, using voice and text only – to become a new collaborative medium, a full visual, synaesthetic, interactive and performative tool of deeper expression and social change. It discusses seminal works and the evolution of the medium, within intermedial digital art and performance practices as medium for artistic expression, creative process and staged performances. It focuses on projects and artists who have pushed mobile media performance beyond the conventional blackbox. Emerging visual, digital, interactive, tactile, gestural and theatrical or performance projects that incorporate mobile or wearable devices, used as vehicles for more challenging, experimental, experiential and immersive performative artworks are highlighted. The book also contextualises Baker's own media research and performance practice within the larger landscape with the field. It is bookended with interviews with the artists themselves on their creative process

and intentions. It is the outcome of three years of research of artistic works around the world, interviews, in-person viewings of performances, as well as incorporating and reflecting on her own ongoing practice and projects in context.

Cyber Worship in Multifaith Perspectives Mohamed Taher, 2006 Cyber Worship in Multifaith Perspectives, as is implied by its name, explores worship (i.e., Prayer, Praise, Scripture, Sacrament, Rituals, Confessions, Eucharist, Rites, Pilgrimages, Reflection, Contemplation, etc.) on the Internet. It is not an 'everything you need to know' guide about the subjects of faith and belief, religions-online, religions on the Net, or religions in cyberspace. Rather, it is a book about religious and spiritual experience under the rubric, cyber worship, which is the variety of ways religious devotion is performed and carried out on the Internet. The term 'Cyber Worship' is a catchall phrase, which includes variants such as online worship, virtual worship, electronic prayer, cyber puja, cyber synagogue, and so on. Dr. Mohamed Taher has thus assembled a quick reference for two groups: those communities that are involved in Cyber Worship and business Webs that collaborate in sustaining wired environments. As such, this book provides an interesting and current perspective on a practice that will continue to grow in the future.

A Student Guide to Energy [5 volumes] John F. Mongillo, 2011-05-04 This multivolume resource is an excellent research tool for developing a working knowledge of basic energy concepts and topics. With energy issues so much in the news, it is important that students get a clear understanding of how energy is produced and how it affects virtually every aspect of our lives. The multivolume set A Student Guide to Energy does just that, with an accessible introduction to the basic concepts and key topics concerning nonrenewable energy sources, future renewable energy programs, and the importance of achieving a sustainable energy program for future generations. A Student Guide to Energy is divided into five separate volumes. Volume 1 highlights our present dependence on nonrenewable energy sources—oil, gas, coal, and nuclear power. Volumes 2, 3, and 4 look at the renewable energy sources that will play a vital role in our future, including solar energy, hydrogen fuel cells, wind and water power, and geothermal energy. The concluding volume focuses on efforts to develop a global sustainable energy system that encompasses energy efficiency, conservation, and a healthy, cleaner environment.

Psychedelic Drug Treatments Ben Sessa, Eileen Worthley, 2016-02-29 Psychedelic Drug Treatments: Assisting the Therapeutic Process provides information about current and quite viable investigation into reviving and progressing with neurological research that began in the middle of the 20th century and was brought to a halt when certain drugs were banned in the 1970s. Using a question/answer format, the book will introduce you to the way in which the chemical compounds known as psychedelics affect the brain, provide you with the definitions of key terms particular to the neurological and psychological vocabulary, describe the specific disorders that can realistically be helped or relieved through treatment with psychedelics, and offer information with regard to current research being conducted in the field. This text will discuss the history of the earlier research efforts and will examine the likelihood of a resurgence of interest in the successful development of methods and practices

of clinical therapy assisted by psychedelic drugs. The purpose of this volume is to promote an understanding of the use of psychedelics as tools to assist therapy and to challenge the 40-year-old prejudices against research into the possible benefits of these drugs. Features: •Questions and answers about the history, research, and treatments related to psychedelic drugs •Makes a case for the re-evaluation of psychedelics – LSD, MDMA ('ecstasy'), DMT, psilocybin, ayahuasca, peyote, ibogaine, and more – and their clinical potential for treating a range of conditions from post-traumatic stress disorder and depression to autism and cluster headaches. •Includes numerous in-text resources such as links to Web sites, videos, articles, blogs, etc. from NIH, FDA, YouTube, and university/clinical studies

The Virtual Campus M.F. Verdejo, Gordon Davies, 2013-04-17 The virtual campus: Trends for higher education and training was the theme of the IFIP Working Conference on which this book is based. It was a joint event of Working Groups 3.3 and 3.6, Research and distance Education respectively, of IFIP Technical Committee 3 for Education. International dissemination and promotion of cooperation are IFIP aims that we particularly wanted to address. This is why we opened the event to non WG members and have established a virtual forum on the WEB that has been widely visited. The programme for the 27 to 29 November 97 in Madrid included invited speakers from leading institutions in the field, reviewed and selected contributions from an open call for papers, on-site demonstrations of large European projects and discussion sessions involving distant and present participants. The event attracted experts from 23 countries. About a hundred persons were involved, from all over the world. The spread and accessibility of information and communication technologies are rapidly changing practices in learning and research activities, both in professional and academic settings. The number, variety and scale of experiences reported in recent publications shows a growing international involvement concerning not only small groups of researchers but also institutions fully committed in that direction.

Disability Research and Policy Richard J. Morris, 2006-04-21 Scholars working on a research project at the University of Arizona look at some relatively new areas of research and scholarship concerning adults and children within the area of disability, and critically examine various public policy and legal issues that impact the daily lives of many people having disabilities. Among their topics are the use of.

Neuropedia | The Deblocking Method Paulo Sergio Santos Negrete, aka, "Teacher John Chapman", 2021-03-09 Welcome to Neuropedia | The Deblocking Method This method accelerates learning 3 to 5 times more than any conventional method. It has several positive by-products, such as psychotherapeutic and psycho-hygienic effects in the Suggestopedic environment created in the classroom. During my years of teaching English as a Foreign Language, I could never accept the fact that my students needed so many years to start speaking a new language with confidence. Some others, even with years of study and dedication, could not develop, despite my efforts to create better classes and activities. Others had to constantly review the verb to be. The results? The students were afraid of speaking and learning. Many people may ask: But how can it be possible to learn effectively in a short time? What's the secret? Others say: That's impossible! It is just propaganda! But actually, we are beings with an

incredible power to learn, but the Social Suggestive Norms so present in our pedagogical system for centuries dictate how much we can learn and how long we need to. But I ask you: How did we learn our mother language? How could our brain collect, organize, understand, and reproduce words and sentences when we were children? No one went to school to learn to speak. Our parents or who may have raised us never taught us grammar in order to make us speak. We can realize that we are missing something in our system of foreign language teaching. It does not use the resources available in our brain/mind. Our way of teaching in the present is not structured to follow the way the brain receives stores and processes information. So, why not change the whole system? The answer is quite simple. Who wants to train teachers? Change textbooks and methods? How long would it take? But the fact is that more scientists are discovering the mysteries of mind and memory. We are taking advantage of these discoveries made centuries and decades ago. Researchers have noticed that the current pedagogic system is not the best approach to learn. That's why so many so-called accelerated learning systems or brain-friendly approaches have appeared. The main problem is that most of them have never been really tested. They have not had a follow-up for decades to check if they would be beneficial to the students. Neuropedia is a method with a scientific background.

A History of Travel in 50 Vehicles (History in 50) Paula Grey,2016-09-06 Paula Grey explores how creative thinkers—collaborating or competing and always building on the work of their predecessors—have envisioned new ways to move about in the world. The story of travel is the human story. From the first migrations out of Africa on weary feet to horses, camels, rafts, chariots, steamships, trains, hot air balloons, cars, submarines, and moon rockets, humans have combined imagination, daring, and technical brilliance to create new vehicles and improve existing ones. Geography and culture have influenced the development of vehicles in far-flung parts of the world, and human travel has, in turn, exerted a profound influence on society and the environment. Whether escaping deprivation, pestilence, persecution, oppression, or fear—or seeking abundance, freedom, fame, fortune, or a fresh start—we have always been a traveling species, and it seems we always will be. Here is the story of humankind's restless impulse to see what's over the next ridge, beyond the next sunrise, on the next planet. Enjoy the journey!

Clean Bombs and Dirty Wars Robert H. Gregory,2015-10-01 Clean Bombs and Dirty Wars: Air Power in Kosovo and Libya explores how the U.S. public, policymakers, and military services perceived and utilized air power and precision munitions before, during, and after Operation Allied Force in Kosovo in 1999 with incorrect assumptions-

Ukraine Over the Edge Gordon M. Hahn,2018-01-25 The Ukrainian crisis that dominated headlines in fall 2013 was decades in the making. Two great schisms shaped events: one within Ukraine, its western and southeastern parts divided along cultural and political lines; the other was driven by geopolitical factors. Competition between Russia and the West exacerbated Ukraine's divisions. This study focuses on the historical background and complex causality of the crisis, from the rise of mass demonstrations on Kiev's Maidan Nezalezhnosti (Independence Square) to the making of the post-revolt regime. In the context of a new cold war, the author sheds light on the role of

radical Ukrainian nationalists and neofascists in the February 2014 snipers' massacre, the ouster of President Viktor Yanukovich, and Russia's seizure of Crimea and involvement in the civil war in the eastern region of Donbass.

Integrating African American Literature in the Library and Classroom Dorothy Littlejohn Guthrie, 2011-09-14 In this book, African American literature is illuminated through a project-based curriculum that incorporates national curriculum standards. It is important that the school curriculae be representative of the diversity of the American student population. Integrating African American Literature in the Library and Classroom is designed to help teachers and librarians achieve that goal. The book recommends and annotates more than 200 titles that touch on African American life from slavery through the present time, most of them by black authors, and many of them winners of the Coretta Scott King, Caldecott, and/or Newbery awards. This guide offers cross-curricular lesson plans for grades K-12. Each chapter identifies areas in which instructional attention is most needed to help students develop a greater appreciation for diversity, perseverance, and ethnicity. Examples and ideas for activities are offered to reinforce related concepts. With this book, teachers and librarians will be better able to motivate and inform, helping students discover the richness of African American culture now and through time.

Noise Wars Robert Freedman, 2009 Let me place on your radar screen an issue that for most people goes by unnoticed. Every day it is there for all of us to see and hear ? if we can just notice it for that first time. This is the rising use of media, the use of media in abusive, penetrating ways. Our freedom to choose whether or not we consume that media is taken away from us.

Islamic Imperialism Efraim Karsh, 2007-01-01 From the first Arab-Islamic Empire of the mid-seventh century to the Ottomans, the last great Muslim empire, the story of the Middle East has been the story of the rise and fall of universal empires and, no less important, of imperialist dreams. So argues Efraim Karsh in this highly provocative book. Rejecting the conventional Western interpretation of Middle Eastern history as an offshoot of global power politics, Karsh contends that the region's experience is the culmination of long-existing indigenous trends, passions, and patterns of behavior, and that foremost among these is Islam's millenarian imperial tradition. The author explores the history of Islam's imperialism and the persistence of the Ottoman imperialist dream that outlasted World War I to haunt Islamic and Middle Eastern politics to the present day. September 11 can be seen as simply the latest expression of this dream, and such attacks have little to do with U.S. international behavior or policy in the Middle East, says Karsh. The House of Islam's war for world mastery is traditional, indeed venerable, and it is a quest that is far from over.
